#90147u1332 05/27/1990 ~United Press International

(MAY 27) UPI - Police in West Palm Beach, Florida, report a bizarre shooting involving a gunman dressed like a clown. Authorities say the clown went to a woman's home in a high-income neighborhood, handed her flowers and balloons and then shot her in the head. Witnesses told police the clown then fled in a white car with NO license plates. The victim, Marlene Warren, was listed in critical condition.

The commander of the shuttle Columbia and his crew arrived at Cape Canaveral, Florida, today as the countdown continues toward Wednesday's early morning launch. Commander Vance Brand said the crew was glad to be at the launch site after a 13-day delay caused by repairs to a faulty cooling system. The crew will study X-rays and ultra-violet light from deep space during its 10-day mission.

Colombia's leading presidential candidate is urging his countrymen to respond to drug cartel violence with ''Millions of votes for democracy'' in today's balloting. The violence made this year's campaign one of the bloodiest in Colombian history. Thousands of troops were guarding polling stations today as voting began. Polls predict that only about half of the nation's 14-Million eligible voters will cast ballots.

An Israeli who claims he desecrated Jewish graves in an effort to unite Jews against perceived Arab threats was sentenced today in Jerusalem. David Goldner was given four years in prison... with one year suspended... for spraying anti-Semitic graffiti on hundreds of Jewish graves in northern Israel. Another Jewish man suspect in the case is undergoing psychiatric evaluation.

Some five-thousand veterans of World War Two gathered for celebrations in Dunkirk, France, today marking the 50th anniversary of the ''miracle'' evacuation of 338-thousand Allied troops from the town. The parades and rejoicing was capped by a quiet seaside service. A British Royal Air Force helicopter lowered a wreath into a circle formed by 74 of the 700 original ''little ships'' that ferried the trapped soldiers to safety.

#90147u1401 05/27/1990 ~United Press International

NAYLOR, MO. (MAY 28) UPI - A single-engine plane registered lost its wings and crashed Sunday in southeastern Missouri, killing the elderly couple aboard, the Missouri Highway Patrol said.

Frank Adams of Boise, Idaho, and his wife, Novella, both 64, died when the plane went down at about 11:39 a.m. in Ripley County, said Sgt. J.E. Bacon of the Missouri Highwayh Patrol Troop E in Poplar Bluff.

The plane went down in a wooded area about 4 miles northwest of Naylor near the Arkansas border.

Investigators were puzzled by the crash because the rural region was not near a landing strip, and there were no high structures nearby that could have caused the plane, a Piper, to lose its wings, Bacon said.

''Witnesses said they heard a loud noise and then saw a plane come out of the clouds without its wings,'' Bacon said. ''The wings have been located some distance south of where the fuselage was located.''

Ripley County sheriff's officers were notified of the crash by residents of a home who were able to see the plane crash outside. Nobody on the ground was believed to have been injured by the wreck.

The Federal Aviation Administration sent an agent to investigate the crash and the Missouri Highway Patrol and the Ripley County Sheriff's Department were also investigating.

#90147u1530 05/27/1990 ~United Press International

(MAY 27) UPI - Soviet President Gorbachev will have lots of luggage with him when he arrives on Wednesday for the Washington summit. He's bringing 250 advisers, his own satellite station, six Soviet Zil limousines and 18 Russian airplanes. Gorbachev woN'T be staying at the guest house, but rather the Soviet embassy.

NASA is counting down for Wednesday's blast-off of the shuttle Columbia.

The mission's seven crew members... including two civilian astronomers... have checked in at Florida's Kennedy Space Center for last-minute preparations for the 10-day flight to study deep space ultraviolet and X-ray light emissions.

Thousands of troops are guarding polls as Colombia's elections end the country's bloodiest campaign in memory. Liberal Party candidate Cesar Gaviria, the expected winner, voted in Bogota as polls opened this morning under the protection of 120 bodyguards. There have been NO reports of bombings so far.

Poland's national radio reports that turn-out was surprisingly low in the country's first free elections since World War Two. Only 26 percent of all eligible voters cast their ballots by mid-day. Elections come as the Solidarity government continues to grapple with the nation's crippling railway strike.

A Florida woman is listed in critical condition after being shot in her doorway by a man wearing a clown suit. Police in West Palm Beach say the assailant gave Marlene Warren balloons and flowers before firing. One officer says it's the strangest case he has seen in his 19 years on the force.

#90147u1538 05/27/1990 ~United Press International

(MAY 27) UPI - Tragedy struck a Boston family early today. Authorities say a fire apparently caused by careless smoking swept through a two-story home, killing a family of five and a friend. One person escaped the flames. Three of the victims were children between the ages of eight months and four years.

Doctors from Thailand are keeping tabs on Thai workers in Singapore following the mysterious deaths of 17 laborers who died in their sleep. 30-thousand Thais are working in Singapore... but the UNexplained deaths have frightened many into returning to their homeland.

A lawyer for an Israeli convicted of espionage and treason says his client will go on fighting for what the lawyer said was the man's belief that he is innocent. The attorney's comments came after Israel's Supreme Court rejected Mordechai Vanunu's appeal of his 1988 conviction for leaking Israeli nuclear secrets.

Tens of thousands of Maltese heard Pope John Paul speak today at a mass ending the first-ever visit by the pontiff to the Mediterranean republic. One ecstatic woman declared herself ''ready to die'' after the mass. As she explained ''It was my only wish in my life to see the pope.''

A member of the team that developed the atomic bomb during the second world war died yesterday in Bloomington, Indiana, at the age of 78. Emil J. Konopinksi worked with Robert Oppenheimer and Edward Teller in developing the first atomic bomb at the Los Alamos National Laboratory in 1943.

-30- 1643

#90147u1566 05/27/1990 ~United Press International

(MAY 28) UPI - A hail of bullets from cocaine cartel gunmen propelled Cesar Gaviria into the presidency of Colombia.

Gaviria, a 43-year-old economist who was elected Sunday to a four-year term, became the political heir of Sen. Luis Galan after the leading presidential candidate was cut down by cocaine hitmen at an Aug. 18, 1989, campaign rally.

Since then, the father of two has been an unwavering foe of the cartels who control most of the world's cocaine trade.

''He's probably the most threatened man in Colombia right now,'' said a U.S. official with expertise in narcotics.

Gaviria wears a bullet-proof vest whenever he appears in public, which was seldom in the last weeks of the assassination-ridden campaign. In Bogota, he travels in a caravan of armored cars and jeeps carrying bodyguards who hold submachine guns just below open windows, ready to shoot. An ambulance always brings up the rear.

He has spoken out strongly in public against the cocaine cartels ever since he became the candidate following Galan's assassination.

Galan's son, Juan, gave the Colombian and Liberal Party flags to Gaviria at his father's funeral, bestowing upon him Galan's challenge to confront the cocaine cartels who have invaded most of the nation's institutions and made a shambles of its justice system.

''The country is facing the most powerful criminal organizations that any country has ever had to confront,'' Gaviria said during the campaign. ''Never has any nation at any time in its history had to confront criminal organizations with billions of dollars at its service.''

Through a hail of bombs and assassinations of presidential candidates, Gaviria steadfastly refused to consider negotiations with the cartels despite alls for peace by his opponents trying to appeal to a war-weary public.

''Countries that make concessions to terrorism continue to have terrorism

'' he said.

Gaviria was a former economy minister and interior minister, the top domestic policy position, in the Cabinet of President Virgilio Barco, whom he replaces. He temporarily assumed the presidency nine times during Barco's absence.

He became Galan's campaign manager after Galan brought his reformist New Liberal movement back into the party fold, then won the party's nomination on March 11, seven months after Galan's death.

He was a congressman since 1974 from the city of Pereira, the coffee-growing center where he was born on March 31, 1947, and where he served as a city councilman and mayor. Gaviria was president of the House of Deputies in 1983.

Gaviria is a fan of rock music and is married to Ana Milena Munoz de Gaviria. They have two children, Mariapaz and Simon.

#90147u1694 05/27/1990 ~United Press International

(MAY 27) UPI - Violence continues in Colombia's presidential campaign as voters go to the polls.... former hostage Frank Reed returns home... and President Bush and the nation commemorate the nation's war dead. Details on these stories and more, next, from U-P-I.

Colombians are voting today in presidential elections being held under the threat of violence by the nation's drug cartels.

Voting was suspended in two polling areas after suspected rebels kidnapped two election officials in one area and stole election material in both.

In the drug stronghold of Medellin, police say four people were killed and three others wounded during a home invasion by gunmen.

Police also say two bombs were set off last night at neighborhood police centers in the city 160 miles northwest of Bogota . Officers killed one of the attackers.

Nearly 14-Million citizens are eligible to vote in the election to pick a new president, but polls predict only a 50 percent turnout.

Polls taken before the election project that Liberal Party candidate Cesar Gaviria will win with almost 50 percent of the vote. Gaviria has taken the toughest stand of any candidate against Colombia's cocaine traffickers.

Elections are also being held today in Burma and Poland.

In Burma, an anti-government opposition party held an early lead in the nation's first multi-party election in 30 years.

And Poland is holding its first free elections in the post World War Two era. But the elections involving about 50-thousand local government posts are being overshadowed by a spreading railway strike.

-30- 1756

#90147u1715 05/27/1990 ~United Press International

(MAY 27) UPI - Former hostage Frank Reed is thinking of the six Americans still held in Lebanon this Memorial Day weekend.

Reed returned to Malden, Massachusetts, today for an emotional reunion with his 91-year-old mother, who greeted her son in a wheelchair.

Reed says he'll enjoy his family, while taking a three-day break before returning Wednesday to a hospital outside Washington.

But the 57-year-old educator says his thoughts are also with the Americans still in Lebanon, where he spent 44 months in captivity before being freed last month.

Reed says he is ''worrying'' about his fellow captives still being held. He describes them as ''NOT well.''

Reed himself is NOT in top shape. He lost more than 50 pounds during his ordeal.

Reed says in memorializing the nation's war dead, he's hoping that ''one day we doN'T have a day to memorialize the hostages that are dead, or will die.''

Americans are taking time out during this three-day Memorial Day weekend to remember the nation's war dead.

NOwhere were high spirits more evident than at the Indianapolis Motor Speedway. Hundreds of thousands of people gathered in the stands and in the always wild-and-crazy infield for the 74th Indianapolis 500.

But even the high-volume car chase that promotes itself as the ''greatest spectacle in racing'' took a quiet time out to play ''Taps'' and honor the nation's war dead.

Dutch driver Arie Luyendyk was first to cross the finish line at Indy today.

Just after dawn today, a small veteran's group gathered for a ceremony at the Vietnam Veterans Memorial in Washington, D-C... a fraction of the thousands of people expected to visit the site this weekend.

Maryland's new Korean War Memorial was dedicated at Baltimore's Canton Waterfront Park. The seven-acre memorial overlooks the Patapsco River opposite Fort McHenry.

In Los Angeles, however, there are 19 new victims of war... gang war.

Police say at least 19 people were killed in shootings and stabbings during a blood-stained weekend.

Nine of the killings are believed gang-related.

-30- 2272

#90147u1736 05/27/1990 ~United Press International

(MAY 27) UPI - President Bush says he hopes that the upcoming superpower summit will help produce what he called a ''world at peace.''

Bush made the remarks following Memorial Day services near his family retreat in Kennebunkport, Maine.

During the services, Bush sang and prayed with a gathering of about 150 local residents, including family and friends and veterans.

When asked to share his thoughts about Memorial Day and next week's meeting with Soviet President Gorbachev, Bush said ''That is what this little service is about, and certainly that is what this summit coming up with Gorbachev is about.''

The president later indulged in an all-sports Sunday.

He golfed, played tennis, tossed horse shoes and shot the waves in his red-white-and-blue speedboat.

Bush told reporters he brought two ''fat'' pre-briefing summit books with him on vacation.

He says he has NO excuses... NOR apologies... for NOT cracking them.

NASA engineers say all systems are ''go'' for Wednesday's pre-dawn launch of the repaired shuttle Columbia.

Countdown is already underway and the seven shuttle astronauts are making final preparations at Florida's Kennedy Space Center.

NASA test director Michael Leinbach said Columbia's countdown is the smoothest one he's seen by far... and that engineers already were two hours ahead of schedule.

If all goes well, mission Commander Vance Brand and company will blast off at 12:38 A-M, Eastern Time, Wednesday on a 10-day mission to study X-rays and ultraviolet light from violent, energetic deep space targets.

The crew... which includes two civilian astronomers... will use high-powered telescopes to give scientists their first detailed look at more than 200 targets across the sky.

-30- 1926

#90147u1755 05/27/1990 ~United Press International

(MAY 27) UPI - The White House is trying to defuse a possible stumbling block over German membership in NATO before Soviet President Gorbachev arrives in Washington Wednesday.

President Bush, Secretary of State Baker and National Security Adviser Brent Scowcroft are all trying to send reassurances to the Soviet leader.

In a series of interviews, the three spoke of the benefits of a re-unified Germany joining the NATO alliance of Western nations.

Bush... in an interview broadcast today in the Soviet Union... said he hopes to convince Gorbachev that a re-united Germany in NATO will NOT be a threat to the Kremlin.

And Baker echoed the president in another interview. Baker says Bush will argue that NATO is a stablizing factor needed in Europe.

Scowcroft said that he expects the re-unification of Germany and other European issues, and NOT arms control, to dominate the talks.

Mikhail Gorbachev is urging Soviets- in his words- ''NOT to give in to panic.''

The Soviet leader appeared on a Soviet television news show today in an effort to stem frantic buying nation-wide because of planned price hikes.

Gorbachev appealed for reason, saying a transition to a market economy is needed to end the nation's economic decline.

The 45-minute address came after two days of frenzied buying that swept half the country. Consumers cleaned stores in Moscow of a month's supply of goods in 48 hours.

The buying frenzy came after the government announced a program involving a three-stage transition to a regulated market economy by 1993.

The program will have bread prices tripling on July 1st this year.

-30- 1806

#90147u1760 05/27/1990 ~United Press International

(MAY 27) UPI - John Fitzgerald Kennedy's family plans to celebrate the 73rd anniversary of his birth Tuesday with the unveiling of his home state's first formal tribute... an eight-foot bronze statue of the popular president in his prime.

Caroline Kennedy Schlossberg and John F. Kennedy Junior will unveil the memorial to their father at the Massachusetts Statehouse.

The work, sculpted by Concord artist Isabel McIlvain, was financed by public donations.

It will join thousands of other J-F-K memorials across the nation, including a space center, four airports, a performing arts center and a library named for him.

But close Kennedy friend Dave Powers says this statue is special because- in his words- ''it's a citizens tribute to President Kennedy from the people of Massachusetts.''

From its perch on the west portico of the Statehouse, the Kennedy sculpture looks out over historic Boston Common. It shows J-F-K in full stride with one hand in his suitcoat pocket.

-30- 1149

#90147u1844 05/27/1990 ~United Press International

(MAY 27) UPI - South African police say nine people were killed in renewed fighting between black factions in the strife-torn province of Natal. Police report that one victim was ''necklaced''... executed by having a gasoline-filled tire burned around her neck. The clashes are between supporters of the African National Congress and a Zulu tribal movement.

Soviet President Gorbachev issued a televised appeal urging his people ''NOT to give in to panic.'' His address today caps two days of frenzied buying that swept half the country. The panic was triggered by the announcement of a new modified market plan which will triple the price of some staple goods on July 1st.

Former hostage Frank Reed is back home outside of Boston today, where he

shared an emotional reunion with his 91-year-old mother. Reed's mother Leota Sprague and more than 50 other people turned up to welcome Reed home. The U-S educator says he feels a duty to the friends he left behind in captivity in Lebanon.

A former Hungarian foreign minister will lead the nation's Socialist Party. Gyula Horn was elected today in Budapest to head the party viewed as the successor to the Communist Party. Horn helped dismantle the Berlin Wall last year by letting thousands of East Germans pass from Hungary to the West.

Police and F-B-I agents are searching the small town of Italy, Texas, for a woman suspected of kidnapping a newborn baby from his mother's arms two days ago. Investigators say they suspect may have been trying to replace a baby she lost through stillbirth or miscarriage.

A Ku Klux Klansman who won a court case overturning Georgia's ban on public mask-wearing last week has been arrested for donning a hood. Shade Miller was arrested yesterday for wearing a Klan headdress at a rally in the northwest Georgia town of Chatsworth. Miller's right to wear the hood has NOT gone into effect because his victory is being appealed.

Depending on which language expert you listen to, Soviet President Gorbachev may or may NOT be offended by a billboard when he visits St. Paul, Minnesota. Linquists are debating whether a Russian saying on a sign depicting Gorbachev reads- to your health'' or ''I hope your sneezing is NOT a sign of illness.''

A Tacoma, Washington, woman probably will feed her pet snake before trying to pet it next time. Emergency workers say a 10-foot-long boa constrictor swallowed its owner's fist when she tried to pet the reptile before serving it a rabbit. The snake's jaws were pried open and the woman was NOT seriously hurt.

-30- 2742

#90147u2253 05/27/1990 ~United Press International

(MAY 27) UPI - Officials in Pakistan say 55 demonstrators were killed and scores more hurt in a day of ethnic fighting in the southern cities of Hyderabad and Karachi. The army now has control of Hyderabad, following weeks of tension between Sindhis and ethnic Indians. Tens of thousands of protestors defied a curfew to march today and violence erupted when some demonstrators and police exchanged fire.

Tensions eased somewhat today in east Beirut, with a Christian military leader freeing 30 rival Lebanese forces militiamen. The release of the prisoners follows an appeal last week by Pope John Paul, who urged both sides to end four months of fighting for control of the Christian enclave.

But political sources say about 17-hundred fighters remain imprisoned.

Sources say a commission led by the U-N and Organization of American States observers found NO evidence of an alleged Sandinista attack on a group of demobilized Contras. A rebel leader broke off demobilization talks with Nicaragua's government two days ago, saying the Sandinista army attacked a group of Contras north of Managua ... killing 17. But a source close to the investigation says the rebel leader was apparently ''fed false information.''

Chrysler Corporation has agreed to pay nearly three-Million dollars in fines to the U-S government after one of its subsidiaries allegedly overcharged the Air Force on more than 100 contracts. A Detroit newspaper reports Chrysler chose to pay the fines to settle a three-year investigation into Electroscope. The auto giant also fired the company's top executives.

-30- 1765

#90147u2428 05/27/1990 ~United Press International

(MAY 27) UPI - The polls are closed in Colombia, with official results from that nation's presidential election expected later tonight. However, an exit poll says the apparent winner is Cesar Gaviria. Gaviria is the candidate who took the harshest stance against the nation's drug lords. A substantial number of Colombia's 14-Million eligible voters reportedly cast ballots, despite fears of further violence from the nation's warring cocaine cartels.

Election officials in Poland say less than half of the country's some 27-Million-strong electorate participated in today's elections. The balloting- Poland's first free election in nearly seven decades- will fill more than 52-thousand local government posts in 48-thousand precincts. Analysts blame the low turnout on economic austerity measures implemented by the Solidarity-led government.

Residents of the Boston suburb of Malden are rolling out the red carpet to welcome home former U-S hostage Frank Reed. More than 50 people showed up at Boston's Logan International Airport to greet Reed... including his wheelchair-bound mother, whom he hasN'T seen since he was taken hostage more than three years ago. Malden residents are planning a parade Tuesday in Reed's honor.

Officials at the Attica Correctional Facility in upstate New York have ordered a prison lock-down after more than 450 inmates staged an all-night sit-in in the prison's recreational yards. An Attica spokeswoman says officials are trying to figure out why the prisoners refused to return to their cells last night. Last week, an inmate died after he allegedly assaulted three correction officers in a prison yard.

-30- 1822
#90147u2446 05/27/1990 ~United Press International
(MAY 27) UPI - Soviet President Gorbachev took to the airwaves tonight in the Soviet Union to try to allay citizens' fears in the face of planned price hikes. Gorbachev appeared during the time slot reserved for the evening news to make his appeal for calm as the nation moves from a centralized to a market economy. When word of the proposed price hikes became public last week, Soviets raided already half-empty stores to stock up before prices are raised.

Congressional investigators say Washington canNOT and will NOT win its war on drugs without more help from Mexico. Members of the House Armed Services Committee say while the United States is winning its war on drugs in the air, it is losing the battle on the ground. Their study shows more and more traffickers resorting to smuggling drugs into the United States in some of the Millions of vehicles which cross the U-S-Mexican border each year.

It appears Israel's Labor Party is NOT merely vying for power against the rival Likud Party... it is also rife with internal disputes as well. Labor leader Shimon Peres and his top potential challenger within the party, Yitzhak Rabin, both spoke to Labor's central committee today. The debate on the party's future grew heated at times... with members shouting out their opinions during speeches.

Veterans of the ''Battle of Dunkirk'' today returned to the once-bloodied French beach to mark the 50th anniversary of their successful evacuation from invading Nazi forces. Some five-thousand Allied vets held services to remember the nine-day evacuation. Historians credit their pull-out as a crucial move in Hitler's ultimate defeat because so many lived to fight another day.

-30- 1855
#90147u2580 05/27/1990 ~United Press International
(MAY 27) UPI - Americans celebrate the Memorial Day weekend...

Elections were held today in Colombia, Poland and Burma...

And Soviet President Gorbachev seeks to calm fears that've sparked panicked buying...

These stories... and more... next, from United Press International:

Americans are halfway through a long holiday weekend known for its split personality- part solemn commemoration and part summer kickoff.

Americans are barbequing and going to the beaches this weekend... but also setting aside time to honor the nation's war dead.

The Vietnam Veterans Memorial in Washington, D-C, is one of the sites where thousands are expected to gather during tomorrow's official holiday. Today, families walked along the black wall etched with the names of Americans killed in Vietnam... pausing along the flower-strewn path to read messages left by those still mourning.

President Bush is also combining summer-type pleasures and honoring those who died in uniform this weekend. Bush attended a Memorial Day service today in Kennebunkport, Maine, where he expressed home that the upcoming superpower summit will help produce a ''world at peace.''

Bush then went out for a ride in the Atlantic aboard his red-white-and-blue speedboat Fidelity.

Former hostage Frank Reed is spending the weekend with his 91-year-old mother and other family members in sububan Boston. But Reed says his joy is tempered by the memory of the six Americans still held captive in Lebanon.

In Los Angeles, the holiday weekend is proving to be a violent one.

Authorites say at least 20 people were killed and eight others wounded in a spree of shootings and stabbings. Nine of the killings are thought to be gang-related.

-30- 1900

#90147u2604 05/27/1990 ~United Press International

(MAY 27) UPI - Exit polls in Colombia show front-runner presidential candidate Cesar Gaviria appears to have won today's election. Official results are expected later tonight.

Gaviria... the candidate who has taken the toughest stand against the cocaine cartels... urged Colombians to respond with ''Millions of votes'' to protest the car bomb attacks and shootings that made the campaign one of the bloodiest in memory.

He cast his own ballot just after polls opened, wearing a bullet-proof vest and accompanied by 120 bodyguards.

Thousands of troops guarded polling stations against cartel hitmen. At mid-day, there were few reports of disturbances. In a rural election center, however, voting had to be suspended when suspected leftist rebels kidnapped two polling officials.

Gaviria has been an unwavering foe of the cartels following the assassination of his party's leading candidate. Unlike the other presidential candidates, he refuses to negotiate a peace with the Colombian druglords.

-30- 1169

#90147u2642 05/27/1990 ~United Press International

(MAY 27) UPI - Poland's first free elections in 68 years ended today with a turnout well below 50 percent.

Analysts say the outcome is an indication of apathy among people discouraged by the drastic austerity measures adopted by the Solidarity government... including a wage freeze and stiff price hikes to kill inflation.

A total of 52-thousand-237 local government posts were up for grabs in 48-thousand precincts. About 11-hundred-50 organizations and 80 political parties were involved in the campaign.

The director of Poland's Election Commission says the results were NOT encouraging... but NOT bad, compared with the 62-percent turnout for the June 1989 parliamentary elections that brought Solidarity to power.

But the elections were overshadowed by the on-going railway strike.

Earlier today, Solidarity leader Lech Walesa failed in an attempt to talk striking railway workers into suspending their walk-out.

An angry Walesa says he was close to persuading the strike committee to suspend their protest when- in his words- ''political players'' intervened.

The railway workers... whose strike until now has confined to northern Poland... have called for a nationwide warning strike on the railways tomorrow and promised to close down all freight lines for one day on Tuesday.

The workers want an 85-percent pay hike, which the young democratic government says it can NOT afford.

Two leading opposition candidates appear to have won seats in Burma's first multi-party elections in 30 years today... but may NOT be able to claim them.

The front-running candidates for the Burmese legislature include the 45-year-old daughter of Burma's independence hero, and her political ally.

Both have been jailed since last July.

The two have become symbols of defiance against the ruling military junta. Their inaugurations hinge on whether the military will free them. And the results from today's election will count only if the military rulers of the Southeast Asian socialist republic give their approval.

Complete results may NOT be released for two weeks.

But the staunch anti-government party, the National League for Democracy, has surged to an early lead. An N-L-D spokesman predicts the party will sweep all seats in Rangoon and says favorable reports are coming in from other cities as well.

The pro-military National Unity Party fared poorly in the capital, receiving only 16 percent of the vote in one sampling.

-30- 2660

#90147u2656 05/27/1990 ~United Press International

(MAY 27) UPI - Mikhail Gorbachev has pressing domestic concerns on his mind... despite the summit with President Bush that begins Thursday in Washington, D-C.

The Soviet president spoke on nationwide television tonight, appealing to Soviet consumers to show restraint as the nation moves to a market economy.

Gorbachev is urging restraint at a time when Soviet citizens are doing the opposite... buying up a month's supply of goods from Moscow stores in a few days. The frenzied pace of buying has come in reaction to planned price hikes that will have the price of bread tripling on July 1st.

Gorbachev declared both the government and the public have to take the situation under control to end the Soviet Union's economic decline.

The market transition plan causing the frantic buying will be discussed again tomorrow in the Soviet Parliament. The government program for a three-stage transition to a regulated market economy by 1993 was announced by the Kremlin on Thursday.

The Coast Guard is trying to figure out how to refloat a huge passenger cruise ship that lost power and ran aground earlier today on the sandy bottom of the Delaware Bay.

The Regent Star, carrying some 14-hundred passengers and crew, hit bottom about five miles off the New Jersey shoreline.

And while there doesN'T seem to be any damage, the Coast Guard is at a

loss at how to rescue the vessel. An attempt to refloat the vessel at high tide this afternoon did NOT work.

Now rescuers are racing to come up with an alternative plan by high tide tonight.

The Bahamian-registered ship, charted by the Regency Cruise Line, was heading up the Delaware Bay to Penn's Landing in Philadelphia when a small electrical fire broke out in the engine room.

-30- 1923

#90147u2660 05/27/1990 ~United Press International

(MAY 27) UPI - A congressional report released tonight suggests that drugs approved by the Food and Drug Administration are NOT necessarily safe.

The General Accounting Office says half of the drugs approved by the F-D-A between 1976 and '85 later caused adverse reactions... including death.

The congressional watchdog agency says of the 198 drugs approved by the F-D-A during those nine years, more than 50 percent had serious post-approval risks. They included heart failure, convulsions, birth defects and blindness.

New York Representative Ted Weiss says the findings point to possible defects in the government's drug approval process. The Democrat says he believes it is appropriate to speed up the approval process for drugs to treat life-threatening diseases... but NOT for other types of afflictions.

Health and Human Services Inspector General Richard Kusserow denounced the report, saying it will unnecessarily alarm consumers.

-30- 1111

#90147u2702 05/27/1990 ~United Press International

(MAY 27) UPI - Boston authorities say the deadliest fire in the city in 18 years swept through a home in the Rosindale section early this morning... killing three children, their parents and a family friend. A fire department official says all the victims were found in or near their beds.

Former hostage Frank Reed was welcomed back to the Boston area today for the first time in eight years. Reed was reunited with his 91-year-old wheelchair-bound mother for the first time since he was released in Lebanon April 30th.

Iranian President Rafsanjani issued harsh words for the United States and

other Western powers today. Speaking to visiting Lebanese families in Tehran, Rafsanjani urged Western powers to explain why they have NOT responded in kind to the release of two U-S hostages one month ago.

Pakistani officials are NOT sure what sparked bloodshed today in Hyderabad and Karachi. At least 55 people died in violence in the two cities and government troops took control of Hyderabad after repeated clashes between demonstrators and police.

Turkish police say one person drowned and another four are missing after a ferry capsized in the Bosphorus strait near Istanbul. 66 people were on board the vessel when it turned over this morning. Fishermen in the area plucked survivors from the water.

(MAY 27) UPI - Colombia has a new president tonight. 34-year-old economist Cesar Gaviria was given the nod by Colombian voters, who turned out by the Millions despite a bloody anti-election campaign carried out by the Latin American nation's notorious cocaine cartels. With slightly more than 20 percent of the vote counted, two of Gaviria's three political opponents conceded. Gaviria has distinguished himself by vowing NOT to bend to the drug gangs.

At least 12 people were injured this evening, one seriously, after a freak storm ripped through a festival which had attracted up to 10-thousand people in Baton Rouge, Louisiana. The sudden, intense storm carried with it high winds which caused a stage to collapse. Many of the people were on hand at the Fest-for-All to see a free performance by The Temptations.

In the days leading up to this week's superpower summit in Washington, the Bush administration is engaging in a full-court press to allay Soviet fears regarding NATO membership for a united Germany. Secretary of State Baker said today that NATO's role is defensive... one which seeks to maintain European stability. National security adviser Brent Scowcroft said that the issue of German re-unification will dominate the summit's agenda.

President Bush did his part to ease Soviet fears regarding a single German state by giving an interview that appeared today on Soviet television. During the broadcast, Bush said he hopes to ''narrow the differences'' with Soviet President Gorbachev on the issue of German unity. Bush told the Soviet audience he expects an upfront session with Gorbachev when they meet in Washington. He says the two men will discuss an array of issues.

(MAY 27) UPI - Witnesses say calm returned to much of the African nation of Gabon today following five days of rioting. The unrest arose after the unexplained death of an opposition leader. Sources say the government held a special Cabinet meeting today to review the situation. Despite the apparent return to normal, French nationals in the former French colony continue to leave in droves... with some 18-hundred departing since yesterday.

South African President de Klerk is lashing out at his critics while trying to walk a middle road in the conflict over apartheid . De Klerk today issued a statement slamming the right-wing Conservative Party for inciting whites to rise up against his racial reform policies. At the same time, de Klerk also warned black activist Nelson Mandela NOT to discredit peaceful negotiations to end South Africa's racial system.

A U-N-led commission has found NO evidence of an alleged Sandinista attack on a group of demobilized Contra rebels in Nicaragua. A Contra leader on Friday broke-off renewed demobilization talks with the government of President Violeta Chamorro because of the alleged attack. Chamorro asked U-N observers to check into the report, but investigators could find NO proof to substantiate rebel claims.

Congressional investigators are blasting President Bush for what they say is an imbalanced war on drugs. Members of a House Armed Services subcommittee say Bush is winning the war against drugs in the sky. But the war is NOT going nearly as well when it comes to stemming the flow of drugs into the United States on land by way of the U-S-Mexican border. The congressmen say traffickers are taking to the highways and byways to smuggle drugs into the United States.

ROERMOND, NETHERLANDS, MAY 28 - Two Australian tourists mistaken for British servicemen were shot dead in a marketplace here in an attack claimed Monday by the Irish Republican Army (IRA).

In a communique released in Dublin, the IRA said it "accepts responsibility for the death of two Australian men in Roermond."

"An active service unit involved tragically mistook the men for two British army personnel," the IRA said, adding that it "deeply regretted the tragedy" Sunday in this Dutch border town.

The two victims of Sunday's attack, who were touring Europe with their wives, were Australian lawyers living in London.

Nicholas Spanos, 29, from Sydney, and Stephen John Melrose, 24, of Brisbane, were riddled with bullets when they were getting into a British-registered car in the local marketplace, police spokesman Louis Steens said.

The wife of Mr. Melrose, Lynda McRedie, 29, of Queensland, Australia, and a friend of Mr. Spanos, Vicky Coss, 24, from New South Wales, Australia, escaped unhurt but were taken to hospital in shock.

A huge manhunt was launched after the Sunday night attack.

In London, British Prime Minister Margaret Thatcher said she was "shocked and concerned" by the killings.

Police here said there were "between one and four killers," according to witnesses, who were "perhaps using automatic or semi-automatic weapons."

Dutch police have offered a reward of 100,000 florins (50,000 dollars) to anyone providing information leading to the arrest of the killers.

The IRA, which is fighting British rule in Northern Ireland, killed three British servicemen and wounded three others in this region in 1988. The organisation is believed to have units based in the Netherlands.

The gunmen opened fire with automatic weapons on the Australians' hired car, a British-registered Citroen BX, then fled in a Dutch-registered Mazda, which police believe had been stolen.

Dutch police formed a 30-strong team of investigators to track down the killers and were liaising with police in neighbouring countries.

Mr. Steens said the two couples had stayed in London before driving to the Netherlands.

TEGUCIGALPA, Honduras May 28 (EFE).- The forests left in Central America could disappear within 20 years unless a new agricultural system is adopted, a Venezuelan agronomist said Monday.

The co-ordinator of the Tropical Agriculture Centre for Investigation and Education (CATIE), Ramon Lastra, said that if current farming methods continued 400,000 hectares of forest would be lost each year.

At a scientific conference in La Ceiba, Honduras, he said that in that one country alone 80,000 hectares of forest were disappearing every year, causing a great upheaval in its ecological system.

PANAMA CITY (MAY 28) EFE - Panamanian President Guillermo Endara, 54, is to next month marry his 24-year-old fiancee of three months, Ana Mae Diaz, in a ceremony which is to be "neither luxurious nor ostentatious", the presidential office said.

The couple, who have known each other for eight months, will marry June 10 in the Metropolitan Cathedral, with Vice Presidents Ricardo Arias and Guillermo Ford as Endara's best men.

The ceremony and reception will be paid for by Endara and his wife-to-be, who met when Endara went on a hunger strike in September to protest against the former government of military strongman Manuel Antonio Noriega.

The couple got engaged in February.

Diaz is a law student who was then working for a law office specializing in human rights cases.

Endara's first wife died last year.

MANAGUA (MAY 28) EFE - A senior official of the Palestine Liberation Orgnaization (PLO) diplomatic representation in Nicargua has sought refuge in an unidentified foreign embassy in Managua follwing a violent internal dispute between members of the mission, a newspaper in the capital reported Monday.

Citing "totally credible" but unnamed sources, the La Prensa daily said the offical had sought refuge following an argument Saturday between members of the PLO officials established in Managua and a newly-arrived contingency of Palestinians.

The official, accompanied by his wife, daughter and two students, forced his way into the embassy armed with a rifle.

The PLO diplomat "virtually forced his way into the foreign mission and demanded refuge or asylum in order to save his life", the report said.

Efforts by EFE to obtain comments from the PLO mission in Managua proved fruitless, as the embassy's telephones appeared to be permanently engaged or off the hook.

Nicaragua's former leftist Sandinista government recognized the Palestinian state declared by PLO leader Yasser Arafat, who visited Managua in July 1980.

CHICAGO (MAY 27) UPI - Police hoped Sunday that a motorist who struck a bicyclist, then scraped her off his windshield and left her to die, would show up at one of several addresses listed to him.

The Cook County Medical Examiner's office identified the woman as Edna Fatima, 37, of Chicago. She was pronounced dead at Illinois Masonic Medical Centera early Saturday 20 minutes after the accident occurred.

''We do have a tentative I.D. but because we haven't located next of kin we're not releasing any information,'' Sgt. Kay Louis said.

Witnesses said the driver struck the woman on her bicycle and drove a full block before prying her from the windshield and dumping her on the ground.

''She was on his windshield, he stopped the car and pulled her off and drove away,'' Sgt. Robert Covelli said.

''She was stuffed in the windshield; he had to pull her off,'' Covelli said.

Police issued a nationwide bulletin for the driver, thought to be a foreign national, and hoped he would show up at one of a number of places where he lived.

''We have certain addresses where he lives and we're just checking them out and hopefully he'll turn up,'' Sgt. Dwight Bleke said.

Police said the victim was struck at about 1:11 a.m. Saturday as she rode her bike on a major thoroughfare on the city's North Side.

Watch Commander Paul Lewis said police found the car later that morning at a North Side residence and that the owner of the car did not live there.

Lewis said police, however, ran a vehicle identification number on the car which led them to another North Side address. Lewis said police searched the house at about 6:30 a.m. Saturday.

''They found blood-stained clothing that apparently belonged to him (the driver) and some papers with some identification on it showing that he did live there,'' Lewis said.

The car had ''extensive damage'' to its windshield, he said.

#90148u0042 05/28/1990 ~United Press International

(MAY 28) UPI - The California Angels are finally clearing the bases instead of the stands.

Wally Joyner delivered his second career grand slam Sunday, helping the Angels climb within one game of .500 with a 7-3 victory over the Milwaukee Brewers.

''I think it will be significant (to be at .500 again),'' Joyner said. ''It's one of our objectives because we played so bad so early. We had fans walking out on us.''

California's seventh straight victory, combined with Oakland's rainout, left the Angels 9 1-2 games behind the Athletics in the American League West.

''We are capable of putting on a streak like this,'' said winner Chuck Finley. ''When we get on a roll, we have the confidence we can win every game.''

Finley, 7-2, gave up three runs on seven hits while striking out three and walking two in 8 1-3 innings. Bill Wegman, 2-2, absorbed the loss, surrendering six runs on nine hits in his 6 1-3 innings.

''I knew I didn't have my usual stuff when I came out of the bullpen,'' Finley said. ''I was hoping to figure out some way to get through it. I was more lucky than anything. The guys provided me with enough runs where I could relax.''

''We didn't keep the ball in the ballpark,'' Milwaukee Manager Tom Trebelhorn said. ''We had an error that gave them an extra at bat and then we hung a breaking ball to Joyner and he hit it out. We've had some difficulty defending some of those long fly balls.''

Leading 3-2, the Angels loaded the bases in the seventh on Donnie Hill's single, Wegman's throwing error on a sacrifice attempt by Gary DiSarcina and a one-out intentional walk to Ray.

Tony Fossas relieved Wegman and struck out Devon White for the second out. Then Joyner drove a 1-0 hanging slider deep into the bullpen in right field for his seventh homer of the season.

Joyner has 12 hits in his last 29 at-bats, with three homers and 15 RBI in that span.

''As a ballplayer, you want to keep that streaking feeling as long as possible,'' Joyner said.

In other AL games, Chicago edged Detroit 2-1, Minnesota downed Boston 3-1, Kansas City ripped New York 6-2, Baltimore routed Texas 9-2, Toronto clipped Seattle 5-1 and Cleveland at Oakland was postponed by rain.

In the NL, it was Pittsburgh 5, San Francisco 2; Atlanta 6, Philadelphia 1; San Diego 8, New York 4; Montreal 5, Cincinnati 3; Los Angeles 14, St. Louis 7; and Chicago 11, Houston 6.

White Sox 2, Tigers 1

At Detroit, Ron Kittle singled home the tie-breaking run with two out in the seventh and Carlton Fisk hit his 339th homer, tying Boog Powell for 45th place on the career list, leading Chicago. Melido Perez, 4-4, was the winner. Bobby Thigpen earned his 14th save in 16 chances. Jack Morris fell to 2-7.

Twins 3, Red Sox 1

At Minneapolis, Dan Gladden homered, singled and scored twice to help Minnesota complete a sweep of their three-game series. Gladden sent the second pitch from starter Dana Kiecker, 0-2, into the seats. Kevin Tapani, 6-3, was the winner. Rick Aguilera worked two innings for his 13th save.

Royals 6, New York 2

At Kansas City, Kevin Seitzer hit his first home run of the season and two doubles while scoring twice and knocking in a pair of runs, lifting the Royals. Kevin Appier, 1-0, collected his first victory since June 13, 1989. Jeff Montgomery got four outs for his second save. Dave LaPoint fell to 3-4.

Orioles 9, Rangers 2

At Texas, Jeff Ballard posted his first victory of the season, helping Baltimore wind up a three-game sweep. Ballard, 1-5, entered the game with a 4.05 ERA. Bobby Witt, 2-6, pitched six innings.

Blue Jays 5, Mariners 1

At Seattle, Manny Lee and Junior Felix hit back-to-back homers and Pat Borders added a two-run shot to help the Blue Jays sweep their three-game series and extend the Mariners' losing streak to four games. John Cerutti, 2-5, filled in for scheduled starter Jimmy Key and pitched 7 1-3 innings. Randy Johnson, 3-3, took the loss.

(MAY 28) UPI - Returning to the ballpark where his father used to play, Stan Javier relived childhood memories and added punch to the Dodgers' lineup.

The son of former Cardinal infielder Julian Javier pounded out four hits Sunday, two coming in a nine-run first inning that led the Los Angeles Dodgers to a 14-7 victory over St. Louis at Busch Stadium.

''I played in a lot of father-son games in this ballpark,'' said Javier, who collected four successive singles. ''My father always did well here, and I wanted to do the same.''

The younger Javier, recently acquired from Oakland, used the onslaught to help the Dodgers record their fifth straight victory, and 10th in their last 13 games.

Nonetheless, Javier, who finished the afternoon 4-for-6, was looking to do further damage.

''I really wanted that fifth hit,'' he said. ''I was 5-for-5 in the American League once and I wanted to do it in the National League.''

The nine runs were the most scored in one inning by the Dodgers since Sept. 12, 1977, when they scored 10 against San Diego. That was Tommy Lasorda's first year as manager of the Dodgers.

''That was too long ago to remember, though,'' Lasorda said. ''But it's a lot of runs in one inning.''

Javier, who also had a triple Saturday, was 5-for-7 in his two St. Louis starts in the series.

''He had a good couple of days here,'' Lasorda said. ''I'm glad he continued the name of his father in this ballpark.''

Lenny Harris, Javier, Chris Gwynn and Eddie Murray each singled leading off the first inning in which the Dodgers sent 14 batters to the plate, collected 10 hits and added a hit batsman.

St. Louis starter Jose DeLeon, 4-3, lasted only two-thirds of an inning, allowing seven runs on six hits while facing nine batters.

Tim Crews, 1-1, pitched 3 1-3 scoreless innings of relief for the victory.

The first four singles produced two runs, and after Hubie Brooks flied out Mike Scoscia was hit by a pitch to load the bases. Juan Samuel singled in the third run and Alfredo Griffin's double scored two more.

Starting pitcher John Wetteland forced Samuel at home and Frank DiPino relieved DeLeon. Harris singled in a run and Javier's second hit again loaded the bases. Gwynn singled home two more before Murray's RBI single to right, giving the Dodgers a 9-0 lead.

''They didn't hit the ball that hard, but that's the way it goes sometimes '' St. Louis Manager Whitey Herzog said.

Elsewhere in the National League, Montreal downed Cincinnati 5-3, San Diego dumped New York 8-4, Atlanta topped Philadelphia 6-1, Pittsburgh dropped San Francisco 5-2 and Chicago slugged Houston 11-6.

In the AL, it was Chicago 2, Detroit 1; Minnesota 3, Boston 1; Kansas City 6, New York 2; Baltimore 9, Texas 2; California 7, Milwaukee 3; Toronto 5, Seattle 1. Cleveland at Oakland was postponed by rain.

Expos 5, Reds 3

At Montreal, Andres Galarraga hit his fourth homer of the season in the fifth inning, helping the Expos avoid a four-game sweep by Cincinnati. Galarraga homered off reliever Tim Birtsas, 1-2. Drew Hall, 3-5, earned the victory and Tim Burke pitched one inning for his 11th save.

Padres 8, Mets 4

At New York, Joe Carter drove in four runs, two with a tie-breaking single in the eighth inning to power the Padres in a game that included a bench-clearing incident. Mets shortstop Kevin Elster charged the mound after he was hit by a pitch by Greg Harris. Ed Whitson, 4-3, pitched seven innings for the win and Craig Lefferts notched his eighth save. Dwight Gooden fell to 3-4.

Braves 6, Phillies 1

At Philadelphia, John Smoltz lost his no-hitter when Len Dykstra doubled

with one out in the ninth. Smoltz, 3-4, finished with a two-hitter and Philadelhia's Terry Mulholland, 3-2, took the loss.

Pirates 5, Giants 2

At Pittsburgh, Barry Bonds, Don Slaught and Andy Van Slyke homered to power the Pirates. Neal Heaton, 8-1, pitched five innings and Ted Power earned his fourth save. Rick Reuschel, 2-6, dropped his fourth straight start.

Cubs 11, Astros 6

At Chicago, Ryne Sandberg hit a three-run homer and a solo shot to fuel the Cubs' season-high 18-hit attack, helping Chicago snap a four-game losing streak. Mike Bielecki, 3-3, notched his third win in his last five starts and Sandberg went 4-for-5. Mark Portugal, 1-5, took the loss.

BOGOTA, COLOMBIA (MAY 28) UPI - Voters ignored threats of violence and elected as their next president Sunday ardent drug cartel foe Cesar Gaviria, who immediately said he would make no deals with the rich and ruthless czars of cocaine.

The 34-year-old economist and candidate of the ruling Liberal Party swept to victory with 47 percent in the official vote count by the National Election Board. With 85 percent of the districts reporting, he was named on 2,488,687 ballots.

Gaviria's chief rival, Alvaro Gomez of the National Salvation Movement, had 24.3 percent, or 1,285,260 votes. Former M-19 guerrilla leader Antonio Navarro was third with 12.7 percent, or 674,829 votes. Rodrigo Lloreda of the Social Conservatives won 12 percent, or 636,709 votes.

No major violence was reported during the nine hours of voting.

''There will be no concessions to narcoterrorism,'' Garivia said in a victory speech before a crowd at a downtown hotel shortly after Gomez conceded.

''The most difficult and troubled political campaign of all of (the nation's) history has come to an end,'' the president-elect said. ''Never like today were its values at risk, its democracy, its freedom. Never in this time have the violent ones of all kinds tried to destabilize our institutions.''

The vote culminated a bloody campaign that saw three presidential candidates assassinated, acts blamed on the Medellin cartel of cocaine traffickers. Gaviria will begin a four-year term Aug. 7 when he replaces President Virgilio Barco.

With some 10 armed bodyguards with him on the stage, Gaviria praised the millions of Colombians who voted, saying they ''supported a democracy that has had to confront the bombs, narcoterrorism, the practices of hate.''

''All of those who have wanted to threaten our democracy, listen to us,''

Gaviria said. ''The people have spoken today with courage and clarity.''

In conceding, Gomez said, ''The very high vote obtained has converted the National Salvation Movement in the second political force in the nation.''

Gaviria has taken the toughest stance against the cartels, based in Medellin and Cali, that control most of the world's cocaine trade. The chief cartel, based in Medellin, has unleashed a war on the nation and is blamed for the assassination of three candidates and a series of car bombs.

Gaviria has been an unwavering foe of the drug barons after stepping into the Liberal Party primary race since the assassination of the party's leading candidate, Sen. Luis Galan, nine months ago. In contrast, Gomez, Lloreda and Navarro all have said they were willing to negotiate a peace with the cartels.

Official returns also showed overwhelming approval for the other ballot measure, a call for the National Assembly to reform the constitution. The measure was winning with 89 percent of the vote to 3.9 percent against. The rest of the votes were apparently left blank.

Gaviria voted just as polls opened, wearing a bulletproof vest. He was accompanied by some 14 vehicles and 120 people, most of them bodyguards and policemen.

''To the bombs, to the terrorist attacks, we must respond with votes, with millions of votes for democracy, for peace and for a future for Colombia '' Gaviria said before voting in northern Bogota.

Gaviria is probably the most threatened man in Colombia because of his hard line against the cartels. He stopped appearing in public during most of the final weeks of the campaign.

More than 200,000 heavily armed policemen, secret police and soldiers patrolled voting stations. In one Bogota station, at least 40 officers and soldiers were present, carefully searching each person who entered.

Voting was suspended in a rural polling place in the state of Antioquia after the rebel National Liberation Army kidnapped two election officials and stole election material. Voting also was suspended in a polling place in the state of Cesar, where guerrillas also robbed election material, a Bogota radio station reported.

Bogota Mayor Andres Pastrana presided over a ceremony in honor of the three slain candidates just minutes before voting began. Taps were played and a minute of silence observed.

Gaviria assumed the campaign of Galan when the popular young Liberal Party

candidate was assassinated by cocaine-cartel gunmen at a campaign rally on Aug. 18.

The assassination touched off a war between the Medellin cartel and the government that has produced explosions of dozens of car bombs, a bombing in airliner that killed 107 people and other attacks that have killed at least 400 people.

#90148u0147 05/28/1990 ~United Press International

(MAY 28) UPI - The only major candidate NOT to falter in the face of intimidating tactics of Colombia's powerful cocaine cartels has been elected the Latin American nation's new president. Cesar Gaviria refused to kowtow to Colombia's mighty drug gangs... even though the gangs reportedly figured in the deaths of three presidential candidates since last August.

Gaviria assumed the campaign of Liberal Party candidate Senator Luis Galan Loo-EES' Guh-LAHN' after drug cartel gunmen assassinated Galan August 18th of last year. Gaviria may be the most threatened man in Colombia for his fierce stance in opposition of the country's ruthless cocaine gangs. Sunday, more than 100 bodyguards surrounded him as he cast his ballot.

An outdoor festival in Baton Rouge, Louisiana, came to an unceremonious end Sunday when a sudden storm swept through the area where as many as 10-thousand people awaited a free performance by the group The Temptations. Stiff gusts of wind whipped up debris and caused part of the stage to collapse. Organizers of Fest-For-All say up to 17 people were injured in the freak storm.

For the first time since 1954, North Korea has returned to U-S officials the remains of American soldiers who died during the Korean War. U-S and North Korean officials met Monday at the truce village of Panmunjom along the South-North Korean border where the remains of five American soldiers were handed over to a group of U-S officials.

(MAY 28) UPI - A report Sunday by the General Accounting Office revealed possible deficiencies in the manner in which the Food and Drug Administration conducts tests on new drugs. The G-A-O, which is the watchdog agency for Congress, says half of the drugs O-K'd by the F-D-A between 1976 and 1985 later caused adverse reactions.

10 Maryland law enforcement agencies are hoping for better luck next time. The 10 had hoped to lure hundreds of fugitives to the state's premier

resort area Saturday under the ruse of winning a brand new car. As it turns out, only nine alleged wrong-doers fell for the trick. But instead of going back to the drawing board, the officials hope to use the same red herring in the future.

#90148u0189 05/28/1990 ~United Press International

BOSTON (MAY 28) UPI - Although clearly elated during an emotional reunion with his 91-year-old mother in his native state, former hostage Frank Reed continued his passionate advocacy for the captives he left behind in Lebanon.

Reed saw his mother on Sunday for the first time since he left Boston in 1982, but used the Memorial Day weekend celebration to again remember ''mates'' who he says are not faring well in captivity.

''This weekend, we are memorializing the dead that fought for our country. Let us hope that one day we don't have to have a day to memorialize the hostages that are dead, or will die,'' Reed said. ''Let's not forget that there are still six Americans still in captivity, and the news is not good as far as I'm concerned. The hostages are not well.''

Reed said he felt an ''obligation, a duty'' to them, and said he was ''worrying about my mates that I left behind.'' His attorney, Bob Woolf, abruptly ended the news conference when reporters pressed the former hostage for more information on the other captives' plight.

More than 50 people turned out at Logan International Airport on a sunny day to welcome back the 57-year-old educator, who was held hostage for 44 months before being freed April 30. Many applauded as he emerged from the plane.

''I want to say I love you, Boston, and I love all of you for coming out to see me,'' said Reed, after crouching to whisper to and embrace his mother for several minutes.

''How can you ever forget a mother? Mothers are always great,'' he said. ''She looks lovely, my mother. My mother's a tough gal.''

''I say rejoice, give thanks. He's back,'' said Leota Sprague, who was in a wheelchair to greet her son. ''I feel as good as can be. I'm just so thankful for the day, for the sunshine.''

Reed was kidnapped in West Beirut on Sept. 9, 1986. He had moved to Lebanon in 1977 and worked at the University of Beirut before founding the Lebanese International School. He converted to Islam to marry his Syrian-born wife, Fahimeh.

''It's just like a long-lost friend coming home. I brought the kids, it's so exciting,'' said John Ferguson, who said he worked briefly as a salesman with Reed 15 years ago.

Reed said he expected to spend time ''enjoing Boston, enjoying my family'' during his three-day visit, before returning Wednesday to a hospital outside Washington.

Dressed in a dark suit, Reed said he had weighed just 133 pounds, down from 185, when he was released from captivity, and said he had been ''severely malnourished'' during his ordeal.

''What we've been doing, basically, as far as my health goes, is trying to do some medical sleuthing; trying to find out some things, why I am so severely anemic,'' he said.

''In spite of it all, they say my heart is fine. My lungs are fine. My liver's fine. I'm still feisty, still try to be as tough as I can about a few things.

''I'm not going to spend four years in captivity and come out and have something happen here, I hope.''

Woolf said the ex-hostage has gained 18 pounds since being freed and shot a 41 over nine holes of golf in Maryland.

A motorcade with four limousines took Reed and his family, including his wife and 9-year-old son, Tarek, to his daughter's home in suburban Malden for a lobster dinner and family reunion.

Dozens of neighbors wandered by the house, which was festooned with yellow ribbons and balloons, and a sign reading, ''Free at last. Frank Reed. April 30, 1990.'' Several local seafood restaurants donated the lobsters, most them the 3-pound mammoths from Maine that Reed had specifically requested.

''He looks a lot better than he did a few weeks ago,'' said his daughter, Marilyn Langston.

The town of Malden plans to celebrate Reed's homecoming with a parade on Tuesday. Reed is scheduled to address residents after receiving an official welcome from Mayor James Conway.

#90148u0213 05/28/1990 ~United Press International
FORTESCUE, NJ (MAY 28) UPI - The Coast Guard decided Monday to wait until high tide to try to refloat a cruise ship stuck on the sandy bottom of Delaware Bay, giving passengers and crew an unexpected extension on a trip from the Bahamas.

A Coast Guard ship was stationed near the M.V. Regency Star to route traffic away from the disabled craft - and monitor for any leaks or damage officials said.

Coast Guard officials said there had been no reports the vessel had been taking on water since it was grounded early Sunday, or that the 642-floot vessel was polluting the water.

No injuries were reported among the ship's 1,360 passengers and crew.

But Petty Officer Darayl Tompkins said officials had called off an attempt to free the craft at high tide around midnight Sunday, opting instead to attempt the procedure around high tide Monday afternoon.

''They didn't want to do anything in the dark,'' Tompkins said.

Meanwhile, Tompkins said passengers headed to Philadelphia after a cruise to the Bahamas were apparently not too concerned their vacations had been extended.

''We hear they're having a pretty good time,'' he said, adding that there had been no calls for additional food, water or other provisions. ''We hear it's a pretty nice ship.''

Earlier, Lt. Jim Weakley reported that an attempt to refloat the vessel at high tide around 1 p.m. Sunday was unsuccessful.

''Two commercial ocean-going tugs had lines attached and we had hoped it would refloat, but it didn't,'' Weakley said. ''What we are doing is trying to develop a plan to refloat it as quickly and as safely as possible.''

The Bahamian-registered ship, chartered by the Regency Cruise Line, was heading up the Delaware Bay to Penn's Landing in Philadelphia when a small electrical fire broke out in the 24,114-ton ship's engine room just before 1 a.m., Weakley said.

The fire was quickly put out with carbon dioxide extinguishers, he said, but the blaze left the ship without steering or engines. It drifted onto the bottom and was stuck on an even keel in 22 feet of water about 5 miles off Fortescue, he said.

The ship had been heading to Philadelphia from Nassau in the Bahamas when the accident occurred. Officials could not say how long the ship had been at sea.

Tompkins said there were no plans to evacuate the ship.

#90148u0228 05/28/1990 ~United Press International

WEST PALM BEACH, FL (MAY 28) UPI - Police investigating the shooting of a woman by a man dressed as a clown found a vehicle matching the description of the getaway car but were searching for a suspect and possible motive.

Police said Sunday the vehicle was spotted by detectives in a parking lot of Palm Beach International Airport, but it was not clear if it was the same one used in the shooting Saturday of 40-year-old Marlene Warren.

Warren, the wife of a West Palm Beach businessman, was shot at least once in the head, police said. She was listed in critical condition at West

Palm Hospital.

Investigators checked with friends and business associates to see if anyone knew of a possible motive for the shooting. Police also questioned workers at stores selling balloons and flowers like those left behind by the clown.

Warren was shot at point-blank range in the doorway of her home at about 11 a.m. Saturday by a man dressed in clown costume, complete with a red wig, red bulb nose, gloves and a white clown mask with a big red smile, police said.

''This is the strangest thing I've seen in all my 19 years in law enforcement,'' Palm Beach County sheriff's spokesman Bob Ferrell said. ''It certainly seems well planned out.''

The clown walked to the front door of Warren's ranch-style home in a high-income neighborhood Saturday morning, carrying a bouquet of red and white flowers and two balloons, detectives said.

The balloons were imprinted with the slogan, ''You're the Greatest!'' and one had a picture of Snow White.

Warren answered the door and, ''as she went to take the flowers and balloons, the clown shot her,'' Ferrell said. ''As far as I know, nothing was said.''

The clown then dropped the bouquet and the balloons and fled in a white car with no license plates.

Warren's two teenage sons and several of their friends witnessed the shooting.

Warren's husband, Mike Warren, owns Bargain Motors, an automobile sales and leasing business in West Palm Beach. He was at work when the shooting occurred.

Neighbors said they had no idea why anyone would want to shoot the woman.

''She was a friendly, nice person,'' one neighbor said.

#90148u0256 05/28/1990 ~United Press International

MOSCOW (MAY 28) UPI - President Mikhail Gorbachev, seeking to stem nationwide panic buying spurred by proposed price increases, appealed to the Soviet people to accept the transition to a market economy.

The market transition plan was slated for discussion again Monday in the Soviet Parliament. In the Russian republic's new legislature, renegade communist Boris Yeltsin was poised to resume his battle Monday for the presidency of the largest of the country's 15 republics.

Yeltsin has been a leading critic of Gorbachev's reform policies.

Speaking calmly Sunday in a nationwide television address that pre-empted the nightly news, Gorbachev urged local governments to stop the frenzied buying that has swept half the country since Thursday and stripped Moscow stores of a month's supply of eggs, cooking oil and flour.

''Now, more than ever, we need mutual trust,'' Gorbachev said. ''I call on you all, dear comrades, for consolidation, joint efforts and a search for the most painless path to a market economy.

''Since in some places such attitudes (fears prompting panic buying) have arisen, then clearly both state organs and the public have to take the situation under control,'' Gorbachev said without elaborating.

But the president pulled no punches in stating that ''in the next few months or a year the situation will become even more tense, difficult and, to be frank, dangerous.''

Gorbachev, reading from half sheets of paper with a half cup of coffee to his right, called the movement away from a centralized economy ''a new revolution'' without which the country cannot end its economic decline.

''I appeal to you, dear comrades, not to give in to panic,'' Gorbachev said in his 45-minute address. ''Don't give in to panic. Let's look at this soberly and realistically.''

He explained that wages would be indexed to cushion the higher prices on bread and grain products beginning July 1 and that grants would be given to the poor and to large families, students and pensioners.

The frantic buying came after Premier Nikolai Ryzhkov presented the government program Thursday for a three-stage transition to a regulated market economy by 1993, with bread prices to triple July 1 and other products increasing Jan. 1, 1991.

''All the trash cans are filled with remnants of uneaten bread,'' Gorbachev said. ''All the trash heaps are filled with spoiled bread that is thrown out.

''Bread is bought to be fed to animals while we import grain to make bread paying for the imports with hard currency (dollars),'' he said. ''Is this situation permissible? It offends the peasants.''

Long lines formed Sunday at Moscow shops, and in the Ukrainian capital of Kiev the government reported that the sale of flour and macaroni had increased eightfold in the past three days.

Gorbachev, facing the burgeoning domestic crisis only days before his summit with President Bush in Washington, warned political opponents not to take advantage of people's fears.

''Of course it is now inadmissible that there should be ultimatums, the stirring up of people and irresponsible slogans,'' he said. ''We must put in their place those who worry not about society but about their own ambitions.''

Gorbachev explained that the budget adopted five months ago was in tatters with rising income, sinking production and a ballooning budget deficit caused in part by state subsidies and credits to failing enterprises.

Gorbachev called for an emergency budget for the second half of 1990, with cuts across the board, including defense slashes to stem the deficit now financed only by printing rubles of ever-decreasing value.

Gorbachev indicated there has been strong resistance to cutting the budget deficit of $154 billion to the $6 billion level he has envisaged.

The president said his economic reform has stalled and pleaded for the people's consent to raise prices. ''In general, we need agreement in society, and not just agreement in name,'' he said.

Acknowledging that the reforms will cause unemployment, Gorbachev pledged there would be job retraining but said the nation can no longer afford to subsidize unproductive workers.

Seeking to calm consumer fears, Gorbachev said prices on the most essential goods would be regulated to prevent price-gouging.

''Uncontrolled price-setting by a still unstable and unformed market is simply unacceptable, since it would be a heavy blow to the people's standard of living,'' he said.

#90148u0286 05/28/1990 ~United Press International

PARIS (MAY 28) UPI - Polish Prime Minister Tadeusz Mazowiecki arrived in Paris Monday for an official two-day visit to France expected to be dominated by monetary issues.

Mazowiecki landed at Orly Airport outside of Paris at 10:30 a.m. and was

greeted by French Foreign Affairs Minister Roland Dumas. The Polish prime minister was scheduled to meet with President Francois Mitterrand and other French officials during his visit to discuss common fiscal concerns.

Mazowiecki's 9-month-old Solidarity government has been the target of wildcat strikes by rail workers in northern Poland. The strikers, who have demanded a substantial wage increase, agreed Monday to return to work following talks with Solidarity union leader Lech Walesa.

#90148u0301 05/28/1990 ~United Press International

MOSCOW (MAY 28) UPI - An earthquake rumbled through northern Armenia, which was devastated by a killer quake in December 1988, the official Tass news agency said Monday.

''There were no casualties,'' Tass said.

It said at 10:28 p.m. Moscow time Sunday, an earthquake rocked the town of Spitak, which two years ago was razed by a quake. No Richter scale reading was immediately available for the tremor.

Older structures were damaged in the city of Stepanavan and the community of Kirovakan also was shaken. The tremor also was felt to a lesser degree in Yerevan, capital of the republic, Tass said.

The earthquake Dec. 7, 1988, left at least 15,000 people dead in Leninikan Spitak and Kirovakan. The quake forced Soviet leader Mikhail Gorbachev to cut short a meeting in New York with President Ronald Reagan.

The cities leveled by the quake have still not been rebuilt, and foreign work teams have gone home because the strife between rivals in the republics of Armenia and Azerbaijan has often cut off building supplies to reconstruct the towns.

In Yerevan Sunday, Interior Ministry troops killed six Armenians in a shootout at the Armenian capital's rail station, Tass said.

Ten soldiers also were wounded, three of them seriously, at the rail termninal in Yerevan where the soldiers had just returned from escorting a train from the southeast, Tass said.

Tass said that 15 Armenian militants fired at a guard in the building of the Yerevan terminal, and the troops shot back in an attempt to repulse an attack.

#90148u0333 05/28/1990 ~United Press International

BEIJING (MAY 28) UPI - Tibet's communist authorities have adopted security measures sharply limiting political and religious demonstrations following China's lifting of martial law in the restive Himalayan region, the state-run press reported Monday.

The leadership of Tibet's nominally autonomous legislature enacted the 25-clause security law Wednesday, the semi-official China News Service reported.

The measures ostensibly guarantee Tibetans' right to dissent but not at the price of ''social stability,'' the dispatch said.

Chinese authorities proclaimed martial law in Tibet March 8, 1989, in a crackdown on fierce anti-Chinese rioting in the capital Lhasa led by pro-independence Buddhist monks. Dozens died in the rioting and its forceful suppression by Chinese troops.

Beijing lifted martial law in Lhasa May 1, saying social order had been restored in Tibet.

But in reporting the new security law, the China News Service quoted a public security official in Tibet as saying the tough restrictions were needed to prevent separatist agitation that could undermine Tibet's stability and economic development.

''In recent years, a small number of separatists have stirred up repeated demonstrations with the intent to split Tibet from the motherland and destroy national unity, and severe rioting developed,'' the unidentified official was quoted as saying.

''The rioting severely endangered the stability of the autonomous region and destroyed the region's economic construction. Therefore, passage of the security measure was imperative,'' the official said.

The regulations state that Tibetans exercising their right to protest ''may not use religion or other activities to organize rallies, demonstrations or parades that will endanger the state's unification or destroy national unity or social stability.''

Demonstrators must secure local party and government permission before protesting within 300 yards of religious centers or military installations the news service said.

Many of last year's disturbances erupted at or near Buddhist monasteries.

The rules authorize police to establish police lines to keep lawful demonstrators away from state offices, foreign consulates, military

installations, television and radio studios and broadcast facilities, prisons and labor reform camps, the report said.

China claims that Tibet is historically part of Chinese territory. The region was a largely autonomous feudal kingdom until 1950, when Chinese troops invaded and asserted Chinese communist authority.

Many Tibetans still hope for the return of the exiled spiritual leader, the dalai lama, who fled the region after an abortive armed uprising in 1959. The dalai lama and his followers live in India.

#90148u0338 05/28/1990 ~United Press International

(MAY 28) UPI - Scattered storms dumped rain across much of the nation early Monday, dampening Memorial Day plans from New England through the Plains region, while a strong Pacific front brought heavy rain to drought-stricken California.

The National Weather Service said steady rain fell early Monday in Sacramento and across much of northern and central California. The unusual late-season storm raised hopes in the drought-parched region but fair skies were expected to return by Monday night, forecasters said.

Snow fell at higher elevations in the California mountains. A snow advisory was issued for the western slopes of the Sierra Nevada and the Shasta-Siskiyou mountains, where 6 to 12 inches of snow was expected by Monday night.

Storms in northern California rained on Memorial Day weekend activities in the San Francisco Bay area.

Rainfall of 3 to 5 inches was common in the northwestern part of the state while in Southern California skies were cloudy with highs ranging from the 60s at the beaches to 90 at Palm Springs.

In the southern Plains states, rain fell over parts of Oklahoma and Louisiana early Monday as heavy thunderstorms drenched parts of Texas. Powerful storms in Texas on Sunday dumped hail and spawned tornadoes near Wichita Falls, ripping trees from the ground. No injuries were reported.

The same storm front produced nickel- to golfball-size hail from the Red River, between Texas and Oklahoma, to the Lake Brownwood area in central Texas.

At least 27 people were hurt, two critically, in Baton Rouge, La., Sunday when high winds shot debris through a crowd of about 10,000 people attending a free concert by the Temptations soul group near the

Mississippi River.

''People were hysterical. Their kids were gone,'' said Debra Southwick, a volunteer coordinator. ''It was mass hysteria, that's all I can say. People were just running for their lives.''

The sudden, intense storm downed power lines and tree limbs across the city, police said.

Thundershowers also doused much of the South and caused some flooding in southern Florida. Gusty winds and hail lashed northern Georgia, but no serious damage was reported.

Temperatures across the South were humid early Monday, ranging from 66 in Knoxville, Tenn., to 75 in Jacksonville, Fla.

In the Midwest, skies were variably cloudy overnight with small patches of rain.

Heavy showers were reported in southwest Indiana, western Kentucky and southeast Illinois, and weather service forecasters warned of possible flooding. Some low-area flooding was reported in Kentucky at Central City.

Memorial Day arrived in New England with mostly clear skies and temperatures in the upper 40s and lower 50s, but scattered showers and thunderstorms were reported in parts of Vermont and western Massachusetts.

#90148u0342 05/28/1990 ~United Press International
(MAY 28) UPI - Around the world... around the clock... the latest news from U-P-I.

Up to 17 people were injured late Sunday afternoon when high winds battered a festival in Baton Rouge, Louisiana. Part of a stage at the FestForAll collapsed. 12 people were taken to hospitals. Between seven-thousand and 10-thousand people were at the free concert by the rhythm and blues group the Temptations when the winds struck.

Colombia's ruling Liberal Party has retained control of the presidency in the embattled Latin American nation. With 85 percent of the districts reporting, 34-year-old economist Cesar Gaviria has garnered 47 percent of the vote. In a victory speech Sunday night, Gaviria said ''There will be NO concessions to narco-terrorism.

Soviet President Gorbachev appeared on Soviet television Sunday night to urge his compatriots NOT to lose sight of the positive goals he wants to achieve. Gorbachev appealed for Soviet viewers... quote... ''NOT to give

in to panic'' as he tries to mold the nation's economy into a market model. Soviets have been buying food in a frenzy in recent days.

The official Soviet news agency Tass says Red Army troops trying to repulse an attack by Armenian militants Sunday killed six militants. The gunfight in the Armenian capital left three soldiers seriously injured. It is the first rupture of tentative calm in Armenia since Soviet troops entered the volatile region three months ago.

#90148u0343 05/28/1990 ~United Press International

(MAY 28) UPI - Politicians in Washington and Moscow areN'T alone in maneuvering before the upcoming summit. Diplomats in Afghanistan say Moscow-backed President Najibullah is pushing reforms to show the superpowers that his government is politically viable. Diplomats say U-S-backed Moslem rebels have stepped up rocket attacks to try to discredit Najibullah.

Chicago police have issued a nationwide bulletin Sunday for the driver of a car that struck and killed a bicyclist. Police have found the car used in the hit-and-run... as well as bloodied clothing apparently belonging to the driver. A police spokesman said the driver pried the female victim from his extensively damaged windshield before speeding away.

The Texas hills were alive Sunday with something other than the sound of music. Some 300 people streamed into Helotes, Texas, to take part in the third annual Texas Hill Country Machine Gun Shoot. As the name implies, the purpose of the event is to blow targets to smithereens. Among the objects fired upon were washers, dryers and B-M-W's.

#90148u0376 05/28/1990 ~United Press International

MOSCOW (MAY 28) UPI - Interior Ministry troops waged two gunbattles with Armenians in the republic's capital of Yerevan, leaving 20 Armenians dead, the Interior Ministry said Monday.

An Interior Ministry spokesman in Moscow said that, in two separate incidents Sunday, Armenians had fired on troops - once in the morning at the Yerevan rail station and later in the Oshernskiy region of the Armenian capital.

Interior Ministry troops were forced to open fire to repulse the attacks, the spokesman said. He said, ''Six Armenians were killed at the rail terminal and 14 in the Oshernskiy region.''

''You may say about 20 people were killed,'' he added in a telephone

interview, stressing he was working with preliminary information.

The spokesman, answering the telephone number used for news media inquiries, said he preferred his name not be used. He explained his hesitancy by saying all his information was now coming from Armenia's Interior Ministry and that confirmed details would be released later.

He said he believed the attacks may have been connected with the disputed region of Nagorno-Karabakh. The enclave is in the neighboring Moslem republic of Azerbaijan, but has a predominantly Armenian population.

The spokesman added Sunday's conflict also might have involved those Armenians still homeless because of a December 1988 earthquake in northern Armenia. On Sunday, a moderate quake rumbled through the northern Armenian area, devastated in 1988, the official Tass news agency said Monday. Tass said the quake caused no casualties.

Armenian use of weapons against Interior Ministry troops was seen by analysts as a dangerous escalation of the strife in the southern republic and an addition to domestic problems of Soviet President Mikhail Gorbachev before this week's superpower summit with President Bush in Washington.

Gorbachev, who was to arrive in Washington Wednesday evening, made a televised address Sunday night appealing to Soviets to halt panic buying sweeping the nation amid fears about rapid price increases during the transition to a modified market economy now being debated in the Supreme Soviet.

In Armenia, the soldiers who opened fire at the rail terminal Sunday had just returned to Yerevan after escorting a train from Kafan, 120 miles southeast of Yerevan, Tass said Sunday.

Thousands of Interior Ministry and regular army troops have been sent to Armenia and Azerbaijan over the last two years to keep peace between the two republics, which raised vigilante armies in January and fought a near civil war.

Regular army and Interior Ministry troops escort trains and buses in Nagorno-Karabakh to keep the two peoples apart.

The fresh violence, and another incident four days earlier in which a soldier was killed in a shootout at a checkpoint in Nagorno-Karabakh, broke three months of relative quiet in the region. In that incident, the soldiers reportedly killed one of the attackers and wounded six others.

#90148u0386 05/28/1990 ~United Press International

KABUL, AFGHANISTAN (MAY 28) UPI - President Najibullah announced Monday he has sent proposals for ending the Afghan civil war, including a new offer of a nationwide referendum, to the American and Soviet presidents for consideration at this week's summit.

''I once again propose that the government is ready to hold talks with any opposition group inside or outside the country,'' Najibullah said in his first speech to a grand tribal assembly, known as a Loya Jirgah, which is expected to approve changes in the constitution.

The president renewed his proposal for ending the 12-year-old war through a ''cooling-off period'' and a cease-fire prior to peace negotiations and U.N.-monitored elections.

But this time, he also offered to hold a referendum or plebiscite on the need for a cease-fire.

''This referendum would facilitate the commencement of talks among the concerned parties on the one hand, and would pave the way for U.N. humanitarian aid in various parts of the country and for future elections planned in the transition period, on the other,'' Najibullah said, according to an official translation of his speech in the Pashto language.

He said he has sent the revised proposals to President Bush and Soviet President Mikhail Gorbachev ''so that they can take them into consideration'' at Wednesday's superpower summit in Washington.

There was no immediate reaction to the offer from Afghan resistance leaders based in Pakistan, but the guerrillas have have rejected all previous peace proposals by the Kabul government and have refused to negotiate or share power with members of Najibullah's People's Democratic Party of Afghanistan.

The rebels, who are based mostly in Pakistan and backed by the United States and Saudi Arabia, have had little military success despite the February 1989 withdrawal of Soviet troops backing the government.

Najibullah has defied Western predictions that he would be overthrown swiftly following the Soviet pullout. The 44-year-old former head of the secret police this month launched a political offensive aimed at building a more moderate image for his communist government.

Diplomats in Kabul have described the moves as largely cosmetic and designed to influence the superpower summit, at which ways to end the Afghan civil war are expected to be discussed.

Washington and Moscow have reportedly narrowed their differences on Afghanistan recently, and the United States this year dropped its

insistence that Najibullah step down prior to the start of any peace negotiations.

Najibullah, however, has rejected U.S. calls that he transfer power to an interim government prior to any elections.

As part of the Kabul government's liberalization efforts, the president on May 3 lifted a state of emergency imposed three days after the Soviet withdrawal and revived the powers of the National Assembly. He later appointed a non-ruling party member, Fazle Haq Khaliqyar, as prime minister.

The Loya Jirgah, which is to last two days, is to approve constitutional changes committing the country to political pluralism and encouraging liberalization of almost all sections of the economy.

''The draft amendment ... has stressed on generalizing and widening the principles of democracy in the socio-political life and helping revival and economic growth according to the requirements of the country and the international situation,'' Najibullah said, addressing the meeting.

Officials said more than 750 delegates from around the country, Cabinet ministers, National Assembly members and judges attended the opening session of the meeting, held in a movie theater under tight security.

Najibullah's party is scheduled in the next few months to hold its first congress since the 1978 communist revolution. Diplomats say the meeting is likely to change the name of the party and disavow its Marxist-Leninist past.

Diplomats say the party congress will have the power to replace Najibullah as the party's general secretary, the country's effective leader.

Najibullah, fearing such a move, has sought in recent months to reduce the number of senior officials from the Khalq faction of the party which has been in dispute with his Parcham wing, the diplomats say.

The president in March crushed a coup attempt led by his defense minister, Gen. Shahnawaz Tanai, the leader of the Khalq group.

#90148u0394 05/28/1990 ~United Press International

INDIANAPOLIS (MAY 28) UPI - Official results released Monday from the 74th running of the Indianapolis 500 run Sunday at Indianapolis Motor Speedway. Driver, hometown, car, laps completed, reason out if any, and winner's average speed in mph.

1. Arie Luyendyk, Holland, Lola-Chevrolet, 200, 185.984 (record, breaks old mark of 170.722 mph set in 1986 by Bobby Rahal).

2. Bobby Rahal, Dublin, Ohio, Lola-Chevrolet, 200.

3. Emerson Fittipaldi, Brazil, Penske-Chevrolet, 200.

4. Al Unser Jr., Albuquerque, N.M., Lola-Chevrolet, 199.

5. Rick Mears, Bakersfield, Calif., Penske-Chevrolet, 198.

6. A.J. Foyt, Houston, Lola-Chevrolet, 194.

7. Scott Brayton, Coldwater, Mich., Lola-Cosworth, 194.

8. Eddie Cheever, Italy, Penske-Chevrolet, 193.

9. Kevin Cogan, Palos Verdes Estates, Calif., Penske-Buick, 191.

10. Scott Goodyear, Canada, Lola-Judd, 191.

11. Didier Theys, Belgium, Penske-Buick, 190.

12. Tero Palmroth, Finland, Lola-Cosworth, 188.

13. Al Unser, Albuquerque, N.M., March-Alfa Romeo, 186.

14. Randy Lewis, Hillsborough, Calif., Penske-Buick, 186.

15. Jim Crawford, Scotland, Lola-Buick, 183.

16. John Paul Jr., West Palm Beach, Fla., Lola-Buick, 176, radiator.

17. Dean Hall, Olympic Valley, Calif., Lola-Cosworth, 165, broken front suspension.

18. Teo Fabi, Italy, March-Porsche, 162, transmission.

19. Geoff Brabham, Noblesville, Ind., Lola-Judd, 161.

20. Michael Andretti, Nazareth, Pa., Lola-Chevrolet, 146, severe vibration.

21. John Andretti, Indianapolis, March-Porsche, 136, spin.

22, Dominic Dobson, Fairfax, Calif., Lola-Cosworth, 129, engine.

23. Roberto Guerrero, San Juan Capistrano, Calif., March-Alfa Romeo, 118,

right rear suspension.

24. Billy Vukovich III, Indianapolis, Lola-Buick, 102, engine.

25. Rocky Moran, Coto de Caza, Calif., Lola-Buick, 88, engine.

26. Tony Bettenhausen, Indianapolis, Lola-Buick, 76, engine.

27. Mario Andretti, Nazareth, Pa., Lola-Chevrolet, 60, engine.

28. Raul Boesel, Brazil, Lola-Judd, 60, engine.

29. Pancho Carter, Brownsburg, Ind., Lola-Cosworth, 59, crash.

30. Tom Sneva, Paradise Valley, Ariz., Penske-Buick, 48, rear CV joint.

31. Gary Bettenhausen, Martinsville, Ind., Lola-Buick, 39, wheel bearing.

32, Danny Sullivan, Los Angeles, Penske-Chevrolet, 19, crash.

33. Stan Fox, Janesville, Wis., Lola-Buick, 10, gear box.

Time of race: 2 hours, 41 minutes, 18.248 seconds.

Margin of victory: 10.7 seconds.

Caution periods: 4 for 22 laps.

Lead changes: 7 among 3 drivers.

Lap leaders: Fittipaldi 1-92; Luyendyk 93-94; Fittipaldi 95-117; Rahal 118-122; Fittipaldi 123-135; Rahal 136-167; Luyendyk 168-200.

-30- 2895

#90148u0396 05/28/1990 ~United Press International

JERUSALEM (MAY 28) UPI - A pipe bomb exploded at midday Monday in a Jewish market crowded with pre-holiday shoppers and wounded at least 10 people, adding to Arab-Israeli tension in the city.

Police rounded up about 20 suspects after the explosion, which occurred about 12:30 p.m. in the Mahane Yehuda market in west Jerusalem. The market caters to Jewish residents of Jerusalem and is near the main commercial streets of the city.

The explosion came eight days after an Israeli posing as a soldier opened fire on Palestinian workers and killed seven near the Israeli town of Rishon Le Zion, 6 miles south of Tel Aviv. The May 22 slayings sparked

violence in the Israeli-occupied territories, leaving 14 Palestinians dead and hundreds wounded in less than a week of rioting.

In Rishon Le Zion, a bomb was found at a bus station. The device was safely dismantled, Army Radio reported.

In the Jerusalem market, the bomb exploded under a stall at the Rasar Restaurant.

Arieh Bibi, Jerusalem police commander, said the explosion was caused by a pipe bomb. Ten people were wounded and taken to hospitals, police spokesman Uzi Sandori said.

The blast caused little material damage. Vegetables littered the narrow aisle of the covered market in front of the restaurant. The market was packed with shoppers preparing for the Shavout Jewish holiday, which begins Tuesday night.

At one point after the explosion, police had to use force to separate angry Jewish shoppers from Arab workers in the market, Army Radio reported. Most of the Arab workers in the market fled after the blast, shopkeepers said.

''I was weighing a box of grapes for a woman, a client of mine. Suddenly there was a boom opposite my stall,'' shopkeeper Yoram Shabti told Army Radio. ''The box of grapes flew out of my hand. The woman stumbled a bit. I was blown to the wall. ... I saw two people hurt badly ... I saw one was losing a lot of blood.''

As investigators searched the area, a small group of angry Jews gathered and chanted, ''Death to the Arabs.'' Some threw vegetables at cameramen and jostled reporters.

Jewish shoppers yelled ''Arab murderers'' as police led away a group of young Arabs for questioning. Police said patrols had been stepped up throughout the city to prevent revenge attacks against Arabs.

Moshe Abuhatzeira said he had gone to the market with his son and was talking with a friend when he was wounded by the blast.

''We heard a very big explosion,'' he said. ''Immediately, I heard my son crying. I held him and ran out of the market to try to get an ambulance.''

Abuhatzeira was wounded lightly in the leg and back. In a telephone interview from Bikur Holim Hospital, he said his 8-year-old son had just returned from surgery.

The market was reopened about two hours after the explosion. Right- and

left-wing politicians condemned the attack.

Also Monday, the Supreme Court turned down an appeal by Rishon Le Zion city officials to stop a rally by the anti-Arab Kach movement planned before the Jerusalem explosion.

-30- 3276

#90148u0404 05/28/1990 ~United Press International

INDIANAPOLIS (MAY 28) UPI - Eddie Cheever, a 10-year Formula One veteran, says all races are the same ''whether it's go-karts or Indy.''

But even Cheever, a 32-year-old American-born resident of Monaco, was struck by the hoopla surrounding the Indianapolis 500.

''With all the fanfare, it's hard to concentrate on the job at hand,'' Cheever said after finishing eighth Sunday, the best finish for a rookie at this year's Indy 500.

Cheever's comments are common among rookies, who often are intimidated not only by the Indianapolis Motor Speedway's 2 1/2 mile oval but also the track's storied history and its 400,000 fans who pack the track on race day.

''It definitely was an exciting experience,'' said Dean Hall, a 17th-place finisher and a former professional skier. ''It's just amazing. There are so many (fans) here. It's just exciting.''

Cheever was listed as the seventh finisher after the race, but the official scorer miscounted his laps and he was dropped to eighth Monday. Cheever ran 193 laps, instead of the 194 credited to him Sunday.

Scott Goodyear, a Toronto native who Sunday had the highest Indy finish (10th) ever for a Canadian driver, said he tried to forget the teeming throngs in the stands.

''About 25 minutes to (race time), I got into the car, and I tried to shut the world out,'' Goodyear said.

The rookies looked at their first time at Indy as a learning experience, since none of them figured they had a shot at being the first rookie since Graham Hill in 1966 to win the race.

''It's hard to know who you're racing with (on an oval). There's a lot to think about,'' said Cheever, whose first race on an oval was Sunday. ''There are so many cars at different speeds, you are really busy. You just go as fast as you can and stay out of trouble.

''I promised not to be scraped off the wall, and I wanted to finish. I met (both goals).''

Cheever not only was the fastest rookie during qualifications and the race he also was the top finisher among drivers with a non-1990 model chassis. He drove a 1989 Penske-Chevy.

''You have to have new cars (to win),'' Cheever said. ''The whole team did a good job, but we do have a problem running an '89 car. We're carrying a ball and chain.''

Hall, who drove a 1990 Lola-Cosworth, and Goodyear, who drove a 1989 Lola-Judd, were more complimentary of their equipment.

''The guys did a great job preparing the car. I just didn't run it too fast,'' Hall said. ''I learned an expensive lesson, that's for sure.''

Cheever, Hall and Goodyear all said they would like to come back to Indy next year.

''You learn what to expect at the start for next year,'' Hall said. ''I'll definitely be back. For many years to come, hopefully.''

-30- 2974

#90148u0410 05/28/1990 ~United Press International

INDIANAPOLIS (MAY 28) UPI - The record-setting pace wasn't surprising. The man who won the race certainly was.

Arie Luyendyk's victory in the 74th running of the Indianapolis 500 Sunday was surprising not because he lacked talent or good equipment - he had plenty of both - but because the Dutchman had never led a lap at the Indianapolis Motor Speedway and had never won an Indy car race anywhere. Tradition, which surrounds this race more than any other, dictates that a driver must work his way to victory lane gradually.

But Luyendyk blew that concept away and his Lola-Chevrolet was the only one that was able to hold up under the blistering pace of the race. When he crossed the finish line first, he was not only the winner of the greatest race in the world, but the fastest champion in Indy 500 history.

''Being overlooked didn't bother me,'' Luyendyk said. ''I should have bet in Las Vegas.''

Luyendyk's average speed of 185.984 mph shattered the previous speed record at Indianapolis, the 170.722 mph achieved by 1986 winner Bobby Rahal, who finished second Sunday, 10.7 seconds behind the winner. Defending champion Emerson Fittipaldi, who led 126 laps, finished third

and was the only other driver on the lead lap at the end.

Al Unser Jr. was fourth, followed by three-time winner Rick Mears, four-time winner A.J. Foyt, Scott Brayton, rookie Eddie Cheever, Kevin Cogan, rookie Scott Goodyear and Didier Theys.

The race was the fastest Indy car race ever, topping Danny Sullivan's 180.564 mph average at the 1988 Michigan 500, and second fastest 500-mile race ever. Only Bill Elliott's win in 1985 at Talladega Superspeedway, where he averaged 186.288 mph, was quicker.

Luyendyk will earn more than $1 million for the victory - the exact amount won't be announced until the awards banquet Monday night - and he needed just two hours, 41 minutes and 18.248 seconds to cover the 500 miles in front of an estimated 400,000 spectators. There were 16 cars running at the end of the race.

The last time Luyendyk, who now resides in Scottsdale, Ariz., won an open-wheel event was in a Super Vee race in 1984, one year before he got a steady Indy car ride. His best Indy car finish in 75 previous races was a second at Portland in 1988, and he is the first driver to notch his first-ever Indy car win at Indianapolis since Graham Hill in 1966.

''I've had a few years without a win,'' said Luyendyk, whose best previous finish at Indianapolis was a seventh in his rookie year of 1985. ''This one's going to last me for a long time.''

For most of the race it looked as if a foreign-born driver was going to win, but it was the Brazlian Fittipaldi who was dominating in his attempt to become the first man since Al Unser in 1970 and 1971 to win back-to-back races at the Brickyard.

The tires on his pole-sitting Penske-Chevrolet couldn't take the fast pace however, and started to blister. Those tire problems eventually forced him to surrender the lead to Rahal on lap 136. At that point, Luyendyk was second, well behind Rahal, but he was making up ground quickly.

With 100 miles to go, Luyendyk was running laps in the 222 mph range while Rahal was clocked consistently around 217 mph, and Luydendyk finally caught the two-time Indy car champion on lap 168, 32 laps from the finish.

Going into turn three, the same turn where Unser Jr. and Fittipaldi touched last year with one lap to go, Luyendyk dove low and smoothly made his way past Rahal's car.

He never trailed again.

''There was just nobody who could keep up with us,'' Luyendyk said. ''I

went by Bobby quite easy and that was it.''

The top six and seven of the top eight finishers had Chevrolet engines. The other three Chevy drivers, Michael and Mario Andretti and Danny Sullivan, did not finish.

Sullivan hit the wall on lap 20 to bring out the first caution period of the day, Mario left with a failed engine on lap 61, and Michael had problems with the right rear of the car and eventually was forced to drop out.

From the beginning, it was clear that the race would be a quick one. Fittipaldi completed the first 50 miles at a record pace of 209.587 mph, and the lack of yellow flags - there were just four for 22 laps - allowed the fastest field in race history to set a blistering pace.

But the pace wasn't the only thing blistering on the track. Many drivers, including Fittipaldi and Unser Jr., were plagued by tire troubles that kept them from challenging Luyendyk.

''Everything was looking really good,'' Fittipaldi said. ''My car was beautiful. We were having a very smooth race. The only problem I was having was with the tires. What can I say? I had to stop twice (unscheduled stops) to change them.''

That knocked Fittipaldi out of contention, and with Unser Jr. also struggling, Rahal and Luyendyk were left to fight it out.

It wasn't much of a battle. Rahal's Lola developed a push late in the race and once Luyendyk passed him, there wasn't much the Dublin, Ohio resident could do.

''We lost the balance,'' Rahal said, after leading the race for the first time since 1986. ''It doesn't take much (to fall behind). We kind of held on to him for a while, but then we started pushing and that was it.''

A driver needs luck, or actually the absence of misfortune, to win any race, and Luyendyk knew he caught a few breaks Sunday.

''What made it easier was that other teams had some problems,'' he said. ''It did help us that the other drivers had problems. We haven't had any tire problems all month long.''

What he did have all month was confidence.

WASHINGTON (MAY 28) UPI - The human rights group Asia Watch accused the Chinese government Monday of still engaging in ''merciless repression'' against the region of Tibet.

Asia Watch issued its 102-page report the week after the administration announced it is extending China's most-favored-nation trade status, despite complaints on Capitol Hill about the persecution of dissidents in China and Tibet.

The report, titled ''Merciless Repression,'' took its name from a senior Chinese official who said, ''The government of the region (Tibet) must adopt a policy of merciless repression toward all rebels.''

Tibet, in southwestern China, was taken over militarily by the Chinese government in 1951.

Secretary of State James Baker cited the Chinese government's announcement of an end to martial law in Tibet as one of the reasons for extending the favorable trading status to China.

Asia Watch said the accusations of the most serious violations date from the time when martial law was in effect, before April 1990.

In the initial clashes between religious demonstraters and troops in March 1989, the casualties were thought to be 60 Tibetan dead, with another 100 wounded, the report said.

Of those Tibetans imprisoned, the report said, the use of torture was general, and Asia Watch said it ''believes that the abuse is still systematically perpetrated in Tibetan prisons today.''

''Imprisonment under harsh conditions is the principal means by which the authority of China has been brought to bear upon dissenting Tibetans,'' the report stated.

Asia Watch's assessment generally coincides with the State Department's human rights report published in February about the mistreatment of dissidents in Tibet and the suppression of news coverage about the events.

Asia Watch acknowledged that Tibetans have been able to exercise considerably more religious freedom since Chinese leader Deng Xiaopeng came to power, but there are still sharp limits to the practice of Buddhism.

HOUSTON (MAY 28) UPI - Nationally ranked boxer David Gonzales was listed

in serious condition Monday at Ben Taub Hospital where he recovered from a gunshot wound to the back.

Gonzales, 21, was injured and his companion, Miguel Angel Martinez, 25, was killed Saturday upon leaving a northeast Houston bar.

The shooting apparently stemmed from a grudge with two other men about a pool game, investigators said. No charges had been filed in the case as of Monday, a police spokesman said.

Gonzales is a lightweight boxer ranked ninth by the World Boxing Association and the International Boxing Federation. He was to have fought for the North American Boxing Federation's lightweight championship next month.

Gonzales was raised in Galena Park and now lives in San Antonio.

LITTLE ROCK, AR (MAY 28) UPI - Primaries for state offices and one congressional district are expected to draw slightly more than half of Arkansas' registered voters to the ballot box Tuesday.

State Auditor Julia Hughes Jones estimated that 51.3 percent of the 1,171,027 registered voters in Arkansas will cast ballots.

Voters will choose nominees for governor, lieutenant governor, attorney general and secretary of state. Runoffs, if necessary, will be held June 12.

A vacancy on the Arkansas Supreme Court will be filled in the Democratic primary. There is no Republican opposition in the contest.

Only one of the state's four congressional seats is contested in Tuesday's elections. Rep. Bill Alexander, D-Ark., faces stiff opposition for renomination to his district in northeastern Arkansas.

In his quest for a 12th term of office, Alexander, 56, has met opposition from Mike Gibson, 43, the city attorney in Osceola. The latest poll showed Alexander with a lead of 53 percent to 35 percent with 12 percent undecided. The winner of the Democratic primary will face Republican Terry Hayes of Heber Springs in the general election.

Sen. David Pryor, D-Ark., is up for re-election, but he has no opposition in either the primary or the fall election.

Gov. Bill Clinton faces opposition from five challengers in the Democratic

primary. The main challenger is Tom McRae, 51, of Little Rock, a former Peace Corps volunteer and former director of the Winthrop Rockefeller Foundation.

A spirited battle for the Republican nomination for governor developed between Rep. Tommy Robinson, R-Ark., and Sheffield Nelson, a Little Rock lawyer who was the former chief executive officer of Arkla Inc., the state's major natural gas utility. Both men are former Democrats.

UNIONDALE, NY (MAY 28) UPI - An early morning fire Monday swept through a Long Island home, killing two young girls and critically injuring their grandmother, authorities said.

The blaze broke out in the two-story red brick house in which the family lived shortly before 4 a.m., said Paul Simon, a Uniondale Fire Department supervisor.

The fire killed Keisha Moise, 11, and her sister Tatianna, 7, said Ed Smith, a spokesman for the Nassau County Medical Center, where the bodies of the two girl were brought.

Authorities said they have been unable to locate the children's parents.

The girls' grandmother, Peggy Abellard, 45, suffered burns over 15 percent of her body and was listed in critical condition at Nassau County Medical Center, Smith said.

Fifty men from the Fire Department used six trucks to battle the blaze.

Officials have labeled the fire suspicious because of the deaths, but the cause of the blaze has not been determined and was under investigation.

(MAY 28) UPI - President Bush will attend the Memorial Day parade in Kennebunkport, Maine, where he's spending the holiday weekend in his summer home. Bush will return to the White House this evening to begin preparations for his summit later this week with Soviet President Gorbachev. Bush said that he expects a frank yet cordial talk with the Soviet leader.

The Memorial Day weekend unofficially marks the first day of summer... but try and tell that to Mother Nature. The National Weather Service says snow is expected today in the higher elevations of California's Mount Shasta-Siskyou area and the Sierra Nevada north of Yosemite Park. Forecasters say rain will be heavy in the valleys and lower elevations of northern California.

A 43-year-old economist who vowed to get tough and stay tough with drug traffickers was elected president of Colombia. President-elect Cesar Gaviria won 47 percent of the vote in an election held under threats of bombings by the Medellin drug cartel. Gaviria supports the current Colombian government policy of extraditing drug-trafficking suspects wanted in the United States.

Former hostage Frank Reed visited his 91-year-old mother yesterday for the first time since he left Boston in 1982. Reed's mother, Leota Sprague, greeted her son from a wheelchair. She said... quoting here... ''I feel as good as can be. I'm just so thankful for the day.'' Reed... clearly elated during the emotional reunion, said... ''My mother's a tough gal.''

Iranian President Rafsanjani castigated the United States and other Western powers yesterday for NOT reciprocating for last month's release of two U-S hostages. Rafsanjani told a crowd of Lebanese families visiting

Iran that the West criticizes hostage-taking but doesn't criticize Israel for the same thing. Radical Shiite groups hold 16 Western hostages in Lebanon.

(MAY 28) UPI - Party and diplomatic sources in Burma say the opposition National League for Democracy appears headed for a landslide victory over pro-military parties. However, the N-L-D's two leaders are under arrest for defying the military junta since July... and many of the party's top activists also have been jailed. The vote was Burma's first multi-party election in 30 years.

Authorities in Los Angeles say at least 20 people were killed in a series of shootings and stabbings during a bloodstained Memorial Day holiday weekend. Nine of the killings are believed gang-related, including the death of a teenager shot in Bell Gardens Saturday night. At least eight people were wounded, including an 11-year-old girl and nine-year-old boy.

''Boris,'' a Vietnamese potbellied pig... is a political issue in Virginia Beach, Virginia. Robert Van Arsdale says he's meeting tomorrow with Mayor Meyera Oberndorf to discuss changing a city pet ordinance to allow the swine... whose owners see them as pearls. Van Arsdale says of ''Boris''... ''Once you've gotten to know him, he's a fantastic little pig.''

KENNEBUNKPORT, ME (MAY 28) UPI - President Bush told a Memorial Day crowd Monday that he will welcome Soviet President Mikhail Gorbachev with ''open arms'' but will ''stand firm on our principles'' when they discuss

world affairs.

''And that is what I plan to do,'' Bush told a flag-waving crowd of several hundred citizens of his summer home on the coast.

Wrapping up a four-day weekend before returning to Washington, Bush spoke to the audience after watching a Memorial Day parade with high school bands, Boy Scout troops, fire engines and marching war veterans.

''There is no question that we have a better chance for lasting world peace, but there are still some enormous problems out there and this country must remain strong,'' Bush said.

In an interview broadcast on Soviet television Sunday, Bush said differences over the reunification of Germany and the Soviet response to the independence movement in the Baltic republics could impede progress at the May 30-June 3 talks in Washington.

''I go to the summit with open arms to welcome the president of the Soviet Union,'' Bush told the crowd. ''But we must stand firm on our principles when we discuss world peace ... the stability of Europe or the fate of the countries around the world that are not yet free.''

He declared, ''We must remain committed to the values that have made us great over the past 200 years.''

Bush, standing beside an American flag at half-staff, spoke under clear skies. Commenting on his holiday sojourn that included golf, tennis and boating, Bush said he goes to the summit ''refurbished ... by four days in our beloved Kennebunkport.''

He said he was speaking as commander in chief and a World War II veteran in saluting the nation's servicemen.

''Thank the heavens for our veterans,'' Bush said.

In his tribute, Bush gave special praise to the American soldiers who died last year in the U.S. invasion of Panama, which ousted dictator Manuel Antonio Noriega.

Earlier Monday, Bush told reporters he is almost ready for his meeting with Gorbachev.

''I'm looking forward to it,'' Bush told said before a game of golf.

Bush said he plans to finish reading a pair of briefing books and then hold ''two days of intense consultation'' with aides before Gorbachev arrives at the White House on Thursday.

''We have a big agenda, Bush said, citing the issues of German reunification, superpower arms control, conventional forces, chemical weapons, commercial agreements, and the drive for independence in the Baltics.

Bush noted that Gorbachev has ''enormous problems'' at home because of ethnic unrest and economic pressures, but he rejected suggestions that Gorbachev is in danger of losing power.

''My own personal opinion is that he's pretty darn strong,'' Bush said.

In the Soviet interview, Bush said he hopes to ''narrow the differences'' with Gorbachev during the summit.

''If we argue, we'll do that pleasantly,'' Bush told the Soviet television interviewer last week.

In the interview Bush said, ''We have a responsibility - Mr. Gorbachev and me - for a broad agenda of items, including world peace.''

#90148u0681 05/28/1990 ~United Press International

KENNEBUNKPORT, ME (MAY 28) UPI - President Bush said Monday he is awaiting a report on the reopened investigation into the explosion last year aboard the USS Iowa, and that if Clayton Hartwig is shown to be innocent of any blame, the dead seaman deserves an apology.

Bush said he cannot reach any conclusions until he sees all the facts, but said, ''Clearly, I'm interested.'' It was his first comment on the matter since investigators reported new evidence to Congress Friday.

Sandia National Laboratories, hired by Congress to look into the tragedy, challenged the Navy's conclusion that the April 1989 blast that killed Hartwig and 46 other sailors was probably an act of suicidal sabotage by Hartwig, a gunner's mate 2nd class.

The explosion occurred in the reonditioned World War II battleship while gun crews were firing the 16-inch guns in the No. 2 turret.

The Sandia report suggested that the explosion could have been caused by gunners ''over-ramming'' the powder bags into a gun breech.

It also said elements of calcium and chlorine found in the blast area - traces cited by the Navy as evidence that a chemical detonator triggered the explosion - were commonly found in tests performed on gun turrets aboard the Iowa and two other battleships.

The day before Sandia reported to Congress, Navy Secretary Lawrence Garrett reopened the investigation after gunpower bags caught fire in Navy tests.

Both findings appeared to bolster the possibility that the disaster was an accident.

Bush, wrapping up a four-day Memorial Day weekend at his Kennebunkport summer home, was asked if Hartwig deserved an apology.

''I have no opinion on it,'' Bush told reporters before teeing off at the Cape Arundel Golf Club. ''I really have no judgment.''

But, he said, ''If the man is innocent, is proved innocent, of these allegations, clearly there should be a statement to that effect.''

The president declined comment when asked to assess the Navy's initial investigation, which critics have charged was slip-shod, flawed and even bent on pinning blame on Hartwig rather than its own equipment.

''I can't assess it until I get all the facts. They'll get it (a report) to me. ... I don't know how long.''

Bush said he hasn't formally requested a report, but ''it will come to me.''

Defense Secretary Dick Cheney said last week that it would be premature to dismiss the service's initial findings.

But Hartwig's family and friends said the new evidence was a victory for the sailor, and further proof of his innocence.

After the explosion aboard the reconditioned World War II battleship, Bush traveled to Norfolk, Va., for a memorial service. At the ceremony, Bush promised the families of the dead crewmen that the government would determine what went wrong aboard the ship.

#90148u0737 05/28/1990 ~United Press International

PROVIDENCE, RI (MAY 28) UPI - Former Surgeon General C. Everett Koop told graduating medical students Monday the U.S. health care system has become a moral and economic ''burden'' on society and needs ''profound change.''

Koop, in an address at Brown University, said Americans are ''deeply disturbed about the state of their health care system.''

Part of the problem, he said, is that some medical technology has advanced so rapidly that people expect ''miracles'' in areas such as AIDS treatment when, in reality, progress against disease comes far slower.

But he said there is also concern that the cost of medical care continues to rise without a proportional improvement in the quality of care, and that ''more and more money'' is being spent to serve ''fewer and fewer people.''

''The health care system in America today is a terrible moral burden for society to bear, in that it is not responsive at all to some 12 to 15 percent of our fellow citizens,'' Koop said.

''And it is a terrible economic burden for society to bear in that the system satisfies its own uncontrolled needs at the expense of almost every other sector of American society.''

''The system has to be changed,'' he said. ''Not just little changes here and there. We need to bring about profound change across the board in the way we make medical health care available to all our citizens.''

In working toward change, Koop urged graduates to shun the idea of nationalized health care, for which he said there is a ''growing infatuation'' in the United States. Such systems have not worked satisfactorily in other countries and will lead to an ''erosion of quality productivity, innovation and creativity,'' he said.

''Ten years from now, I think the class of 1990 will be doing one of two things,'' Koop said. ''Either you will be working to free us from a hastily imposed national health service or you will be practicing medicine in a way that is very different than that of today, but it will be part of the best system of medical care in the world.''

While government is working on solutions to problems in the health care system, Koop urged graduates to do their part by offering free care to some patients.

''In the early years of my practice, before there was Medicaid or Medicare I found myself to be extraordinarily lucky if I got paid for as much as 60 percent of what I did,'' he said. ''But I was extraordinarily happy in my practice.''

Koop also urged graduates to think of their profession as an ''art'' of dealing with patients as much as a ''science of medicine.''

''In our scientific progress, something may have been lost, something very important. We need to restore that older 'doctor-patient' relationship and

with it, the doctor must reassume his or her position of respect for ethics, morality and integrity and needs to get away from the consumer-provider mentality.''

Koop was appointed surgeon general in 1982 by President Reagan. He left office in July 1989, reportedly angry that incoming President Bush had not done more to assure him a place in the new administration.

#90148u0770 05/28/1990 ~United Press International

(MAY 28) UPI - Tens of thousands have filed silently past the Vietnam War Memorial so far this Memorial Day weekend... many leaving messages along the black stone wall for loved ones who will never read them. One note was left yesterday to Army enlisted man Thomas Fitzpatrick, who was killed in 1969 at age 21. It read... ''Missing you doesn't get easier''... and was signed ''Di.''

The remains of five American G-I's killed during the Korean War were handed over to U-S authorities today by North Korean officials. The hand-over was the first time since 1954 that North Korea has returned the remains of servicemen. There were eight-thousand-177 others missing in action from the three-year war... as well as 389 prisoners of war unaccounted for.

Israeli authorities said today at least seven people were wounded in an explosion in a packed Jewish West Jerusalem market. Police have closed off the area to investigate the blast. Army Radio reports that police are keeping watch over the area to make sure NO Arab workers will be attacked by Jews in retaliation. The radio reports several suspects were detained after the blast.

A Lebanese fundamentalist leader says the captors of British hostages in Lebanon may set free a captive... but only if Britain expels Salman Rushdie, author of the allegedly blasphemous novel, ''The Satanic Verses.'' The leader of the pro-Iranian Islamic Amal Movement said London would NOT be obliged to deliver Rushdie to Iran or Syria... only expel him.

#90148u0771 05/28/1990 ~United Press International

(MAY 28) UPI - The Bush administration is working to de-fuse a stumbling block of Germany belonging to NATO before this week's summit between President Bush and Soviet President Gorbachev. Bush told Soviet television that a reunited Germany with full membership in NATO will NOT be a threat to the Kremlin. Bush insists that a Germany in NATO will preserve stability in Europe that Moscow should welcome.

Gorbachev will arrive Wednesday with a considerable entourage of 250 advisers... his own satellite station... six Soviet limousines... and 18 airplanes. U-S chief of protocol Joseph Reed insists that Gorbachev will treated as just another ''state visitor.'' Bush wants to make Gorbachev's visits a regular occurrence, and NOT the special event they are now.

The Polish people seemed unenthusiastic about their first free elections in 68 years. Election officials say the turn-out for local government elections was well below 50-percent. Polish election analysts believe the low-turnout was an indication of apathy among people discouraged by the drastic austerity measures adopted by the Solidarity government.

Police in West Palm Beach, Florida, are searching for a suspect and possible motive in the shooting of a woman by a man dressed as a clown. 40-year-old Marlene Warren is in critcal condition after suffering a point-blank gunshot wound to the head in the doorway of her home on Saturday. Said one police official... ''This is the strangest thing I've seen in all my 19 years in law enforcement.''

-30- 1692

#90148u0777 05/28/1990 ~United Press International

(MAY 28) UPI - Americans flew the flag proudly and shed unashamed tears for their war dead Monday, the first Memorial Day since 23 fresh graves were dug for soldiers and sailors killed in the invasion of Panama.

''They never knew whether their overall mission was successful. They were doing what they were trained to do,'' Navy Capt. Ron Pearson said at a service at Fort Sam Houston in San Antonio. ''Freedom is ours because others paid a price for our lives. God bless them all.''

President Bush, speaking at a star-spangled Memorial Day ceremony in his summer hometown of Kennbunkport, Maine, also paid tribute to servicemen who died in the December invasion that ousted Panamanian dictator Manuel Antonio Noriega.

''The day of the dictator is over and democracy and freedom are winning all around the world,'' Bush told a flag-waving crowd of several hundred in Kennebunkport's crowded Dock Square.

Bush's remarks followed a traditional Memorial Day parade through town that included high school bands, Boy Scouts, fire engines and long lines of marching veterans.

Vice President Dan Quayle laid a wreath at the Tomb of the Unknowns at Arlington National Cemetery outside Washington, D.C., where 214,000 servicemen and women are interred.

Veterans and others streamed to the Vietnam Veterans Memorial in Washington as early as a few minutes after dawn Monday, adding more flowers, written messages and mementos to those already left at the long black wall inscribed with the names of more than 58,000 Vietnam war dead.

One victim of the war whose name is not on the wall also was remembered there. The son of Air Force Master Sgt. Ronald Eugene Peterson left a poem addressed to his father, who died in 1969 of cancer he says was triggered by the trauma of the Vietnam experience.

''Your name's not here upon the wall,'' Joseph Peterson wrote to his father. ''Your wounds not visible, they took their toll. Vietnam killed your soul.''

Memorial Day began in 1866 as Decoration Day, a time for the graves of Civil War dead from both the North and South to be strewn with flowers. The observance eventually was extended to all U.S. war dead. It is now celebrated in most states on the last Monday in May, but in some on the traditional date of May 30.

Americans also took advantage of Monday's holiday to get a head start on summer suntans, hit the beach or the pool and break out the charcoal for family barbecues.

''Many people take it for leisure,'' complained Furman Walls, 65, a World War II veteran and commander of Veterans of Foreign Wars Post 9104 in Huntersville, N.C.

''They don't give it a second thought,'' said Walls, who spent the weekend tidying the graves of dead soldiers and placing flags on them. ''Way back, a soldier used to be important. He was a hero. Nowadays, he's just another person.''

The Memorial Day theme of honoring the dead was expanded in Dallas, where residents remembered the 1,451 people believed to have died of AIDS in the city with 31 rows of small wooden crosses in a local park. Small American flags were scattered among the crosses.

''Each one of the crosses represents a person who died of AIDS,'' said Tim York. ''And for every person, there was a loved one, someone like me, that has been affected.''

More than 2,700 American flags waved along the 23rd annual Avenue of Flags at Floral Hills Cemetery in Kansas City. Cemetery workers save the flags that adorn veterans' caskets and display them each Memorial Day.

''I go every year to see my son's flag,'' said Sadie Cliborn of Overland Park, Kan. ''It fills my heart with joy to see his flag flying with the

flags of the other veterans and to know that he is remembered.''

In Ohio, descendants and local officials rededicated a Revolutionary War soldier's grave. Franklin County Recorder Joe Testa, who keeps the records of veterans' graves in the county, obtained a new headstone for Capt. John Stevenson, commander of the 2nd Maryland Battalion of the Flying Camp, who moved to Ohio after the war. The original sandstone marker had been broken and buried under about 6 inches of dirt.

Eda Stevenson McMahan, 90, the captain's great-great-great-granddaughter, was to be present for the ceremony.

''I was so happy to hear that someone was taking an interest in renovating the cemetery and his gravestone,'' she said. ''We should honor our soldiers. Somebody had to fight or we wouldn't be here, would we?''

A Korean War veteran from Hull, Mass., had reason to be especially proud on Memorial Day when North Korea, in the first such transfer in 36 years, returned the remains of five U.S. servicemen killed during the conflict.

Frank Kerr, a survivor of the ferocious Chosin Reservoir battle in 1950, had been working with the Korean and U.S. governments for five years to bring about the first transfer of MIA remains since 1954.

''At the start, my biggest surprise was the lack of support from the U.S. government and the total candor and honesty the North Koreans showed us,'' Kerr said. ''We agreed from the start not to talk about the war and who was to blame, but just to focus on the MIAs.''

-30- 5429

#90148u0791 05/28/1990 ~United Press International

PARIS (MAY 28) UPI - Michael Chang, a loser of his previous three matches, found inspiration at the scene of his greatest triumph Monday, advancing along with Andre Agassi and Steffi Graf on opening day of the French Open.

''Paris seems to click with me,'' Chang said after beginning defense of his French title with a 6-2, 7-6 (7-5), 6-1 victory over Cassio Motta. ''I don't know whether it's the people, the clay or the bread, but something is definitely going well for me here.''

Agassi, who didn't even arrive in Paris until Sunday, overcame a double set point in the second set before beating Canadian Martin Wostenholme, 4-6, 7-6 (10-8), 6-0, 6-1.

''I was real frustrated, no question about it,'' said the 20-year-old fourth seed. ''I didn't feel that good even at the end of the match. I was

making a lot of errors and wasn't moving him the way I wanted to.''

Graf, coming off a rare defeat, required merely 40 minutes to crush Pascale Paradis, 6-0, 6-2, as she seeks to claim the lone Grand Slam title that does not belong to her.

There were several upsets on a sunny, warm day at Roland Garros, the most notable victims being Americans Zina Garrison and Jay Berger. Garrison, the fifth seed, fell to West German Wiltrud Probst, 6-1, 1-6, 7-5, and Berger, seeded No. 9 and a quarterfinalist here last year, was eliminated by Argentinian Alberto Mancini, 6-4, 6-2, 6-2.

Garrison, unhappy about playing at 11 a.m., led 5-2 in the final set and held a match point at 5-4, when she netted a forehand.

''It's all mental,'' the 26-year-old Texan said of her problems. ''I want it too bad, and I shouldn't put that kind of emphasis on it, it's only a game. This year I've put too much pressure on myself.''

Berger, who won the first three games before fading, said he was tennised-out after playing 17 of the last 18 weeks.

Fourth seed Gabriela Sabatini won her opening match on the red clay of Roland Garros, beating Andrea Vieira of Brazil, 6-0, 7-6 (7-4).

Chang had won only two matches this year, both in Tokyo, before being beaten in the opening contest of his last three clay court tournaments. There was even a rumor Sunday he would withdraw from the French because of an injured left wrist.

He came out strong against Motta, though, and even when he trailed 4-1 in the second set, Chang was able to draw even. Motta, from Brazil, double faulted to end the tie-break.

''It's nice to come back to Roland Garros,'' Chang said. ''Coming off such a great tournament last year has given me confidence to come back and play. The last three weeks on the clay court circuit has been tough for me and I'm just trying to play as well as I can.''

Chang, an 18-year-old from Placentia, Calif., said his wrist didn't bother him, although he wore a bandage for support.

Wostenholme, ranked No. 122, served for the second set at 5-4, only to be broken, and had double set point at 6-4 in the tie-break. Agassi then converted his third set point when Wostenholme netted a forehand.

Agassi, who next meets qualifier Todd Woodbridge, defended his lack of preparation on clay, explaining he served his needs better by remaining at

home and working on conditioning.

Graf swept the first nine games, winning 13 of the first 14 points, and was well in control before Paradis was able to hold serve in the fourth and sixth games of the second set.

''It was not the hardest match,'' said the 20-year-old West German, who did not appear too wide awake even after her victory. ''You could see she didn't have too much confidence. I'm glad to get the first match over.''

Paradis, a Frenchwoman ranked 127th in the world, admitted she was overwhelmed.

''It's really another level for me,'' she said. ''I'm not used to playing balls that go so fast. I don't know if it's a dream or a nightmare.''

This was Graf's first match since losing to Monica Seles in Berlin last week, snapping the West German's near-record 66-match winning streak.

Prior to the Seles defeat, Graf last was beaten in the 1989 French Open final by Aranxta Sanchez-Vicario. That was the only Grand Slam singles Graf has failed to win since the beginning of 1988.

Other seeded players to advance included Guillermo Perez-Roldan, No. 15 among men, and No. 8 Katerina Maleeva, No. 9 Conchita Martinez, No. 11 Jana Novotna, No. 12 Judith Wiesner and No. 15 Nathalie Tauziat. No. 13 Ros Fairbank lost to Canadian Rene Simpson.

Hana Mandlikova of Australia, the 1981 French champion, withdrew because of a groin injury and was replaced in the draw by American Jennifer Santrock.

GARDINER, N.Y. (MAY 28) UPI - A Canadian sky diver whose main parachute malfunctioned and then became tangled with his backup chute plunged 13,000 feet to his death, authorities said Monday.

Robin Sutherland of Montreal jumped from a small plane along with several other sky divers at 11:15 a.m. Sunday over Gardiner, about 80 miles north of New York City, state police said.

Sutherland, 42, tried to open his main parachute and became tangled in it. His backup chute then tangled with his main chute, leaving him with no means of halting his free fall, state police said.

Sutherland fell 13,000 feet, crashing to the ground. He was pronounced

dead at the scene by Dr. Francis Mayle of the Ulster County Medical Examiner's office.

The Federal Aviation Administration and state police said they were investigating the accident.

ATHENS, GREECE (MAY 28) UPI - Bomb explosions rocked central Athens for the second time in less than a week, slightly injuring one person and damaging nine cars, police said.

Police said the most powerful of the three explosions occurred near the Athens Hilton Hotel, scaring local residents and temporarily cutting the power supply to the Ilissia district.

No group immediately took responsibility for the blasts, which occurred in the early morning hours and were similar to a series of explosions in the nearby Kolonaki district last week.

Nine cars were damaged or destroyed in Monday's blast, and a woman was slightly injured by flying glass. The windows of several apartments were smashed.

Police said they were looking for the bombers, but still had no suspects for last week's bombings, or another series that rocked the affluent Ekali suburb north of Athens two weeks ago.

A little known extremist group calling itself November 17 claimed responsibility for the Ekali blasts.

#90148u0920 05/28/1990 ~United Press International

DUBLIN (MAY 28) UPI - Britain's Northern Ireland Secretary Peter Brooke went to Dublin Monday for talks with Ireland's prime minister aimed at bringing about an end to the political stalemate in Northern Ireland.

Brooke and Prime Minister Charles Haughey were set to meet at Dublin Castle Monday night to examine Brooke's proposal for the terms of possible talks between Northern Ireland's deeply divided political parties.

Since January, Brooke has tried to find common ground between the Unionist leaders and the nationalist Social Democratic and Labor Party.

If Brooke's proposal goes forward, the talks would be the first time since 1974 that the Protestant Unionist parties and the predominately Roman

Catholic SDLP officially negotiated a settlement on the future of the province, the Guardian newspaper said Monday.

After the Anglo-Irish agreement was signed in 1985, the Unionists have boycotted all formal political dialogue, the newspaper said. The agreement between Britain and Ireland gave the Irish Republic government a say in the running of affairs in Northern Ireland, an aspect that was totally opposed by the Unionist parties.

The two major parties have been unable to find common grounds for setting up a local government in Northern Ireland. The Unionists want a return to majority rule because two-thirds of the population are Protestant, while the Nationalists in the SDLP want to see a united Ireland.

In recent years, the British government, which has been governing Northern Ireland through direct rule from London, has been attempting to find a formula for agreement on local administration and power-sharing, or devolution, between the local parties.

Previous attempts were unsuccessful, but in the last week Brooke has proposed a formula that has been accepted as a basis for talks.

Neither the parties nor the British government is discussing the formula publicly, but officials have said they hope to start talks on a local level in September.

TRENTON, N.J. (MAY 28) UPI - Robert B. Meyner, the former New Jersey governor whose favorite-son candidacy blocked John F. Kennedy from a first-ballot nomination at the 1960 Democratic National Convention, has died, it was announced Monday. He was 81.

Meyner died Sunday at his retirement home in Captiva, Fla., after a long illness, according to Emma Byrne, press secretary to Gov. Jim Florio. Meyner suffered a stroke in September 1986 and had been in poor health since.

The precise cause of death was not immediately known, but Byrne said Meyner had suffered complications from the stroke.

''Today, New Jersey mourns the loss of one of her most ardent and outspoken supporters,'' Florio said.

''Despite his recent illness, Bob Meyner never lost interest in the public policy or the politics of New Jersey,'' Florio said. ''He loved this state and was among the first of our governors in recent memory to speak out on

New Jersey's pride and New Jersey's spirit.''

Meyner served as governor from 1954 until 1962, the first Democratic governor in a decade and the first two-term governor after the adoption of a new state constitution in 1947. He sought the post again in 1969, winning the Democratic nomination but losing the general election to Republican William Cahill.

Meyner was known as a frugal spender of taxpayer money and boasted in a 1988 newspaper interview, ''I could pinch a penny until it hurt.''

In 1957, he was challenged by Republican multimillionaire magazine publisher Malcolm Forbes, who scheduled a television campaign program to come on the air just after the end of one paid for by Meyner. Meyner ended his program with the national anthem and a picture of the flag, tricking some viewers into thinking the station had gone off the air for the night and turning off their sets.

Meyner rode his political popularity to the 1960 Democratic National Convention, where he was New Jersey's favorite-son candidate.

New Jersey's votes for Meyner kept Kennedy from locking in the nomination on the first ballot, leading to criticism from Democrats that severely wounded his political career.

''One of the great things he'll always be remembered for was the Democratic National Convention,'' said state Democratic Chairman Phil Keegan, whose father was vice mayor of Newark while Meyner was governor. ''Many people thought maybe Meyner would be the presidential candidate or the vice presidential candidate.''

Meyner's wife, Helen, who survives him, took up the political efforts of the family during the 1970s, serving two terms in Congress from 1975 to 1979.

#90148u0949 05/28/1990 ~United Press International

OTTAWA (MAY 28) UPI - Soviet leader Mikhail Gorbachev, in deep political trouble at home over his economic reforms, will get encouragement from Canadian leaders when he arrives in the capital Tuesday for a two-day pre-summit visit, government officials said.

Gorbachev, accompanied by his wife Raisa and Foreign Minister Eduard Shevardnadze, will spend most of the time in private meetings with Prime Minister Brian Mulroney and other political leaders. He travels to Washington late Wednesday for the summit with President Bush.

The Soviet President apparently will be treated with velvet gloves by his hosts in Ottawa, Canadian sources said.

Relations between Gorbachev and Mulroney have sometimes been testy in recent years. The Soviet leader was noticeably sarcastic when he greeted Mulroney in Moscow last November, asking him why it took so long to schedule the visit.

Gorbachev had already entertained President Reagan, as well as leaders from Britain, France and West Germany and his invitation to the Canadian leader had been outstanding for years.

Bush has said he would tell Gorbachev that discord over Lithuania threatens closer economic ties. Canada has been much more defensive of Gorbachev's strategy.

A senior goverment official said in a recent briefing:

''The guy has a lot of problems. ... He needs time to work (them) out. That's fair.''

Mulroney was to brief Bush on the Canadian stopover before Gorbachev arrives in Washington, government officials said.

They said the visit was an opportunity to help bolster the Soviet leader's economic and political reforms and to allay any perception among the Russians that they are outsiders in the global community.

''What is essential,'' said a senior Canadian official, ''is that he be able to tell his people that what he has set in motion is having positive effects, that arms are being reduced on both sides and the Soviet Union will be able to devote its energies to economic reform.''

During his visit to Ottawa, Gorbachev will hold bilateral talks with Mulroney and other politicians, lay a wreath at the National War Memorial and make a public speech at a luncheon at the National Gallery of Canada.

Canadian officials said Gorbachev declined an invitation to address Parliament as well as state dinners in his honor in order to spend as much time in private meetings with politicians.

Specifically, Mulroney will discuss with Gorbachev a Canadian proposal that is gaining acceptance among industrialized countries that the Soviet Union be briefed on future economic summit meetings, including one scheduled for July in Houston.

Such a move would be in keeping with the Soviet Union being granted observer status at meetings of the international trade agency which

operates under the General Agreement on Tariffs and Trade, or GATT.

Mulroney, like Bush, will also try to persuade Gorbachev that a reunified Germany should be a full member of the NATO. Gorbachev, who reluctantly accepted a swift reunification process, wants a neutral Germany.

In 1987, Canadian defense officials were considering the need to build a dozen nuclear-powered submarines to defend the high Arctic against Soviet subs. The policy was later scrapped.

But a year later, the two countries engaged in a tit-for-tat series of diplomatic expulsions over spying allegations.

Gorbachev first visited Canada in 1983 as a senior member of the Politburo in charge of agriculture.

Agriculture will be again be on the agenda this week with Canada's wheat export contract up for renewal. Wheat accounts for about 75 percent of Canadian exports to the Soviet Union, which totalled $685 million in 1989. Canada is the Soviet Union's largest supplier of grain.

#90148u0962 05/28/1990 ~United Press International

KARLSRUHE, WEST GERMANY (MAY 28) UPI - A former U.S. Army sergeant's spying for two Warsaw Pact countries at a critical stage of the Cold War could have led to a nuclear conflict in Europe, West Germany's federal prosecutor said Monday.

Prosecutor Kurt Rebman told a news conference that the alleged spying by Sgt. 1st Class Clyde Lee Conrad, 42, formerly of Bergholz, Ohio, was the worst case of high treason his office had ever dealt with.

Conrad, who retired in 1985, had been living in West Germany with his German wife and their son at the time of his arrest in August 1988 for allegedly selling top secret nuclear and other military plans to the communist governments of Hungary and Czechoslovakia between 1975 and 1986.

Conrad, who was formally indicted last year, allegedly received $1.2 million from Hungary and $120,000 from his Czech contacts, Rebman said.

Rebman said West German experts believed that if Conrad's alleged spying activities had not been uncovered, West Germany could have faced the choice of using strategic nuclear weapons ''or having to give up the defense of the Federal Republic of Germany.''

He said he would seek the maximum penalty of life imprisonment for Conrad, whose military occupation at the time of the alleged espionage activities

was as a documents custodian.

''There has been no treason case of an even remotely comparable weight,'' the prosecutor said.

He said Conrad's alleged spying activities endangered both West Germany and the 250,000 American troops stationed in the country.

Conrad is accused of having supplied the two Warsaw Pact countries with classified documents including microfilms of U.S. rocket bases, a NATO pipeline system and information on other Western military installations.

He joined the army in 1965 and was transferred to the 8th Infantry Division in Bad Kreuznach, West Germany in 1980.

#90148u0963 05/28/1990 ~United Press International

MOSCOW (MAY 28) UPI - Politburo member Alexander Vlasov re-entered the race for the Russian presidency Monday and challenged renegade Communist Boris Yeltsin's bid to gain the top post in the giant republic.

''I am a fighter, I will fight, and I do not fear the battle,'' Vlasov, the giant republic's incumbent premier, said upon announcing his renewed candidacy.

The week-long deadlock over who will rule Russia showed the high stakes involved in the contest for the leadership of the republic that takes up three-quarters of the Soviet Union and is home to half its 285 million people.

Tumult erupted when several dozen of Yeltsin's supporters rushed the podium to protest an attempt to force a vote on whether candidates from last week's inconclusive elections should be allowed to run again, a move that could have eliminated him from further competition.

In another twist in the topsy-turvy drama, ethnic Korean businessman Valentin Tsoi joined the race and promptly hailed ''Reaganomics'' as the cure for Russia's economic ills.

''Mr. (former President) Reagan, an actor who calmed people's souls, clearly understood ... that it is wrong economically to strangle enterprises with your own hands, that you can't kill the goose that lays the golden egg - that you let her live, grow and give more eggs,'' Tsoi said.

With the 1,060-seat legislature split between conservatives and radicals, Yeltsin urged his rivals to join with him to form a coalition government

to break the impasse.

''Even if I win, there will not be unity at the (legislature) unless we build this coalition,'' Yeltsin told his fellow lawmakers. ''That is completely clear.''

Yeltsin made the offer after Vlasov re-entered the race for chairman of the legislature, fracturing the competition further and weakening Yeltsin's chances for gaining an outright majority.

Vlasov, a candidate member of the Communist Party's ruling Politburo, withdrew from the race Friday before the first round of voting in which Yeltsin bested his other opponents but fell 28 votes shy of the majority needed to claim the republic's effective presidency.

Hard-line Communist Ivan Polozkov, who ran a close second to Yeltsin in the initial polling, dropped out of the race Monday.

Vlasov presents Yeltsin with a centrist opponent who could draw support from moderate deputies who voted for Yeltsin in the first round mainly because they feared Polozkov's archconservative policies.

Yeltsin, also wooing the center, vehemently rejected claims that he favors Russia's secession from the Soviet Union.

''I stand for the sovereignty of the union, for the equality and independence of all (15) republics so that their strength can reinforce our strong union,'' Yeltsin said.

Asked whether he wants Russia to remain a part of the Soviet Union, Yeltsin responded: ''That, and only that.''

Yeltsin did not elaborate on his proposal for a coalition government, and there was no immediate sign that his rivals were prepared to enter a partnership with him.

The winner of the election contest will be Russia's effective president as chairman of both the Congress and the Supreme Soviet, a smaller standing parliament to be chosen from its ranks.

#90148u1015 05/28/1990 ~United Press International

FRANKFORT, KY (MAY 28) UPI - Democrats Harvey Sloane and John Brock go into Kentucky's primary election Tuesday seeking the right to face Republican incumbent Mitch McConnell in the November Senate race.

Recent polls show Sloane ahead by a wide margin.

Brock said he had hoped to raise $500,000 for the campaign, but had managed less than $150,000. Sloane, on the other hand, has raised more than $1 million. McConnell's war chest was nearly $3 million.

Sloan has used his two previous terms as mayor of Louisville and one as Jefferson County judge-executive as his main advantage over Brock, saying, ''He has no public record I can identify.''

Brock has called Sloane ''Dr. Deficit,'' saying he is responsible for the $15 million shortfall Jefferson County is expected to experience in the next fiscal year.

McConnell is also a former Jefferson County judge-executive and is finishing his first term in the Senate. He has done little toward the primary race because his only opposition is from perennial candidate Tommy Klein, who says he is running because he needs a job.

Only two of Kentucky's seven incumbent congressmen face opposition in the primary, but five of them will have at least a token opponent in November.

Democrats Romano Mazzoli and Chris Perkins must pass an initial test, and there will also be Republican primaries in their 3rd and 7th districts.

Tim Hardy and Al Brown, also both from Louisville, are running on the 3rd District Republican ticket.

The only other congressional race on the primary ballot will be in the 2nd District where Republicans Martin Tori of Radcliff and Linda Pepper of Irvington are vying for the right to face Democratic incumbent William Natcher of Bowling Green, who has been in office for 37 of his 80 years.

Republican incumbents Hal Rogers of Somerset in the 5th District and Larry Hopkins of Lexington in the 6th District are unopposed in their campaigns for another two-year term.

In the 1st District, incumbent Carroll Hubbard, D-Mayfield, will get his only challenge from Populist Party candidate Marvin Seat in the November general election.

Former major league baseball pitcher Jim Bunning, a Republican, will try for another term against Democrat Galen Martin for the 4th District seat this fall.

In the 7th District, Democratic incumbent Chris Perkins, 35, will try to keep the seat in the family again. Perkins has served three terms since taking over when his father Carl, who held the seat for 35 years, died in 1984.

#90148u1034 05/28/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (MAY 28) UPI - Black nationalist leader Nelson Mandela has been hospitalized in a private clinic, apparently suffering a prostate problem, state-run television reported Monday night.

The television bulletin said the 71-year-old Mandela, who underwent prostate surgery several years ago, was hospitalized in Johannesburg Sunday night and was visited Monday by his wife, Winnie. It gave no indication of Mandela's condition.

The African National Congress had no immediate comment, the South African Broadcast Corp. said.

Mandela was released from 27 years of imprisonment Feb. 11 and has engaged in a hectic schedule that has taken him on numerous overseas and local

trips, often raising concern about his health.

Mandela is expected to arrive in the United States around June 20 for visits to Washington, New York and several other cities. Congressional sources had said Monday before word of Mandela's hospitalization was announced that he would address a joint session of Congress June 26.

President Bush has invited Mandela to visit the White House during his visit to the United States. He also has invited South Africa's President, F.W. de Klerk, to make a separate visit in June.

The invitations were extended after Mandela and de Klerk held their first talks on ways to end apartheid in South Africa.

During his visit, de Klerk was expected to urge the easing of U.S. economic sanctions imposed on Pretoria to express opposition to the suppression of the black majority in South Africa.

Mandela opposes removing the sanctions to keep the pressure on the South African government to continue its reforms.

#90148u1093 05/28/1990 ~United Press International

ARLINGTON, VA (MAY 28) UPI - Vice President Dan Quayle led the Memorial Day observance at Arlington National Cemetery Monday, saying the United States must remain militarily strong because ''the world is still a dangerous place.''

Under somber slate-gray skies, Quayle began the ceremonies by placing a wreath at the Tomb of the Unknowns, where four unknown servicemen killed in World War I, World War II and the Korean and Vietnam wars are buried.

He then saluted the courage of the 214,000 veterans buried at Arlington, singling out for praise Spec. Alejandro Manriquelozano, one of the 23 U.S. servicemen killed during last year's invasion of Panama.

In addition, the vice president urged Americans to ''renew our solemn commitment'' to servicemen missing in action, calling them a ''constant reminder that the world is still a dangerous place.''

Quayle cautioned that Americans must ''always be prepared'' for future dangers. He said the United States was surprised in the past by communism, Nazism and radical Islamic fundamentalism, and could be surprised again.

''Yes, freedom has made some remarkable strides in the past year. And yes, American ideals of democracy and human rights have captured the imagination of mankind. But tyrannies, armed with increasingly lethal

weapons, still threaten peace,'' he said.

Quayle, whose service in the National Guard during the Vietnam War became an issue in the 1988 campaign, led the observance for the second straight year - and again received high marks from veterans among the audience of about 5,000.

''The things he said hit home; we must always be prepared,'' said Dave Spivey of Baltimore, an Army veteran who volunteered to go to Vietnam in 1964 as a military adviser.

Ken Britter, an Air Force veteran from Toledo, Ohio, who served in Vietnam from 1967 to 1968, said, ''Regardless of what his views are or whether he served, you lay that aside. He is the vice president of the United States.''

Across the Potomac River at the Vietnam Veterans Memorial in Washington, an estimated 2,000 people gathered for a ceremony that focused on the women who served in Vietnam and on those still missing. There are eight women's names inscribed among the 58,175 Vietnam dead and missing on the black granite wall.

''Our country needs to know that we were there for them,'' said Diane Carlson Evans, who served in Vietnam as a nurse and is leading the efforts for a women's memorial on the site.

The walk along the wall was closed for the ceremony, but hundreds of relatives, friends and survivors of the men and women whose names are inscribed already had visited, leaving flags, flowers and other mementos.

While most of those who spoke held up the memorial as ''a healing place'' for one of the most divisive wars in U.S. history, keynote speaker Maj. Gen. Patrick Brady had a slightly different message.

Brady criticized the peace movement, saying, ''I am hard pressed to know what those people do to promote peace.''

''The greatest threat to peace today is the perception that there is no threat,'' he said.

-30- 3337

#90148u1124 05/28/1990 ~United Press International

FORTESCUE, N.J. (MAY 28) UPI - The owner of a 642-foot cruise ship grounded for more than a day on the sandy bottom of Delaware Bay planned Monday to evacuate 885 passengers after the Coast Guard canceled an attempt to refloat the vessel.

Capt. Larry Murdock, the Coast Guard's chief of the Philadelphia port, was forced to cancel a second attempt to use tugs to free the M.V. Regent Star at high tide, said Lt. Jim Weakley, a Coast Guard spokesman.

The 24,000-ton ship, which became stuck on the bottom early Sunday en route from the Bahamas to Philadelphia, was resting with its anchor wedged beneath the hull. Officials feared the anchor could puncture oil tanks along the ship's bottom if the vessel was moved too quickly.

''We don't want an oil spill,'' said Gregory Czerwonka, another Coast Guard spokesman. ''The fuel is old and cold and attempts have been unsuccessful to move it out of the tanks.

''The tanks are on the bottom of the ship and the ship is sitting on the anchor and, if they pull it off too fast, there is a possiblity of puncturing one of the tanks.''

A new attempt to free the ship was not immediately scheduled, Czerwonka said. An attempt to use a pair of tugs to pull the ship into deeper water at high tide Sunday afternoon failed.

The 24,000-ton Bahamian-registered ship ran aground with 1,306 passengers and crew aboard about 1 a.m. Sunday after a small fire in the engine room cut power to the ship's engines and its steering, Weakley said.

The ship, owned by Regency Crusie Lines, then drifted into the sand in 22 feet of water about 5 miles off Fortescue, N.J., he said. No one was injured in the grounding, officials said.

The 885 passengers were being taken off the ship as ''a matter of customer safety and satisfaction and convenience for Regency,'' Czerwonka said. ''Not having them on board will allow the salvage operation to progress.''

The passengers were scheduled to be moved by gangway to a ferry that runs between Cape May and Lewes, Del., and delivered to the Lewes ferry port, said Ann Burguieres, a spokeswoman for the cruise line.

From there, passengers were to be bused to Philadelphia or airports in Newark, Baltimore, Washington and on Long Island, she said.

Crew members were to be left aboard because of limited ferry space and to operate the ship.

The ship was heading for Philadelphia at the end of a cruise from Nassau in the Bahamas when the accident occurred.

The ship maintained regular food and beverage service using emergency power and passengers were treating the unintentioned extensions of their

holidays as an excuse to celebrate, Burguieres said.

''I hear we missed quite a party,'' she said.

#90148u1163 05/28/1990 ~United Press International

(MAY 28) UPI - Like many Americans, President Bush is involved in Memorial Day observances and leisure activities today. Bush hit the golf course early this morning in the town of Kennebunkport, Maine, where he is spending the long weekend. He will address a Memorial Day ceremony this morning and return to the White House tonight. Bush told reporters that he is almost ready for his summit with Mikhail Gorbachev later this week.

President Bush says he's reserving judgement in the case of Clayton Hartwig, the sailor blamed for causing the gun turret explosion aboard the U-S-S Iowa in April of 1989. But Bush told reporters today that if Hartwig is proven innocent, the government should apologize. Scientists told Congress on Friday that the blast could have been an accident. Hartwig and 46 others died in the explosion.

Jerusalem police have rounded up about 20 suspects in the bombing of a Jewish market today. The bomb wounded at least 10 people in the market in Jewish west Jerusalem. Shop-keepers say most of the Arab workers in the market fled after the explosion. At one point, police had to force Jewish shoppers away from Arab workers.

20 Armenians died yesterday in clashes with Soviet Interior Ministry troops in the republic's capital of Yerevan. A spokesman in Moscow said that Armenians fired on troops in the morning at the Yerevan rail station and later in another section of the Armenian capital. Six Armenians died in the first incident and 14 in the other.

The Washington Post says that Transportation Secretary Skinner may be about to make some changes in the operation of aviation security and intelligence. Skinner reportedly said that he may switch the functions from the jurisdiction of the Federal Aviation Administration to his office. The change would be in line with a recommendation of the commission that investigated the December 1988 terrorist bombing of Pan American World Airways Flight 103.

In Columbus, Ohio, today, Franklin County Recorder Joe Testa is making sure that a Revolutionary War soldier is included among those honored on this Memorial Day. Testa's Adopt-A-Cemetery program is intended to ensure that NO veteran's grave site will be left UNremembered on Memorial Day. Testa located the grave of Captain John Stevenson, and replaced his buried and broken headstone with a new one.

#90148u1165 05/28/1990 ~United Press International
PANAMA CITY, PANAMA (MAY 28) UPI - Panama criticized Monday a U.S. proposal that would let the U.S. Coast Guard patrol Panamanian waters to curb drug trafficking.

''We must not permit the U.S. Coast Guard to be navigating in Panamanian waters as if it were their own ocean,'' Foreign Minister Julio Linares said.

The U.S. proposal is aimed at intercepting drug shipments from Colombia, Linares said. A Panamanian official would be on board each U.S. vessel under the plan.

Linares said he discussed the proposal with a State Department official in New York last week. He said the talks over the proposal are in an ''embryonic stage'' and would not give further details.

''The Foreign Ministry will make a study of the proposal and express its point of view,'' Linares said. ''It is possible that changes will be made, but as it is I do not like it.''

Officials at the U.S. Embassy and the U.S. Southern Command could not be reached for comment on the proposal.

Panama's National Maritime Service is responsible for patrolling Panamanian waters and intercepting contraband, but the service has only two patrol boats.

In January, Panama signed a broadly worded agreement to cooperate with the United States to combat drug trafficking - a move which made it eligible for a full slate of U.S. foreign aid programs. Last week, President Bush signed a bill that includes $420 million in aid for Panama.

''The government is willing to contribute to the supression of drug trafficking,'' Linares said.

Panama became ineligible for U.S. aid in 1988 and 1989 after former dictator Manuel Noriega was indicted in Florida on drug trafficking and money laundering charges. Noriega, who is awaiting trial in a Miami jail, was ousted when U.S. forces invaded Panama last December and installed a civilian government.

Also Monday, the U.S. officials turned over control of a causeway in Panama City and three small islands to Panama. The areas had been occupied by U.S. troops since the invasion and were formerly used as a training site by Noriega's Panamanian Defense Forces.

Linares said two weeks ago that the presence of U.S. troops on Panamanian territory outside of U.S. bases was damaging his country's international image. U.S. troops still occupy a number of former Panamanian military installations while about 500 U.S. troops work with local police.

(MAY 28) UPI - The human rights group Asia Watch is criticizing the Chinese government for its policy toward Tibet. Asia Watch issued a 102-page report today that accuses China of still engaging in ''merciless repression'' of Tibet. The report comes the week after the U-S government extended China's most-favored-nation trade status.

The Federal Aviation Administration and New York state police are investigating a skydiving accident in which a Canadian man plunged 13-thousand feet to his death. Authorities say the man's main parachute malfunctioned and then became tangled with his backup chute yesterday.

#90148u1624 05/28/1990 ~United Press International

(MAY 28) UPI - President Bush told a Memorial Day crowd in Kennebunkport, Maine, today that he will welcome Soviet President Gorbachev with ''open arms'' this week, but will ''stand firm'' on U-S principles when they discuss world affairs. Bush spoke to the audience after watching a Memorial Day parade with high school bands, Boy Scout troops, fire engines and marching war veterans.

Reports from a news agency and police in India say Sikh extremists today killed 16 people in a new cycle of violence in the nation's northern Punjab state. Police say 13 of the victims were migrant farm workers, who were wakened from their sleep and forced to chant separatist slogans before being gunned down. Authorities say the Khalistan Liberation Force and the Khalistan Commando Force jointly claimed responsibility for the attacks.

The U-S State Department is voicing concern about the latest acts of violence in Israel. A State Department spokeswoman says the United States deplores today's bombing in a crowded Jerusalem market, which injured at least 10 people. The spokeswoman says ''such cowardly and barbaric acts only impede those who work toward peace.'' Israeli police rounded up about 20 suspects after the bombing.

The Soviet Union's official Tass news agency says NO casulties have been reported from an earthquake that rumbled through northern Armenia today. The tremor damaged several villages in the region which was devastated by

a December 1988 quake that killed at least 15-thousand people. Tass decribes today's quake as moderate, but says NO Richter scale reading was immediately available.

#90148u1628 05/28/1990 ~United Press International

(MAY 28) UPI - Long Island authorities are labeling as suspicious a blaze that claimed the lives of two young girls this morning in their Uniondale, New York, home. Officials are trying to determine the cause of the fire. The girls' grandmother was listed in critical condition with burns over 15 percent of her body.

Slightly more than half of Arkansas' one-point-one-Million registered voters are expected to cast ballots tomorrow in primaries for state offices and one congressional district. Democratic Representative Bill Alexander faces stiff opposition in his bid for re-nomination to his northeastern district. Voters will also select nominees for governor, lieutenant governor, attorney general and secretary of state.

-30- 886

#90148u1781 05/28/1990 ~United Press International

(MAY 28) UPI - Israeli police say a pipe bomb exploded in a Jerusalem market crowded with shoppers, killing an elderly man and wounding nine other Jews. Police rounded up 87 Arab suspects after the explosion... which came eight days after an Israeli opened fire on Palestinian workers, killing seven of them.

The Press Trust of India reports that 16 people were killed by Sikh extremists in Punjab state. Among those killed were 13 migrant Hindu road workers... routed from their sleep and forced to chant separatist slogans before being gunned down.

President Bush vows to ''stand firm'' on his principles when meeting with Soviet leader Gorbachev at a summit later this week. Bush told a flag-waving crowd at his summer hometown in Kennebunkport, Maine, that Gorbachev will be welcomed with ''open arms'' to the United States, as the two leader discuss world affairs.

Afghanistan's capital came under rocket fire again today, killing six people and wounding 20 others. At least 20 people have died and more than 100 wounded since U-S-backed rebels began assaulting Kabul with rockets nine days ago. Officials say the attacks are aimed at disrupting a grand tribal assembly.

Memorial Day ceremonies were held today across the nation. In Kennebunkport, Maine, President Bush paid tribute to servicemen who died

in the invasion of Panama last December. Vice President Quayle laid a wreath at the Tomb of the Unknowns at Arlington National Cemetery near Washington, D-C. 214-thousand servicemen and women are buried there.

#90148u1799 05/28/1990 ~United Press International

(MAY 28) UPI - Burma's military government is conceding defeat following the Southeast Asian nation's first free elections in 30 years. The ruling junta says it will hand over power to Burma's main opposition party once a constitution is drafted. UNofficial returns show that the National League for Democracy won two-thirds of the vote in yesterday's election.

A three-day Arab summit got underway in Baghdad, but with several key figures absent. The United Emirates News Agency says Syrian leader Hafez Assad and the leaders of Algeria, Morocco and Oman did NOT attend. Arab radio stations say Libyan leader Moammar Gadhafi decided to attend at the last-minute.

The semi-official China News Service says Tibet has adopted security measures sharply limiting political and religious protests in the Himalayan region. The leadership of Tibet's nominally autonomous legislature enacted the security law Wednesday... following China's lifting of martial law in the area.

A top government official in Gabon warns that the African nation will suffer serious economic problems if oil production does NOT resume within 10 days. The evacuation of some oil workers from Port Gentil led to a near-halt in oil production. At least two people were killed in riots last week sparked by the mysterious death of an opposition leader.

The Loch Ness Monster may or may NOT be real... but the legendary ''Nessie'' brings in real tourist money to the Scottish Highlands. A study published today says tourists spend as much as 42-Million dollars each year in the hopes of catching a glimpse of the elusive creature.

#90148u1819 05/28/1990 ~United Press International

(MAY 29) UPI - DIGEST:

Basketball

The Phoenix Suns and Utah Jazz will open the 1990-1991 NBA season at the Tokyo Metropolitan Gymnasium, November 3-4, 1990. The teams will play twice in the first regular season games by an American professional sports league outside North America.

College

UCLA freshman Heather Compton tossed a one-hitter to lead the Bruins to a 2-0 victory over Fresno State and a third straight NCAA softball championship. Compton, 18-1, carried a perfect game into the fifth inning before giving up a single. UCLA, 62-6, has won the NCAA title in six times in the last eight years.

... Kansas City Royals catcher Bob Boone, on the disabled list, followed his son's college baseball team to Baton Rouge, La. for the NCAA tournament.

Bret Boone is an infielder for the Southern California.

College Basketball

Austin Peay University basketball coach Lake Kelly resigned after coaching 11 years with the Ohio Valley Conference school. Kelly, 55, who said he was leaving to pursue a career in private business, compiled a 189-122 record at the school. Austin Peay Athletic Director Tim Weiser said the school would begin an immediate search for a successor to Kelly.

Cycling

Adriano Baffi of Italy won the 11th stage of the Tour of Italy cycle race, edging out the field in the final mass sprint of the 241-kilometer stage from Cuneo to Lodi, near Milan. Compatriot Gianni Bugno retained the lead in the overall standings.

Football

Representatives from the U.S., Mexico, Australia and New Zealand will attend the initial organizational meeting of the National Spring Football League, June 1 in Las Vegas, Nev. The meeting will determine which cities will be granted franchises for the 1991 season beginning in February.

Golf

Australian Mike Harwood won the third event of his career on the European Tour when he lifted the PGA Championship title at Wentworth, England. Harwood's last round 3-under-par 69 left him with a four round total of 17-under-par 271, one stroke in front of U.S. Masters champion Nick Faldo and South African John Bland.

Harness racing

Two Swedish harness drivers were arrested for drunk driving during a trotting race in Stockholm. The drivers, whose names have been withheld by

the Swedish trotting association, were suspended for one month.

Hockey

Borje Salming, who played for 17 seasons in the National Hockey League, signed a 2-year contract with AIK of Stockholm.

Lacrosse

Syracuse won its third straight NCAA championship with a 21-9 rout of Loyola (Md.) Gary Gait and Greg Burns scored five goals apiece for the Orangemen, who finished the season 13-0. Loyola, 11-3, was led by Chris Colbeck's five goals.

Miscellany

Mike Pavel, who learned to fish just two weeks ago, landed a snapping, 16-inch piranha in a Washington state lake over the Memorial Day weekend. Pavel, 19, said he caught the fish Sunday on Clear Lake with a marshmallow and a worm. Officials from the Washington Wildlife Department confirmed the fish was a piranha, which usually lives in South America.

Road Running

Rosa Mota of Portugal won a record fifth women's title in the Boulder 10-kilometer race at Boulder, Co., and Martin Pitayo of Mexico took the men's event. Mota, 31, who won her third Boston marathon this year and the 1988 Olympic marathon, was timed in 33.14. Pitayo, 30, who returned to racing last year after a two-year injury break, finished just two seconds off the record with a time of 28.48

Soccer

Luciano Pavarotti enthralled 8,000 fans who attended a concert at the Palatrussardi sports arena as Milan prepares for the opening of the World Cup, June 8. At intermission, players from each of the previous 13 World Cups were honored including Argentine star Diego Maradono and the legendary Pele. ... Dutch superstar Ruud Gullit is hoping to stamp out any lingering doubts about his playing condition when Holland faces Austria Wednesday in a warmup for the World Cup. Gullit has only played a handful of games since undergoing three knee operations last year.

Yacht racing

Maiden, the only yacht in the Whitbread Round the World Race with an all-female crew, finished the race in 18th place overall and second place in Division D behind French entry Esprit de Liberte. Maiden, a Britsh entry, took 22 days, 17 hours, 59 minutes and 8 seconds to complete the

sixth and final leg of the race from Fort Lauderdale, Florida to Southampton, England.

#90148u2034 05/28/1990 ~United Press International

(MAY 28) UPI - West German prosecutors charge that a U-S serviceman spying for two Warsaw Pact countries could have caused a nuclear war in Europe.

Prosecutor Kurt Rebman told reporters that alleged spying by former Sergeant First Class Clyde Conrad was the worst case of espionage his office has ever dealt with. Conrad is accused of selling nuclear and other military plans to the communist governments of Hungary and Czechoslovakia between 1975 and 1986.

Rebman says that Conrad allegedly received one-point-two-Million dollars from Hungary and 120-thousand dollars from Czech contacts.

The prosecutor says that if the spying had NOT been UNcovered, West Germanywould have faced the choice of using strategic nuclear weapons, or-in his words- ''having to give up the defense of the Federal Republic of Germany.''

Rebman vows to seek the maximum penalty of life imprisonment for Conrad... formerly of Bergholz, Ohio.

Dallas has expanded on the Memorial Day theme of honoring American war dead.

Residents today lined up 31 rows of wooden crosses in a park to remember the 14-hundred-51 people believed to have died of AIDS in the city.

As one Dallas resident explained- ''each one of the crosses represents a person who died of AIDS. And for every person, there was a loved one, someone like me, that has been affected.''

In Kansas City, more than 27-hundred American flags are flying today at Floral Hills Cemetery, where workers save flags that adorn veterans' caskets to display each Memoral Day.

And at Fort Sam Houston in San Antonio, services were held today for the 23 Americans who died in the latest U-S miltary action. Navy Captain Ron Person spoke during the ceremony, saying the sailors who died during the invasion of Panama ''never knew whether their overall mission was successful.''

While many Americans are honoring their dead, others are taking advantage of the holiday to get a head start on summer suntans or join family barbecues.

#90148u2055 05/28/1990 ~United Press International

(MAY 28) UPI - The South American nation of Colombia has elected as president a hardliner in the war against the drug cartels... making him what a U-S diplomat calls ''the most threatened man in Colombia right now.''

Cesar Gaviria vows to take a tough stance against cocaine-consuming nations, including the United States.

He promises to demand more economic help to battle the powerful Colombian drug leaders. Gaviria told foreign reporters that ''the international solidarity has been more rhetoric than real.''

Gaviria wears a bullet-proff vest to public appearances and travels in an a caravan of armored cars and jeeps carrying bodyguards

With more than 90 percent of the ballots counted from yesterday's election Gaviria had 48 percent of the vote... double his nearest opponent.

Gaviria says the vote demonstrates support for a policy of making ''NO concessions'' to the Medillin drug cartel... which has declared war on the

nation. Gaviria is scheduled to take office August 7th.

Another round of violence in northern India.

The Press Trust of India and police in India's northern Punjab state say Sikh extremists killed 16 people... bringing to at least 32 the number killed in three days.

Authorities say the worst incident of the day came before dawn, when gunmen dressed as police officers rousted migrant workers sleeping near a highway.

Police... quoting laborers who escaped... say the Hindu workers were forced to chant separatist slogans before being gunned down. 13 were killed.

Police say extremists also shot three other people in separate incidents around the state.

More than seven-thousand people have died since the Sikh extremists launched their drive for a separate state in 1983.

Militants want a separate nation for India's 16-Million Sikhs, saying they face discrimination by the Hindu-dominated central government.

Government officials in Punjab claim today's killings are part of a Pakistani conspiracy to inflame tension among India's religious groups.

-30- 2207
#90148u2071 05/28/1990 ~United Press International
(MAY 28) UPI - The Washington Post says Transportation Secretary Skinner wants control of aviation security and intelligence.

Skinner told the paper that he will likely take the recommendation of a commission that investigated the 1988 terrorist bombing of a Pan Am jet over Scotland, in which 170 people were killed. The commission report criticized the F-A-A, Pan Am and others involved in security.

Skinner reportedly said ''it's fair to say we've taken the report very seriously.''

The panel recommended putting security and intelligence directly under control of the nation's highest transportation official. It called for a C-I-A delegate to work in the new Transportation office.

But Skinner vows to go a step further by moving Coast Guard and maritime intelligence security directly into the Transportation Department.

The size of a fish often gets bigger as the story of its capture is retold. But how about the size of its teeth?

A 19-year-old man who recently immigrated to Spokane, Washington, from Romania landed a 16-inch pirahna during the weekend using a marshmallow and a worm as bait. Mike Pavel says the fish's mouth was moving ''open and closed very fast.'' And, Pavel says, ''there were lots of teeth.''

But doN'T worry about taking a swim in the Spokane Valley... Pavel says he got scared after landing the fish, so he killed it with a piece of wood. In his words- ''it was way too big.''

Wildlife officials confirm Pavel's fish tale, saying the piranha probably came from someone's aquarium.

-30- 1713

#90148u2208 05/28/1990 ~United Press International

(MAY 28) UPI - NO group has claimed responsibility for three bomb explosions that rocked Athens, Greece, today... injuring one person. The most powerful explosion occured near the Athens Hilton Hotel, temporarily cutting power to the area. It was the second time in less than a week that explosions have hit central Athens.

Black nationalist leader Nelson Mandela is hospitalized in a private Johannesburg clinic for what a senior African National Congress official said was a ''routine'' examination before he begins trips to Europe and the United States. South Africa's state-run television earlier said Mandela is suffering from a prostate problem.

Another twist in the race for the Russian presidency. Politburo member Alexander Vlasov re-entered the contest today, declaring himself a''fighter.'' Vlasov is challenging renegade Communist Boris Yeltsin's bid for the top post in the giant republic that makes up three-quarters of the Soviet Union.

A former Romanian army garrison commander testified that Nicu Ceausescu... son of the nation's executed dictator... was drunk when he ordered police to kill anti-government protestors. Ceausescu is conducting his own defense in his trial on charges of genocide. He tried to show through testimony that the shoot-to-kill order was just an after-dinner remark.

Canadian sources say Soviet President Gorbachev will be treated with velvet gloves when he visits Ottawa in advance of his Washington summit. One senior Canadian government official says the idea is to be supportive of Gorbachev so he will be able to devote his energies to his economic reforms at home.

Highly-placed government sources in Gabon say the government is ready to send in troops and declare a state of siege in the petroleum center of Port Gentil. The move is being considered to resume oil production in the port and establish peace so foreign workers who fled rioting will return.

Britain's Northern Ireland secretary is in Dublin today for talks tonight with Ireland's prime minister. Peter Brooke and Prime Minister Charles Haughey will examine Brooke's proposal for the terms of possible talks between Northern Ireland's deeply-divided political parties.

In Atlanta, a 12-year-old girl is recovering after getting hit by a bolt of lightning while playing softball at a park. Hospital officials say Shannon Flynn is in critical condition. Elsewhere, storms brought rain today to much of the nation, dampening holiday plans from New England through the Plains.

-30- 2702

#90148u2694 05/28/1990 ~United Press International

(MAY 28) UPI - The Soviet commander in Armenia is calling for ''decisive measures'' to disarm nationalists he blames for three days of deadly unrest. At least 20 Armenians and one Interior Ministry officer have been killed in the clashes that included a gunbattle between militants and soldiers at a rail station. Soviet television showed footage of bloodstained benches and walls in the station.

Panama is criticizing a U-S proposal that would let the U-S Coast Guard patrol Panamanian waters to curb drug trafficking. Panama's foreign minister says he does NOT wants the United States- as he puts it- ''navigating in Panamanian waters as if it were their own ocean.'' The minister says he discussed the plan with a State Department official in New York last week.

The owners of a 642-foot cruise ship grounded on the bottom of Delaware Bay began evacuating the 885 passengers today after the Coast Guard decided against trying to refloat the vessel. A Coast Guard spokesman says a second attempt to use tug boats to refloat the vessel was canceled at high tide. The M-V Regent Star ran aground off the New Jersey coast yesterday after a small engine room fire cut power to the ship's engines and steering.

C. Everett Koop is NOT pleased with the state of his profession. The former surgeon general told graduating medical students at Brown University in Providence, Rhode Island, today the nation's health care system needs- in his words- ''profound change.'' Koop says one of the problems is that ''more and more money'' is being spent to serve ''fewer and fewer people.''

-30- 1764
#90148u2728 05/28/1990 ~United Press International
(MAY 28) UPI - Vice President Quayle says the United States must remain strong militarily because- in his words- ''the world is still a dangerous place. Quayle led Memorial Day observances at Arlington National Cemetery outside Washington, D-C. Quayle saluted the courage of the 214-thousand veterans buried at Arlington... singling out for praise one of 23 U-S servicemen killed in the U-S invasion of Panama last December.

Israeli military sources in Jerusalem deny an UNconfirmed report on Monte Carlo radio that Israeli forces are being mobilized along Israel's borders with Arab states. Israeli sources say ''there has been NO change in deployment of military personnel.'' The Monte Carlo broadcast came as Arab leaders began an emergency summit in Baghdad to discuss the heightened tensions in the Israeli-occupied terroritories.

An attorney for John Demjanjuk says the convicted war criminal is NOT the only person who lied on U-S immigration documents to avoid repatriation to the Soviet Union. The lawyer says the retired American auto worker was one of thousands of Ukrainians who lied to avoid getting sent back to the U-S-S-R. Israel's Supreme Court is hearing an appeal of Demjanjuk's conviction that he served as a Nazi death camp guard. He faces death by hanging.

African National Congress officials say black leader Nelson Mandela has been hospitalized for ''routine'' medical tests. An A-N-C official says Mandela is getting ''a few days rest'' at a Johannesburg clinic where he will undergo medical tests for prostate problems. The 71-year-old Mandela had prostate surgery in 1985. He is scheduled to leave for trips next month to the United States and Europe.

-30- 1859
#90148u2866 05/28/1990 ~United Press International
(MAY 28) UPI - The Louisiana House was at work this Memorial Day approving a law that drastically reduces penalties for anyone convicted of assaulting a person who desecrates the U-S flag. The bill's sponsor, James Cain, told lawmakers he's- quote- ''sick and tired of marijuana-planting dope-smoking hippies burning the American flag.'' The lower chamber approved the bill, 54-39, and sent it on to the Louisiana Senate for further action.

A study released on the holiday set aside to honor the nation's war dead does NOT say good things about the care America's 27-Million living veterans are receiving. The Los Angeles Times says an average V-A hospital is more likely than other hospitals to fall below quality standards in

surgery, emergency room and intensive care. The study of 116 V-A hospitals was done by the commission that accredits most of the nation's health care facilities.

Talks to try to mediate an end to El Salvador's civil war resumed today in Venezuela's capital of Caracas. In El Salvador, a rebel commander spoke to reporters about the peace talks... saying a break down would prompt a ''major offensive'' by the guerrillas. The rebel leader says a massive offensive last November created conditions for serious negotiation... and rebels are ready to take that tact again if necessary.

Soviet leader Gorbachev is expected to get encouragement from Canadian leaders when he arrives in Ottawa tomorrow for a two-day visit. Officials say Gorbachev, his wife, Raisa , and Soviet Foreign Minister Shevardnadze will spend most of the time in private meetings with Prime Minister Mulroney. Canadian officials say Mulroney will brief President Bush on the visit before Gorbachev heads for the Washington superpower summit, which begins Thursday.

-30- 1944

#90148u3052 05/28/1990 ~United Press International

(MAY 28) UPI - Americans honor their war dead and kick off the summer season on this Memorial Day...

A disturbance at a rap music concert in Houston injures at least 11 people...

And violence in Jerusalem leaves one dead...

These stories... and more... next, from United Press International:

Americans kicked off the unofficial start of summer today with barbecues, picnics and trips to the beaches.

Others marked the holiday honoring the nation's war dead in a more traditional manner... attending parades and visiting cemeteries.

The fact that many people view Memorial Day as a day for leisure irks Furman Walls, who spent the weekend tidying the graves of soldiers in Huntersville, North Carolina. As the 65-year-old World War Two veteran explains- ''Way back, a soldier used to be important... nowadays, he's just another person.''

State legislators in Louisiana were feeling even more disgusted with people they view as unpatriotic. The state House marked the day by approving a bill that would dramatically lessen the penalty for assaulting someone who desecrates Old Glory.

In the words of Democrat David Cain- ''I am sick and tired of marijuana-planting, dope-smoking hippies burning the American Flag.''

In Kennebunkport, Maine... President Bush paid tribute to the 23 U-S servicemen who died in the December invasion in Panama. Bush declared to a flag-waving crowd- ''The day of the dictator is over.''

And Memorial day festivities took on particularly somber tone in Davie, Florida, with the death of a seven-year-old girl. Police say Vanessa Carter was watching a parade when her horse fell on top of her, kicking and trampling the child before running off.

There were other injuries today as a crowd angry by delays in a rap music concert grew unruly in Houston. Police say bottles hurled by impatient fans set off a dirsturbance that left at least 11 people injured and several arrested.

The riot occurred at a large park where an estimated 10-thousand people had gathered to hear the bands Queen Latifah, Doc and 2 Live Crew.

-30- 2267

#90148u3074 05/28/1990 ~United Press International

(MAY 28) UPI - Violence erupted in Israel today. A bomb went off in Jerusalem's main market... killing a 72-year-old man and wounding nine other Jews.

In calls to Western news agencies, two groups claimed responsibility... the Islamic Jihad Organization in Palestine and Fatah-The Uprising group. The market was crowded with shoppers preparing for a Jewish holiday tomorrow.

The attack served to escalate Arab-Israeli tensions. Police rounded up dozens of Arab suspects following the blast.

At the same time, officials say police stepped up patrols throughout the city to prevent retaliatory strikes against Arabs. After the attack, angry Jews beat several journalists... injuring a photographer, who was taken to a hospital for treatment.

Today's explosion comes just eight days after an Israeli civilian dressed as a soldier opened fire on Palestianian workers... killing seven and triggering riots in the Gaza Strip and West Bank.

Also today, Israeli military officials denied reports that troops were being mobilized along Israel's borders with Arab states. Monte Carlo radio broadcast UNconfirmed reports of Israeli troop mobilization as Arab

leaders opened a meeting in Baghdad, Iraq.

A Soviet commander in the republic of Armenia wants to turn up the heat on militant nationalists he blames for three days of clashes. At least 20 Armenians and a Interior Ministry officer have been killed in the violence.

The commander told the Soviet news agency Tass the situation in Armenia is UNpredictable. He blames the violence on what he describes as the tolerance ''of the illegal armed group by the leadership of the republic.''

The Soviet general called for ''decisive measures'' to disarm militant Armenian nationalists. A spokesman for the Interior Ministry in Moscow says there were casualties in at least two separate clashes yesterday... at the Yerevan rail station and the Oshernsky region of the Armenian capital.

Leaders of the All-Armenian National Movement and the republic's Comunist Party appealed for calm as thousands of Armenians marked the Armenian national day with demonstations.

Thousands of Interior Ministry and regular army troops have been sent to Armenia and neighboring Azerbaijan during the last two years to keep peace between the two Soviet republics. Both states have raised vigilante armies since engaging in a near civil war in January.

-30- 2584
#90148u3099 05/28/1990 ~United Press International
(MAY 28) UPI - Nelson Mandela is undergoing what hospital officials and aides describe as ''routine tests'' in a private clinic in Johannesburg, South Africa.

The clinic's general manager says the family of the black nationalist leader will be releasing a statement tomorrow on Mandela's condition. But he says the 71-year-old Mandela is ''in NO danger what-so-ever,'' but declined to comment on a report that Mandela would undergo minor surgery.

Mandela's grueling foreign and local travels since his release from prison more than three months ago have raised concerns about his ability to maintain the pace. Last week, Mandela returned from a six-nation African tour and addressed two rallies in South Africa during the weekend.

He is scheduled to embark next week on an extensive trip to Europe and the United States.

The countdown clocks at Cape Canaveral, Florida, are ticking smoothly toward a predawn lift-off Wednesday for the shuttle Columbia on a 10-day mission to check out the stars.

Rocket engineers are working on repairs to a faulty cockpit display... but NASA test director Albert Sofge says ''basically things are going well.'' Even the weather seems to be cooperating. Air Force meteorologists predict a 90-percent chance of favorable weather at launch time.

Columbia will be carrying the ''Astro-1'' observatory into space. It's a battery of four telescopes builty to study ultra-violet light and X-rays from targets deep in outer space... including black holes, quasars and exploding stars.

Astronomers hope to use Columbia's perch 219 miles above the Earth to open a new window on the universe, gathering information to complement studies from the orbiting Hubble Space Telescope.

-30- 1894

#90148u3114 05/28/1990 ~United Press International

(MAY 28) UPI - A NOT-so-high-seas adventure is ending today for 885 passengers stranded for more than one day on a cruise ship that ran aground in Delaware Bay off the New Jersey coast.

Passengers were evacuated from the vessel after the Coast Guard abandoned plans to use tugs to drag 642-foot M-V Regent Star off the bay's sandy bottom. A Coast Guard spokesman says crews gave up when attempts failed to move fuel oil out of the ship's bottom tanks.

Officials say they were taking precautions against an oil spill. The Coast Guard says NO new attempts to free ship were immediately scheduled. The vessel ran aground yesterday after a small engine room fire cut power to the ship's engine and steering. The ship was heading for Philadelphia following a cruise to Nassau in the Bahamas.

NO one was injured in the grounding. Authorities say passengers are being evacuated ''for their own convenience'' and to allow the salvage operation to progress.

Things doN'T just go bump in the night in Orlando, Florida.

People also hear ''things blowing up'' and jackhammers operating so close to their homes that their walls vibrate and crack.

The late-night activity stems from Universal Studios' 630-Million-dollar theme park and sound stages. Besides being a tourist attraction, the new park is also a working movie, television and commercial operation. For nearby residents, it's one big nuisance when trying to sleep.

And some of them are worried it will only get worse after the theme park

holds its grand opening June 7th.

The city's chief of planning and zoning says there's little he can do. Richard Levey says NONE of the various noises are loud enough and long-lasting enough to violate the city's noise ordinance.

In fact, Levey says the 444-acre attraction is quieter than living near a rowdy bar or an airport.

(MAY 28) UPI - The head of Soviet Interior Ministry troops in Armenia says ''decisive measures'' must be taken to quell a surge in militancy in the volatile republic. Gun battles between Moscow-controlled troops and Armenian nationalists during the past three days have left at least 21 combatants dead.

Pakistan is refusing to comment on a published report that says U-S spy satellites have photographed ''heavily armed convoys'' leaving a nuclear weapons complex near Islamabad. It's also reported the Soviets have detected that Indian nuclear arms are being readied for use.

Aides to South African black nationalist Nelson Mandela say the 71-year-old leader has been admitted to a private Johannesburg clinic for ''routine tests.'' Mandela has maintained a grueling schedule since his release from prison February 11th.

Florida officials say nine people aboard a northbound Amtrak train were hospitalized this morning when their train plowed into a sewage truck that pulled onto the track. The accident involving the Silver Meteor occurred about nine miles northwest of Indiantown.

Officials in Davie, Florida, say a seven-year-old girl suffered fatal internal and head injuries this morning when her horse fell on top of her. The horse then kicked and trampled the girl before it ran off.

#90148u3199 05/28/1990 ~United Press International

(MAY 28) UPI - The Louisiana House passed legislation today which would severely reduce penalties imposed against a person convicted of assaulting someone who desecrated the U-S flag. The bill's author described flag burners as- quote- ''marijuana-planting, dope-smoking hippies.''

Officials in Nassau County, New York, say a morning blaze that claimed the lives of two children and critically injured their grandmother today was deliberately set. A county police spokesman says the fire was

intentionally set in several places.

Striking rail workers in northern Poland ended their wildcat strike today, after an all-night meeting with Solidarity leader Lech Walesa . The strike's end comes one day after Poland's first free vote in 68 years.

Salvadoran rebels and government representatives resumed talks today in Venezuela toward ending the Latin American nation's 10-year-old civil war. A rebel leader in El Salvador says his group is prepared to bear arms again if the present talks fail.

Houston authorities say a string of delays at a free outdoor rap music concert prompted some members of the 10-thousand-person audience to lose their tempers. At least 11 people were injured in the ensuing violence and several people were arrested.

#90148u3290 05/28/1990 ~United Press International

(MAY 28) UPI - Pakistan's foreign ministry is keeping mum on a London newspaper report that the superpowers are worried rising tensions along the Indian-Pakistani border may lead to nuclear war. The Sunday Times says U-S spy satellites recently photographed ''heavily armed convoys'' leaving a nuclear arms plant near Pakistan's capital. The report also says the Soviets have detected signs that Indian nuclear weapons ''are being readied for use.'' India says Pakistan is aiding a separatist movement in India's predominantly Moslem Kashmir state.

The National Asbestos Council says what you doN'T know can hurt you. Government estimates say as many as one-quarter of the homes in America are equipped with asbestos. But the NON-profit Atlanta-based group says only four-point-two percent of the people questioned in a nationwide survey said they were aware of asbestos in their homes. The cancer-causing material is a common fireproofing and insulating material.

The White House is trying to ease Soviet fears over a re-unified Germany's possible NATO membership in advance of this week's summit in Washington. Speaking in Utah today, National Security Adviser Brent Scowcroft says President Bush will try to convince Soviet President Gorbachev the idea makes sense for both sides. Scowcroft says a united Germany in NATO would help preserve stability in Europe.

President Bush came away from a four-day weekend in Maine... tan, refreshed and ready to make final preparations for the superpower summit that begins Thursday. Bush told reporters before returning to the White House that ''we've got a big agenda and I look forward to it.'' Bush concedes differences over German unification and the drive for independence in the Baltic republics are the biggest sticking points in

U-S-Soviet relations.

#90149b0006 05/29/1990 ~Business Wire
PORTLAND, OR (MAY 28) BUSINESS WIRE - WTD Industries Inc.'s (NASDAQ:WTDI) President Bruce L. Engel confirmed that the recent decline in lumber prices will put pressure on earnings for all lumber producers.

''The 25 to 30 percent drop in Douglas fir lumber prices and in other green coastal species since mid-April, if sustained, should result in industry-wide curtailments in the Northwest. At these lumber price levels we also expect log costs to decrease, which would help re-establish a more normal relationship between log and lumber prices.''

In response to these depressed market conditions, Engel said, ''WTD continues to operate conservatively. We are continuing our program to reduce capital expenditures and overhead. It is our goal to operate the company for a positive cash flow during these poor lumber market conditions.''

Engel continued, ''We expect to announce our year-end results between June 15 and June 22, and will show a profit for the fiscal year ended April 30, 1990, before taking into account the previously announced write offs.''

In April WTD announced that it would permanently close three sawmills in Eugene and Union, Ore., and in Olympia, Wash. Engel noted, ''These three mills used large, more expensive logs. WTD's focus is to use second-growth logs almost exclusively. That's where we believe the industry is headed,'' said Engel. ''None of WTD's other mills have been permanently closed, although there have been temporary curtailments in reaction to the poor lumber market,'' continued Engel.

''It is more than a little frustrating,'' commented Engel, ''that even though WTD continues to operate sensibly, rumors by shortsellers and other self-interested parties of our demise contribute to volatility in our stock price.''

Engel confirmed that, as a result of the recent decline in the company's stock price, brokers sold WTD stock from Engel's account to fulfill margin borrowing requirements and that Engel's ownership interest in WTD is now approximately 36 percent.

The company disclosed that it received notice in May that the State of Wisconsin Investment Board increased its ownership interest from 7.5 percent to 9.2 percent of WTD's outstanding shares.

#90149b0013 05/29/1990 ~Business Wire

MENLO PARK, CA (MAY 29) BUSINESS WIRE - Continuing its leadership position in Token Ring network diagnostics and analysis, Network General (NASDAQ:NETG) Tuesday unveiled two new products: 16/4 Mbps Token Ring support for the Sniffer Network Analyzer, and the Series 700 Sniffer based on the IBM PS/2 Model P70.

Network General becomes the firs0 developer of network anaylsis tools to employ an IBM-manufactured board for Token Ring 16/4 network analysis.

The 16/4 Mbps Sniffer Network Analyzer offers network managers the ability to troubleshoot 16 Mbps Token Ring installations. Utilizing a 16/4 card manufactured for Network General by IBM Corp., this new Sniffer product features diagnostic capabilities critical for meeting the challenges of managing the increasing number of Token Ring installations in corporate environments.

To address the security concerns of network managers, the 16/4 card automatically generates a ''Trace Tool Present Notification'' LLC frame every 60 seconds. The IBM LAN Manager program notifies the network manager when this frame is present on the network.

This protocol enables network managers to easily determine if a network is being monitored without their knowledge, and automatically removes the intruder. Network General is the first company to join IBM in support of this IBM standard.

In addition, the 16/4 Mbps Sniffer analyzer can collect and capture frames while a ring is ''beaconing.'' Beaconing occurs when there is a major error on the network such as a cable break or a faulty network card. This feature helps the user isolate and solve problems at critical times. Beaconing rings are especially hard to diagnose because standard Token Ring cards cannot connect to such rings.

From today, all Token Ring Sniffer analyzers will ship as 16/4 Mbps. This replaces the former 4 Mbps only Token Ring product at no additional charge. The 4 Mbps and 16 Mbps ring speeds are menu (software) selectable.

The 16/4 Mbps Sniffer Network Analyzer is available on the IBM PS/2 Model P70 platform announced today, as well as on the Series 500 Compaq Portable 386 and the Series 300 Toshiba 3200SX Sniffer platforms supported by Network General.

The new Series 700 is based on the IBM PS/2 Model P70, and offers the following features:

-- Initial topology support of 16/4 Mbps Token Ring;

-- Portable platforms;

-- Intel 20 MHz 80386 processor;

-- Micro Channel Architecture (MCA) bus;

-- 60 MB hard disk; and

-- 4 MB of memory

Founded in 1986, Network General is an industry leader in designing, developing and marketing diagnostic systems for local area networks. The company's Sniffer Network Analyzer was named PC Magazine's ''Editor's Choice'' in 1987 among a selection of competing LAN network analyzers, and was awarded the 1987, 1988 and 1989 ''LAN Product of the Year'' in LAN Magazine's diagnostic equipment category.

BURLINGTON, MA (MAY 29) BUSINESS WIRE - M/A-COM Inc. (NYSE:MAI) announced today that it has received a $16.5 million contract from Raytheon Co.'s Equipment Division, headquartered in Marlborough, Mass., for a major portion of the solid state transmitter on the TPS-71 Relocatable Over-the-Horizon Radar (ROTHR).

This represents the first production release after four years of development and testing.

ROTHR will provide the U.S. Navy with long-range early warning of approaching naval and airborne threats and can be relocated to prepared sites. The contract was awarded to M/A-COM's Microwave Power Devices Division in Hauppauge, N.Y.

M/A-COM is a leading producer of radio frequency, microwave and millimeter wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation, missile guidance, electronic

warfare, surveillance and command-control- communications-intelligence (C3I) systems. M/A-COM also supplies surveillance products used in intelligence collection applications.

The company's products are used primarily in defense electronics systems, but also have numerous commercial applications.

SAN DIEGO (MAY 29) BUSINESS WIRE - W. E. (Bill) Helbling retired in 1959 as a district manager in San Diego from what was then Pacific Telephone.

He died in May 1988 with a unique wish that will keep his memory alive for his many friends who knew him at work and during his 29 years in retirement.

He asked that his entire estate, valued at approximately $1.4 million, be used to help Pacific Telesis retirees who are in need.

Prior to his death, Helbling worked closely with the company's benefits director, Tom McCauley, to assure that fellow retirees would be helped if needed. In compliance with his wishes, Pacific Telesis has established the Helbling Fund, a non-profit corporation. Officers of the corporation were elected last year and a committee was established to administer the fund.

Helbling is remembered by several Pacific Telephone and Pacific Bell retirees still living in the San Diego area.

''I'm grateful to hear that a man such as Bill Helbling saw fit to set up such a fund,'' said George Lyons, who worked for Helbling in San Diego.

R. B. ''Bob'' Dugger of Solana Beach, who also worked with Helbling in the 1950s, said: ''It sounds just like him to leave an estate such as this. He loved working for the company.''

Pacific Telesis Group retirees who have questions regarding their eligibility for this fund may call Pacific Bell Retiree Services on 800/248-0130.

#90149b0021 05/29/1990 ~Business Wire
SANTA BARBARA, CA (MAY 29) BUSINESS WIRE - Donut Inn, with 39 stores throughout Southern California, has installed two of the six Sharp 3100 cash registers Western Data Systems is supplying at this time, said Art Pfefferman, chief executive officer.

''This is a new relationship we have with Western Data Systems,'' Pfefferman said. ''You never know where that is going to take you. We are contemplating as many as 12 systems. We have not decided,'' he continued.

''Our agreement with Donut Inn,'' said Duane Pushkaric, account manager for Western Data Systems, ''is that we are to provide support to the franchises; we will be representing the Sharp equipment to the franchises as they need new equipment.''

Pushkaric noted that when Donut Inn selected the Sharp 3100 register the company saved $300 per unit over what it would have cost to install comparable equipment of the type it had been using.

''It also is less expensive to maintain and offers more features than did the equipment they had,'' Pushkaric explained. He continued: ''The savings can be critical to a franchise of any sort; the advantage in versatility is a bonus.''

Western Data Systems is the authorized sales and service dealer for NCR, ICL Retail Systems (formerly ICL/Datachecker) and Sharp. It sells electronic cash registers and point-of-sale systems, which use the computerized registers as devices to collect and transmit information for analysis. The firm also sells computers, custom software programs and supplies for cash register systems.

''The systems we offer,'' explained Western Data Systems President Chuck Carmichael, ''help retail and service-oriented vendors of all sorts control inventory, price their wares analytically and eliminate waste. Each of these functions increases the profits for such businesses.''

Western Data Systems has offices at 4 W. Calle Laureles in Santa Barbara and at 1429 E. Thousand Oaks Blvd., 200, in Thousand Oaks.

SUNNYVALE, CA (MAY 29) BUSINESS WIRE - Advanced Micro Devices announced

Tuesday that Richard Previte has been elected to the board of directors and named president and chief operating officer.

Anthony B. Holbrook was elected vice chairman of the board and continues as the company's chief technical officer. The actions took place at a board meeting held in conjunction with the company's annual meeting of shareholders on May 16.

Together with Chairman and Chief Executive Officer W.J. Sanders III, Holbrook and Previte comprise the office of the chief executive which was created in May 1989. The changes in title will have no effect on reporting structures or responsibilities within the company.

Previte, 55, previously was executive vice president and chief operating officer. Holbrook, 50, a member of the AMD board of directors since 1987, held the positions of president and chief technical officer. Both men are long-time AMD veterans.

SAN FRANCISCO (MAY 29) BUSINESS WIRE - PC WORLD, the magazine for PC-proficient managers, Tuesday announced the appointment of Patrick Kenealy as the president and chief executive officer of PC World Communications and publisher of PC WORLD.

Kenealy, 30, was most recently president of Digital News Publishing and publisher of Boston-based Digital News, a national publication for VAX computer users. He founded Digital News at its inception in 1986, guiding it from start-up to profitability in four years. Both Digital News and PC WORLD are members of the International Data Group (IDG) family of computer publications.

''I'm thrilled to be joining the largest of IDGs fourteen PC magazines worldwide,'' said Kenealy, ''especially at a time when powerful new microprocessors and windowing interfaces are changing the way management-level PC users compute.

''In the last few years a new kind of executive has emerged, someone who not only knows how PCs work but also understands how they contribute directly to business results. We call this new executive the 'TPC-proficient manager' -- that's the audience we serve.''

Kenealy's 13 years in the publishing industry include terms as associate publisher and editor-in-chief of Digital Review, senior editor of

Mini-Micro Systems and managing editor of five research publications at GML Information Services.

Kenealy has spoken extensively on mini- and microcomputer industry trends at dozens of conferences in the United States and Europe and has written and edited hundreds of articles on computer topics.

PC WORLD is a subsidiary of IDG Communications, the world's leading publisher of computer-related newspapers and magazines with more than 135 publications in 44 countries. IDG Communications is part of International Data Group, the world's leader in providing information services on information technology.

SAN RAFAEL, CA (MAY 29) BUSINESS WIRE - International Microcomputer Software Inc. (NASDAQ:IMSFC) Tuesday announced that it will debut two new products at next week's COMDEX trade show in Atlanta.

The first product, Menu Direct, is a software program that provides a number of useful utilities to improve the power and ease of use of IBM personal computers. Menu Direct also provides a number of tools for use with hard disk drives for IBM PCs.

The second product, Backup Direct, works with Menu Direct and allows the user to automatically and easily backup and manipulate information on hard disks.

Menu Direct retails for $99.95, and Backup Direct retails for $79.95.

Geoffrey Koblick, president of IMSI, said: ''These two new products are the first of several published software product introductions planned by IMSI for 1990. By continuing to introduce new published software products which have gross profit margins of 60-70 percent like Menu Direct and Backup Direct, the company expects to increase its overall profitability over the next fiscal year.''

Koblick also said: ''The company's $1.8 million rights offering to shareholders is well underway, and the company has already received numerous subscription agreements. Shareholders must deliver their subscription agreements to the company by June 3, 1990, to exercise their rights.''

International Microcomputer Software Inc. publishes and distributes a wide range of computer CAD and graphics software products for IBM microcomputers including TurboCAD, TurboCAD 3D, IMSI Presentation Graphics IMSI Publisher and Graphics Transformer. The comany also offers several complementary hardware products including the IMSI Mouse and the IMSI Handscanner.

BELMONT, CA (MAY 29) BUSINESS WIRE - Oracle Corp., (NASDAQ/NMS:ORCL) the world's largest supplier of database software and services, has expanded its AIX product offerings to include the entire range of IBM AIX platforms.

The company is now shipping beta versions of ORACLE running under AIX for the new IBM RISC System/6000 and AIX/370, in addition to providing continued support for the IBM PS/2 AIX and the IBM RT.

Oracle V6 with the transaction processing option takes full advantage of IBM's AIX technology. For example, Oracle is fully compatible with the graphical user interfaces (GUIs) and network protocols integral to the RISC System/6000. In addition, Oracle provides National Language Support so that applications can be built to work in the end-user's native language.

Beta versions of ORACLE V6 for IBM RISC System/6000 have been shipping to IBM Early Support customers since April; production units will be available in conjunction with IBM's release of production AIX. For AIX/370 ORACLE V6 software tools are shipping now with beta units of the ORACLE RDBMS available at the end of this month.

ORACLE for the PS/2 AIX has been available since 1989. ORACLE on the IBM RT system (PC RT Model 6150) has been shipping since 1987.

Oracle Corp., headquartered in Belmont, is the largest supplier of DBMS software and the third largest software and services company in the world. Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation as well as families of financial and manufacturing applications packages.

All Oracle products are available on PCs, mini-computers, and mainframes, and ORACLE is the first and only database to run on supercomputers.

The company offers its products, along with related consulting, education,

and support services to 90 countries around the world. For further information about Oracle, call Oracle corporate headquarters at 800/345-DBMS (345-3267), or write to Oracle Corp. at 500 Oracle Parkway, Redwood Shores, Calif. 94065.

#90149b0046 05/29/1990 ~Business Wire

CONCORD, CA (MAY 29) BUSINESS WIRE - Microgenics Corp., a Concord-based biotechnology company, announced Tuesday the introduction of two new immunoassay products, Cortisol and Digitoxin, both of which are based on Microgenics' proprietary CEDIA technology.

These two new products complement bioengineered diagnostic tests already marketed by Microgenics, which include T-4 and T-Uptake in the hormone area, and Digoxin in the therapeutic drug area. The significance of these tests is that they allow routine analysis of patient samples on a variety of laboratory instrumentation, avoiding the need for specialized equipment or resorting to labor intensive radio-immunoassay which uses hazardous radioactive isotopes.

Commenting on the announcement, Fredric Feldman, Microgenics' president and chief executive officer, stated, ''The new tests add to our growing menu of cost-effective, state-of-the-art immunoassays. Our tests are simple, one-step tests that can be performed on existing laboratory instruments.''

Microgenics Corp. is a medical diagnostics systems company which develops, manufactures and markets CEDIA recombinant DNA-based diagnostic tests as well as clinical diagnostic analyzers. These products are sold to hospitals, clinical laboratories and physicians' offices.

Microgenics markets its CEDIA immunoassays through its development partners, including Boehringer-Mannheim GmbH, Yamanouchi Pharmaceutical Co., Ltd. and Technicon Instruments Corp. In addition, Microgenics' immunoassays are marketed in the United States by a direct sales force and are distributed by Beckman Instruments Inc. and a network of international distributors.

Through its wholly owned subsidiary, BioAutomed Systems Inc., Microgenics offers the ''ASCA'', a cost-effective diagnostic analyzer, to the physicians' office and small laboratory market on a worldwide basis.

Microgenics, founded in 1981, is a privately held corporation based in Concord.

LOS ANGELES (MAY 29) BUSINESS WIRE - HarCor Energy Inc. (NASDAQ:HARC) Tuesday announced the results of its first quarter ending March 31, 1990.

Oil and gas revenues more than doubled to $818,000 vs. $394,000 in the prior year. HarCor's net earnings for the first quarter approached break-even with a deficit of $19,800 vs. a loss of $222,000 in the prior-year period. Net cash provided by operating activities was $203,000 vs. a negative cash flow from operations of $298,000 in the prior-year's first quarter.

Commenting on the improved performance, Francis Roth, HarCor's president and chief operating officer, stated, ''HarCor experienced a 58 percent increase in its U.S. oil equivalent production primarily as a consequence of its property acquisitions in west Texas and New Mexico.'' Roth added, ''Favorable year-to-year comparisons are anticipated during the balance of 1990.''

MOUNTAIN VIEW, CA (MAY 29) BUSINESS WIRE - Sun Microsystems Inc. and Bell Atlantic Business Systems Services Inc. (formerly Sorbus Inc.) Tuesday announced the signing of a strategic partnership agreement under which Bell Atlantic Business Systems Services will extended Sun's delivery of hardware-related customer service in the eastern region of the United States.

The service will be part of Sun's U.S. Customer Service ''Strategic Partner Program,'' and will expand the number of field engineers available for on-site hardware maintenance calls for Sun equipment. Sun will maintain complete responsibility for customer service contracts, management of service calls, escalation of services and technical service follow-up.

Bell Atlantic Business Systems Services' customer service organization will be utilized to provide Sun customers with expanded support.

This agreement further enhances Sun's growing strength in field customer service. In February, Sun signed a similar partnership with Eastman Kodak to expand hardware service in central and western regions of the United States.

With these partnerships in place, faster customer response and repair time are expected due to the greater number of service engineering resources and the extensive geographic coverage provided by both Sun partners.

For Bell Atlantic Business Systems Service, the announcement represents a significant expansion into the workstation service marketplace. Sun is the leading workstation manufacturer, with its eastern region representing more thatn 40 percent of Sun's U.S. installed base.

Bell Atlantic Business Systems Services is the worldwide leader in independent computer service, maintaining more than 500 computer brands and more than 5,000 different types of computer hardware. The company has more than 240 key locations, supporting more than 80,000 customer sites.

Its system expertise ranges from the largest mainframes to workstations and departmental networks. Its service offerings include software support, proprietary diagnostics, remote support capabilites, disaster recovery and other value added services.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is the leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

REDDING, CA (MAY 29) BUSINESS WIRE - American Eagle Industries Inc. (OTC) an emerging leader in the development, manufacture and marketing of fuel efficient automotive overdrive systems, has announced the appointment of its new president, Walter Smith.

Former president of Automotive Franchise Corp., franchisor of the 100 store Mr. Transmission transmission repair shop chain, Smith brings to

American Eagle a thorough understanding of the automotive aftermarket.

Smith will direct the company's marketing focus on generating sales through large retail transmission distributors and the continued development of sales to major truck/vehicle fleet operators.

Smith was formerly sales manager for Ingram Barge Co., the dry cargo hauling division of Ingram Industries Inc., a $1 billion plus diversified holding company. He holds a bachelor of science in computer science from the University of Illinois.

Commenting on his appointment, Smith said: ''American Eagle has developed a truly exciting product, with virtually no competition in the United States.

''During my first few weeks with AEI, we have instituted significant changes and efficiencies that we believe will result in the achievement of profitable operating levels before the end of calendar 1990. April was a record month for AEI, having shipped 303 overdrive units, at an average price of $985. As the company's financial base improves, we expect to see further increases in shipments in fiscal 1991, beginning this summer.

''We have continued to focus on improving our manufacturing efficiencies and reducing our breakeven point. We have implemented longer production runs, reducing the level of ''custom'' manufacturing techniques that had previously been the standard at AEL. These actions will result in substantial improvements in quality and uniformity of product performance.

''American Eagle is also negotiating several possible joint ventures involving both marketing and manufacturing of overdrives. We are not at liberty to reveal the names of the potential joint venture partners at this time, but the companies that we are talking with are much larger than AEI,'' said Smith.

Redding-based American Eagle Industries Inc. is currently engaged in a $5 million private placement offering of common stock. If successful, the company expects to qualify for NASDAQ listing of its common stock and will apply for NASDAQ listing upon the private placement's completion. American Eagle Industries' common stock currently trades over-the-counter.

PLEASANTON, CA (MAY 29) BUSINESS WIRE - ComputerLand Corp. announced Tuesday that it had acquired certain assets of The Computer Shoppe, Inc.

A regional chain of eight computer retail stores located in the Southeast and Midwest, The Computer Shoppe had 1989 sales of $55 million. Its operations will be transferred to existing ComputerLand stores or will be re-opened as new ComputerLand locations. The purchase price was not disclosed. The acquisition was effective on May 18.

''With this acquisition, ComputerLand significantly enlarges its presence in promising markets in the Southeast and Midwest,'' said William Y. Tauscher, chairman, chief executive officer and president of ComputerLand. ''Moreover, consistent with our strategic focus, we are further building our large corporate customer base.

''The new ComputerLand customers will benefit from being part of ComputerLand's network, enjoying ComputerLand's purchasing power, national distribution system, service maintenance, and networking and connectivity expertise.''

The Computer Shoppe stores are located in Chattanooga, Knoxville, Memphis and Nashville, Tenn.; Huntsville, Ala.; Little Rock, Ark.; Louisville, Ky.; and Indianapolis, Ind.

ComputerLand, headquartered in Pleasanton, is the world's largest multi-vendor computer reseller network, servicing the corporate customer. ComputerLand Corp. reported 1989 retail sales of more than $2.5 billion.

IRVINE, CA (MAY 29) BUSINESS WIRE - AST Research Inc. Tuesday announced the release of an updated software emulation package for the AST 5251/11 Enhanced Plus Adapter, providing greater productivity and efficiency.

A combination of hardware and software, AST's 5251/11 enables Industry Standard Architecture and Micro Channel personal computers to communicate with IBM minicomputers via twinax cable, phone connections and LAN gateways.

AST's new 5251/11 enhanced version 4.30 software reduces conventional memory usage during operation, freeing memory area for other applications such as spreadsheets and data bases.

Version 4.30 also offers increased support for Hewlett-Packard Laserjet Series II and IBM's Quietwriter III printers.

Additionally, enhanced support is provided for a wide range of domestic

and international keyboards. The software allows keyboard use with microcomputers such as the AT&T 6300 PC and Unisys HT400, while also offering enhancements to the 5250 IRMA and Key Tronics 122-key keyboards.

Included with the 5251/11 Enhanced version 4.30 software is AST's 5250 Twinax Adapter handler software, providing compatibility with IBM's Support AS/400 software. The Twinax Adapter handler also is available separately.

The software is available from the AST bulletin board system at no charge. The products also may be ordered on floppy diskette through the AST North American Services Group at 800/759-4278. There is a $35 charge for the diskettes and manual.

AST Research is a leading manufacturer of high-performance desktop computers. The AST systems product line includes the entry-level Bravo and the high-performing Premium series of computers. AST's board-level product include memory/multifunction add-in cards as well as 5250, 3270 and local area network products.

AST products may be purchased in North America and internationally through value-added resellers, value-added dealers and more than 1,500 retail locations. AST Research corporate headquarters are located at 16215 Alton Parkway, Box 19658, Irvine; 714/727-4141.

MOUNTAIN VIEW, CA (MAY 29) BUSINESS WIRE - ASK Computer Systems Tuesday announced that Lindsay MacDermid has been promoted to the new position of general manager and vice president of Asia/Pacific Operations.

MacDermid has been with ASK since 1981, and served as vice president of Customer Support since 1986.

''The Asia/Pacific region is one of the fastest growing and most important areas of the world for manufacturing,'' commented Sandra Kurtzig, chief executive officer of ASK. ''ASK already has over 90 customer installations in the region and we expect to expand this substantially.''

MacDermid will be responsible for ASK's sales, marketing, customer support and administration throughout Asia, Australia and New Zealand. ASK's full product line of manufacturing information systems for Hewlett-Packard 3000 Digital Equipment Corp. VAX and IBM AS/400 computers is marketed across the region.

Prior to joining ASK in 1981, MacDermid was vice president, sales for Western Bradford Trust Co. of San Francisco. Before this, he was a vice president at the Chase Manhattan Bank in New York. MacDermid earned a bachelor's of science in electrical engineering from Stevens Institute of Technology in Hoboken, N.J.

ASK is the largest independent supplier of enterprise-wide information systems for manufacturing companies. There are 300,000 users operating 25,000 ASK software products worldwide. ASK completed its 1989 fiscal year in June with revenue of $186 million and net income of $13.5 million.

IRVINE, CA (MAY 29) BUSINESS WIRE - Thomas Bros. Maps, the West's premier map maker, and Geographic Systems Corp. finalized the sale last week of San Diego Gas & Electric's (SDG&E) map database to Thomas Bros. Maps.

The map company will use this information to create computer-generated map products for San Diego County, including the new San Diego Thomas Guide.

The high-accuracy digital file of San Diego County will be a key addition to Thomas Bros. Maps' master mapping database for Southern California. Thomas Bros. Maps is working to convert all of its 24 map books into a master geographic digital database.

''For the first time, businesses, county governments and city governments will have available a digital map base that will be consistent with the Thomas Guides in all counties that we serve,'' said Glen Jansma, manager of Thomas Bros. Maps' Cartographic Information Systems Division.

The master mapping database will provide users of digital mapping systems with a high-accuracy and continuously up-to-date mapping database for the West Coast.

''Out master database will be used for both Thomas Bros. Maps' products and special jobs for private businesses and government,'' Jansma said. ''We will be producing specialized map products for marketing analysis and site selection.''

The database also has applications for emergency services.

''Public safety agencies will use the database for verifying the location of calls for service and dispatching,'' explained Jansma.

The Cartographic Information Systems Division will enhance the high-accuracy map database of San Diego County with detailed information of individual street characteristics such as block addressing, street names, street surface types and Thomas Bros. Maps' copyrighted page and grid system.

IRVINE, CA (MAY 29) BUSINESS WIRE - Western Digital Corp. (ASE:WDC) Tuesday announced that, effective immediately, it is reducing the suggested retail price of its high-performance 8-and-16-bit Ethernet local area network (LAN) adapters.

The price of the 8-bit EtherCard PLUS will be reduced from $349 to $249, while the EtherCard PLUS16 will be price reduced from $399 to $349.

''There are a number of factors enabling us to further reduce the price of these powerful Ethernet products,'' said Bob Stephens, senior vice president and general manager of Western Digital's microcomputer products unit.

''Primarily, our expertise as a semiconductor manufacturer has allowed us to increase the Western Digital silicon content on our Ethernet boards -- this is more cost effective for us. Our investment in manufacturing technology and our worldwide production capabilities have allowed us to produce boards more efficiently and in closer proximity to our customers.

''In addition, high demand for our EtherCard PLUS family of products has helped us reduce materials cost because we can now purchase complementary parts in volume.''

The award-winning EtherCard PLUS, with an XT/AT interface, is one of the industry's fastest 8-bit Ethernet adapters, rivaling many 16-bit boards. The EtherCard PLUS16, through an exclusive zero wait state shared memory interface, provides unsurpassed 16-bit performance. That performance, combined with guaranteed software compatibility, make it ideal for today's demanding workstation and network server applications.

Western Digital is the only company to provide integrated solutions for all major network standards: Token Ring, coaxial Ethernet, 10BaseT and LattisNet twisted pair Ethernet and StarLAN.

With headquarters in Irvine, Western Digital is a multinational company

that designs, develops, manufactures and markets semiconductors, subsystems and intelligent disk drives to original equipment manufacturers and resellers that serve the microcomputer industry. The company's storage products unit produces intelligent drives and controllers, while its microcomputer products unit provides communications, imaging, systems logic and integrated systems products.

FEDERAL WAY, WA (MAY 29) BUSINESS WIRE - Pacific Nuclear Systems Inc., Federal Way, has been awarded a renewal of its service contract by Northeast Utilities of Connecticut.

Under the contract, the NuPac Services group will provide radioactive waste processing, packaging and transportation over the next three years at the Millstone Nuclear Station. The estimated value of the contract is in excess of $1 million.

''We are committed to excellence in our services to the nuclear industry. This contract exemplifies the continued confidence felt by our customers towards NuPac Services,'' Maurice Carson, NuPac president said.

Pacific Nuclear Systems Inc. and its subsidiary companies (Nutech Inc.; NuPac Services Inc.; Nuclear Packaging Inc.; and PN Services Inc.; and Alaron Corp.) provide a wide range of services to the nuclear industry. The company, founded in 1983 and headquartered in Federal Way, is traded in the NASDAQ - National Market System under the symbol PACN.

REDMOND, WA (MAY 29) BUSINESS WIRE - Microsoft Corp. Monday announced that Microsoft Mail integration will be featured in the newest version of Aldus PageMaker for the Macintosh.

Aldus is one of the first software developers to take advantage of the communication layer of Microsoft Mail for AppleTalk networks to offer

increased product functionality. Mail integration lets PageMaker 4.0 users share documents across a network by simply selecting commands from the PageMaker menu such as the Place Mail command, which inserts a document sent via Microsoft Mail directly into an open PageMaker file.

Microsoft Excel and Microsoft Word for the Macintosh feature similar integration with Microsoft Mail. PageMaker joins these products in supporting Mail integration to provide users with an easy way to communicate and share information across a network while continuing to work within their primary application.

Microsoft Mail provides a high-level applications programming interface (API) that lets software developers create applications that communicate with other applications or users on a network via the Microsoft Mail system. PageMaker takes advantage of Microsoft Mail's open APIs to provide seamless integration with Mail. Mail users will no longer need to save a PageMaker document as a separate attachment in order to send it to another user on the network. With version 4.0, users can send PageMaker documents via Microsoft Mail directly from the menu, without having to quit or open a new window.

Microsoft Mail can act as the transmission service for network communication. Its open architecture and development tools let developers create an entirely new class of applications that utilize the Mail store-and-forward, client-server model. These distributed applications can create, send and read standard or application- specific messages, access the Mail user list for addressing files and messages, transmit messages and files and utilize Mail system-based security.

Aldus Corp. (NASDAQ:ALDC) creates computer software that helps people throughout the world communicate information and ideas. The Aldus product line includes PageMaker for the Macintosh, PC-DOS, and OS/2 Presentation Manager; Aldus Persuasion; Aldus FreeHand; and Aldus PrePrint, which is expected to ship in the second quarter. Aldus distributes all products through an international network of more than 16,000 authorized dealers and distributors.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

PHOENIX (MAY 29) BUSINESS WIRE - Emerald Homes L.P., a Delaware limited partnership (NYSE:EHP), Tuesday announced a profit of $224,000, or 2 cents per unit for the first quarter ended March 31, 1990, compared with income of $32,000, or a loss of 1 cent per unit during the first quarter of 1989.

Revenues for the first quarter of 1990 increased 72 percent to $32.1 million from $18.7 million for the comparable 1989 quarter.

Results for the first quarter of 1990 include the California nad Texas operations through March 21, 1990. On March 21, 1990, the California and Texas operations were sold to Verit Industries.

Unit deliveries increased 39 percent to 180 in the first quarter of 1990 from 130 in 1989 and gross margins decreased to 10 percent in 1990 from 13 percent in 1989. For the Arizona operations only, unit deliveries increased 127 percent to 118 in the first quarter of 1990 from 52 in 1989 and margins decreased to 4 percent in 1990 from 12 percent in 1989.

Dollar backlog, for Arizona only, has increased 72 percent to $26.6 million (208 units) at March 31, 1990 from $15.5 million (116 units) at March 31, 1989.

The company also announced that it has converted the ownership in its Retirement Communities division in Green Valley, Ariz., into a limited partnership interest in the newly formed Quail Creek Country Club Limited Partnership.

Emerald Homes L.P. designs, builds and markets single family homes in Arizona.

SANTA ROSA, CA (MAY 29) BUSINESS WIRE - Lynn J. Brinker, chairman and chief executive officer of American Home Shield, the nation's oldest and largest home service contract (home warranty) company, Tuesday announced that Daniel J. Brinker has been named president, effective immediately.

Daniel J. Brinker joined AHS in 1984 and has served in certain key executive positions until being named chief operating officer in March 1986, a title he will retain as he assumes his new duties.

In related moves, Charles E. Mache, formerly vice president, sales, was named executive vice president, sales, for the company. Mache also joined AHS in 1984 and was largely responsible for creating and building the company's multi-region national sales network.

Also promoted was Scott J. Cromie to vice president, administration and accounting. Cromie was formerly company controller.

American Home Shield is a partner in the ServiceMaster Quality Service Network (NYSE:SVM).

ServiceMaster is a leader in providing the services of professional cleaning, termite and pest control, maid service, lawn care, appliance and other mechanical repair and maintenance to residential and commercial customers through a worldwide network of over 5,000 ServiceMaster, Terminix, and Merry Maids company-owned and franchised branches, and the leading home warranty service, American Home Shield.

ServiceMaster is also the leading company in the United States providing supportive managment services to health care, educational and industrial facilities. These services include management of plant operations and maintenance, housekeeping/custodial, laundry and linen, clincial equipment maintenance and food service.

SAN DIMAS, CA (MAY 29) USINESS WIRE - William V. Caveney, a 22-year veteran of Southern California Water Co., has been elevated to chairman of the board and chief executive officer, and Floyd E. Wicks has been appointed president by the board of the 60-year-old statewide investor-owned corporation.

The action was taken during the board's first meeting in its new headquarters facility in San Dimas. The company -- located in downtown Los Angeles for the past 20 years -- moved to the new location in April 1990.

The board also announced the promotions of John F. MacDonald to vice president of Operations and Donald L. Twomley to vice president of Water Resources.

Caveney, a resident of Chino Hills, previously served as president and chief executive officer. He moved up through the ranks after joining the company in November 1968 as manager of its Rate and Valuation Department.

A Registered Professional Engineer and a veteran of a combined 41 years serving California public utilities, Caveney had previously served as a supervising utilities engineer for the California Public Utilities Commission and, before that, served as a distribution field engineer for Pacific Gas and Electric Company.

Wicks, a resident of Costa Mesa, joined Southern California Water in 1988. He previously served as vice president of Operations. Before joining the company, he served as chief engineer and assistant general manager of the Casitas Municipal Water District in Oak View, California, senior engineer for a major civil engineering firm in Santa Barbara, and vice president of Operations for the Ohio Water Service Company in Poland, Ohio, a subsidiary of Consumers Water Company. A Registered Professional Engineer

in California, Ohio and Pennsylvania, his professional career spans the past 21 years.

MacDonald, a resident of Torrance, joined Southern California Water in 1957. Previously the company's director of Engineering and Development, he moved up through the ranks through the Production and Water Supply Departments.

Twomley, a resident of Cypress, joined the company in 1951 as a District Superintendent. Previously director of Water Resources, he has also served as a division superintendent, division manager, and assistant manager of Operations.

Southern California Water, operator of 16 water districts and an electric district, serves roughly a quarter of a million customers representing a population of 1.5 million in 75 cities and 10 counties located throughout California. The company is the second-largest investor-owned water utility in the state and the sixth-largest in the nation.

CHULA VISTA, CA (MAY 29) BUSINESS WIRE - Rohr Industries Tuesday announced that the Grumman Corp. has agreed to negotiate a new baseline price for components of the F-14 fighter.

A new order from Grumman will cover the final 18 F-14Ds to be delivered beginning mid-1990 and concluding in 1991. Rohr has produced nacelles and inlets for more than 700 F-14s since 1972.

''This agreement to negotiate a new baseline price is very welcome to us '' said John R. Johnson, vice president, government business. ''In addition, we are anticipating improved operating instructions concerning government acceptance criteria which we hope will improve productivity, but that has not yet been finalized.''

Rohr designs, integrates, manufactures and supports aircraft engine nacelle systems and components for commercial, military and business aircraft. The company also manufactures solid rocket motor casings for space programs.

SEATTLE (MAY 29) BUSINESS WIRE - Thermal Exploration Inc. (doing business in Canada as TransNorth Energy) has purchased oil and gas wells in Wyoming and Saskatchewan in recent months, President Keith E. Anderson announced Tuesday.

These purchases total approximately $2 million (U.S.).

In late April, Thermal Exploration purchased interests in 20 wells in Sweetwater, Lincoln and Uinta counties in Wyoming from Devon Energy Corp. of Oklahoma City. Thermal Exploration acquired 30,797 barrels of oil and 3.3 billion cubic feet of gas. This increases its reserves by an estimated 581,000 barrels-of-oil-equivalent (BOE).

TransNorth Energy acquired 100 percent interest in 12 wells plus additional undeveloped acreage at Prairiedale in southwest Saskatchewan from Petro Canada Inc. TransNorth is also participating with Nautilus Exploration and Associates and other partners in further developing the properties. Five wells have been completed recently and five more are planned.

With the recent purchases, Thermal Exploration owns or controls interests in oil and gas leases covering 250,000 acres in eight states, the Gulf of Mexico and in western Canada. The company's reserves at the end of fiscal year 1989, which ended September 1989, totaled approximately 8.45 million barrels-of-oil-equivalent. It has acquired approximately $15 million of proved oil and gas reserves in the past three years.

Thermal Exploration, a subsidiary of Washington Energy Co., is an oil and gas exploration, development and production company with operations focused in the Rocky Mountains, western Canada and the Gulf Coast. Thermal Exploration maintains an operational office for the Rocky Mountain region in Denver and has headquarters in Seattle.

The Washington Energy Co. trading symbol is ''WECO'' on the NASDAQ National Market System, and is quoted as ''WashEngy'' or ''Wash Energy Co'' in other sources.

LOUISVILLE, CO (MAY 29) BUSINESS WIRE - Cybermedic Inc. (NASDAQ:CMEDD), Tuesday announced the formal signing of a distribution agreement with Medec International Co. of Tokyo.

In a ceremony in the offices of Governor Roy Romer, the agreement was applauded by both parties as a significant step in the relationship between the companies.

The agreement signed by Cybermedic President Patrick Crane and Toshiharu Katahira, president of Medec International, provides for the initial distribution, sale and service of Cybermedic's MetaScope metabolic analyzer in Japan, Korea and Taiwan. Medec is a market leader in the delivery of complex lung diagnostic systems to hospitals and clinics throughout the Pacific Rim.

Full market introduction is scheduled pending formal approval by Japanese governmental authorities. Under terms of the agreement, no estimates of additional sales or employment levels were released by Cybermedic.

Cybermedic manufactures computerized pulmonary diagnostic equipment and metabolic analyzers which it markets to hospitals, clinics and physicians throughout the United States and in selected international markets.

WASHINGTON (MAY 29) BUSINESS WIRE - The Denver & Rio Grande Western Railroad and Southern Pacific Transportation Co. Tuesday each received E.H. Harriman Memorial awards for employee safety in 1989.

DRGW won the gold medal award in the Group B category for the eleventh consecutive year.

SP, which won the gold medal in 1986, 1987 and 1988 in the Group A competition, received the third-place bronze medal.

Although Rio Grande Industries, owner of DRGW, purchased SP in October 1988, the Harriman committee considers both railroads separate operations.

DRGW Chairman William Holtman and Ken Moore, SP vice president-operations, accepted the awards during a ceremony in Washington.

The Harriman is based on the lowest casualty rate per 200,000 employee-hours worked, a formula which takes into account the number of fatalities, injuries and occupational illnesses reported to the Federal Railroad Administration.

DRGW had a casualty rate of 5.23 to win the Group B award (employees working between 4 and 15 million employee hours). It was in first place

throughout all of last year.

In competition with railroads whose employees worked a minimum of 15 million employee hours (Group A), Southern Pacific had a casualty ratio of 5.50.

MOUNTAIN VIEW, CA (MAY 29) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ: ADBE) Tuesday announced that a class action lawsuit has been filed against the company related to alleged violations of federal securities laws in connection with the company's operations.

The action also names certain Adobe officers. The lawsuit, which was filed May 25, 1990 in the U.S. District Court for the Northern District of California, does not specify any amount of damages. Legal counsel said it would not be unusual for the company to receive one or more additional similar complaints. The company believes that the lawsuit is completely without merit and intends to vigorously contest the action.

Adobe Systems Inc., founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, is headquartered in Mountain View, Calif. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device independent graphics software component for computer displays.

In addition, the company develops and markets a complete line of application software programs, including the award-winning Adobe Illustrator 88, and Adobe Type Manager, Adobe Photoshop, Adobe TypeAlign, Adobe Type Reunion, the Adobe Type Library and the Smart Art graphics-effects library. Revenue for fiscal 1989 was over $121 million.

Adobe, PostScript and Display PostScript are registered trademarks and Adobe Illustrator 88, Adobe Type Manager, Adobe TypeAlign, Adobe Type Reunion, Adobe Photoshop and Smart Art are trademarks of Adobe Systems Inc.

#90149b0271 05/29/1990 ~Business Wire
WASHINGTON (MAY 29) BUSINESS WIRE - Richard B. Stewart, assistant attorney general for the Environment and Natural Resources Division,

Tuesday sent a letter to the South Florida Water Management District Board criticizing the revised Everglades Surface Water Improvement Management (SWIM) Plan as ''seriously deficient.''

Stewart's comments came in reaction to the latest draft of the SWIM plan, a water quality planning document being prepared by the South Florida Water Management District.

''I am heartened by the district's apparent recognition that it must face up to the problems of widespread environmental degradation... by agricultural runoff...(But) good intentions are not enough. The district's proposed plan has no teeth,'' Stewart said.

Stewart pointed out that the district's revised plan will not ensure protection of the unique ecosystems in the Loxahatchee National Wildlife Refuge and Evergaldes National Park. He said that in order to work, a plan must have four components which the district's plan lacks:

-- It must have specific performance-based standards for inflows;

-- It must have a tight timetable for compliance with mandatory

deadlines;

-- It must have specific implementing measures, including an

aggressive enforcement program with sanctions for non-compliance; and

-- It must have a realistic and attainable funding scheme which makes the polluters, not the Florida or U.S. taxpayer, bear the cost of cleanup.

The district has been engaged in deliberations on the SWIM plan for approximately 1-1/2 years. Stewart said, ''At this late stage, I am gravely concerned that the district is still not committed to use the SWIM Plan process to protect the unique environment of Loxahatchee and the Everglades.''

In October 1988, the United States brought a suit, separate and independent of the SWIM process, against the state of Florida Department of Environmental Regulation and the South Florida Water Management District alleging violations of Florida water quality laws to the detriment of Loxahatchee National Wildlife Refuge and the Everglades National Park. That suit is still pending in federal district court after recent rulings in which the federal court refused to dismiss the action at the state's request.

WENATCHEE, WA (MAY 29) BUSINESS WIRE - Gary M. Bolyard, president and chief executive officer of Central Bancorporation, Wenatchee, Tuesday announced that the board of directors of the company had unanimously rejected an unsolicited cash offer of $12.30 per share from another financial institution.

Bolyard stated that, ''subsequent to our recent announcement of a proposed stock repurchase plan, we received this unsolicited acquisition offer. The board carefully considered the offer and determined it was in the best interests of our shareholders not to accept this offer, but to remain independent and to proceed with the stock repurchase plan.''

The stock repurchase plan, which calls for the purchase of up to 150,000 shares of the company's stock at $10.00 per share, was recently approved by federal bank regulatory authorities and is expected to commence within the next few weeks. Bolyard commented that ''the stock repurchase price represents a premium over the current book value and market price, and a good investment for the company.''

He further noted that each shareholder could make his or her own decision whether to participate in the repurchase plan.

Central Bancorporation, with $105 million in assets, is the parent company of Central Washington Bank, an FDIC-insured state commercial bank. The bank has five offices serving Wenatchee and adjacent communities.

RICHMOND, B.C. (MAY 29) BUSINESS WIRE - MTC Electronic Technologies Co. Inc. (NASDAQ:MTCEF) announced Tuesday that it has signed a contract with Blanco Sucesores, S.A., a major retail department store chain located throughout Mexico, which calls for Blanco, using letters of credit (L/Cs), to purchase a minimum of $32 million of consumer electronics from MTC over the next four years commencing June 1.

Miko Leung, president of MTC, said: ''This contract represents a major step forward in the continuing expansion of MTC in the Central American marketplace. Blanco is the third largest retail department store chain in Mexico, with 98 stores located throughout the country, and we are most pleased to have been able to successfully establish a long-term relationship with a company of their stature.''

Leung further stated: ''The recent announcement of China being granted 'favored nation' trade status by the United States will allow MTC to continue its expansion in the United States marketplace. The recent devaluation of the Chinese currency will also allow MTC to continue to operate more cost-effectively in its manufacturing efforts.''

The Chinese government owns an 18 percent equity interest in MTC.

MTC recently reported record revenues and record income for the year ended Jan. 31, 1990, of $58,164,879, and $632,153, or 8 cents per share, respectively.

MTC Electronic Technologies is an 18-year-old manufacturer, distributor and importer of over 160 products imported from the Far East, including televisions, stereo equipment and VCRs. The company also imports sub-assembled FAX machines into China under an exclusive trade agreement with the Yin Jiang Telephone Co.

SANTA CLARA, CA (MAY 28) BUSINESS WIRE - Publisher Andrew Seybold and Dataquest Vice President Steve Lair Tuesday announced an agreement to join forces on a series of projects.

Under the agreement, Dataquest will assume full responsibility for marketing Seybold's Outlook on Professional Computing (The Outlook), the technically-oriented product/industry watch newsletter. The newsletter was founded within Seybold Publications in 1983 and subsequently spun off as an independent enterprise by Andrew Seybold.

Seybold, in turn, will produce a series of reports that will be marketed as joint products from Dataquest and Andrew Seybold's Computer Insiders Inc. (ASCII). The reports will be inaugurated with a three-part series on portable computing that will be based upon a set of proprietary evaluation standards that was developed by ASCII.

The Outlook monitors developments in desktop computing and provides buyers with technical insight to help them make informed purchasing decisions, while also providing vendors with hands-on product assessments of their products as well as competing products.

In the past year, circulation for The Outlook has grown about 60 percent, and Seybold believes that with Dataquest providing a new level of marketing aggressiveness, ASCII should double its current circulation during the next year.

For information about the newsletter and portable computing reports, call Patty Chang, Dataquest, 408/437-8108.

ASCII is a consulting, publishing, and product testing research firm that serves vendors, volume buyers, and corporate end users. The cornerstone publication of the firm, Andrew Seybold's Outlook on Professional Computing provides industry insights paired with in-depth product reviews of hardware and software, particularly in the areas of desktop computing and communications.

Dataquest, founded in 1971, is an international company of The Dun & Bradstreet Corp. It is a leading market intelligence company that provides market research and consulting services to the high technology industry and the venture capital and banking communities. The company currently has seven research offices throughout the world and employs more than 700 persons.

ALBANY, NY (MAY 28) BUSINESS WIRE - Trans World Music Corp. (NASDAQ:TWMC) Tuesday announced record first quarter sales and earnings.

The results include first quarter sales of $70,866,000, net income of $2,449,000 and earnings per share of $.27 compared to 1989 sales for the same period of $65,350,000, net income of $345,000 and earnings of $.04 per share. Prior year results included a one-time, after tax charge of $1,500,000 or $.17 per share for litigation expense.

Total sales increased 8 percent in the quarter while comparable stores sales increased 5 percent. Company officials noted that operating results were bolstered by improved gross margins and lower selling, general and administrative expenses when compared on a percent of sales basis.

Twelve new stores were opened and 5 stores closed in the first quarter. Two new Saturday Matinee stores, the Company's newest store format dedicated to the sale of prerecorded video tapes, were opened during the

first quarter. Management plans to open more than 50 Saturday Matinee stores in 1990 in addition to 60 to 80 new music stores during the same period.

Trans World Music Corp. is one of the largest specialty retailers of prerecorded music and video products, operating 449 stores under several distinct store formats throughout the eastern half of the United States. The Company operates retail stores under several names including Record Town, Tape World, Coconuts, Great American Music, Good Vibrations, and Saturday Matinee.

MENLO PARK, CA (MAY 29) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) Tuesday announced a Premier Value-Added Reseller (VAR) Program designed to meet the specialized support needs of Informix resellers developing UNIX-based OLTP or Executive Information System (EIS) applications.

The program supports resellers using Informix's information management products, including Informix-OnLine, Informix's mainframe-replacement database engine that combines fault tolerant OLTP performance with multimedia capabilities; and Wingz, Informix's leading graphic spreadsheet that includes the HyperScript graphical programming language.

With Informix's Wingz-DataLink technology, users can access information from any Informix SQL database into a Wingz worksheet, or use HyperScript to develop custom EIS applications for accessing and manipulating data.

The Premier VAR Program meets the support needs of VARs who are using Informix products to build OLTP and EIS applications that are central to their customers' business. The program enables Informix to assist VARs in successfully designing, developing and marketing applications to their corporate customers.

FourGen Software Inc., GTE Telecom, Kodak Legal Systems and Travelers/EBS are among the first Informix resellers taking part in the new VAR program. FourGen, an Informix reseller specializing in 4GL-based accounting applications, is adding customized EIS applications with the HyperScript capabilities of Wingz-DataLink.

Using Informix's OLTP database technology, GTE Telecom is creating UNIX-based network management and control systems.

Kodak Legal Systems uses Informix products as part of a legal office information management system that handles document management, storage and retrieval. Travelers/EBS is building a turnkey system for independent insurance agencies that will automate policy management, marketing, accounting and communications to insurance companies.

The Premier VAR Program is designed to ensure reseller success in developing and delivering high-performance UNIX-based applications.

Informix also introduced today a new Primary VAR Program to deliver

enhanced marketing and technical support and professional services for its more than 2,000 resellers. The program includes new reseller training courses and developer certification as well as joint promotion and sales materials, unlimited telephone support and product updates.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

Headquartered in Menlo Park, Informix also has European headquarters in London and Asia/Pacific headquarters in Singapore.

SAN JOSE, CA (MAY 29) BUISNESS WIRE - Peter Knight has been named vice president of business development for Conner Peripherals Inc. (NASDAQ:CNNR), it was announced Tuesday by William J. Almon, president and chief operating officer.

In this newly created position, Knight will be responsible for product management, European operations liaison, customer service and the disk division. Previously, Knight was executive assistant to the president at Conner.

Knight's charter is to help Conner identify and develop business opportunities worldwide, and to focus internal resources on managing mature products.

Founded in 1986, Conner designs, manufactures and markets high-performance 2.5- and 3.5-inch Winchester disk drives for the new generation of notebook, laptop, portable and desktop micorcomputers and workstations.

The San Jose-based company reported third-year revenues of $704.9 million in 1989, making it one of the fastest-growing manufacturing startups in American business history.

VANCOUVER, BC (MAY 28) BUSINESS WIRE - CLEARLY CANADIAN BEVERAGE CORPORATION (When Issued NASDAQ Symbol: CLCFV; VSE Symbol: CLV.V) Tuesday announced the start-up of a multi-media campaign to assess receptivity towards ''Clearly Canadian Sparkling Mineral Waters'' in key California markets.

Integrating 60-second radio spots, outdoor billboards, print advertising and point-of-sale items, the promotion will provide the foundation for CLEARLY CANADIAN's further expansion into other U.S. markets.

The total program, including trade activity, media and consumer promotional offers, is valued at approximately $1,000,000. The campaign is a co-operative effort between the company and Golden Brands Marketing, the master licensee for California, Arizona, Nevada and Hawaii.

Glen Foreman, vice president of Sales and Marketing for CLEARLY CANADIAN BEVERAGE CORPORATION, stated, ''We have set aggressive reach/frequency goals and will be closely monitoring the awareness and trial for the Brand as we continue to roll-out into major markets in both the United States, Canada and abroad.''

CLEARLY CANADIAN BEVERAGE CORPORATION produces and markets ''Clearly CanadianTM'', a line of natural and flavored sparkling mineral waters. Through distribution agreements, ''Clearly CanadianTM'' is sold in 29 states, all of Canada and Japan.

CHICAGO (MAY 29) BUSINESS WIRE - United Airlines and Australian Airlines Monday announced a major expansion of their marketing partnership which will benefit customers through coordinated schedules, promotional pricing, one-stop check-in services, joint tour products, as well as other shared marketing programs.

The announcement was made in Chicago by Stephen M. Wolf, chairman and president of United, and John W. Schaap, managing director and chief executive officer of Australian Airlines.

''United Airlines has a major presence in Australia today,'' Wolf said. ''We see Australia as a growth market and we intend to grow with it.

Coupled with Australian Airlines' vast domestic network in Australia and United Airlines' trans-Pacific and domestic U.S. network, this partnership will greatly enhance air travel between the United States and Australia.''

''The Australian aviation industry is changing rapidly as we move toward deregulation,'' Schaap said. ''Our partnership with United Airlines positions us well to compete in the overseas markets.''

United and Australian Airlines have been interline partners since September 1987 when the carriers offered passengers reciprocal use of each others' airport club rooms. The expanded relationship mutually benefits both carriers in marketing as well as operational areas.

The carriers plan to offer one-stop check-in for United/Australian connecting flights, through checking of baggage between the domestic and international terminal at Sydney, concierge service for first class passengers and joint tour products. The carriers also plan to explore jointly opportunities to share airport and city ticket office facilities.

Australian Airlines flies to 18 destinations in Australia. United serves 156 cities in the U.S., Canada, Mexico, Europe, Asia and the South Pacific.

#90149b0621 05/29/1990 ~Business Wire

OAKLAND, CA (MAY 29) BUSINESS WIRE - Robert H. Bisno, chairman of TransAction Financial Corp., confirmed Tuesday his offer to purchase Sprouse-Reitz Stores Inc., of Portland, Ore. (NASDAQ:STRS) for $17 per share, in cash.

''The transaction requires approval by the Sprouse family,'' Bisno said. ''We believe that the board of directors has an independent duty to present the offer to all shareholders and recommend approval if the offer is in their best interests,'' Bisno stated. ''The board can no longer permit the Sprouse family to hide behind legal fortifications that do not recognize the rights of the company's majority owners.''

Bisno explained that the board of directors only publicly disclosed his April 23 proposal after he prompted them to do so. Prior to disclosure of the offer on May 10, Sprouse-Reitz stock had been trading at $8.50 per share, down from $23.25 one year ago.

''More than one month later, the Sprouse-Reitz board of directors still has not responded to our generous offer, other than to inform us that they have appointed an independent sub-committee, composed of directors Peter Bechen and Donald Tripp, to evaluate the alternatives available to the company,'' Bisno said.

''The Sprouse family only owns 21.4 percent of the company, yet they effectively exercise absolute control of the company through a Shareholder Stand-Together Agreement that votes 78.3 percent of the voting common stock,'' Bisno noted. ''We believe the Sprouse family adopted this anti-takeover agreement in November 1987 as a response to our previously undisclosed 1987 offer to purchase Sprouse-Reitz.

''We look to the board of directors to step up to their responsibility to the owners of non-voting common stock whose rights and interests must be considered,'' Bisno stated.

Bisno said he has submitted a proposal to be voted upon by the shareholders entitled to vote at the annual meeting of shareholders to be held in Portland on June 4, 1990. The proposal calls for the board of directors to submit an amendment to the company's Articles of Incorporation providing for voting rights to be granted to non-voting common stock.

''We believe Sprouse-Reitz can become a profitable enterprise if the company takes bold steps to reorganize itself,'' Bisno said. ''In the last two years Sprouse-Reitz has lost $2.6 million under the leadership of Robert A. Sprouse II. These accelerating losses have become a financial disaster for all shareholders.

''As a major shareholder for several years and as a landlord of Sprouse-Reitz store locations, we have acquired detailed knowledge of Sprouse-Reitz stores,'' Bisno noted. ''It would be our intention to return Sprouse-Reitz to its roots in the Pacific Northwest by eliminating unprofitable stores scattered throughout eight other Western states.''

The offer, presented to the board of directors of Sprouse-Reitz on April 23, was not made contingent upon obtaining financing, but would require the approval of shareholders owning both the voting and non-voting common stock of Sprouse-Reitz. Bisno said the proposal is being made on behalf of TransAction Financial Corp., First San Francisco Holding's Ltd. and certain other investors. TransAction Financial Corp. owns in excess of $500 million in commercial, office and residential developments in urban, West Coast communities.

#90149b0631 05/29/1990 ~Business Wire

ATLANTA (MAY 29) BUSINESS WIRE - The Merchant Bank of Atlanta Tuesday announced it has acquired the insured deposits and branch network of First Federal Savings and Loan Association from the Resolution Trust Corp. (RTC) over the Memorial Day weekend.

The acquisition is the largest to date of a failed institution in Georgia. First Federal operated 13 branches in the metropolitan Atlanta market and had total deposits of $169.8 million and more than 29,000 account holders.

The institution was founded in Atlanta in 1924 as the city's first mutual building and loan association.

In addition to the deposits and branch network, The Merchant Bank also acquired branching rights in Clayton and Cobb counties. It previously had the rights to branch in Fulton and DeKalb counties under Georgia banking law.

The Merchant Bank currently operates its headquarters and banking offices in Midtown Atlanta. The de novo institution began operation in late 1987 and had grown to more than $37 million in assets by the end of March. Earnings for its second full year of operation were $203,000, or 10 cents a share in 1989.

''We are delighted with this acquisition,'' said Chairman and co-founder Mark Bedner. ''We adopted a strategic plan this year which called for a 'buy vs. build' approach to increasing assets. This opportunity fit perfectly with that strategy.''

President and co-founder R. Elliott Miller told all First Federal employees over the holiday weekend to report to work Tuesday for ''business as usual.'' First Federal had approximately 90 employees as of last Friday. ''We expect to integrate the branches and operations into The Merchant Bank's systems,'' Miller said.

Bedner and Miller organized The Merchant Bank with 28 investors from Atlanta and capitalized it with $10.2 million, less than three years ago. They attributed their success in acquiring First Federal's franchise on such short notice (two weeks from bid to closing) to their capital base and good working relationships with federal and state regulators.

''Our credit record and asset growth has been good, especially given the Atlanta economy the past two years,'' Miller said, ''it helped.''

The Merchant Bank was founded to take advantage of changing bank regulations in the United States. According to Bedner, the projected

modification of 60-year-old laws separating investment banking from commercial banking was key to the creation of the bank.

''As our name implies, we are a Merchant Bank -- part commercial and part investment bank,'' Bedner said. ''The acquisition of First Federal was just that, part commercial and part investment banking.''

MILPITAS, CA (MAY 28) BUSINESS WIRE - Octel Communications Corp. held the leading share in the fast-growing U.S. voice messaging market for the second consecutive year with just over one-fifth of the total market in 1989, according to recent reports by market research firms Probe Research, Vanguard Communications and Dataquest.

Probe Research of Cedar Knolls, N.J. reported Octel with 22 percent of the market. Vanguard Communications of New York City and Dataquest of San Jose, each reported Octel with slightly more than 20 percent.

Octel held approximately 50 percent more market share than the second-place competitor in the voice processing market, AT&T. The three market research firms reported AT&T held between 13 percent and 14 percent of the total market.

Octel became the market share leader in voice messaging in 1988.

Probe Research also reported that from 1988 to 1989, growth in the voice messaging market as a whole exceeded 40 percent, up from $452 million to $635 million in total revenues. Octel's revenue growth outpaced the market during the period, increasing 82 percent to $87 million from 1988 to 1989.

In April, Octel announced revenues for the first nine months of fiscal 1990 (ending in June) of $91,634,000, a 50 percent increase over the same period last year. Net income also increased 50 percent to $12,741,000 for the first nine months of fiscal 1990. Octel's fiscal 1990 third quarter was the company's 18th consecutive quarter of profitability. For the full fiscal year 1989, Octel reported income of $11.8 million on revenues of $87.1 million, a 71 percent increase in net income over fiscal year 1988.

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. These specialized computers which integrate with a large number of telephone systems, help companies and individuals solve a range of communications problems.

Octel's Aspen product line is sold in the United States, Canada and overseas to small businesses and large multisite corporations. The recently announced Sierra multiple-application voice processing platform is a very large capacity system designed to meet the special needs of telephone companies and other voice information service providers.

LOS ANGELES (MAY 28) BUSINESS WIRE - The shareholders of Xuma Corp., a publicly traded Florida company, approved a merger on May 9, 1990, with Zanart Publishing Inc., a California company.

All shareholders of Zanart shall surrender all outstanding shares of Zanart in exchange for issuance of controlling shares of Xuma. Xuma has on May 23, 1990, amended its Articles of Incorporation and is now Zanart Publishing Inc..

Forty-two years old, Thomas Zotos, president and chief executive officer of Zanart has signed an exclusive three-year employment contract with Zanart agreeing that all Zotos' art publishing-related activities, for the duration of his employment shall be performed by Zanart.

Zotos is a veteran in the world of art publishing. Zotos is responsible for bringing cartoon imagery to fine art. In the mid-80s he convinced the Walt Disney Co. that there was a market for limited edition lithographs and high-end posters. Twenty-seven Disney images were successfully published.

Zanart has just been granted a license by Warner Bros. to publish high-end posters and limited-edition lithographs of America's favorite rabbit, ''BUGS BUNNY,'' along with the rest of the ''LOONEY TUNES'' characters, commemorating ''BUGS' 50TH ANNIVERSARY.''

Zanart recently released, pursuant to their license with Warner Bros. and DC Comics, ''BATMAN'' as interpreted brilliantly by artist John Taylor Dismukes.

Under the leadership of Zotos, Zanart intends to become an even more important name in the field of art publication and to diversify into other businesses related to art publication.

#90149b0637 05/29/1990 ~Business Wire

VANCOUVER, BC (MAY 29) BIZWIRE - Galactic Resources Ltd. (''Galactic'') announced Monday that it has entered into agreements with certain shareholders of Cornucopia Resources Ltd. (''Cornucopia'') to acquire by private purchase 3,152,750 common shares of Cornucopia, representing 16.28% of Cornucopia's outstanding shares, on the basis of 0.5 of a common share of Galactic for each Cornucopia share.

The Cornucopia shares are being acquired by Galactic for investment purposes, as well as to facilitate a possible business combination with Cornucopia.

Galactic has proposed to Cornucopia that negotiations be entered into with a view to effecting a proposed business combination of the two corporations on terms to be mutually agreed upon. Galactic has proposed that it would issue 0.5 of a common share of Galactic for each outstanding share of Cornucopia.

A decision to proceed with a business combination and, if so, the final share ratio are both subject to settlement of the terms of a definitive agreement, the receipt of all necessary approvals and the receipt of a fairness opinion from Galactic's independent financial advisors.

Closing of these transactions is subject to the receipt of certain regulatory approvals which are to be completed within the next few weeks. The agreements also contemplate the payment of additional Galactic shares if within one year Galactic acquires, other than by normal market purchases made through the facilities of a stock exchange, additional Cornucopia shares for a consideration greater than 0.5 of a Galactic share per Cornucopia common share. Galactic currently owns no securities of Cornucopia and may acquire additional shares of Cornucopia.

Certain of the Cornucopia shares to be acquired by Galactic pursuant to the agreements referred to above are being acquired from Robert M. Friedland, Chairman and CEO of Galactic, and from his wife.

Galactic produces gold at the Ridgeway Mine in South Carolina with joint venture RTZ Corporation PLC and at is wholly-owned Summitville Mine in Colorado. Galactic and Cornucopia are joint venture partners in the Ivanhoe property located on the Carlin Gold Trend in Nevada. Galactic also has precious metal development projects in California, Canada, China, and the Philippines.

Galactic trades on the American, Toronto, Montreal and Vancouver Stock Exchanges (symbol: GLC). American Stock Exchange quotes in US$ are listed daily in the Wall Street Journal under American Stock Exchange Composite

Transactions.

#90149b0638 05/29/1990 ~Business Wire

VERNON HILLS, IL (MAY 29) BUSINESS WIRE - Scotsman Industries, Inc. (NYSE:SCT) reported Tuesday that the Consent Order Agreement (the ''Consent Agreement'') between its subsidiary, Scotsman Group Inc. (''Scotsman''), and the staff of the United States Consumer Product Safety Commission (''CPSC'') under the Lead Contamination Control Act of 1988 (the ''Act'') has been accepted by the CPSC and become final.

The Consent Agreement had been published in the Federal Register for public comment on April 19, 1990. Under the terms of the Consent Agreement, Scotsman will conduct a replacement/refund program for any Halsey Taylor tank-style water coolers manufactured before April 1, 1979, which are water tested by the cooler owner and shown to contribute more than twenty parts per billion lead to the water.

The Consent Agreement resolves all claims that the CPSC might have under the Act for issuance of an order requiring the repair, replacement or recall and refund of the purchase price of water coolers manufactured by Scotsman's Halsey Taylor division.

The company previously made provisions to cover expenditures that it expected to result from the Act. The actual cost to the Company under the Consent Agreement will depend upon, among other things, the number of cooler owners participating in the replacement/refund program.

Although no assurance can be given until the program is completed, the Company believes, based upon its present expectations, that expenditures incurred in implementing the program required by the Consent Agreement will not have a material adverse effect on the Company's financial condition.

Scotsman markets Halsey Taylor water coolers through its Halsey Taylor division. Scotsman is a market leader in the manufacture of commercial refrigeration products, with a primary market focus on the food service industry. The global manufacturing and marketing of ice machines is the largest component of Scotsman's business.

#90149b0641 05/29/1990 ~Business Wire
COSTA MESA, CA (MAY 28) BUSINESS WIRE - US Facilities Corp. (NASDAQ/NMS:USRE) announced Tuesday that its board of directors has adopted a stockholder rights plan designed to assure that all US Facilities stockholders would receive fair and equal treatment in any takeover of the company and to protect stockholders from partial tender offers and other abusive takeover tactics to gain control of the company without paying all stockholders a fair price.

The plan provides for the distribution of one right for each share of common stock outstanding on June 15, 1990.

The Rights Plan provides that in the event any person becomes the beneficial owner of 15 percent or more of the outstanding common shares, each Right (other than a Right held by the 15 percent stockholder) will be exercisable, on and after the close of business on the 10th business day following such event and will entitle the holder to purchase US Facilities common shares which have a market value equal to two times the then current exercise price (initially $22.50 per share).

The Plan further provides that if, on or after the occurence of such event the company is merged into any other corporation or 50 percent or more of the company's assets or earning power are sold, each Right (other than a Right held by the 15 percent stockholder) will be exercisable to purchase common shares of the acquiring corporation which have a market value equal to two times the exercise price.

The Rights expire on May 24, 2000, and are subject to redemption by the board of directors at 1 cent per Right at any time prior to the first date upon which they become exercisable to purchase common shares.

US Facilities will provide stockholders with further details of the Rights Plan in a letter to be mailed in June 1990.

US Facilities, an insurance and reinsurance holding company, conducts its business through USF RE INSURANCE CO. and US Benefits Inc. USF RE is a property and casualty reinsurance company accepting business through reinsurance intermediaries nationwide. US Benefits is an underwriting manager for excess group medical stop-loss coverage.

#90149b0646 05/29/1990 ~Business Wire
BEAVERTON, OR (MAY 29) BUSINESS WIRE - Tektronix Inc. Tuesday announced a

major restructuring and work force reduction that will result in a one-time charge of approximately $70 million in its fourth fiscal quarter, which ended on May 26, 1990.

The work force reduction will affect about 1300 employees and will reduce employment to about 13,000 by August, 1990. The reductions will occur in many operational and support groups of the company. Most affected employees will be notified by the end of June.

''These steps are part of a broad effort to place Tek on a solid financial footing for the long term,'' said Robert Lundeen, chairman and chief executive officer of Tektronix. ''We especially regret having to make layoffs, but they are necessary to balance our costs against our revenues.

'' The best thing Tektronix can do for its shareholders, employees, and the communities of which it is part is to return to profitability as soon as possible. Making that happen requires these painful steps.''

Tektronix intends to sell or close certain of its non-core business activities in its test & measurement and non-television-related communications areas. The affected businesses had operating losses in excess of $25 million during the fiscal year ended May 26, 1990. The company plans to begin an orderly exit from these businesses immediately with a view toward maximizing their potential market value.

While the company cannot disclose which units are affected until all customers have been notified, actions to accomplish the sale of these businesses have been initiated.

Regarding Visual Systems, the company is actively exploring the possibility of partnerships to enhance the market positions and performance of its products.

The company also announced that it had ended discussions with Sony Corp. concerning the possible sale of its Grass Valley Group subsidiary, and affirmed its commitment to that business.

Tektronix is a leading worldwide supplier of Test and Measurement and Visual Systems equipment. Total sales are about $1.4 billion.

CONCORD, CA (MAY 28) BUSINESS WIRE - Microgenics Corp., a Concord-based biotechnology company, reported new developments and recapped the accomplishments of the past year at its annual meeting of shareholders on May 23, 1990, in Concord.

Microgenic's president, Fredric J. Feldman, announced the release of two new immunoassay products, Cortisol and Digitoxin, both of which are based on Microgenics' proprietary CEDIA technology. The new tests complement the recombinant DNA-based immunoassays already marketed by Microgenics, which include assays to monitor the heart drug digoxin, the thyroid hormone thyroxine and thyroid uptake.

Microgenics Corp. is a medical diagnostics company which develops, manufactures and markets CEDIA recombinant DNA-based diagnostic tests as well as clinical diagnostic analyzers. These products are sold to hospitals, clinical laboratories and physicians' offices.

Through its wholly owned subsidiary, BioAutomed Systems Inc., Microgenics offers the ''ASCA'', a cost-effective diagnostic analyzer, to the physicians' office and small laboratory market on a worldwide basis.

BioAutomed Systems Inc., acquired by Microgenics in February 1990, is being integrated into the company and has already contributed to first quarter sales, Feldman reported.

The acquisition of BioAutomed Systems, a Sunnyvale, Calif.-based manufacturer of automated diagnostic test equipment brings Microgenics fully into its second strategic phase: becoming an integrated diagnostics systems company offering its customers reagents and instruments.

Richard L. Fischer, Microgenics' vice president of finance, reported a 238 percent increase in product sales and a 65 percent increase in total revenues from first quarter 1989 to first quarter 1990. In addition,

Microgenics is now earning royalties on product sales from its development partner, Boehringer-Mannheim GmbH.

Fischer also announced the signing of a $1.5 million working line of credit agreement with Silicon Valley Bank. According to Fischer, this financing will provide a source of funds to help Microgenics continue its sales growth.

Microgenics markets it CEDIA immunoassays through its development partners inlcuding Boehringer-Mannheim GmbH, Yamanouchi Pharmaceutical Co., Ltd. and Technicon Instruments Corp. In addition, Microgenics' immunoassays are marketed in the United States by a direct sales force and are distributed by Beckman Instruments Inc. and a network of international distributors. Microgenics, founded in 1981, is a privately held corporation based in Concord.

MOUNTAIN VIEW, CA (MAY 29) BUSINESS WIRE - ParcPlace Systems Tuesday announced the availability of its Objectworks for Smalltalk-80 object-oriented programming system for Microsoft Windows 3.0.

This new product, named Objectworks for Smalltalk-80/Windows 3.0, brings workstation performance to the PC and allows programmers to port graphical-user-interface (GUI) programs across PCs and workstations.

Under Windows 3.0, Objectworks for Smalltalk-80 allows programmers to create sophisticated and graphical applications that run identically on all major platforms.

Objectworks for Smalltalk-80 sets the standard for portability, allowing programmers to run compiled code across IBM PS/2s and compatibles, Apple Macintosh computers, Sun SPARCstations, Hewlett-Packard Apollo Series, Hewlett-Packard 9000 Series 300 and Digital DECstations.

Users benefit from performance improvements resulting from Objectworks for Smalltalk-80 code optimization for Windows 3.0. As importantly, Objectworks for Smalltalk-80/Windows takes advantage of the Windows 3.0 memory management and runs in 80386 enhanced mode, eliminating the 640K program size barrier.

With access to virtual memory, users can run substantial programs on systems with minimal memory. For example, up to a 16MB (megabyte) Objectworks for Smalltalk-80/Windows 3.0 application can run in as little as 4MBs of real memory.

Other programs running under Windows 3.0 work only in segmented mode, slowing down application performance. In segmented mode, programs are broken into chunks of 64K bytes. If a section of the program requires more than 64K bytes, the programmer must segment code to make it fit.

By using 32-bit linear mode, Objectworks for Smalltalk-80/Windows 3.0 simplifies the programming process, by eliminating the need to segment code.

Taking advantage of almost 20 years of research and technology advances, Objectworks for Smalltalk-80 provides corporate software developers with integrated tools and reusable software components to create and deliver applications.

It offers a complete software development environment, a uniform object-oriented development language with dynamic compilation, and an extensive class library of more than 300 reusable software modules.

Objectworks for Smalltalk-80/Windows 3.0 is priced at $595 and will be available during the third quarter of 1990. Objectworks for Smalltalk-80 is priced at $595 for Apple Macintosh computers, IBM PS/2s and compatibles and is priced at $3,495 for UNIX platforms.

Also available are volume runtime agreements and technical support, which includes a customer hotline, upgrades to new software releases, an electronic bulletin board and regular newsletters. In-house and on-site training courses are available, covering introductory through advanced level object-oriented methodology and programming.

ParcPlace System Inc., based in Mountain View, Calif., is a pioneer and leader in the development and marketing of object-oriented programming systems.

ParcPlace products include development environments for Smalltalk-80 and C++ object-oriented languages, training, technical support and consulting, all of which bring the benefits of object-oriented technology to a wide range of computer programmers and users.

NEW YORK (MAY 28) BUSINESS WIRE - Unity Healthcare Holding Co. Inc. (NASDAQ:UNTY) announced Tuesday the opening on June 4 of Unity Lymphedema Services, P.C., 215 Lexington Ave., New York City, the first United States location for the treatment of lymphedema and its complications by Complete Decongestive Physiotherapy, a form of treatment developed and used in Europe with a high degree of success.

Lymphedema is a chronic swelling of the extremities caused by prior surgery or radiation given for the treatment of various forms of cancer.

Lymphedema affects approximately one percent of the American population. The P.C. will operate under the medical direction of Robert Lerner, M.D.

Patients are signed up and scheduled to begin the 28 day ambulatory course of physiotherapy and other related procedures. Unity Healthcare projects that revenues from the new program may reach approximately $3 million in the first year of operations, and $6 million in the second year, enhancing the profitability of the company.

Unity Lymphedema Services, P.C. has contracted with a subsidiary of Unity Healthcare Holding Co. Inc. to establish treatment centers, and to provide management and systems expertise, as well as health care and administrative personnel to manage and operate the day-by-day non-medical portions of the treatment centers.

Unity Healthcare also plans to manage treatment centers which are expected to open in Florida and California.

An international health care services organization, Unity Healthcare primarily engages in providing temporary and permanent health care personnel to health care institutions through its offices in New York, New Jersey, Florida, California and the United Kingdom. Unity Healthcare also provides home care to patients with temporary health care personnel and medical supplies and equipment.

LAUREL, MS (MAY 29) BUSINESS WIRE - Sanderson Farms Inc. (NASDAQ/NMS:SAFM) Tuesday reported results for the second quarter and six months ended April 30, 1990.

For the quarter, net sales were $43,833,000, compared with $45,459,000 in the second quarter of 1989. Net income was $2,977,000, or 33 cents per share, compared with $3,982,000, or 44 cents per share, in the same period last year.

For the first six months of 1990, net sales totaled $83,639,000, compared with $87,406,000 in the first half of 1989. Net income amounted to $3,527,000, or 39 cents per share, compared with $6,019,000, or 66 cents per share, in the comparable period a year ago.

Joe F. Sanderson Jr., president and chief executive officer of Sanderson Farms, commented: ''The decline in sales and profits in the second quarter was due primarily to lower selling prices for poultry products.

''As measured by a simple average of the Georgia dock price, market prices for poultry were approximately 8 percent lower than in the same quarter last year. The decrease in selling prices was partially offset by lower feed costs and gains in prepared food sales.''

Sanderson Farms Inc. is engaged in the production, processing, marketing and distribution of fresh and frozen chicken and other prepared food items.

SHANNON, IRELAND (MAY 29) BUSINESS WIRE - GPA Group plc announced Tuesday that its financial services division, GAP Capital, has set up a publicly traded Swedish aircraft leasing company, Solitair Kapital AB, in conjunction with Sparbankernas Bank, ABB Financial Services, Nyckeln Holding AB and Gamlestaden AB.

Solitair is the first company of its type ever to be floated on a stock exchange. GPA will have an indirect 7 percent interest in Solitair through another Swedish joint venture. GPA also provides administrative and marketing services to Solitair's independent management.

Solitair has an equity capitalization of $90 million and is listed on the Stockholm Stock Exchange. Solitair has also arranged a credit facility from SwedBank and has used its funds to purchase an initial investment portolio of eight modern jet aircraft with a value of $255 million, all of which have been acquired from GPA Group.

These aircraft comprise six Boeing and two McDonnell Douglas aircraft which are on lease to six airlines. Solitair will receive the income from

these leases. The initial public offering was signficantly oversubscribed.

The chairman of Solitair is Lars Thunnell, who is also president of ABB Financial Servcies, a subsidiary of Asea Brown Boveri.

Commenting on the transaction, Colm Barrington, chief executive of GPA Capital and a director of GPA Group and of Solitiar, said, ''Solitair is the latest development in GPA Capital's programme to provide opportunities for institutional and individual investors to participate directly in the $500 billion of aircraft financing which will be placed in the 1990s. It is the continuing objective of GPA Capital to provide additional aircraft investment opportunities for the international capital markets.''

#90149b0663 05/29/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (MAY 28) BUSINESS WIRE - Genentech Inc. announced that it filed an investigational new drug (IND) application this month with the U.S. Food and Drug Administration (FDA) for a drug which may be useful in the management of cystic fibrosis.

The company expects to begin human clinical trials for DNase, a mucus-dissolving enzyme, within the next few months.

Persistent, thick secretions which clog the lungs are a frequent occurence in patients with cystic fibrosis, the most common fatal genetic disease in the United States.

It afflicts approximately 30,000 children and young adults who usually die from respiratory failure brought on by repeated lung infections. Median survival age for cystic fibrosis patients is 28 years. To date, no aproved therapy exists that effectively shortens the course of lung infections by dissolving excessive and thick infected mucus secretions.

Shak, who conceived of this approach and led the team that developed DNase presented results of in vitro studies of the molecule's activity at the annual meeting of the American Federation for Clinical Research earlier this month.

The thickness of infected mucus secretions is due to the large amounts of extracellular DNA, which is released by the inflammatory cells that accumulate to fight the infection. DNase, an enzyme that dissolves the extracellular DNA, has been found in preclinical studies, to be effective in liquifying secretions obtained from the lungs of patients with cystic

fibrosis.

An earlier form of DNase, derived from cow pancreas, was shown to have beneficial effect in humans, but is no longer available.

Reasoning that the mucolytic properties of DNase, could be used to dissolve thick secretion, Shak and his colleagues cloned, sequenced, and have produced a purified human DNase from genetically engineered cells.

Since the recombinant molecule mimics the natural human enzyme normally present in blood and saliva, few allergic responses to it are anticipated.

Genentech is a leading biotechnology company focusing on the development, manufacture and marketing of pharmaceuticals produced by recombinant DNA technology.

#90149b0678 05/29/1990 ~Business Wire

VALENCIA, CA (MAY 29) BUSINESS WIRE - 3D Systems, the company that created StereoLithography, Tuesday announced the introduction of its next-generation system, the SLA-500.

Like the existing SLA-250, the SLA-500 builds solid models directly from computer-aided design (CAD) data. With enhanced capabilities, the new system is five to 10 times faster and builds much larger models.

The SLA-500 accepts data from most CAD systems. Software converts the solid-object data into slices as thin as five-thousandths of an inch. The slice data then controls a laser-generated beam of ultraviolet light focused onto the surface of photo-sensitive resin in a vat.

The light beam draws the shape of the slice onto the resin, and tbe liquid resin solidifies wherever the light strikes it, resulting in a solid layer of the CAD design. The process repeats, layer by layer, until the object is complete.

The new SLA-500 can build objects as large as 20 x 20 x 24 inches. Larger objects can be built in sections that are subsequently bonded together. Multiple copies of a single object, or several different objects, can be built simultaneously. Using a high-power argon laser, the system rapidly builds parts under computer control with no human supervision.

While traditional methods of making patterns and conceptual models usually take weeks or months, the SLA-500 system takes only hours. One aerospace manufacturer who produced a model of a jet engine blade in six hours with a StereoLithography system estimated that it would have taken three months to produce the same model by conventional methods.

The U.S. price of the SLA-500 system is $385,000. The system has

completed beta testing and is now available.

3D Systems Inc., based in Valencia, was established in 1986 to design, manufacture and market StereoLithography systems. Since mid-1988, 3D Systems has delivered more than 160 systems, principally to aerospace, automotive, casting and molding, computer, consumer products, electronic systems and medical industries.

Many of these companies have rapidly integrated StereoLithography into their design and manufacturing operations and have benefited by reducing the time and costs of bringing new products to market.

HOUSTON (MAY 29) BUSINESS WIRE - DI Industries Inc. (AMEX:DRL) announced Tuesday that its subsidiary, Alamo Machine and Tool, has purchased oilfield rig-up and supply yards in both Houston and Odessa, Texas, from Rigs-R-Us Inc. for a total of $1,050,000.

The purchase and sale of equipment is intended to allow Alamo Machine and Tool to continue with its functions of supplying equipment to the oil and gas industry, assembling and rigging up of equipment for overseas and domestic operations and certain supply store functions for specialty equipment.

Wally McClanahan has been hired as marketing manager for the Houston facility.

This represents a portion of the acquisitions announced in DI's March public offering in which the firm raised $15 million of new funds. The parent, DI Industries Inc., recently released its best quarterly earnings since 1983.

DI Industries Inc. is a holding company with firms in oil and gas contracting, commercial drilling, oil and gas exploration and production and heavy equipment sales.

SUFFERN, NY (MAY 29) BUSINESS WIRE - Rapitech Systems, Inc. (RSI) announced Tuesday its results of operations for the nine months ended April 30, 1990.

Revenues for the period were $1,313,531 up from $594,159 for the comparable period of the prior year. The Company generated a net profit of $359,177, or $.09 per share, compared to a loss of $1,020,341, or $.30 per share, for the comparable prior period.

Revenues for the third quarter ended April 30, 1990 were $519,031 compared to $371,356 for the third quarter last year. The net income was $326,339, or $.08 per share, compared to the loss of $74,968, or $.02 per share, for the comparable prior period.

Jeffrey M. Tolk, President of Rapitech Systems stated that ''the results of operations for the nine months showed substantial improvement over a year ago, both in revenues and earnings.'' The increase in revenues (121 percent) is due primarily to the contract with Amdahl Corporation, which was announced earlier in the fiscal year. RSI recently completed the development of a new product, which the Company believes will increase the Company's potential customer base, although no assurance can be given.

Rapitech is continuing to negotiate with various third parties for the license of its Conversionware products and use of its consulting and technology services. No assurance can be given as to whether the Company will be successful in these efforts, however, it is Management's belief that additional revenue producing projects will be forthcoming in the near future as a result of these negotiations.

Rapitech Systems, Incorporated is the leading developer of a series of language translation and migration tools, Conversionware, which translate proprietary dialects of Fortran, Cobol, VMS-Fortran and other language into industry standard ''C'' language, 1977 ANSI Fortran and Ada language.

In addition, the Company offers a full range of consulting services which include custom and turnkey translations on a total project management basis. Conversionware is a registered trademark of Rapitech Systems, Incorporated.

SAN ANTONIO, TX (MAY 29) BUSINESS WIRE - Kinetic Concepts, Inc. (NASDAQ: KNCI) said Tuesday that it had been served with a lawsuit filed by MEDIQ Incorporated against Kinetic Concepts and Medirec in the United States District Court for the Eastern District of Pennsylvania.

Kinetic Concepts and Medirec have recently entered into a letter of intent under which Kinetic Concepts has agreed, subject to certain conditions, to acquire Medirec. MEDIQ is a competitor of Medirec.

In its complaint, MEDIQ alleges, among other things, that Kinetic Concepts breached a confidentiality agreement and misappropriated confidential information and trade secrets between Kinetic Concepts and MEDIQ. MEDIQ has requested that the District Court enjoin Kinetic Concepts from acquiring Medirec and from using certain non-public information related to MEDIQ.

Kinetic Concepts said that it believes the allegations and claims made by MEDIQ are without merit and that it intends to vigorously defend itself against them.

Kinetic Concepts designs, manufactures and rents a full line of

specialized beds that provide therapeutic benefits for acutely ill patients.

MECHANICSBURG, PA (MAY 29) BUSINESS WIRE - Continental Medical Systems Inc. (NASDAQ:CONT) (''CMS'') announced Monday that it has signed a commitment with Citibank, N.A. for a bank credit facility in the amount of $135 million.

The new credit facility will include a $95 million revolving line of credit to refinance certain current indebtedness and to provide funding for new acquisitions and working capital.

The facility will also provide for up to $40 million of letters of credit to be used principally in connection with the company's new hospital financings. The new facility has a term of approximately eight years (subject to possible renewal) and will be fully secured by company assets. It is subject to negotiation of definitive documentation, which the company expects to complete during July.

Continental Medical Systems Inc. is one of the nation's leading providers of comprehensive medical rehabilitation. CMS operates 11 rehabilitation hospitals and one specialty facility for a system total of 882 beds in Arkansas, California, Colorado, Florida, Kansas, Kentucky, Louisiana, Massachusetts and Texas. CMS has 10 community-based rehabilitation hospitals under construction in Arkansas, California, Colorado and Texas.

In addition, CMS supplies physical, occupational and speech therapy services in 27 states nationwide through its California Physical Therapy, Inc. in Southern California; VTA Management Services Inc. of New York City; Pro Therapy of America in Birmingham, Mich.; and RehabWorks Inc. headquartered in Clearwater, Fla.

WILLIAMSPORT, PA (MAY 29) BUSINESS WIRE - Commonwealth Bancshares Corp., headquartered in Williamsport, Pa., has announced an increase in its

stockholder dividend payment for the second quarter of 1990.

The second quarter payment of 22 cents per share is an increase over the 21 cents per share payment of the first quarter.

''We continue to be optimistic relative to earnings performance in 1990,'' said William D. Davis, chairman and chief executive officer. ''Productivity gains, a strong capital position and a sound portfolio reflecting a diversified local economy should result in a modest continuing improvement in earnings growth,'' agreed William E. Snell Jr., president and chief operating officer.

The dividend will be paid on July 25, to shareholders of record June 29.

Commonwealth Bancshares Corp. is listed on the NASDAQ National Market System with the trading symbol CBKS. The multi-bank holding company, after the merger of First Bank of Greater Pittston, which is expected to be completed in third quarter, will have assets exceeding $1.5 billion. The corporation will serve 14 counties with 60 community offices throughout northcentral and northeastern Pennsylvania.

SOUTH NORWALK, CT (MAY 29) BUSINESS WIRE - The Union Corp. (NYSE:UCO), announced that its board of directors has amended its shareholder rights plan to increase to $30 per share the minimum price at which an offer to acquire all of the company's outstanding common stock must be made in order to avoid triggering the exercisability of the rights.

Previously, this minimum price was $21.

Commenting on the announcement, Melvin L. Cooper, chairman and chief executive officer, stated, ''The Board's decision is supported by an independent evaluation of the company. Since the adoption of the rights plan in February 1988, Union has completed its restructuring by the sale of its manufacturing segment, strengthened its balance sheet and improved its earnings performance.

''These factors have increased our value substantially. Indeed, the current market price of the stock fully justifies the $21 minimum price originally established.''

Cooper said that the rights plan is intended to increase the board's ability to effectively represent the interests of all stockholders in the

event of an unsolicited takeover attempt which does not meet the minimum price and other criteria stated in the plan or which is not approved by the board of directors.

The board's recent action to amend the plan was not taken in response to any existing effort to change control of the company, but as a timely and appropriate method of protecting the shareholders' right to retain their investment in the company or to realize the fair value of that investment.

The company provides accounts receivable management and debt collection services on a fixed rate and contingency fee basis to a wide range of institutional, commercial and government customers through its Transworld Systems Inc. and Capital Credit Corp. subsidiaries.

LISLE, IL (MAY 29) BUSINESS WIRE - Molex Inc. (NASDAQ:MOLX), an international elecronic connector manufacturer, Tuesday announced approval by its stockholders to amend the company's Certificate of Incorporation.

The amendment provides for the creation of 60 million shares of a new class of non-voting Class A common stock.

Molex's board of directors declared a dividend of one share of Class A common stock for each share of its common stock, and Class B common stock outstanding.

The dividend will be payable on July 25, to stockholders of record as of June 29.

Further, the amendment defines and establishes the relative rights, powers and limitations of the company's three different classes of common stock, and eliminates the old class of preferred stock.

The stockholders also authorized 25 million shares of a new class of ''blank-check'' preferred stock. The issuance, terms, and conditionso of the new preferred stock are at the discretion of the board of directors.

Lastly, the stockholders approved fair price provisions relative to certain minimum price and procedural requirements in connection with certain business combinations.

Molex vice-chairman and CEO Fred A. Kerhbiel announced a 25 percent increase in the regular quarterly cash dividend to one cent per share payable July 25, to all holders of common stock and Class B common stock as of June 29.

''After the July 25, 1990 distribution of Class A common stock, the board of directors intends to continue an adjusted quarterly cash dividend of one-half cent per post-dividend share for all three classes of common stock,'' Krehbiel said.

MUNDELEIN, IL (MAY 29) BUSINESS WIRE - Bio-logic Systems Corp. (NASDAQ:BLSC) a designer and marketer of computerized medical electrodiagnostic equipment, Tuesday announced operating results for its fiscal year ended Feb. 28.

Total revenues for fiscal 1990 increased to $9,908,518 compared to $9,236,967 for fiscal 1989.

The company had operating income of $318,594 for fiscal 1990 compared to $801,361 for fiscal 1989. The company's net income was $355,394, or 13 cents per share for fiscal 1990 compared to $568,772, or 21 cents per share for fiscal 1989.

The weighted average number of shares were 2,792,570 for fiscal 1990 and 2,751,678 for fiscal 1989. Gabriel Raviv, president of Bio-logic, stated that ''he expects the decreased profitability trend to continue at least through the current fiscal quarter ending May 31, 1990.

''The company remains cautious about the rate of growth for the existing product lines, although it continues to be optimistic about the opportunities available for new product offerings scheduled for release in the first half of fiscal 1991.

''The company is committed to dedicating its efforts to put operational expenses in line with expected sales growth to reverse the current trend in profitability. Bio-logic will continue to support the current level of research and development efforts.''

LAWRENCEVILLE, NJ (MAY 29) BUSINESS WIRE - Tuesday, Multi Soft Inc. (NASDAQ:MSOF) announced an agreement with CDSI (Computer Data Systems Inc. NASDAQ:CMPT) for the distribution of the Multi Soft INFRONT product line in the federal, state, and local government markets.

Multi Soft's INFRONT product line supports the development of PC-based front-ends for existing host-based applications without requiring any changes to the host code. This allows a developer to totally remodel and enhance the user interface for applications that were originally written for use with dumb terminals.

CDSI sells financial systems and consulting services to federal, state, and local government agencies. Charles Lombardo, chairman of Multi Soft commented, ''We are pleased that CDSI has joined us in our efforts to widen the distribution of INFRONT. We have been interested in extending our reach into the government agencies. With $110 million in annual revenues, CDSI has a significant presence in these markets and a substantial customer base.''

According to Tom Green, vice president and general manager of CDSI's Financial Systems Division, ''We sell financial systems primarily to government agencies. Like any vendor of packaged software, our users have expressed an interest in being able to customize and enhance our standard packages to meet their specific and unique requirements.''

''In addition, when dealing with governmental agencies, budgetary constraints are a constant concern,'' Green continued. ''With that in mine, we were particulary excited to discover that INFRONT can provide its benefits on low-cost PC rather than requiring an expensive, OS/2-capable machine. That's why we have acquired distribution rights for INFRONT. It's the ideal product for this market.''

Green concluded, ''Of course, the distribution of INFRONT will provide us with many opportunities to expand our consulting practice. And, the ability to develop a user interface that is unique to a particular agency's specific requirements will make our software packages attractive to a wider range of potential clients.''

Multi-Soft Inc. (NASDAQ:MSOF) is a subsidiary of Multi-Solutions Inc. (NASDAQ:MULT) and has provided state-of-the-art cooperative processing software and solutions for production operating platforms and communications environments since 1985. For more information on Multi-Soft and its products, please contact Ross Altman at Multi-Soft 609/896-4100.

CDSI (Computer Data Systems Inc. NASDAQ:CPTD) is a professional and processing services firm which provides consulting, financial systems, and data processing services to the federal government, not-for-profit institutions, and commercial clients. For more information on CDSI and its products and services, please contact Howard Friedman, sales director, 301/921-7256.

EASTON, PA (MAY 29) BUSINESS WIRE - SI Handling Systems Inc., (NASDAQ: SIHS) traded on the Additional Over-the-Counter (NASDAQ) Exchange under the trading symbol ''SIHS,'' announces its earnings for the fiscal year ended Feb. 25 as follows:

	(in thousands) Fiscal Year Ended	
	Feb. 25, 1990	Feb. 26, 1989
Net sales	$ 17,534	$ 21,846
Earnings before income taxes	574	529
Income taxes	--	--
Net earnings	$ 574	$ 529
Net earnings per share	$ .39	$ .36

Sales declined due to a lower level of backlog entering the fiscal year and weakness in the new order rate early in the year.

Profits were up due to the company's excellent performance on major contracts, but were partially offset by the negative impact of several orders taken in support of the company's efforts to penetrate markets for its newly acquired and devloped products.

AMHERST, NY (MAY 29) BUSINESS WIRE - Mark IV Industries, Inc. (NYSE: IV) Tuesday announced that its Dayco subsidiary has reached an agreement with the United Rubber Workers (URW) to end a 24-day strike at Dayco's Waynesville, North Carolina plant.

The union membership approved a five-year contract in a vote taken on

Friday, May 25. Approximately 800 of the plant's 1,050 employees are represented by the URW.

During the strike, the company was able to continue necessary production to meet all customer demands including full operation of its major distribution center.

Sal H. Alfiero, Mark IV's chairman said, ''Although we expect that first quarter earnings will be reduced by approximately $650,000, or four cents per share fully-diluted, as a result of this strike, we still expect aggregate first quarter earnings to compare favorably to last year's first quarter. We are pleased that the peaceful resolution of these negotiations resulted in a non-inflationary agreement which will ultimately make the Waynesville facility more competitive.''

Dayco's Waynesville, North Carolina plant manufactures curved radiator hose primarily for the OEM and automotive aftermarket, and plastic hose for the floor care and swimming pool industries.

Mark IV, headquartered in the Buffalo suburb of Amherst, New York, is a diversified manufacturer of products in three business segments: Technical Products and Systems; Engineered Products and Systems; and Transportation Products and Systems.

BRAINTREE, MA (MAY 29) BUSINESS WIRE - Mike Grossman, chairman of the board, president and chief executive officer of Grossman's Inc. (NASDAQ:GROS) said that Grossman's directors would provide a recommendation to stockholders as soon as practicable if Hawaii-based real estate investor Jay H. Shidler and Robert W. Holman Jr. carry out their recently disclosed intention to solicit stockholder consents to remove the company's directors and to elect their own nominees.

''Until that time,'' Grossman said, ''we urge the stockholders not to sign any consent solicited by the Shidler-Holman group as part of its takeover attempt.''

Grossman's also announced that May 30, 1990 had been fixed as the record date for determining stockholders entitled to give, revoke or withhold any consent solicited by the Shidler-Holman group and relating to the matters referred to in the group's SEC filings.

Grossman's, a major retailer of lumber and building materials, operates 157 stores in nine Northeastern states and in California.

ATLANTA (MAY 29) BUSINESS WIRE - First Financial Management Corp. (NYSE:FFM) Tuesday announced the signing of a definitive agreement to acquire Nationwide Credit (Nationwide) of Atlanta.

Nationwide is one of the largest debt collection and accounts receivable management companies in the United States. Nationwide provides a full range of customized debt collection services to many of the nation's largest financial institutions, retailers, government agencies and health care providers and had revenues of over $30 million in 1989.

Its technological innovation in data/telecommunications and software development allows it to be a low cost provider of high quality collection services.

The agreement calls for a purchase price of approximately $65 million consisting of 1.3 million FFMC shares and cash of $31.8 million subject to adjustment based on the net worth of Nationwide at closing. In addition to the initial consideration, there is an additional potential earnout of $30 million based on earnings above targeted levels through 1994.

In addition, FFMC has acquired Online Financial Communications Systems Inc. (Online) of Atlanta. Online develops, markets and maintains computer software systems, as well as providing related services. It develops technological solutions for a variety of business communication needs.

Online's software solutions are designed for integrated PC-based intelligent work stations which provide branch automation, primarily for financial institutions as well as products and services associated with FFMC's MicroBilt subsidiary. Revenues are approximately $6 million annually.

FFMC's wholly owned subsidiary, NaBANCO, signed a definitive agreement to acquire the merchant credit card contracts of Bank of Boston and its affiliates in five New England states. Bank of Boston and its affiliates are major providers of Visa and MasterCard merchant services throughout New England, with a portfolio of approximately $500 million in annual credit card volume.

FFMC also announced the finalization of a five-year contract with Bank of the West to provide host based application processing services, including EFT processing. Bank of the West recently acquired Central Bank, a previous customer of Basis Information Technologies Inc. (Basis), a wholly owned subsidiary of FFMC.

The agreement effectively continues the relationship with Central Bank and extends it to all of the Bank of the West. Based in San Francisco, Bank of the West is the 10th largest commercial bank in California with $2.6 billion in assets and 86 branches.

These acquisitions are in addition to the purchase of Electro Data Corp. of Denver, which was completed last week.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries. It is a leader in data imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing and is one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia and its subsidiary,

First Family Financial Services, a major regional consumer finance company. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

DAYTON, OH (MAY 29) BUSINESS WIRE - Super Food Services Inc., one of the country's largest food wholesalers, today announced the election of Dr. Edward H. Jennings, president of Ohio State University, to its board of directors.

Dr. Jennings became the 10th president of Ohio State University on Sept. 1 1981, after two years as president of the University of Wyoming. He also holds an appointment as professor in the academic faculty of finance at Ohio State. Previously he was vice president for finance and university services at the University of Iowa, where he also was a faculty member for 10 years.

Jennings' background includes extensive experience in both the academic community and private enterprise.

Super Foods wholesales a complete line of food and non-food products to over 800 supermarkets in Ohio, Kentucky, Indiana, Michigan and Florida. Super Foods' stock is listed on the New York Stock Exchange.

SALT LAKE CITY (MAY 29) BUSINESS WIRE - Alta Gold Co. (NASDAQ:ALTA), the Salt Lake City-based diversified metal mining and production company, says its newly commissioned Ward Mountain underground zinc mine and converted Taylor Mill reached full production status on May 21.

Dan S. Bushnell, Alta Gold chairman and chief executive officer, said the Taylor facility is now procesing Ward ores at a rate of 1,000 tons per day seven days a week.

Conversion of the mill from a silver processing plant to a base metal concentrator began in the fall of 1989, and limited production began in

April of this year.

The Ward Mine and Taylor Mill are located south of Ely, Nev. and are about 14 miles apart. The Ward ores include proven-probable minable reserves of 1.7 million tons containing six percent zinc, 0.8 percent copper, 0.7 percent lead and two ounces of silver per ton. The mine has above-ground stockpiles of approximately 120,000 tons of ore.

The Taylor Mill will produce separate zinc, copper and lead-silver-gold concentrates. The zinc concentrate is being shipped and sold to the Cominco smelter at Trail, British Columbia under a five-year contract negotiated with Clarendon Inc. Sale of the copper and lead-silver-gold concentrates is being negotiated.

Annual production of 23 million pounds of zinc, 1.35 million pounds of copper, 1.5 million pounds of lead and 300,000 ounces of silver coupled with minor amounts of gold is expected.

Bushnell said, ''We are excited having the Ward Mine and Taylor Mill both operating now at full capacity, and having a significant base metals production capability to supplement our gold production. Clearly, Alta Gold is a diversified mining company in the truest sense.''

The Taylor Mill, and the adjoining 2,000 acres of silver and gold mining claims, are owned by NERCO Minerals and are being leased by Alta Gold. Prior to December, 1984, Alta Gold predecessor companies and NERCO produced three million ounces of silver from those claims, but suspended opertions due to the decline in silver prices.

An estimated 12.4 million ounces of silver and 7,900 ounces of gold remain to be recovered once silver prices improve to economically feasible levels.

#90149b0793 05/29/1990 ~Business Wire

QUINCY, MA (MAY 29) BUSINESS WIRE - Clean Harbors Inc. (NASDAQ:CLHB) Tuesday announced its results for the fiscal year and fourth quarter ended Feb. 28, 1990 and that it has received a favorable decision from the Massachusetts Hazardous Waste Facility Site Safety Council concerning the proposed incinerator for its Braintree, Mass., treatment facility.

Revenues for fiscal year 1990 were $131,441,000 with net income of $695,000, or 8 cents per common and common equivalent share, as compared

to revenues of $95,679,000 with net income of $2,617,000, or 33 cents per common and common equivalent share for the fiscal year ended Feb. 28, 1989.

Revenues for the fourth quarter of fiscal year 1990 were $29,808,000 with a net loss of $2,664,000, or 30 cents per common and common equivalent share, as compared to revenues of $24,348,000 with a net loss of $2,313,000, or 27 cents per common and common equivalent share for the fourth quarter of the prior year.

In late February the company announced that it expected a fourth quarter loss as a result of weak revenues and lower than expected margins during December and January.

Alan S. McKim, chairman and chief executive officer said, ''The seasonal impact of the winter quarter resulted in a slowdown in our field services and remediation projects. Increased competition for the fewer projects that were performed during the winter resulted in significant pressure on pricing and margins.''

McKim also pointed out that severe cold temperatures in December hindered operations at Clean Harbors' wastewater treatment facilities in Cleveland, Chicago and Baltimore. ''Our largest treatment facility (Braintree, Mass.) was also affected by the slowdown in field services projects, as a significant percentage of its revenues is derived from field services projects,'' McKim said.

Today the Site Safety Council announced its decision endorsing the company's analysis of the social and economic impacts of its proposed incinerator.

This decision by the Council, in conjunction with the May 15th approval by the Massachusetts Secretary of Environmental Affairs, clears the way for the next phase of the approval process, which is the negotiation of a siting agreement with the Braintree Local Assessment Committee.

NEW YORK (MAY 29) BUSINESS WIRE - Regency Cruises Inc. (NASDAQ/NMS Symbol: SHIP) Tuesday announced the 950-passenger Regent Star, operated by Regency Cruises Inc., was successfully refloated early Tuesday morning after having been grounded on a sandbar in Delaware Bay for 2 days.

The operation was accomplished using ship propulsion and the assistance of three tugboats. A Coast Guard cutter and helicopter on the scene confirmed there is no evidence of pollution or any fuel leakage; there is also no known structural damage to the ship.

Coast Guard officials stationed in Philadelphia were also on the scene throughout the entire episode. Their intervention proved instrumental in arranging the transfer of passengers and supervising efforts to refloat. Captain Larry Murdoch is to be commended for his efforts as well as the exemplary performance and cooperation of his staff.

The Regent Star, now due to arrive in Philadelphia Harbor Tuesday evening, will undergo the customary Coast Guard inspection. Due to the ship's delay in arriving, the May 27th 5-day cruise was cancelled; however, the vessel is scheduled to resume cruise service from Philadelphia on Friday, June 1.

Beginning June 24th, the Regent Star will launch a new series of 7- day cruises between New York and Montreal to New England, French Canada and the Maritime Provinces. The Regent Sea and Regent Sun at that time will be positioned in Alaska sailing 7-day cruises between Anchorage and Vancouver.

WALTHAM, MA (MAY 29) BUSINESS WIRE - The Reece Corp. (NYSE:RCE) Tuesday reported that its board of directors voted to omit the second quarter dividend of $0.05 per common share.

Peter J. Abate, president and chief executive officer, said, ''The board of directors decided to omit the second quarter 1990 dividend as a result of the depressed results ($48,000 or $0.02 per share) in the first period of this year and the prospect of an equally sluggish performance in the current period.

''While this action does not preclude the payment of dividends later this year, future dividends will depend on the company's future earnings, capital requirements and financial position.''

The Reece Corp. manufactures and distributes specialized apparel machinery for the worldwide clothing industry.

STAMFORD, CT (MAY 29) BUSINESS WIRE - Citizens Utilities board of directors Tuesday declared a 1.33 percent second-quarter stock dividend on the company's outstanding Series A and Series B common stock, payable on June 29 to shareholders of record on June 8.

This compares with the first quarter dividend which was also at a 1.33 percent rate.

Hampton D. Graham Jr., vice president, treasurer and chief financial officer, noted that dividends on Series A shares, which constitute 84 percent of the company's outstanding shares, have been paid in stock since 1956, while stock dividends on Series B shares were initiated in 1990.

Graham added that Series A stock dividends are now being paid quarterly rather than semi-annually as in past years because the company's certificates of incorporation requires that when the board declares a stock dividend on the company's Series B shares it must declare the same stock dividend on Series A shares.

Citizens Utilities, one of the nation's leading growth companies, is a diversified operating public utility providing telecommunications, including cellular and paging, electric, gas, water and wastewater services to more than 492,000 consumer connections in over 500 communities in 12 states: Arizona, California, Colorado, Hawaii, Idaho, Illinois, Indiana, Nevada, Ohio, Pennyslvania, Utah and Vermont.

For 45 years, the company's administrative offices have been located in Fairfield County, Conn.

#90149c0093 05/29/1990 ~Comtex

WASHINGTON (MAY 29) COMTEX - The 8-K report filed at the SEC shows Fertility and Genetics Research Inc. agreed in principal on May 10, 1990 to sell all assets of Americare Health Services Corp. and Health Care Servics Inc., two Florida-based subsidiaries. Perkins Holdings Inc., the purchaser, is to make compensation by assuming a bank debt of Fertility and Genetics of $1.4 million, as well as paying off all outstanding

liabilities of the two Florida subsidiaries. Further, it is expected that Perkins will pay, subject to closing adjustments, an approximate additional $150,000 to Fertility and Genetics.

The date of scheduled closing is May 22, 1990. The plan of sale came as a result of demands on the part of Fertility and Genetic's bank for either the production of liquid collateral or the repayment of certain debts.

HARARE (MAY 29) - Thousands of teachers defied government pleas to return to work and marched through cities and towns nationwide Tuesday as they marked the end of the first week of a strike for better pay and conditions.

The strike, which began in the country's main urban centres, has snowballed over the week, spreading to remote rural schools.

The strikers, who do not hold university degrees, are demanding salary increases of 23 percent backdated to March 1 to match those awarded then to graduate teachers.

Only four percent of Zimbabwe's 90,000 teachers are university graduates.

Leaders of the Zimbabwe Teachers' Association (Zimta) were due to meet late Tuesday with Education Minister Fay Chung to press the strikers' case.

Ms. Chung said Monday that her ministry agreed that non-graduate teachers were badly paid and had put forward proposals for pay increases which would cost an extra 200 million Zimbabwe dollars (80 million U.S.) a year.

Education has been a priority of President Robert Mugabe's government since it came to power at independence 10 years ago, and is the biggest item in the national budget -- taking some 25 percent.

Ninety per cent of that, some 1.09 billion Zimbabwe dollars (around 448 million U.S.), goes on teachers' salaries.

On Tuesday, some 4,000 demonstrating teachers brought traffic to a halt as they marched through the centre of the capital, Harare.

In the town of Chinoyi, some 110 kilometres (70 miles) to the north-west,

strikers were also on the march, carrying placards reading: "You can't go to university without me" and "We are fed-up with eating dried kapenta fish," (a cheap food).

Schools throughout the country have been thrown into confusion, with many pupils told to report for lessons but being sent home when no teachers turn up for work.

Primary schools, which are staffed mainly by non-graduates, have been particularly hard hit.

#90149d0110 05/29/1990 ~French/German News Agency

BONN (MAY 29) - The East and West German economy ministers on Tuesday discussed ways to speed up privatization in East Germany and create new jobs after German monetary union takes effect in July.

East German Economy Minister Gerhard Pohl told a joint press conference here with his West German counterpart Helmut Haussmann that "there would probably be a million workers needing retraining this year" in East Germany.

He stressed that the East German parliament was to pass a law on professional training at the end of June.

The two ministers said that they were agreed for the moment to reject a Soviet proposal for the setting up of a special fund and the opening of trilateral negotiations between Moscow and the two Germanies over East Germany's trade commitments to the Soviet Union.

Mr. Haussmann said that two working groups were to be set up to study necessary measures to adapt the East German economy after monetary union takes effect and to promote development of medium-sized businesses.

The two ministers said they had also discussed ways to speed up privatisation of East German state holdings, and Mr. Pohl said that the breaking up of conglomerates should be complete by the end of October.

But he said that only 170 of the 8,000 collectives had so far been privatised.

#90149d0130 05/29/1990 ~French/German News Agency

PARIS (MAY 29) - Prime Minister Tadeusz Mazowiecki Tuesday obtained French assurances of support and understanding as it struggles with an enormous external debt.

"The importance of the problem for the success of reforms in Poland is well understood and we are counting on France" to help Poland out, Mr. Mazowiecki told a news conference after talks with President Francois Mitterrand and Prime Minister Michel Rocard.

With a foreign debt of 40 billion dollars Poland is hoping to reduce that

burden by 80 percent.

Mr. Rocard indicated that support from France would be forthcoming.

"Poland has an ally in us," Mr. Rocard said Tuesday.

French Finance MInister Pierre Beregovoy and Polish Finance Minister Leszek Balcerowicz were to sign a bilateral accord later Tuesday on the rescheduling of the French portion of 8.3 billion francs (1.4 billion dollars) in loans to Poland through the Club of Paris.

But Mr. Mazowiecki expressed disappointment about the lack of French business investment in Poland. "We have decided to stimulate to the maximum the development of our economic relations, but governments can't do everything," he said.

#90149d0190 05/29/1990 ~French/German News Agency

VENTERSDORP, SOUTH AFRICA (MAY 29) - After a year out of the limelight following a sex scandal, fiery rightwinger Eugene Terre'Blanche has regained prominence in recent weeks among whites unsettled by talks between the South African government and the formerly banned African National Congress.

"I will never accept an ANC government," Mr. Terre'Blanche, founder of the neo-fascist Afrikaner Resistance Movement (AWB), said in an interview at the movement's headquarters in this large rural town in western Transvaal where he was born and lives.

"That night, it will be war," he warned.

The AWB (Afrikaner WeerstandBeweging), a paramilitary outfit which calls itself a "cultural" movement, was formed in 1973. It wants a white state set up on the lands of the Boer republics of last century: Transvaal, Orange Free State and Vryheid, which covers what is today northern Natal.

Its militants were much in evidence in their khaki uniforms with the swastika-like emblem at the weekend's major rally near Pretoria staged by the hardline official opposition, the Conservative Party.

Since President Frederik de Klerk began reforming the apartheid system and freed ANC deputy president Nelson Mandela in February from life imprisonment,

Mr. Terre'Blanche -- commonly known by his initials as E.T. -- has been ranging the country to alert whites and Afrikaners in particular to prepare for the worst.

"In the last two months, no hall in South Africa was big enough to take our people," boasted the 49-year-old former policeman who now farms.

With a pepper and salt beard and an exceptional oratorical style, he is acknowledged even by enemies to possess undeniable charisma.

On his office wall are portraits of four Boer generals at the time of the war against the British, and it is their example which inspired the formation of Boer commandos presented to the press earlier this month.

Assembled from all over the country, the 300 men and women armed with revolvers and truncheons were officers who would be in charge of setting up a commando in every district and town, Mr. Terre'Blanche explained.

Their carrying guns did not bother him. "Every Boer is an armed man," he remarked.

He was also at pains to point out their purely defensive role, since he has often been accused of seditious intent in the past. "The commandos will be responsible for the safety of the people and property," he said.

Mr. Terre'Blanche insisted: "I want my land. Or else we are heading for war."

In a reference to Mr. Mandela, he asked: "How can I give my land to a black from the Transkei?"

The AWB is reputed to have wide support in the police and the army.

Asked what the two forces would do if the resistance movement took to arms,

he said Law and Order Minister Adriaan Vlok, whom he met a few weeks ago, was "afraid" of the AWB's backing among police.

Then he added, smiling: "I cannot comment on that."

#90149d0240 05/29/1990 ~French/German News Agency

PARIS (MAY 29) - King Carl XVI Gustaf of Sweden arrived here Tuesday on a two-day visit accompanied by his wife Princess Silvia and a large delegation of businessmen led by Volvo head Pehr Gustav Gyllenhammer.

The king is to hold talks with French President Francois Mitterrand, Prime Minister Michel Rocard, and Industry Minister Roger Fauroux.

He has made a practice of taking Swedish industrialists on visits to a

different foreign country once or twice each year.

The group travelling with him this time includes heads of Sweden's top 20 companies, Swedish diplomatic sources here said.

Their visit is aimed particularly with an eye to the single European market due to take shape by 1993.

Fifty-four per cent of Sweden's exports go to European Economic Community (EEC) nations, while 55 percent of its imports come from EEC states, according to official figures.

However France lags far behind West Germany and Britain as a Swedish trade partner, buying only 5.3 percent of its exports and providing just five per cent of its imports.

On Wednesday and Thursday, the king is to tour the aeronautics giant Aerospatiale and attend a lecture and debate on bilateral industrial cooperation hosted by the French employers' organization CNPF and the Swedish Industrial Federation.

#90149d0270 05/29/1990 ~French/German News Agency

GENEVA (MAY 29) - The United Nations High Commissioner for Refugees (UNHCR) is to cut spending on general programs by 18 percent under a budget compromise adopted by the executive committee here Tuesday.

The committee, meeting in a special session, agreed to cut the UNHCR budget for 1990 from 414 to 340 million dollars after donor countries, who want to share the burden of funding the agency, reached a compromise with countries of first asylum seeking greater international aid.

U.N. High Commissioner for Refugees Thorvald Stoltenberg warned in March that the organization was in dire financial straits.

However the cuts are not expected to reduce this year's projected deficit of 82 million dollars, High Commission sources said.

In a text adopted Monday, the executive committee had recognized the gulf between refugees' growing needs and the U.N.'s dwindling resources.

It is hoped money can be saved by administrative reorganization and farming out some of the High Commission's tasks to other U.N. agencies, particularly the U.N. Development Programme.

Priority will go to ensuring refugees' survival, with education and training schemes likely to suffer.

African refugees, main beneficiaries of the agency's general programmes, will probably see their aid fall, observers said.

Meanwhile several donor states, including West Germany, Finland and other Nordic countries, announced supplementary contributions totaling between 25 and 30 million dollars.

Finland pledged an additional five million dollars, while France and Britain promised to boost their donations, without saying by how much.

#90149d0310 05/29/1990 ~French/German News Agency

ROME (MAY 29) - The Vatican is trying to arrange negotiations among all parties to the Israeli-Palestinian conflict, the Roman Catholic patriarch of Jerusalem said in an interview appearing here Tuesday.

"The Catholic Church is in contact with all authorities having influence on the Israelis and Palestinians to secure peace," Monsignor Michel Sabbah was quoted as telling the weekly Famiglie Cristiana.

"At the moment it is making use of international diplomatic mediation in order to bring everyone to a peace conference."

Msgr. Sabbah discussed the initiative May 16 with Vatican Foreign Minister Msgr. Angelo Sodano and Secretary of State Agostino Casaroli.

"There is no alternative to dialogue," he said in the interview. "We must put an end to violence and talk to the enemy.

"The Palestinians have been ready for a year, since the day (Palestine Liberation Organization Chairman) Yasser Arafat said he was ready to recognize the state of Israel.

"Now it's up to the Israelis to say yes. They should know that peace is the only means of salvation for the Jewish people."

But he said the Vatican should not recognize the state of Israel, which he charged with wanting "to expand into other territories."

"How could the Church acknowledge such injustice?" he asked.

#90149d0400 05/29/1990 ~French/German News Agency

KATHMANDU (MAY 29) - Remnants of Nepal's Panchayat system re-emerged Tuesday, shaped into political parties which are expected to challenge the

ruling Nepali Congress Party and United Left Front for power.

However the old political establishment, which was toppled by protests that began in January, failed to heal a split. The rival factions announced simultaneously they were setting up parties with the identical name, National Democratic Party.

Nepal's Panchayat system, which was officially parlayed as partyless grassroots democracy, used to function like a ruling party in a one-party state. Panchayat activists were demoralised when King Birendra opened the way this year to multi-party democracy.

The Panchayat supporters have coalesced around two former prime ministers, Surya Bahadur Thapa and Lokendra Bahadur Chand.

Observers said a united National Democratic Party would have been a major threat to the Congress and the Left, but the divided parties could still play a major role.

The National Democratic Party (Lokendra) promised all-round development of the regions as well as constitutional monarchy under a multi-party political system.

Its supporters include former Nepalese prime minister Matrika Prasad Koirala and the former chairmen of the dissolved national legislature, Biswabandu Thapa, Rajeswore Devkota and Lalit Chand.

The rival party said it would announce a manifesto soon. Its leader, Surya Bahadur Thapa, told the Rss news agency his group believed in national unity and the rights of the individual. Backers of the Ndp (Surya) include ex-ministers Ravindra Nath Sharma, Keshar Bahadur Bista, Hari Bahadur Basnet and Nain Bahadur Swanr.

#90149d0420 05/29/1990 ~French/German News Agency

OSLO (MAY 29) - Norway removed its last law discriminating against women on Tuesday when parliament voted to amend a clause in the constitution giving princes preference over princesses in succession to the throne.

The law will only apply to royalty born after 1990, and Prince Haakon Magnus will therefore someday become king, although his sister, Princess Maertha Louise, is older.

"It is a basic belief in Norwegian society that both sexes have equal rights and obligations. It is obvious that this also should apply to the royal family," said conservative representative Jan Petersen when the bill was briefly debated before adoption Tuesday.

The Socialist Left party again introduced a proposal that the monarchy be replaced by a republic.

The proposal received just 19 votes out of 165, reflecting both the immense personal popularity of Norway's 86-year-old monarch King Olav V.

MOSCOW (MAY 29) - Lithuanian president Vytautas Landsbergis has left for Czechoslovakia for talks with President Vaclav Havel, Lithuanian parliament vice-president Bronius Kuzmiskas said Tuesday.

The surprise visit by Mr. Landsbergis, at the personal invitation of Mr. Havel, was in response to Czechoslovakia's offer to act as mediator in the dispute between Moscow and Vilnius over independence, Mr. Bickauskas told a press conference.

Lithuanian Prime Minister Kazimiera Prunskiene made a tour of several countries, including the United States, earlier this month.

The trip to Czechoslovakia is Mr. Landsbergis's first foreign visit since the Lithuanian parliament's unilateral declaration of independence on March 11.

#90149d0690 05/29/1990 ~French/German News Agency

WASHINGTON (MAY 29) - The State Department Tuesday expressed concern about reports of torture in Tibet and urged China to open its prisons there to foreign observers.

The U.S.-based human rights group Asia Watch Monday accused Washington of ignoring human rights abuses in Tibet.

"We also are deeply concerned about continuing reports of human rights abuses in Tibet", said State Department spokeswoman Margaret Tutwiler.

"Like Asia Watch we have received numerous reports of torture but we have been unable to confirm these reports.

"We hope that the Chinese Government, which recently reaffirmed its opposition to such practices, will allow foreign observers to visit prisons and labor camps in Tibet and will take effective measures to prevent any such abuses from occurring", she added.

Miss Tutwiler noted however that since last March, "several periods of potential tensions, including the anniversary of the imposition of martial law, passed whitout reports of serious incidents". Martial law was lifted in Lhasa on May 1 and a U.S. diplomat was recently permitted to visit the province.

#90149d0720 05/29/1990 ~French/German News Agency

PARIS (MAY 28) - The United States and the European Economic Community (EEC) Tuesday failed to smooth out differences over trade issues, especially agriculture, as OECD ministers prepared for their annual talks opening here Wednesday.

U.S. pressure for "fundamental" reform over the coming decade of agricultural policies seen as distorting world trade was "by far" the most controversial issue facing the annual council session of the 24-nation Organization for Economic Cooperation and Development, diplomatic specialists said.

U.S. Trade Representative Carla Hills said Tuesday that the OECD ministers "must give a political push" if the Uruguay Round of multilateral trade negotiations were to be brought to a successful conclusion in Brussels next December.

In a snipe at the 12 EEC countries, she said: "the Europeans have to decide whether they want a successful Round", and that they had to "understand... that agriculture is key to the success" of the GATT (General Agreement on Tariffs and Trade) negotiations.

Senior EEC officials said the community was fully aware of the importance of a substantial Uruguay Round agreement, but felt the OECD was not the right venue for bargaining on "details".

Implying that on agriculture, the U.S. side was seeking to "twist words" under "the pretext of getting the negotiations moving", one official said the OECD communique could send a "strong political signal" by reaffirming

the determination and political will of OECD countries to achieve progress.

But it should not go into "details of wording" on controversial issues.

Mrs. Hills said she wanted the OECD communique to stress the need for a "substantive progressive reduction" of barriers to market access for farm products, export subsidies and internal support to agriculture, as well as on food health regulations.

-30- 2059

#90149d0780 05/29/1990 ~French/German News Agency

MOSCOW (MAY 29) - About 3,000 people rallied outside the Kremlin and at a Moscow stadium Tuesday to celebrate the election of radical communist Boris Yeltsin as Russian president, AFP correspondents reported.

But the number of demonstrators were less than expected by organisers from pro-democracy movements, and Mr. Yeltsin cancelled planned speeches to the rallies.

Some people said they had been prevented from reaching the demonstration in central Moscow by police. Police have enforced a ban on central demonstrations in recent weeks.

Mr. Yeltsin was elected president of the Russian parliament by obtaining 535 votes, four more than the 50 percent majority required.

He defeated a candidate supported by Soviet President Mikhail Gorbachev, Alexander Vlasov, who won 467 votes.

#90149d0840 05/29/1990 ~French/German News Agency

ISLAMABAD (MAY 29) - More than 40 maimed corpses have been recovered from the Jhelum river, which flows from India-controlled to Pakistan-controlled Kashmir, the Associated Press of Pakistan (APP) reported.

The bodies, allegedly the victims of "repression" in the southern two-thirds of Kashmir that is under New Delhi's control, were recovered Monday, the news agency said but gave no further details.

U.S. Congressman Stephen Solarz was told of the affair Tuesday in talks with refugees from Indian Kashmir in Muzaffarabad, capital of Pakistan-controlled Kashmir, APP said.

Mr. Solarz offered sympathy for the refugees and said he would discuss the Kashmir problem in meetings with Indian officials.

He was to leave for New Delhi on Wednesday after a three-day visit to Pakistan.

-30- 979

#90149d0890 05/29/1990 ~French/German News Agency

KARACHI (MAY 29) - Prime Minister Benazir Bhutto Tuesday dispelled fears that the Pakistan military would have to intervene in the face of ethnic strife in her home province Sindh.

She refused to succumb to opposition pressure for an imposition of emergency rule in the province, but said the army would be called to help the civil administration in curbing ethnic and political violence which has killed nearly 130 people since Sunday.

Bhutto was said to have told journalists her government was trying hard to establish the rule of law.

Official sources said 13 people fell to sniper and police firing in Karachi Tuesday. An unofficial count put the death toll at 14.

Army chief General Mirza Aslam Beg visited his troops sent to the city of Hyderabad after a popular outcry against police firing on ethnic Mohajir crowds.

Beg asked the troops to help ''law-abiding citizens'' and to be ready at the same time for relocation to the border, said to be threatened by India.

Mohajir settlers have been doing battle with Sindhi nationalists in Karachi and the city of Hyderabad to the north. Troops deployed in the commercially important cities brought relative peace.

Thousands of Mohajirs holding pictures of the late military ruler, General Mohammad Zia ul-Haq, assembled in a locality of Hyderabad in the hope Beg would pass through.

They shouted ''Come to our help, Pak army'', demanding martial law and public hanging of policemen who shot dead some 60 curfew violators, including 20 women, on Sunday. Beg did not visit the area, the Ppi news agency said.

#90149d0940 05/29/1990 ~French/German News Agency

PARIS (MAY 29) - A "round table" discussion organised by France's ruling Socialist party ended Tuesday with France's political parties no closer to agreement on immigration policy.

Prime Minister Michel Rocard, who organized the two-hour session aimed at reaching a consensus on French immigration policy, said there remained "important points of disagreement."

Conservative leader Jacques Chirac, head of the neo-Gaullist RPR, said on French television that the opposition and the government disagreed "on everything except the fact that the tolerance threshold (on immigration) has been crossed."

In a proposed immigration "charter", the prime minister had called for such measures as stepped up border controls, modifying the time required to get a resident's visa and breaking the illegal immigration "network".

The charter had the twin goal of cracking down on illegal immigrants and integrating those legally in France.

Immigration has become an emotional political issue in France with 4.4 million immigrants officially living in France -- mostly from North Africa and southern European states such as Portugal -- and hundreds of thousands more estimated to be in the country illegally.

The talks, which the opposition attended only reluctantly on grounds that signing a charter was tantamount to "sharing power" as one centrist deputy put it, come three weeks after the May 9 desecration of a Jewish cemetery in Carpentras, in southern France.

Discontent over immigration policy has led to a resurgence on the right, and particularly of Jean-Marie Le Pen's extreme right National Front, which was not invited to the round table discussion.

The opposition has demanded that the government drop a proposal to allow

immigrants the right to vote in local elections before a national consensus on the issue can be reached.

Mr. Rocard said the government would not back down on its policy of controlling immigration while working to integrate immigrants into the system.

MONROVIA (MAY 29) - The Liberian Senate Tuesday began debating President Samuel Doe's call for an early general elections in a bid to end the present rebel crisis in the country, an official statement said.

The statement said that Wednesday's debate on bringing forward the elections, now scheduled for October next year, would be public.

Mr. Doe said Monday that the proposal was ''in the interest of national peace and security''.

Mr. Doe last week told a political rally by supporters of his National Democratic Party of Liberia he welcomed early elections, and was prepared to step aside if this would help bring an end to the crisis.

On Tuesday, rebels led by Charles Taylor were reported to be attacking government positions around the international airport, 30 miles (50 kms) east of here, as they closed in on the capital.

#90149d1320 05/29/1990 ~French/German News Agency

PORT GENTIL (MAY 29) - The general in command of the Gabonese forces who on Tuesday took control of Gabon's main oil city of Port Gentil has denied allegations that his troops fired on protesters.

General Poncy, the commander in charge of the Port Gentil province, told a news conference here that the injuries of six people who were hospitalized during the day were due to grenade shrapnel and not to bullets.

Gen. Poncy, who was flanked by Armed Forces Chief of Staff General Idris Ngari, said his 300 men had used grenades against protesters who fired on them from behind barricades.

Earlier in the day an AFP reporter had heard gunfire and the explosion of grenades in the city.

Gen. Poncy added that order was not yet fully re-established because a large quantity of stolen arms were still in the hands of the rioters.

However he said his forces were in control of the lagoon city's streets.

The Gabonese officer added that either 18 or 19 people, including all the local leadership of the opposition Gabonese Progress Party had been arrested during the day's operations. They would be taken to the capital Libreville to be tried in front of a military court, he added.

Also on Tuesday, around a thousand Africans were taken from Port Gentil towards Libreville on the troop carrier which had earlier brought in the troop reinforcements.

And in Libreville a reliable source said that since the start of the unrest a week ago President Omar Bongo had called the French former head of his elite presidential guard unit out of retirement to help him restore order.

Louis "Loulou" Martin, 68, who had resigned his post of major in the French army to organize Mr. Bongo's guard, was one of a core of French expatriate military men who helped build up the west African nation's armed forces.

JOHANNESBURG (MAY 29) - Police exploded a parcel bomb in the basement of a bank here by controlled detonation Tuesday.

The bank received an anonymous bomb warning around noon, shortly after delivery of the parcel to the bustling Fox Street site, according to police spokesman Captain Eugene Opperman.

Police cordoned off the street before exploding the bomb, causing slight damage to the bank.

TOKYO (MAY 29) - Japan's Toyota Motor Corp. announced Tuesday a 160 million dollar plan to set up new subsidiaries to produce automotive parts in the Philippines and Malaysia, overseen by a new management unit in Singapore.

The three new companies are part of a "complementary auto parts scheme" for the six-member Asssociation of Southeast Asian Nations (ASEAN) announced in September last year, the company said.

Under the plan, Toyota will set up a new company capitalised at one billion pesos (45 million dollars) to produce transmissions in the Philippines.

The Japanese carmaker will also form a joint venture capitalised at 27

million Malaysian dollars (10 million U.S.) to make steering links in Malaysia.

In addition, a third company capitalised at six million Singapore dollars (3.2 million U.S.) will be set up in the island republic to coordinate activities between various ASEAN countries under the scheme.

TOKYO (MAY 29) - Japan's Shiseido Co. Ltd., one of the world's three biggest cosmetics firms, said Tuesday its net consolidated profit rose 19 per cent to 11.4 billion yen (76 million dollars) in the year to March.

Sales climbed 14 percent to 456 billion yen (3.04 billion dollars), the company said, adding that the performance of "anti-ageing" skin-care products, hair-care products and health foods was particularly strong.

Cosmetics sales advanced 10 percent to 353 billion yen (2.4 billion dollars) while sales of toiletries jumped 22 percent to to 60.6 billion yen (404 million dollars). Sales of fashion goods, foods and other products leapt 33 percent to 42.3 billion yen (282 million dollars).

Shiseido, whose latest performance was compared with the year to November 1988 because of an accounting change, forecast a net consolidated profit of 14.5 billion yen (97 million dollars) in the current year. Sales are expected to reach 500 billion yen (3.3 billion dollars) in the same period it said.

BANGKOK (MAY 29) - Thailand's foreign trade increased 15 percent in the first quarter of 1990 to 12.3 billion dollars, on a year-on-year basis, state-run Radio Thailand said Tuesday.

The radio reported a trade deficit in the period of 1.8 billion dollars.

A rise in imports of 18 percent "was a result of the country's economic and investment expansion, the increase in people's income, and growing demand for fuel and oil," it said.

TOKYO (MAY 29) - Canon Inc., a top Japanese camera manufacturer, said Tuesday it would start compact camera production in Malaysia and China this year under a scheme to transfer all compact camera production abroad by

1992.

Canon officials said Te company would start producing compact cameras in Malaysia in August, producing 500,000 cameras in the first year and to be raised to two million by 1992.

It also plans to start compact camera production at its Chinese susidiary, Cannon Zhuhai Inc., from October this year with plans to produce 400,000 units a year in 1992.

Canon is already producing 1.8 million compact cameras annually at its Taiwan subsidiary, Canon Inc., Taiwan.

Canon's plant in Japan's Oita prefecture, which now produces compact cameras, will become Canon's main facility for making single-lens-reflex cameras, they said.

JAKARTA (MAY 29) - Indonesia has dismantled more protectionist barriers in the hope of sustaining rapid economic growth spurred by earlier deregulation, officials and economists say.

The government announced late Monday its latest package of economic deregulation with sweeping cuts in import tariffs for nearly 2,500 commodities and abolition of import restrictions for 371 others.

The reforms will have far-reaching effects on the once heavily protected pharmaceautical industry with imports of their components now virtually open to all. Previously they were restricted to appointed traders.

Also freed from non-tariff barriers are imports for various fruits, meat and other food products, intermediate steel products, and components and parts for the electronic and watch industries.

The move came after the World Bank in its annual report on Indonesia urged Jakarta to continue with the pace of economic deregulation initiated since 1983 and sustain the rapid growth achieved in the last two years.

The report published early this month said the Indonesian economy grew by an impressive 7.4 percent in real terms last year, compared with 5.6 percent in 1988 and 5.0 percent in 1987.

The most significant development as a result of previous deregulations, which also included import liberalisation, had been their impact on non-oil exports which had grown from 3.9 billion dollars in 1982-83 to 14.1 billion in the year ending March 31, or from 20 percent to over 60 percent

of total exports.

Observers said the move would appease Indonesia's traditional donors in the Inter-Governmental Group on Indonesia (IGGI) who meet next month in The Hague to determine the amount of aid Jakarta should get this year.

TOKYO (MAY 29) - Major Japanese commercial banks suffered sharp profit setbacks in the 1988-1989 business year ending March 31, 1990 caused by soaring interest rates and dropping stock and bond prices.

Combined recurring profits at 13 city banks fell 19.9 percent from the previous year to around 2.16 trillion yen (14.2 billion dollars). After-tax profits also declined 11.6 percent to 1.10 trillion yen.

Four discount rate increases during the business year increased banks' fund-procurement costs, while sluggish stock and bond markets since the start of this year depressed profits, banking sources said.

Write-offs of some 589.2-billion-yen bad loans to Mexico also ate into bank earnings.

Sumitomo Bank retained its top post for the second consecutive year in all of the recurring, after-tax and net business profits, a newly introduced measurement of profitability.

Mitsui Bank and Taiyo Kobe Bank, which merged on April 1, reported independent final earnings reports. Mitsui reported its recurring profits fell 26.9 percent to 126 billion yen and Taiyo Kobe said its recurring incomes dropped 22.9 percent to 89.8 billion yen.

Recurring profits at Sumitomo Bank fell 15.4 percent to 352.6 billion yen and after-tax profits dipped 12 percent to 174.5 billion yen.

Sumitomo was followed by Sanwa Bank with recurring profits of 319.7 billion yen, down 2.6 percent, and net profits of 148.1 billion yen, down 4.7 percent.

Fuji Bank came third with recurring profits of 296.9 billion yen, down 24.6 percent and net profits of 147.1 billion yen, down 14.4 percent.

Meanwhile, the nation's three long-term credit banks - the Industrial Bank of Japan, the Long-Term Credit Bank of Japan and the Nippon Credit Bank - each also suffered double-digit falls.

Their combined recurring profits amounted to 342.5 billion yen, showing a

14.3 percent drop from the previous annual term.

The Industrial Bank of Japan said its recurring profits fell 18.6 percent to 158.6 billion yen and its net profits sagged 10.9 percent to 83.3 billion yen.

The Long-Term Credit Bank of Japan's recurring profits and net profits fell 10.4 percent to 114.8 billion yen and 9.6 percent to 64 billion yen.

The Nippon Credit Bank's recurring profits were down 10.3 percent to 69.1 billion yen and its net profits were down 8.1 percent to 34.9 billion yen.

#90149d6660 05/29/1990 ~French/German News Agency

JERUSALEM (MAY 29) - Israel will double its absorption rate of Soviet immigrants in June and by year's end more than 250,000 will have arrived in the Jewish state, Absorption Minister Itzhak Peretz was quoted in Tuesday's Yediot Aharanot daily as saying.

So far this year 44,000 immigrants, including 38,000 Soviet Jews, have arrived in Israel, Peretz told a special immigration commision Monday.

Peretz claimed that only 150 immigrants had settled in the occupied territories in 1990. This number did not include the estimated 2,363 who settled in Jerusalem, parts of which were annexed by Israel in 1967 but are still regarded internationally as occupied territory.

Peretz and other officials warned that Israel could not absorb the expected number of immigrants with existing plans and forecast chronic unemployment and housing shortages unless urgent action was taken.

Officials also heard of increasing tensions between old-time Israelis and the newcomers because of the generous grants, job opportunities and aid packages the immigrants receive from the government.

LONDON (MAY 29) - French state oil company Elf Aquitaine is considering launching a takeover for British private company Enterprise Oil, in which it already holds a 25 percent stake, the Independent newspaper said Tuesday.

An Elf spokeswoman in London said that Elf had not changed its position as regarded Enterprise, and that it was "studying the situation all the time."

Elf had three options: "to retain its stake, sell or buy," the spokeswoman added.

The Independent quoted sources close to Elf as saying that the French group was worried about who might acquire Imperial Chemical Industries' 25 percent stake in Enterprise, which is about to be sold.

As a result, Elf "is considering launching a bid for control" of the British company, which has a stock market capitalisation of 2.8 billion pounds (4.7 billion dollars), the Independent said.

The Elf spokeswoman said that the Independent article was based on ICI's "well-known" desire to cede its stake.

The Daily Telegraph newspaper said that Elf had put a plan to launch a bid for control of Enterprise on the back burner because of reservations by the British government, which privatised the company in 1984.

Intensive consultations had ended in stalemate, the Telegraph said.

BEIRUT (MAY 29) - Thousands of workers demonstrated in Beirut on Tuesday as the city observed a total shut in protest at the high cost of living and the continued civil war in Lebanon.

The General Union of Lebanese workers called for the strike ''to launch a war against the war'', said union chairman Antoine Basharah.

He said power struggles had left Lebanon's economy in tatters and reduced markedly the pruchasing power of the Lebanese currency. ''The only victims are the workers'', he said in a statement.

Thousands of workers demonstrated in both halves of the divided capital in a rare show of solidarity to draw attendtion to the declining standard of lving.

''No water, no electricty, no food and no education'', shouted marchers as they held up banners blaming the government of President Elias Hrawi for

the situation.

Beirut has been under a total electricity blackout for over four months. Water is rationed and the prices of food and other essentials has soared to unprecedented levels in the past two weeks.

#90149d7400 05/29/1990 ~French/German News Agency

JERUSALEM (MAY 29) - Anti-Arab groups Tuesday hurled stones and bottles at Arab-owned vehicles in a demonstration of anger to mark the funeral here of a 72-year-old Israeli man killed in a bomb blast Monday.

Police said one man was arrested as hundreds of Israelis gathered in the Sanedria district of Jerusalem to participate in the funeral procession of Shimon Cohen.

Assailants threw stones and bottles at Arab-owned vehicles and cars of journalists, including one belonging to a correspondent for Israeli army radio.

Police reinforcements were deployed across Jerusalem's mainly Arabic quarters to prevent anti-Arab attacks.

Mr. Cohen was killed and nine other people wounded when a bomb exploded in a crowded vegetable market in the Jewish quarter of central Jerusalem. Police rounded up 90 Palestinians for questioning before releasing most of them.

The explosion was claimed by an anonymous caller for the Islamic Jihad in Palestine who said the attack took place to avenge the death last week near Tel Aviv of seven Palestinian labourers by an Israeli gunman.

A dissident Palestinian group in Damascus, the Fatah Intifada of Colonel Abu Mussa, also claimed responsibility for the blast.

LONDON (MAY 29) - British helicopter manufacturer Westland increased pre-tax profits for the six months since October by 44 percent to 11.5 million pounds (about 19.6 million dollars), the company reported on Tuesday.

During the same period of last year the company made pre-tax profits of eight million pounds, and the improvement exceeded estimates by analaysts who had forecast a figure of between 10 million and 11 million pounds.

The interim dividend was held at 1.25 pence, and the profits per share rose from 3.2 pence to 5.4 pence, representing an increase of 69 percent.

Westland shares gained three pence in early trading to 107 pence.

Sales fell by 11 percent to 194.9 million pounds compared with 218.5 million pounds.

Westland said that the improvement was due mainly to its aerospace sub-contracting business and to its technological division which accounted for 40 percent of sales. "The level of activity of Westland helicopters remained relatively low", the company said.

Margins were stronger because several hundred people had been made redundant.

The company said that it hoped the British government would decide soon on the future of a project for an Anglo-Italian EH-101 troop-carrying helicopter.

#90149d7540 05/29/1990 ~French/German News Agency
PARIS (MAY 29) - Australian Ministers of Foreign Affairs and Defence, Gareth Evans and Paul Keating, met for an hour Tuesday with French Prime Minister Michel Rocard to discuss issues of "mutual interest" including Cambodia and New Caledonia.

Mr. Evans and Mr. Keating, who are here for a meeting of the Organisation of Economic Cooperation and Development (OECD) on Wednesday and Thursday, told Mr. Rocard they were "very optimistic" about New Caledonia where a referendum on self-determination is scheduled for 1998. Australia supports independence for New Caledonia.

French officials said no problems had surfaced in the talks and there were "no clouds" in Franco-Australian relations at present.

French nuclear testing in Polynesia, which has been criticised in the past by Australia, was not discussed, French officials said.

Topics discussed included turning the Antarctic into a nature reserve and the evolving situation in eastern Europe and the Soviet Union.

FRANKFURT, WEST GERMANY (MAY 29) - Hans Friedrichs, the president of the supervisory board of West Germany's indebted Coop distribution chain, is to

resign on Thursday, the company announced here Tuesday.

Two other members of the supervisory board, Walter Birkhan and Wolfgang von Poelnitz, plan to resign along with Mr. Friedrichs, had been given the task of rescuing the indebted company, the company said in a statement.

The board is known to be considering selling the company to another major West German distribution company, Rewe, which made an offer in April to acquire the 2,000 Coop outlets employing 46,000 people.

The Coop group is controlled by banks. The DG Bank holds 67.5 percent of the shares, the Bank fuer Gemeinwirtschaft holds 22.5 percent, and small shareholders hold 10 percent.

Mr. Friedrichs, a former economy minister, was appointed to his current post in December 1988. In February 1987 he was found guilty of tax fraud.

TOKYO (MAY 29) - All major Japanese paper-pulp producers increased sales to record highs in the year to March 31, but some of them suffered a fall in profit during the period, financial reports showed Tuesday.

Jujo Paper Co. said that its net profit dropped 0.6 percent to 11.8 billion yen (74.7 million dollars), although sales rose 7.3 percent to 393.5 billion yen (2.49 billion dollars).

The company attributed the profit drop to a price markdown resulting from competition with rival companies.

Honshu Paper Co. said that it increased sales by 0.5 percent to 389.2 billion yen (2.46 billion dollars) and net profit by two percent to 3.3 billion yen (20.9 million dollars).

Daishowa Paper Mfg Co. said that its net profit jumped 16.1 percent to 8.4 billion yen (53.2 million dollars) on sales of 344.8 billion yen (2.18 billion dollars), up 3.1 percent.

Sanyo Kokusaku Pulp Co. increased sales by 7.5 percent to 316.9 billion yen (2.01 billion dollars) and net profit by 7.9 percent to 9.1 billion yen (57.6 million dollars).

Taio Paper Mfg Co. posted sales of 252.7 billion yen (1.6 billion dollars), up 9.7 percent, but suffered a 37.6 percent drop in net profit which amounted to 3.9 billion yen (24.7 million dollars).

Mitsubishi Paper Mills Ltd. increased sales by 7.3 percent to 201.2 billion

yen (1.27 billion dollars) and net profit by two percent to 8.1 billion yen (51.3 million dollars).

TOKYO (MAY 29) - Japan's Hitachi Zosen Corp. said Tuesday that its net profit soared 69.1 percent in the year to March 31 to 1.98 billion yen (12.5 million dollars).

Sales jumped 35.4 percent from the previous year to 307.77 billion yen (1.9 billion dollars), the leading shipbuilder and industrial machinery maker said.

Sales of ships soared 179.8 percent to 79.76 billion yen (504.8 million dollars), while receipts from industrial equipment and machinery went up 14.7 percent to 228.01 billion yen (1.4 billion dollars), the report said.

Exports accounted for 28.8 percent of total ship sales.

#90149d7770 05/29/1990 ~French/German News Agency

TOKYO (MAY 29) - Japan's Fanuc Ltd. said Tuesday that its net profit jumped 58.2 percent to 34.77 billion yen (220.1 million dollars) in the financial year to March 31.

Sales rose 19.5 percent from the previous year's level to 178.12 billion yen (1.1 billion dollars), the major producer of numerical control equipment for machinery said in a financial report.

Exports accounted for 31.8 percent of total sales, the report said.

Fanuc predicted that its net profit would increase to some 37 billion yen (234.2 million dollars) on sales of 187 billion yen (1.2 billion dollars) in the current year ending next March.

#90149d7800 05/29/1990 ~French/German News Agency
MANILA (MAY 29) - Finance Secretary Jesus Estanislao on Tuesday called for major financial reforms, including faster sales of state assets and a new tax on private cars, to ease the Philippines' growing public deficit.

Mr. Estanislao told foreign correspondents that his goal was to raise an additional 20 billion pesos (870 million dollars) and secure congressional approval for various tax measures and other reforms by December.

"We are not going to tolerate a very huge budget deficit," he said.

The deficit stood at 19 billion pesos in 1989, and early figures show that the 1990 figure could be much higher unless revenues rise and spending slows.

Mr. Estanislao said one of his proposals would be a "road user's tax," especially in Manila and its suburbs where 85 percent of all vehicles are private cars, to raise revenues and ease the capital's traffic congestion.

"We have to discourage through taxation private ownership of vehicles and then of course expand the capacity for public transportation," he said.

Such a tax is expected to meet opposition in a country where the cheapest new cars now cost more than 11,000 dollars each.

Mr. Estanislao had earlier convinced congress to speed up the approval of "sin taxes" on cigarettes and alcohol that would generate 1.7 billion pesos (74 million dollars) in 1990.

Other measures cited by Mr. Estanislao were faster privatization of state assets, including the luxury Philippine Plaza hotel which is expected to be auctioned off soon for at least 1.2 billion pesos (52 million dollars).

Mr. Estanislao said inflation, which stood at 13.6 percent in April, was easing back toward single-digit levels, but slackening imports in the first quarter indicated that an expected slowdown in economic growth had begun.

#90149d8150 05/29/1990 ~French/German News Agency

BRUSSELS (MAY 29) - Air express service DHL International Ltd., said Tuesday it was selling a minority stake to Lufthansa of West Germany, Japan Airlines (JAL) and Nissho Iwai, a Japanese trading company, and giving them the option of taking a majority share.

The deal "will allow us to expand our air, hub and gateway operations and enhance our current service offering for our customers," said Patrick Lupo, chief executive at the Brussels-based corporation.

JAL and Lufthansa will initially each acquire a five percent stake in DHL International and Middleston NV, an independent Dutch company that owns the trucks and aircraft for DHL's northern European network. Nissho Iwai will take a 2.5 percent interest.

However, Lufthansa and JAL have the option of buying a total of 25 percent apiece in the two companies within 18 months, while Nissho Iwai can increase its stake to 7.5 percent.

Errol Gates, DHL's worldwide services director, said in a telephone interview that the deal would require the approval of the European Economic Community's executive Commission and the Bundeskartelamt, the West German anti-trust agency.

The arrangement has "synergies" for DHL as well as the two airlines, he said. It could eventually give DHL access to bonded storage or airport facilities owned by the two investors, he said.

Mr. Gates declined to disclose details about the acquisition. But he denied suggestions that DHL urgently needed fresh capital. "We are experiencing 20-30 percent growth per year... DHL as a company has a particularly rosy future," he said.

Mr. Lupo, in a press statement, said demand for express serice was growing rapidly as a result of increased global trade. "This alliance will enable us to keep pace with market growth in Asia and Europe," he said.

DHL International's owners are the shareholders of DHL Corp. of Redwood City, California, Mr. Gates said. DHL Corp. has a wholly-owned subsidiary, DHL Airways Inc., that covers air services in the United States.

DHL International takes care of operations outside the United States, through an operating agreement with DHL Airways.

SUVA (MAY 29) - Fiji Prime Minister Ratu Sir Kamisese Mara will on Wednesday lobby for 266 million Fiji dollars (178 million U.S.) in aid from donor countries and international financial institutions, officials said Tuesday.

A government statement said Ratu Mara was in Geneva and would seek the money for 41 economic priority projects at a round-table conference attended by 18 other recipient countries, eight donor nations including the United States,
Sweden and West Germany, and 16 international financial and technical assistance agencies.

Finance and Economic Planning Minister Josevata Kamikamica said the grants would help Fiji reduce its indebtedness and "also cut down our debt servicing burden as part of a policy (of) moving towards a zero net deficit in the budget."

#90149d8610 05/29/1990 ~French/German News Agency

BEIJING (MAY 29) - Four drug traffickers have been sentenced to death and three to life imprisonment in northwestern China, a local newspaper said.

The sentences were handed down in Gansu province, the Gansu Legal Daily said without specifying the date of the trial or whether the condemned had been executed.

A total of 97 people were arrested in the province for drug-related crimes in the first three months of this year, according to the newspaper's May 25 edition, received here Tuesday.

Six other drug traffickers were sentenced to unspecified prison terms in the provincial capital Lanzhou, it said.

The paper said 72 cases, including 59 which were "serious," had been discovered in the first three months of the year, and large quantities of opium, heroin and morphine seized, but did not give details.

In a separate article, the paper said 18 young people aged between 19 and 25 were fined between 50 and 200 yuan (between 10.60 and 42.50 dollars) in Lanzhou in February for smoking heroin.

Thirteen of them were workers and five were unemployed, the paper said, adding that one of them had spent 6,000 yuan (1,276 dollars) in one year on drugs.

A worker's average annual salary is 1,440 yuan (306 dollars).

Earlier this month, the official press announced that an international drug smuggling ring in China had been broken up. The drug smugglers, 51 of whom were arrested, had been bringing heroin from Burma to Hong Kong.

BESANCON, France (MAY 29) - The China Light company and France Ebauches signed an agreement here Tuesday setting up a joint venture to produce watch movements.

France Ebauches president Francois Perret and China Light president Li Wenzhi signed the agreement in the presence of China's commercial adviser in France, Liu Xianming.

China Light deputy director Wang Xiaojing will head the new enterprise in the Zhuhai special economic zone in southern China.

France Ebauches holds a 70 percent stake in the new venture, which aims to achieve monthly production of 700,000 watch movements within five years and will eventually employ 700 people, Mr. Perret said.

The joint venture will export some 80 percent of its production but will also sell finished watches on the Chinese domestic market.

France Ebauches is the leading producer of analogue quartz movements in the European Economic Community, and had sales last year totalling 321 million francs (57.3 million dollars).

It employs 700 people in France plus 800 on a sub-contract basis in Mauritius, South Korea, Thailand and Tunisia.

China Light, China's national light industry import-export organisation, had a consolidated turnover last year of 3.41 billion dollars.

DJIBOUTI (MAY 29) - A Somali military Antonov 26 aircraft carrying 51 people landed here Tuesday after being diverted by its pilot, who demanded political asylum in Djibouti, informed sources said.

In addition to the pilot, Colonel Mohamed Sheikh Ibrahim, a mechanic, Moussa Hersi Warsama, also asked for asylum, the sources said.

The plane took off from Mogadishu at 9:10 a.m. (0610 GMT) for Hargeisa, northern Somalia, and landed here two and a half hours later.

Diplomatic sources said there were 14 military personnel among the passengers, including a colonel in charge of the Burao sector of northern Somalia, whose identity was not given.

They said the two officers seeking asylum had been separated from the passengers but that Djibouti would not allow them to stay in the country because it did not want to get involved in the Somali civil war.

The conflict has pitted President Mohamed Siad Barre's forces against the Somali National Movement, composed of Issak and Issa tribes people who also form part of the Djibouti population.

Somali Airlines has only one large-capacity passenger plane, an Airbus, and used military planes for regional flights.

Authorisation to land at Djibouti airport was given after the pilot put out an emergency call for refuelling facilities.

Col. Ibrahim told the passengers he was unable to land at Berbera in northern Somalia because of poor weather and ruled out landing at the nearby town of Borama, near the border with Ethiopia, because the landing strip was too narrow.

Berbera and Borama, along with Hargeisa, are still controlled by the regular Somalian army, while other regions in northern Somalia are under the control of rebels.

MONROVIA (MAY 29) - Roman Catholic bishops in Liberia called Tuesday on the government and rebels posing a serious threat to it to "lay down their arms and come to the conference table".

In a pastoral letter published in the independent Observer newspaper, the Catholic Bishops' Conference said "we must sit and like rational men and women try to find out what the causes of this tragedy are and look for the

means to solve them".

The bishops ruled out a military solution to the conflict, saying "peace will only be achieved if we behave like God's children, loving one another to the extent that we forgive each other for what we have done".

Their call came as rebels were advancing on the capital, following a fresh vow by President Samuel Doe not to talk to rebel leader Charles Taylor, a former senior government official.

The prelates added: "So many innocent lives are being taken on both sides. So many young lives are perishing. So many innocent men, women, boys, girls and babies are being killed or are suffering because of this fratricidal war".

The bishops' appeal for dialogue follows others by the Red Cross president here, Reverend Edwin Lloyd, former chief justice Chea Cheapoo, students' groups and religious leaders of other denominations.

JAKOBSHAVN, GREENLAND (MAY 29) - A spectacular 10-hour rescue mission in a raging snowstorm in northern Greenland saved the life of an ailing U.S. polar scientist, the Greenland rescue service said Tuesday.

Bob Vaughno, 36, an American scientist, fell seriously ill with altitude sickness late Saturday and a small Icelandic rescue plane and two Danish military planes arrived in time Sunday with oxygen bottles to save his life.

Mr. Vaughno was transferred by plane to hospital in Jakobshavn, in south-west Greenland, where he is recovering.

The American scientist is with the GRIP mission drilling test holes in the Inland Sea glacier to study climatic changes.

VATICAN CITY (MAY 29) - Vatican employees, demanding an audience with John Paul II, marched in silent protest Monday for the first time beneath the windows of the pontiff, a Vatican employees association spokesman said Tuesday.

Demanding higher pay and better interaction with Vatican officials, some 500 employees joined the march through the Vatican.

A much smaller employees' protest was held in 1981 in a courtyard of Vatican City. In February 1988, Vatican employees joined a symbolic strike giving up a day's wages to be donated to relieve Third World hunger.

The some 2,000 Vatican lay employees are calling for "a real dialogue between Vatican officials and personnel" and have demanded an audience with Pope John Paul to air their grievances.

#90149d9510 05/29/1990 ~French/German News Agency

RANGOON (MAY 29) - The National League for Democracy, which won Burma's first multi-party elections, wants power immediately and not after writing a new constitution, as required by the ruling junta, NLD spokesman Kyi Maung said here Tuesday.

Mr. Kyi Maung was reacting to reports that the ruling State Law and Order Restoration Council (SLORC), set up after a September 1988 coup, was ready to hand over power only after a new constitution is drafted.

The opposition spokesman's remarks indicate that despite the successful running by the junta of the nationwide ballot On Sunday, a handover of power to an elected government remains a matter of controversy.

Mr. Kyi Maung said the NLD, which according to an unofficial count won 322 seats in the 485-member parliament, has "presently no dialogue" with the junta.

"We feel they should initiate it because they are in power," he said, adding that when this dialogue began the freeing of Aung San Suu Kyi, the NLD leader under house arrest since July, "will come up."

NLD chairman Tin Oo has been sentenced to a three-year prison term and the other main opposition figure, former premier U Nu, is under house arrest.

The general elections were an outpouring of support for Aung San Suu Kyi, the 44-year-old daughter of Burmese founding father Aung San who is now seen as the symbol of change.

But the other main issue, said Mr. Kyi Maung, was the nature of NLD's overwhelming mandate from the Burmese people.

"If they say we must first draw up a constitution, that's a precondition isn't it?," Mr. Kyi Maung said, adding that the SLORC, who seized power to quash pro-democracy protests, "have been ruling this country for such a long time without a constitution."

"They rule by decree," he said.

Mr. Kyi Maung said the NLD would be holding an executive committee meeting on Friday and that a policy statement would be issued afterwards.

PARIS (MAY 29) - The East European Reconstruction and Development Bank was officially founded in ceremonies Tuesday at the Elysee Palace.

Taking part were representatives from 40 countries, the European Community and the European Investment Bank (Eib).

The new institution, with capital of 10 billion European Currency Units (12 billion dollars), is to be headquartered in London and will open its doors next April to begin funding projects in Eastern Europe.

The E.C. countries hold a 51 percent interest in the bank. Largest single founder is the United States with a 10 percent interest.

BEIJING (MAY 28) - The development of socialist democracy in China must go hand in hand with strengthening the leadership of the Chinese Communist Party, according to government spokesman Yuan Mu.

Mr. Yuan, director of the State Council's research office, made the comments during an interview with Party Construction magazine, quoted at length by the official New China News Agency (NCNA) and published in papers here Tuesday.

His comments on the government's concept of democracy comes days before the first anniversary of China's bloody June 4 crackdown on pro-democracy protests.

"Only by enhancing the communist party's leadership over the state's political life can the healthy development of democracy, its socialist orientation and its conformity with the interests of all the people be ensured," he said.

Mr. Yuan said the development of socialist democracy should proceed "step by step" and "within the scope of the country's constitution and laws."

"It has nothing to do with absolute democratization and anarchy," which if allowed to go unchecked, would "accomplish nothing, he said, "like the chaos of the catastrophic Cultural Revolution, and turmoil and anti-government riots of the spring-summer period last year."

He added that this would "violate China's constitution and laws, sabotage the country's legal system and bring serious disaster to the nation and the people."

Mr. Yuan said the aim of some of protestors was "really to help the Chinese Communist Party to oppose corruption and to promote democracy," but their "good intention was made use of by a tiny number of plotters" working backstage to overthrow the party's leadership and "turn China into a bourgeois republic."

YAOUNDE (MAY 29) - A Cameroon government minister, Ibrahim Mbombo Njoya, Tuesday accused an outlawed opposition party of receiving funds from abroad, three days after six people died at a rally organized by the party.

In an interview with the Cameroon Tribune, the minister of territorial administration said "we have official documents" proving that "the founder of the illegal party", John Fru Ndi, "is being subsidized from abroad".

"Singing the national anthem of a neighbouring country is an act of high treason," he added. The interview was seen by many observers as an indication that arrests were imminent.

Supporters of Mr. Fru Ndi's Social Democratic Front (SDF) sang the Nigerian national anthem during Saturday's inaugural SDF rally at Bamenda in the west of the country, Cameroon radio has reported.

The national radio Sunday said six people were trampled to death at the rally, but several witnesses told Agence France-Presse that the six were shot by police when demonstrators broke through a cordon formed by security forces.

The radio, quoting "unofficial sources", Tuesday stated that Mr. Fru Ndi has fled to Nigeria, something he Sunday told AFP he would not do. His telephone has since been cut off.

The radio also carried a declaration by three prominent people from Bamenda, the capital of the English-speaking part of the country, which called Mr. Fru Ndi a "troublemaker,... an opportunist and a political adventurer".

They blamed him for the "deaths of innocents".

Several hundred supporters had rallied in Bamenda suburbs to hear the SDF leader proclaim the launch of his party, which applied for registration on

March 16 but has still not been legalised.

Cameroon is the latest West African country, after Ivory Coast and Gabon to be shaken by pro-democracy protests. It is a de facto one-party state.

#90149d9870 05/29/1990 ~French/German News Agency

Duesseldorf, West Germany (MAY 29) - Mannesmann, the West German engineering group whose products range from battle-tanks to computers, said Tuesday it expected turnover to grow eight percent this year but would be lucky to match last year's profit.

Mannesmann head Werner Dieter said here the group's consolidated turnover in 1989 was 22.3 billion marks (13.3 billion dollars), up from 1988's 20.4 billion marks.

Pre-tax profit on regular business last year was 1.044 billion marks (625 million marks), a 17 percent improvement on 1988.

If orders held up this year, pre-tax profit would ''with a bit of luck'' reach the same level, he said.

Mannesmann is investing heavily in a mobile phone network for West Germany. The ''D2'' system would cost 2.4 billion marks up to 1993, Dieter said.

He disclosed that Mannesmann was spinning off its large steel tube interests into a joint venture with Gts usinor Sacilor of France. The new management would make its own decisions on axing capacity, he said, though he did not expect the tube business to be closed down.

He also admitted Mannesmann's Kienzle computer subsidiary was troubled by ''worldwide forcible concentration'' in the sector that posed the question how long the company could make computers economically.

In the first four months of this year, orders overall were down four per cent from the same period last year. The figures did not include Krauss-Maffei, the tank maker and engineering company that became a 100-per-cent Mannesmann subsidiary several months ago.

JOHANNESBURG (MAY 29) - Young black supporters of the anti-apartheid African National Congress are to knock on doors in South Africa's white areas as part of a month-long recruitment drive, the ANC-aligned South African Youth Congress (SAYCO) said here Tuesday.

SAYCO's publicity secretary, Parks Mankahlana, told a news conference the programme, planned at its national congress in Soweto last week, was aimed at promoting the ANC "in every homestead or house in all the farms, villages and townships across the country."

He said thousands of SAYCO supporters, armed with pamphlets, would go from house to house in mid-June -- proclaimed by the organisation as "month of the Youth" -- to popularize the ANC's ideal of a non-racial, democratic South Africa.

SAYCO general secretary Peter Mokaba later told Agence France-Presse that ANC supporters would also venture into "whites-only" suburbs in a bid to recruit whites. "We realise that we cannot succeed by talking to the government alone ... We must talk to white families."

But he also called on whites to start mixing with blacks in the townships and said SAYCO was drumming up support among white youths in student organisations countrywide.

With mid-winter, approaching canvassers will have to go to white houses in darkness if they are to catch householders at home, something blacks are wary of doing when many whites shut themselves up behind security bars, guns at hand, conditioned to regard black people as a threat, observers said.

Mass rallies, festivals and cultural activities have also been planned by SAYCO, which boasts a two million membership and plans to merge with the ANC's Youth League later this year.

"The cumulative effect of the entire campaign shall be to make the country reverberate with the call for a Constituent Assembly," Mr. Mankahlana told reporters.

BUENOS AIRES (MAY 29) EFE - Argentine President Carlos Menem is to

separate from his outspoken and highly critical wife Zulema Yoma, ending the stormy marriage which has made front-page news over the last few months, a Buenos Aires paper reported Tuesday.

The Ambito Financiero newspaper quoted +important, reliable and various sources+ on its front page as saying it was +more than a reality+ that Menem's lawyers were preparing a legal separation agreement for him to sign when he returns from a trip abroad.

According to the financial paper's sources, the president, who is to Tuesday leave on a visit to Kuala Lumper and Italy, has been sleeping in the houses of friends and employees since Yoma reportedly kicked him out of their Olivos residence.

The couple's rocky marriage hit the headlines once again Monday, when the weekly Noticias magazine published an interview with Zuelam in which she claimed her husband had been +kidnapped+ by government employees who want to divide the family.

Zulema's friendship with government opponents and her outspoken criticism of government officials and Menem's economic policies have frequently embarassed the president over the last few months.

Menem is quoted as having said that his greatest opponent was his wife.

Although the couple, who have two children, were reported to have split up several years ago, they reportedly got back together again during Menem's campaign for the presidency.

The private Noticias Argentinas news agency this week claimed that Menem, a renowned womaniser, has bought a dlrs 300,000 apartment in Buenos Aires.

KATHMANDU (MAY 29) XINHUA - TWO POLITICAL PARTIES, BOTH ARE NAMED NATIONAL DEMOCRATIC PARTY, WERE FORMED IN NEPAL TODAY BY THE FORMER ELEMENTS OF THE PARTYLESS PANCHAYAT (PARLIAMENT) SYSTEM.

WITH THE FORMATION OF THESE TWO PARTIES, THREE MAJOR FORCES APPEAR ON THE COUNTRY'S POLITICAL ARENA: THE NEPALI CONGRESS (PARTY), THE NEPAL COMMUNIST PARTY AND THE PARTIES FORMED BY FORMER PANCHAS.

THE NEW PARTIES ARE UNDER THE CHAIRMANSHIP OF FORMER PRIME MINISTERS SURYA BAHADUR THAPA AND LOKENDRA BAHADUR CHAND RESPECTIVELY.

BOTH OF THEM SUPPORT THE MULTI-PARTY POLITICAL SYSTEM AND THE CONSTITUTIONAL MONARCHY.

IN A STATEMENT, THE PARTY UNDER CHAIRMAN THAPA SAID THAT ITS DESIRE IS TO CREATE AN OPEN AND ACTIVE SOCIETY UNDER A DEMOCRATIC SYSTEM WITH THE RECOGNITION OF HUMAN DIGNITY ABOVE ALL ELSE.

LOKENDRA BAHADUR CHAND SAID IN A STATEMENT THAT HIS PARTY'S OBJECTIVE IS THE BUILDING OF A STRONG, PROSPEROUS AND SOVEREIGN NEPAL ON THE BASIS OF ALL-ROUND DEVELOPMENT OF ALL REGIONS, COMMUNITIES AND CLASSES.

KING BIRENDRA LIFTED THE 30-YEAR-OLD BAN ON POLITICAL PARTIES AND DISSOLVED THE PANCHAYAT SYSTEM FOLLOWING A TWO-MONTH NATIONAL MOVEMENT JOINTLY LAUNCHED BY THE NEPALI CONGRESS AND THE UNITED LEFT FRONT OF THE NEPAL COMMUNIST PARTY ON FEBRUARY 18.

AN INTERIM GOVERNMENT WAS FORMED ON APRIL 19 TO LOOK INTO THE DRAFTING OF A NEW CONSTITUTION AND HOLDING OF THE GENERAL ELECTION.

THE POLITICAL FORCES IN NEPAL ARE ORGANIZING AND CONSOLIDATING THEIR RANKS FOR THE GENERAL ELECTION, WHICH IS SCHEDULED TO TAKE PLACE EARLY NEXT YEAR.

SANTIAGO (MAY 29) XINHUA - CHINESE PRESIDENT YANG SHANGKUN SUMMARIZED THE RESULTS OF HIS TRIP TO FIVE LATIN AMERICAN COUNTRIES IN A SPEECH DELIVERED HERE TODAY AT A WELCOMING BANQUET GIVEN IN HIS HONOR BY CHILEAN PRESIDENT PATRICIO AYLWIN.

THE SPEECH READS IN FULL AS FOLLOWS: YOUR EXCELLANCY RESPECTED PRESIDENT PATRICIO AYLWIN, LADIES AND GENTLEMEN,

I APPRECIATE THE ENTHUSIASTIC AND FRIENDLY SPEECH YOUR EXCELLANCY THE PRESIDENT HAVE JUST DELIVERED. AS A CHILEAN FOLK SONG SAYS, "GO TO CHILE, AND YOU'LL SEE THE HOSPITALITY OF ITS PEOPLE." I HAVE ALREADY ENJOYED THE SAME KIND OF EXPERIENCE THOUGH I HAVE JUST ARRIVED IN YOUR BEAUTIFUL CAPITAL. I WISH TO TAKE THIS OPPROTUNITY TO OFFER CORDIAL REGARDS AND BEST WISHES TO THE GOVERNMENT AND PEOPLE OF CHILE ON BEHALF OF THE CHINESE GOVERNMENT AND PEOPLE.

CHILE IS A BEAUTIFUL LAND WITH RICH RESOURCES. THE CHILEAN PEOPLE HAVE FOR LONG YEARS MADE CONSISTENT EFFORTS FOR NATIONAL INDEPENDENCE, ECONOMIC DEVELOPMENT AND SOCIAL PROGRESS. TODAY, UNDER THE LEADERSHIP OF PRESIDENT AYLWIN, CHILE HAS ENSURED A CONTINUOUS ECONOMIC DEVELOPMENT AND SOCIAL STABILITY WHILE CONSTANTLY RAISING ITS INTERNATIONAL STATUS. IN INTERNATIONAL AFFAIRS, THE CHILEAN GOVERNMENT PURSUES A FOREIGN POLICY OF PEACE AND SELF-DETERMINATION, FIRMLY UPHOLDS THE PRINCIPLE OF PEOPLE'S SELF-DETERMINATION AND INDEPENDENCE, STANDS FOR DEVELOPING FRIENDLY RELATIONS WITH ALL OTHER COUNTRIES OF THE WORLD AND ATTACHES A GREAT IMPORTANCE TO COOPERATION WITH DEVELOPING COUNTRIES. THE CHINESE PEOPLE ARE ELATED TO SEE THE ACHIEVEMENTS MADE BY THE CHILEAN PEOPLE AND HEARTILY WISH THE FRATERNAL CHILEAN PEOPLE CONTINUOUS NEW ACHIEVEMENTS IN FIGHTING FOR SOCIAL PROGRESS AND NATIONAL ECONOMIC DEVELOPMENT.

THE FRIENDSHIP BETWEEN THE CHINESE AND CHILEAN PEOPLES GOES BACK TO ANCIENT TIMES. THE VAST PACIFIC OCEAN HAS BECOME A THOROUGHFARE FOR FRIENDLY EXCHANGES BETWEEN THE TWO COUNTRIES. FOR ALMOST 20 YEARS AFTER THE ESTABLISHMENT OF THEIR DIPLOMATIC TIES, CHINA AND CHILE HAVE CONTINUOUSLY IMPROVED THEIR RELATIONS ON THE BASIS OF MUTUAL RESPECT, EQUALITY AND MUTUAL BENEFIT. THIS COURSE OF DEVELOPMENT PROVES THAT COUNTRIES MAY BE BIG OR SMALL, RICH OR POOR, THEY MAY DIFFER IN SOCIAL SYSTEM AND IDEOLOGY, AND WHATEVER CHANGES THEY MAY EXPERIENCE INTERNALLY, THEY CAN GET ALONG HARMONIOUSLY, CARRY ON FRIENDLY COOPERATION AND WORK FOR COMMON DEVELOPMENT, SO LONG AS THEY FOLLOW THE FIVE PRINCIPLES OF MUTUAL RESPECT FOR SOVEREIGNTY AND TERRITORIAL INTEGRITY, MUTUAL NONAGGRESSION, MUTUAL NONINTERFERENCE IN INTERNAL AFFAIRS, EQUALITY AND MUTUAL BENEFIT AND PEACEFUL COEXISTENCE.

YOUR EXCELLLANCY THE PRESIDENT ARE NOT ONLY A STATESMAN WITH FORESIGHT AND SAGACITY BUT ALSO AN OLD FRIEND OF THE CHINESE PEOPLE. WE APPRECIATE THE FRIENDLY FEELINGS OF YOUR EXCELLANCY THE PRESIDENT AND THE CHILEAN GOVERNMENT TOWARDS THE CHINESE PEOPLE AND THE CONTRIBUTIONS YOU HAVE MADE TO THE CONSOLIDATION OF FRIENDSHIP BETWEEN CHINA AND CHILE. I BELIEVE THAT THE RELATIONS OF FRIENDLY COOPERATION BETWEEN THE TWO COUNTRIES ARE BOUND TO SEE A NEW AND GREATER DEVELOPMENT IN THE YEARS TO COME.

CHILE IS MY LAST STOP IN MY FIVE-LATIN-AMERICAN-NATION TOUR, WHICH HAS PROVED TO BE A FULL SUCCESS.

FIRST, THE LEADERS OF THE FIVE COUNTRIES AND I HAVE SEPARATELY HELD SINCERE AND FRIENDLY TALKS ON INTERNATIONAL ISSUES OF COMMON CONCERN AND ON A FURTHER DEVELOPMENT OF BILATERAL RELATIONS. WE HAVE ACHIEVED AN IDENTITY OF VIEWS ON THESE WIDERANGING ISSUES AND REACHED A NUMBER OF AGREEMENTS ON EXPANDING BILATERAL COOPERATION.

SECONDLY, I HAVE MET WITH FRIENDS FROM ALL CIRCLES AND HELD BENEFITIAL DISCUSSIONS WITH THEM ON EXTENDING ECONOMIC AND TRADE EXCHANGES AND COOPERATION IN OTHER FIELDS. WE ALL AGREE THAT, BASED ON THE PRINCIPLES

OF EQUALITY, MUTUAL BENEFIT AND COMMON DEVELOPMENT, THE FRIENDLY COOPERATION BETWEEN CHINA AND LATIN AMERICAN COUNTRIES HAS A REMARKABLE POTENTIALITY, A BROAD PROSPECT AND A PLENTY OF SCOPE FOR DEVELOPMENT.

THIRDLY, WE HAVE SEEN WITH OUR OWN EYES THE ACHIEVEMENTS OF CONSTRUCTION IN THE FIVE LATIN AMERICAN COUNTRIES, WHICH PROVIDES US WITH A FINE OPPORTUNITY TO LEARN THEIR VALUABLE EXPERIENCE. THE VIGOROUS DEVELOPMENT OF LATIN AMERICAN COUNTRIES AND THE DILIGENCE AND INTELLIGENCE OF THEIR PEOPLE HAVE LEFT ON ME AN UNFORGETTABLE IMPRESSION.

FOURTHLY, MY VISITS HAVE HELPED DEEPEN OUR MUTUAL UNDERSTANDING AND FRIENDSHIP. WE FEEL KEENLY THAT, AS DEVELOPING COUNTRIES OF THE THIRD WORLD, CHINA AND LATIN AMERICAN COUNTRIES HAVE MANY POINTS IN COMMON AND THEY ALL HAVE A REMARKABLE POTENTIALITY FOR DEVELOPMENT.

#90149k0086 05/29/1990 ~Japanese News Agency

TOKYO (MAY 29) KYODO - HIGHER CRUDE OIL PRICES SENT THE UNCONSOLIDATED

PROFITS OF NINE JAPANESE ELECTRIC POWER COMPANIES SHARPLY LOWER IN THE YEAR ENDED MARCH 31, THOUGH THEIR SALES HIT A FOUR-YEAR HIGH ON INCREASED DEMAND, ACCORDING TO THEIR FINANCIAL STATEMENTS.

THE NINE FIRMS, INCLUDING TOKYO ELECTRIC POWER CO., HAD 12.03 TRILLION YEN IN UNCONSOLIDATED SALES IN FISCAL 1989, A 3.1 PERCENT INCREASE OVER THE PREVIOUS YEAR.

UNCONSOLIDATED PRETAX PROFITS PLUMMETED 25 PERCENT TO 696.5 BILLION YEN AND AFTER-TAX PROFITS 30.4 PERCENT TO 291 BILLION YEN.

THE NINE'S PRETAX PROFITS DROPPED FOR THE THIRD CONSECUTIVE YEAR, WHILE THEIR SALES RECOVERED THE 12 TRILLION YEN LEVEL FOR THE FIRST TIME IN FOUR YEARS.

THE POWER FIRMS ALL LOWERED THEIR ELECTRICITY CHARGES BY AN AVERAGE 2.96 PERCENT FROM APRIL 1, 1989. HOWEVER, THANKS TO A LARGER-THAN-EXPECTED INCREASE IN ELECTRICITY DEMAND, BROUGHT ON BY CONTINUED BUSINESS PROSPERITY, THE NINE COMPANIES' SALES REACHED A HIGH LEVEL.

HOWEVER, THE YEN'S FALL AND THE RISE IN CRUDE OIL PRICES SENT THE POWER FIRMS' FUEL COSTS 20 PERCENT HIGHER THAN IN THE PREVIOUS YEAR.

ANALYSTS FORECAST 12.5 TRILLION YEN IN UNCONSOLIDATED SALES OF THE NINE FIRMS FOR FISCAL 1990, UP 3.9 PERCENT FROM THE PREVIOUS YEAR.

THEY PREDICTED THAT DUE TO THE YEN'S FALL, HIGHER INTEREST RATES AND A RISE IN CRUDE OIL PRICES, UNCONSOLIDATED PRETAX PROFITS WOULD POST A STEEP 32.1 PERCENT FALL TO 473 BILLION YEN IN THE YEAR.

THE NINE COMPANIES' UNCONSOLIDATED SALES, PRETAX PROFITS AND AFTER-TAX PROFITS IN FISCAL 1989 WERE AS FOLLOWS: (FIGURES IN 1 BILLION YEN; FIGURES IN BRACKETS DENOTE YEAR-ON-YEAR PERCENTAGE CHANGES)

	SALES	PRETAX PROFIT	NET PROFIT
HOKKAIDO	450.4 (4.6)	27(-23.7)	12(-47.3)
TOHOKU	1,067.9 (3.3)	73(-17.4)	27(-18.0)
TOKYO	4,086.8 (3.8)	185(-32.8)	74(-37.8)
CHUBU	1,706.7 (2.8)	96(-36.8)	43(-39.1)
HOKURIKU	368.7 (3.1)	36(- 5.7)	16(- 4.6)
KANSAI	2,075.2 (2.8)	128(-14.9)	56(-18.0)
CHUGOKU	810.7 (1.3)	45(-27.2)	17(-44.0)
SHIKOKU	397.7 (1.7)	38(- 6.5)	19(- 3.2)
KYUSHU	1,065.8 (2.6)	68(-20.9)	26(-27.6)

#90149k0093 05/29/1990 ~Japanese News Agency

TOKYO (MAY 29) KYODO - A PRIVATE ECONOMIC RESEARCH INSTITUTE PREDICTED TUESDAY THAT JAPAN'S ECONOMY IS LIKELY TO SET A RECORD FOR THE SUSTAINED ECONOMIC GROWTH THANKS TO CONTINUED ROBUST PERSONAL SPENDING AND CORPORATE CAPITAL INVESTMENT.

THE RESEARCH INSTITUTE ON THE NATIONAL ECONOMY, KNOWN FOR ITS UPBEAT PREDICTIONS, SAID THE COUNTRY'S ECONOMY, WITH SUSTAINED BRISK DOMESTIC DEMAND AS THE MAJOR DRIVING FORCE, WILL GROW AT AN INFLATION-ADJUSTED ANNUAL RATE OF 5.0 PERCENT IN FISCAL 1990 ENDING NEXT MARCH 31.

THE INSTITUTE ALSO PEGGED JAPAN'S REAL ECONOMIC GROWTH IN THE FIRST SIX MONTHS OF FISCAL 1991 AT 4.8 PERCENT, SLIGHTLY DOWN FROM THE ESTIMATED 5.0 PERCENT FOR FISCAL 1990.

THE GOVERNMENT RECENTLY SAID JAPAN ENTERED THE 42ND STRAIGHT MONTH OF ECONOMIC EXPANSION IN MAY, MATCHING ITS SECOND-LONGEST ECONOMIC BOOM THAT OCCURRED BETWEEN JULY 1958 AND DECEMBER 1961.

THE RECORD FOR THE LONGEST PERIOD OF ECONOMIC GROWTH WAS THE 57 MONTHS SPANNING NOVEMBER 1965 AND JULY 1970.

ECONOMISTS AT THE INSTITUTE SAID IN A REPORT THAT PERSONAL CONSUMPTION IS FORECAST TO INCREASE 5.0 PERCENT IN FISCAL 1990 AND 4.8 PERCENT IN THE FIRST SIX MONTHS OF THE FISCAL 1991.

PRIVATE-SECTOR SPENDING ON PLANT AND EQUIPMENT, FOCUSING ON LABOR-SAVING AND REASERCH AND DEVELOPMENT INVESTMENT, IS ALSO EXPECTED TO POST A BRISK 10.2 PERCENT IN FISCAL 1990 AND 9.5 PERCENT IN THE FIRST HALF OF FISCAL 1991.

IN THE REPORT, THE ECONOMISTS DISMISSED THE IMPACT OF THE SO-CALLED TRIPLE LOSSES -- PLUNGES IN STOCK AND BOND PRICES AS WELL AS THE UNABATED DECLINE IN THE YEN'S VALUE AGAINST THE U.S. DOLLAR.

THE INSTITUTE PREDICTED THE YEN'S PRESENT UNDERVALUATION AGAINST ITS U.S. COUNTERPART WOULD BE RECTIFIED IN THE WAKE OF THE DWINDLING SURPLUS IN THE NATION'S CURRENT ACCOUNT.

IT ALSO SAID JAPAN'S PRICES ARE LIKELY TO REMAIN STABLE, AT LEAST UNTIL THE END OF THE FISCAL 1991 FIRST HALF.

-30- 2108

#90149k0095 05/29/1990 ~Japanese News Agency

BIG FISHERY FIRMS SUFFER PROFIT SETBACK AS A RESULT OF INT'L CURBS ON INDUSTRY

TOKYO (MAY 29) KYODO - FOUR MAJOR JAPANESE FISHERY COMPANIES SUFFERED UNCONSOLIDATED PROFIT DECLINES IN THE FISCAL YEAR ENDED MARCH 31 DUE TO TIGHTENED INTERNATIONAL CURBS ON DEEP-SEA FISHING AND A SLUGGISH MARKET CAUSED BY INCREASED IMPORTS, ACCORDING TO THEIR FINANCIAL STATEMENTS.

THE FOUR FIRMS ARE TAIYO FISHERY CO., NIPPON SUISAN KAISHA LTD., NICHIRO GYOGYO KAISHA LTD. AND KYOKUYO CO.

NIPPON SUISAN'S FINANCIAL POSITION DETERIORATED MOST AMONG THE FOUR. THE FIRM'S PRETAX PROFIT AND LOSS ACCOUNT WAS IN THE RED FOR THE FIRST TIME SINCE ITS LISTING AT THE TOKYO STOCK EXCHANGE IN 1949.

DUE MAINLY TO A PLUNGE IN SQUID PRICES, THE COMPANY INCURRED 5,935 MILLION YEN IN UNCONSOLIDATED OPERATING LOSS. SECURITIES WERE SOLD TO HELP COVER THE LOSS, BUT THE FIRM SUSTAINED 263 MILLION YEN IN UNCONSOLIDATED PRETAX LOSS.

KYOKUYO ALSO HAD LOWER PROFITS ON REDUCED SALES, DUE CHIEFLY TO POOR TRAWLER CATCHES AND A SLUGGISH MARKET FOR MINCED FISH.

NICHIRO'S SALES WERE POOR, DUE PRIMARILY TO MUCH SMALLER-THAN-TARGETED CATCHES IN BERING SEA WATERS. HEAVY INTEREST BURDENS ALLOWED THE FIRM ONLY 400 MILLION YEN IN UNCONSOLIDATED PRETAX PROFIT.

BY CONTRAST, TAIYO FISHERY WAS IN RELATIVELY GOOD SHAPE. THE FIRM HAD COMPARATIVELY GOOD BONITO AND TUNA CTACHES. ITS PROCESSED FOOD AND SHIPPING BUSINESSES ALSO FARED BETTER.

THE FOUR'S UNCONSOLIDATED SALES, PRETAX AND NET PROFIT IN FISCAL 1989 WERE AS FOLLOWS (FIGURES IN 1 BILLION YEN WITH FIGURES IN BRACKET PERCENTAGE CHANGES FROM THE PREVIOUS YEAR):

	SALES	PRETAX PROFIT	NET PROFIT
TAIYO	581.4(-)	4.5(-)	1.1(-)
NIPPON	437.7(-5.6)	-0.2(-)	1.0(-32.8)
NICHIRO	218.6(-)	0.4(-)	0.1(-)
KYOKUYO	197.7(-3.3)	0.5(-7.2)	0.6(-3.1)

NOTE: - MEANS THAT THE FISCAL 1989 FIGURES CAN NOT BE COMPARED WITH THOSE OF THE PREVIOUS YEAR BECAUSE OF A CHANGE IN THE ACCOUNTING PERIOD OR A DEFICIT IN THE PREVIOUS YEAR.

#90149m0001 05/29/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (MAY 29) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The U.S. trade deficit shrank to $26.4 billion in the first quarter for the smallest quarterly imbalance in more than six years, the COMMERCE DEPARTMENT says. ... Another Commerce report shows consumer spending posted a moderate 0.6% gain in April. ... New home sales fell 2.1% from March to April. ... DONALD TRUMP's Taj Mahal Casino and Trump Shuttle are eliminating 370 jobs, spokesman say.

WHAT'S AHEAD:

Among the major economic reports due out this week are leading indicators tomorrow, manufacturers' shipments, inventories and factory orders on Thursday and employment and construction spending on Friday.

SHEARSON LEHMAN HUTTON is expected to announce today that AMERICAN EXPRESS executive JONATHAN LINEN will be named to head Shearson's brokerage and asset management divisions. ... GENERAL MOTORS will become the first U.S. automaker to build cars in Eastern Europe later this year. ... Office products companies AVERY INTERNATIONAL and DENNISON MANUFACTURING have agreed to merge in a stock swap worth $470 million based on closing prices Friday. ... No. 2 pizza-maker, DOMINO'S says it has talked with a potential buyer and that it is not another pizza-maker, apparently ruling out No. 1, PIZZA HUT and No. 3, LITTLE CAESARS.

FROM THE BULLS:

CRAIG CORCORAN, editor of the "Davis/Zweig Futures Hotline" in Jacksonville, Fla., is bullish on the market, but looks for a short- term pullback. "Seasonally, the stock market rises 75% of the time before the three-day Memorial holiday," he notes. "Since it declined instead, this

suggests further downside action early next week." But he views any decline as a buying opportunity and looks for the Dow to turn back up and rally to above 2870. ("Investor's Daily," 5/29)

"From a purely technical basis the Dow looks like a champ," says DENNIS JARRETT of KIDDER, PEABODY CO. "I think what we're leading up to here is a 2950 type reading on the Dow in the next couple of months." He sees the current technology pullback lasting a week or two, bringing the industry down a healthy 10% to 15% before it rebounds. Beyond a six-month timeframe, he sees 3300 to 3400 on the Dow. (CNBC "Business View", 5/25)

STOCK MARKET:

"It's a bargain hunting day," says MICHAEL BENSON of SHEARSON LEHMAN HUTTON in London. "The fact that Friday's selloff came on such light volume is encouraging investors [that] it was not a reversal, just a little bout of profit-taking." Benson expects about a 50% retracement of Friday's selloff today. (FNN, 5/29)

"I think it was very orderly, I don't see any problems with [Friday] at all and if it continued for a week or so - down to 2750 - I think it would be very healthy for the market," says DENNIS JARRETT of KIDDER, PEABODY CO. regarding Friday's pullback. "I think what you want to do is begin to get yourself positioned on the weakness in the technology area and some of the other growth type stocks like pharmaceuticals because that's where the momentum has been." He sees the current technology pullback lasting a week or two, bringing the industry down a healthy 10% to 15% before it rebounds. (CNBC "Business View", 5/25)

KIDDER PEABODY's RALPH ACAMPORA remains bullish over the next six to 12 months, but says the current market "is a little overdone. We've had a nice time the last couple of weeks and I think it's about time we take a little of it back. I don't think what I'm talking about necessitates a major decline, but if we were to drop maybe another 50 to 75 points I think it would be helpful." ("Wall Street Week", 5/25)

"We may have started the summer doldrums early," says CHARLES LIEBERMAN, analyst at MANUFACTURERS HANOVER SECURITIES, who says a selloff of high-tech stocks "clearly hurts" the market. "As long as everyone else is worried, I'm not," says MARSHAL ACUFF, strategist at SMITH BARNEY, HARRIS UPHAM & CO. He is among those who contend that the fundamentals of both high-tech stocks and the overall market remain intact. ("USA Today", 5/29)

"I'm actually at the high end of neutral, almost bullish, but not quite," says MARTIN ZWEIG. "I'm still kind of queasy. My indicators are moderately bullish, but I'm not. I'm still nervous about the economy." ("Wall Street Week", 5/25)

JOHN McCARTHY, manager of AFFILIATED FUND INC., and managing partner at LORD, ABBETT & CO., sees stocks moving much higher, before correcting by about 10% to 15% in the wake of lower corporate earnings later in the year. Meanwhile, he looks for bearish money managers to storm into the market as the Dow and other indexes rise. "I think there is too much cash on the sidelines," he says. "In 40 years we have never dropped the market to accommodate people with big cash positions." (WSJ, 5/29)

"I think it has been a very narrow market ... and I would like to see more broadening before I get too excited," says EDDIE BROWN. But he looks for the economy to "kind of continue to muddle through and I think we are approaching the time of year where we will begin to shift to looking at 1991 and I think that's the positive for the market ... because I can see some continued economic growth even though it's slow." ("Wall Street Week", 5/25)

"ADOBE was about it for the market today," says JEFF KAMINSKY, head of institutional sales trading at MABON, NUGENT & CO. "We had a great move in the market led by the technologies, then Adobe pre- announced disastrous earnings relative to Street expectations and that took the edge off the market." However, Kaminsky believes Friday's shortfall is harmless and temporary. "I think it's just a phase and volume was one of the lightest days of the year, so in and of itself it was not that surprising." (UPI, 5/25) 2

STOCK TIPS:

"I think the high-tech stocks are through until sometime in September or October," says PETER BOWEN, fund manager of the FIDELITY SELECT TECHNOLOGY PORTFOLIO and FIDELITY SELECT COMPUTERS PORTFOLIO. His comment followed a 15 1/4 decline in ADOBE SYSTEMS INC., stock, nearly a third of its selling price before the company reported much lower-than-expected second-quarter revenue. However, Bowen says Adobe is a strong company with little competition in its software niche and adds: "I'm in there buying the stock." Some other analysts say Adobe's problems should not affect other tech stocks in the weeks to come. "It's not a harbinger of poor demand in the industry," says PETER SCHLEIDER of WESSELS ARNOLD & HENDERSON in Minneapolis. BRUCE LUPATKIN of HAMBRECHT & QUIST says: "I don't believe this should result in a trend toward a downward spiral in the other tech stocks. But it's very hard to predict investor psychology." ROBERT O'TOOLE SR., head of over-the-counter trading at SHEARSON LEHMAN HUTTON says the Adobe situation "will slow the technology group down, but I don't think it will stop the sector. There's still a lot of money out there." ("Investor's Daily", 5/29)

KEVIN McCARTHY of MABON, NUGENT & CO. says ADOBE's pullback was just an excuse for profit-taking in the technology sector. "[It] started as a valuation play in a basic sector rotation, [but] the fundamentals were

robust enough to support a further rally in the shares and I think that will continue throughout the year." (CNBC "World Business", 5/29)

CNN's DAN DORFMAN says eight insiders at ADOBE sold 389,153 shares throughout March and April amassing a savings of over $1.5 million. (CNN "Moneyline", 5/25)

"The bloodbath isn't over, it's just starting," says MICHAEL MURPHY, head of the "California Technology Stock Letter." "Companies like MICROSOFT, LOTUS DEVELOPMENT and IBM are also in for hell," was his reaction to the big plunge in Adobe stock last Friday. ROGER McNAMEE, who runs T. ROWE PRICE's SCIENCE & TECHNOLOGY FUND, also sees vulnerability in high-tech stocks, listing CAERE, INFORMIX, WEITEK, STRUCTURAL DYNAMICS RESEARCH and MIPS COMPUTER as five whose "virginity is coming to an end." That was his way of saying the companies' records of never having disappointing earnings reports are about to be sullied. ("USA Today", 5/29)

In the wake of ADOBE's decline last Friday, ALAN ACKERMAN of GRUNTAL & CO. says he looks to IBM as the continuing leader of technology stocks. "I'd keep my eye on IBM. If IBM does well I would buy some of the other technology stocks as well." In other sectors, Ackerman recommends MCA, ADM, and GENERAL ELECTRIC. He believes the market will close higher by year end and will reach a new record high along the way. ("Nightly Business Report", 5/25)

FNN's "Stocks to Watch" this morning include: SHEARSON LEHMAN HUTTON, McDONALDS, TYCO LABS and U.S. AIR GROUP. (FNN, "World Business Report", 5/29)

"USA Today" begins a three-day series on the banking industry today, publishing what it calls an exclusive list of 540 banks in trouble. "We're in the midst of a very important emergency," says DAN BRUMBAUGH of STANFORD UNIVERSITY. ("USA Today", 5/29)

"Investor's Daily" calls L.A. GEAR INC. the bears' worst nightmare. KENNETH HEEBNER, portfolio manager at CAPITAL GROWTH MANAGEMENT in Boston explains that he laid off the stock for awhile due to rumors constantly floating about the company. "I remember all the reports. I didn't buy the stock because where there's smoke, there's fire. But then I met [L.A. Gear Chairman Robert] Greenberg. ... He looked like a normal businessman." Furthermore, management reports indicate orders have been strong, Heebner notes, "and the sales momentum in the first quarter of this year more than doubled." ("Investor's Daily", 5/29)

MERRILL LYNCH is featured in the "Heard on the Street" column in "The Wall Street Journal" today. The paper says the stock, "tempting though it may seem as it languishes below book value, may not be a happy hunting ground for bargain hunters just yet." JAMES HANBURY of WERTHEIM SCHRODER is

maintaining an unenthusiastic "hold" rating on the stock and says, "We don't see the commitment by management to really push this company toward a competitive [earnings] return." (WSJ, 5/29)

MICHAEL PRICE, who specializes in picking among stocks in sectors generally being beaten down, is now closely following defense, cable, newspaper and savings and loan stocks for his MUTUAL SHARES CORP. Among his favorites are GENERAL DYNAMICS and LORAL in defense, E.W. SCRIPPS and the NEW YORK TIMES in newspapers, TIME WARNER in cable, PORTSMOUTH BANK SHARES, LONG ISLAND CITY FINANCIAL and SOCIETY FOR SAVINGS in S&Ls. He also likes AIR WISCONSIN, GULF APPLIED TECHNOLOGIES, HASBRO and PAINEWEBBER. ("Barron's", 5/29)

GREAT WESTERN FINANCIAL, PARAMOUNT COMMUNICATIONS and BLOCKBUSTER ENTERTAINMENT are among the favorite stocks of RALPH ACAMPORA of KIDDER PEABODY. ("Wall Street Week", 5/29)

JAMES DRASDO of the GROWTH FUND OF AMERICA says a 10% slide in FEDERAL EXPRESS CORP. stock prices last Tuesday "makes the value that much more compelling" for his favorite stock, which he views as a long-term investment. ("Barron's", 5/29)

ERIC HEINEMANN, chief economist of LANDENBURG THALMAN & CO. INC., says there are "a few storm cellars" in what he believes will be a sluggish stock market for the rest of the year. He particularly likes BOEING because it has "an enormous backlog of orders and more coming in all the time." He also likes oil service stocks, especially HALLIBURTON. ("Wall Street Week", 5/29)

SCOTT BLACK, president of DELPHI MANAGEMENT INC., has come up with three over-the-counter stocks that meet his criteria for buying undervalued companies. He says aircraft parts supplier ELDEC is "a surrogate for Boeing." He also likes ASTROSYSTEMS, calling it "a turnaround, but not a runaway freight train." Another favorite is ARNOLD INDUSTRIES - "probably the best in terms of sustainable return on equity year-over-year." (WSJ, 5/29)

"I think it's possible to get up around the 3000 area," says SMITH BARNEY's MARSHALL ACUFF. "Everyone is skeptical about the market going higher. Everyone is looking for the market to go down. But typically markets just don't roll over and die in the middle." Acuff likes the technology sector, specifically, ADOBE, INTEL, IBM and DEC. (CNN "Moneyline", 5/25)

KIDDER, PEABODY chief market strategist DENNIS JARRETT charts the 30 Dow stocks in today's "Barron's" and comments on each of them except GENERAL ELECTRIC, which owns Kidder, Peabody. Among the stocks drawing strong favorable comment from Jarrett are ALLIED SIGNALS, GENERAL MOTORS, PROCTER

& GAMBLE and PRIMERICA. ("Barron's", 5/29)

#90149m0002 05/29/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (MAY 29) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"My vote would be to lower interest rates, but I don't think that will be the way the Fed will go", says GOLDMAN SACHS' EDWARD McKELVEY. "They've had a number of indicators over the last several months that have suggested, first, a strong economy and then a not- so-strong economy and in between they see a trend that is relatively stable." (CNBC "World Business", 5/29)

"The recent [bond] rally seems to have run its course," says DONALD MAUDE, president of MAUDE CAPITAL MARKET CONSULTANTS. "As such, further consolidation appears in order. Therefore, we have become slightly defensive in our fixed-income portfolio strategy." ("Investor's Daily", 5/29)

"The pending employment report ... will shed light on the seriousness of the much-heralded credit crunch," says SUSAN HERING of SALOMON BROTHERS. "To date, evidence of a squeeze has been largely anecdotal, and the current crunch differs significantly from classic periods of tight lending." ("Investor's Daily", 5/29)

ERIC HEINEMANN, chief economist of LANDENBURG THALMAN & CO. INC., says he believes "we will see the long-term Treasury bond trading between 7 1/2 and 7 3/4" by the end of the year. Noting that would be a drop of 75 to 100 basis points, he says, "that's a sufficient move to provide, if you are aggressive, a substantial speculative profit in bonds. I would say very specifically high-grade bonds." ("Wall Street Week", 5/29)

"If you can take risk, I would be in a [long-term] U.S. Treasury [mutual] fund because I think interest rates will fall," says MICHAEL LIPPER, president of LIPPER ANALYTICAL SERVICES. ("The Washington Post", 5/27)

"There is no currency that has a lot of real strength behind it right now " says MICHAEL ANDREWS, chief international bond and currency strategist at MERRILL LYNCH CAPITAL MARKETS. "The view on the dollar is that it is weak, based on a general perception of sluggish U.S. economic growth. West Germany already faced economic uncertainty over the course of monetary union, and now there is political uncertainty there, too - that is death for a currency. The yen is winner by default." ("Investor's

Daily", 5/29)

"I'm still bullish on the dollar," says TAKAHARU FUKAWA, chief trader at SUMITOMO TRUST & BANKING CO. in New York. He admits the dollar could be in trouble near-term, but bases his overall bullishness on expectations that U.S. economic growth will strengthen later this year. (WSJ, 5/29)

"Once the Nikkei stock index stopped plummeting, we saw a quick turnaround on the yen," says ROBERT HATCHER, corporate foreign exchange dealer at BARCLAYS BANK PLC. "The yen has strengthened against everything." ("Investor's Daily", 5/29)

"If the U.S. economy turns out to be weak and heading toward recession, then the Fed will have to ease and the dollar will collapse to 150 marks and 135 yen," says GEOFFREY DENNIS, chief international economist at JAMES CAPEL & CO. "But if our forecast is correct, and the economy proves to be strengthening in May, it won't take much for the Federal Reserve to start tightening [credit] and the dollar will strengthen." Dennis predicts that the dollar will rise over the course of the next year to 1.80 marks. ("Investor's Daily", 5/29)

THE ECONOMY:

"I still think we are facing that problem [of a recession]," says ERIC HEINEMANN, chief economist of LANDENBURG THALMAN & CO. INC. "We are expecting to publish an updated version of our baseline forecast next week that will show sluggish growth through most of the summer and the beginning of a moderate decline in the fall and through the winter months. I think this will lead to some further decline in corporate profits." ("Wall Street Week", 5/28)

"I think the second quarter will be stronger," says SMITH BARNEY's MARSHALL ACUFF. "I think production will be up a bit from what it was first quarter and this should spill over to the third quarter." Acuff believes positive corporate profits will eventually reflect a stronger economy. "I think for the second-quarter, corporate profits will be flat and then in the second half of the year I think they will turn positive relative from the same period last year." (CNN "Moneyline", 5/25)

"I still think the consumer price numbers may have a bit more noise in them because the big winter increases in apparel prices have not completely worked their way through," says DONALD FINE, chief market analyst at CHASE MANHATTAN BANK. "But the problems that hit the producer price, construction and employment figures earlier in the year are pretty much over." (NYT, 5/29)

LILIANA NEALON of the UNION BANK OF SWITZERLAND says Thursday's Bundesbank Council meeting and Friday's purchasing managers index and unemployment

numbers will shape the currency markets for the next week. (FNN "World Business Report", 5/29)

IN WASHINGTON:

"A budget deal is of the utmost urgency," says RIMMER de VRIES, chief economist for J.P. MORGAN & CO. "If we are to prevent a recession, we have to have an agreement." DARWIN BECK, an economist at the FIRST BOSTON CORPORATION, says "If it takes tax increases [to get deficit reduction] that's the price we have to pay." (NYT, 5/27)

"I believe that the regulation of stocks, options and stock-index futures ought to be under a single agency, and that should be the SEC," says SECURITIES AND EXCHANGE COMMISSION CHAIRMAN RICHARD BREEDEN in a wide-ranging interview in "Barron's". "We are the only country in the world with a major capital market that divides stocks and options from stock-index futures. That creates problems, and it weakens the United States competitively." ("Barron's", 5/29)

The SECURITIES AND EXCHANGE COMMISSION and the ENVIRONMENTAL PROTECTION AGENCY are joining forces to ensure that corporations make known their potential environmental liabilities in SEC filings. ("Investor's Daily", 5/29)

#90149p2601 05/29/1990 ~PR Newswire

ATLANTA (MAY 29) PR NEWSWIRE - The Merchant Bank of Atlanta today announced it has acquired the insured deposits and branch network of First Federal Savings and Loan Association from the Resolution Trust Corporation (RTC) over the Memorial Day weekend.

The acquisition is the largest to date of a failed institution in Georgia. First Federal operated 13 branches in the metropolitan Atlanta market and had total deposits of $169.8 million and more than 29,000 account holders. The institution was founded in Atlanta in 1924 as the city's first mutual building and loan association.

In addition to the deposits and branch network, The Merchant Bank also acquired branching rights in Clayton and Cobb counties. It previously had the rights to branch in Fulton and DeKalb counties under Georgia banking law.

The Merchant Bank currently operates its headquarters and banking offices in Midtown Atlanta. The de novo institution began operation in late 1987 and had grown to more than $37 million in assets by the end of March. Earnings for its second full year of operation were $203,000, or 10 cents a share in 1989.

"We are delighted with this acquisition," said chairman and co-founder, Mark Bedner. "We adopted a strategic plan this year which called for a 'buy vs. build' approach to increasing assets. This opportunity fits perfectly with that strategy."

President and co-founder R. Elliott Miller told all First Federal employees over the holiday weekend to report to work Tuesday for "business as usual." First Federal had approximately 90 employees as of last Friday. "We expect to integrate the branches and operations into The Merchant Bank's system," Miller said.

Bedner and Miller organized The Merchant Bank with 28 investors from Atlanta and capitalized it with $10.2 million, fewer than three years ago. They attributed their success in acquiring First Federal's franchise on such short notice (two weeks from bid to closing) to their capital base and good working relationships with federal and state regulators.

"Our credit record and asset growth has been good, especially given the Atlanta economy the past two years," Miller said, "It helped."

The Merchant Bank was founded to take advantage of changing bank regulations in the U.S. According to Bedner, the projected modification of 60-year-old laws separating investment banking from commercial banking was key to the creation of the bank.

#90149p2620 05/29/1990 ~PR Newswire

EL SEGUNDO, CA (MAY 29) PR NEWSWIRE - INFONET, the leading international value-added network services company, today announced that it will interconnect its worldwide NOTICE 400 messaging service with Consumers Software's Network Courier 400.

INFONET'S NOTICE 400 service is accessible in more than 100 countries for worldwide electronic mail, facsimile and telex transmissions. Users may also transmit binary files via NOTICE 400 without first converting them to ASCII text.

Consumers Software will allow more than 600,000 Network Courier users worldwide to interconnect with INFONET's NOTICE 400 service. Network Courier 400 is a LAN E-mail software package with a native X.400 gateway. It runs on Banyan, 3Com, Novell, DCA 10 Net and any MS-net compatible operating system.

Network Courier has already been certified to interoperate with France's Atlas 400 and Canada's Envoy 100. Consumers Software is also finalizing interoperability agreements with public messaging systems in the U.K., Australia, Norway, Holland and Switzerland. However, the NOTICE 400 link marks the first time Consumers Software has established an interconnect between Network Courier 400 and a global public E-mail service.

"We plan on leveraging our relationship with INFONET to further penetrate the booming European LAN market," said Consumers Software President Jack Gruschow. "Network Courier 400 users in Europe find the NOTICE 400 service especially appealing because INFONET assumes full responsibility for resolving any transnational communication issues that might arise with PTTs and IRCs."

Established in 1970, INFONET is the leading standards-based, international value-added network services company. It provides communication and computer services and directly supports those services worldwide. The company is jointly owned by MCI and 10 major telecommunication administrations in Europe and the Asia- Pacific.

#90149p2622 05/29/1990 ~PR Newswire

VIRGINIA BEACH, VA (MAY 29) PR NEWSWIRE - Essex Financial Parnters (EFP) has just acquired the $125-million Financial Security Federal Savings and Loan of Delray Beach, Fla., (Financial Security), under a "clean bank" acquisition agreement negotiated with the Resolution Trust Corp. (RTC). This acquisition by Essex Financial Partners is one of the first out-of-state purchases of an RTC-run thrift by another thrift holding company.

The Florida acquisition is the latest step in EFP's drive to forge undercapitalized S&Ls into a large regional Southeastern financial institution. EFP is financing the effort with capital raised through a limited partnership offering sponsored by PaineWebber, Inc. EFP has already acquired Essex Savings Bank, Inc., a $300-million S&L in Elizabeth City, N.C. and Emporia Federal Savings Bank, a $36-million S&L in Emporia, Va. A letter of intent to acquire an $80-million institution in Columbia S.C. has been signed, and future acquisition in other Southeastern states are anticipated.

EFP will change the S&L's name to "Essex Savings Bank, F.S.B." and will infuse enough new capital to bring Financial Security into compliance with the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) signed by President Bush in August 1989. EFP will assume management of

$125 million in Financial Security loans, investments, and deposits. Under terms of its "clean bank" agreement with the RTC, Essex has up to 90 days to determine which Financial Security loans it will keep and which loans it will return to the RTC.

Financial Security is a community institution with its headquarters and one branch in Delray Beach, Fla., and other neighboring branches in Lake Worth, Stuart and West Palm Beach, Fla. The Delray Beach, Boca Raton and West Palm Beach area ranks 10th overall in the United States per capita personal income. EFP Chairman Lawrence N. Smith said "The S&L's location fits neatly into our target profile of an area with large numbers of people attracted by the top-of-the-market interest rates Essex typically pays on mini- jumbo, jumbo and money market accounts." Smith noted that Florida is second only to California in S&L deposit volume.

#90149p2624 05/29/1990 ~PR Newswire

CHICAGO (MAY 28) PR NEWSWIRE - United Airlines and Australian Airlines today announced a major expansion of their marketing partnership which will benefit customers through coordinated schedules, promotional pricing, one-stop check-in services, joint tour products, as well as other shared marketing programs.

The announcement was made in Chicago by Stephen M. Wolf, chairman and president of United, and John W. Schaap, managing director and chief executive officer of Australian Airlines.

"United Airlines has a major presence in Australia today," Wolf said.

"We see Australia as a growth market and we intend to grow with it. Coupled with Australian Airlines' vast domestic network in Australia and United Airlines' trans-Pacific and domestic U.S. network, this partnership will greatly enhance air travel between the United States and Australia."

"The Australian aviation industry is changing rapidly as we move toward deregulation," Schaap said. "Our partnership with United Airlines positions us well to compete in the overseas markets."

United and Australian Airlines have been interline partners since September 1987 when the carriers offered passengers reciprocal use of each others' airport club rooms. The expanded relationship mutually benefits both carriers in marketing as well as operational areas.

The carriers plan to offer one-stop check-in for United/Australian connecting flights, through checking of baggage between the domestic and international terminal at Sydney, concierge service for first class passengers and joint tour products. The carriers also plan to explore jointly opportunities to share airport and city ticket office facilities.

Australian Airlines flies to 18 destinations in Australia. United serves 156 cities in the United States, Canada, Mexico, Europe, Asia and the South Pacific.

#90149p2625 05/29/1990 ~PR Newswire

TORONTO (MAY 29) PR NEWSWIRE - Roman Corporation Limited today reported a loss of $1,599,000 or $0.16 per share, for the three months ended March 31 1990, compared with a loss, before extraordinary item, of $1,115,000 or $0.11 per share for the first quarter of 1989. An extraordinary gain of $5,450,000 resulting from the issue of additional participating shares by Denison Mines Limited brought earnings for the 1989 period to $4,335,000, or $0.44 per share.

Revenue for the first quarter of 1990 was $9,416,000, compared with revenue of $10,480,000 for the same period last year.

Helen Roman-Barber, Roman Corporation's chairman and chief executive officer, said that "the most significant developments affecting the first-quarter 1990 performance were reduced equity contributions from Denison and Standard Trustco Limited, higher interest expense, and reduced earnings from Strathcona Paper Company due to a planned maintenance shut-down."

She said that these factors "outweighed a higher equity contribution from Lawson Mardon Group Limited."

#90149p2631 05/29/1990 ~PR Newswire

NEW YORK (MAY 29) PR NEWSWIRE - Vernitron Corporation announced today that if its nominees are elected to the Kollmorgen Corporation (NYSE: KOL) board of directors at the May 31, 1990 annual meeting of shareholders, they will waive all standstill restrictions that the Kollmorgen board signed up last spring with third parties interested in acquiring the company. Kollmorgen recently said that it would waive only certain of the standstill provisions. Kollmorgen's waiver requires all offers from third parties to be made solely to the Kollmorgen board.

Stephen W. Bershad, chairman of Vernitron, stated "Unlike the Kollmorgen waiver, we will waive all standstill restrictions, thereby permitting all third parties interested in acquiring Kollmorgen to make an offer either to the board or to the shareholders directly. This in our opinion, will increase the likelihood of maximizing value to shareholders."

Bershad added, "Kollmorgen management has failed to provide an alternative which will provide immediate value to shareholders. What they have done is spent shareholders' money on expensive litigation to prevent shareholders from considering or accepting our offers. Now they are also spending shareholders' money to get re-elected at the annual meeting and failing to disclose the full cost to shareholders. Management has failed to tell shareholders how much they will pay First Boston for soliciting shareholder votes, other than 'a fee which will be mutually agreed upon based on customary practice with respect to ... services.' First Boston has been actively soliciting votes on behalf of management. Kollmorgen has previously paid or agreed to pay a total of $950,000 to First Boston for its financial advisory services, including takeover defense related to our offers, prior to this proxy contest.

"In contrast, we have told shareholders that, if our slate is elected, we will seek damages from Kollmorgen pursuant to our outstanding litigation claims only if the company is sold to a higher bidder, and will settle our claims, subject to approval by the special committee of the newly constituted board, for the payment by Kollmorgen of an amount not to exceed half our actual out-of-pocket expenses incurred in connection with our investment in Kollmorgen, or approximately $9.5 million. We have also told shareholders that we will bear all costs relating to our proxy solicitation (estimated to be between approximately $2 million to $3 million) if our nominees are not elected. While we intend to seek

reimbursement of such proxy costs from the company if our nominees are elected to the Kollmorgen board, we intend to seek reimbursement of such proxy costs only up to a total of $2 million."

#90149p2632 05/29/1990 ~PR Newswire

VANCOUVER, BC (MAY 29) PR NEWSWIRE - Quintette Coal Limited will have to substantially reduce the price it may charge its customers, under a ruling today by a three-member British Columbia arbitration panel.

The ruling establishes a sliding price scale that goes back to April 1, 1987, and continues until March 31, 1991.

According to the scale, the price that Quintette, which supplies metallurgical coal to the Japanese steel industry, may charge during the second quarter of 1990 has been set at $94.90 per tonne. The Japanese steel industry has been paying $102.90 per tonne during the second quarter.

Under the arbitration ruling, the price will drop during the third quarter of 1990 by approximately $10.50 per tonne to as low as $84.40 per tonne, and by approximately another $1.00 per tonne in each of the next two quarters.

The exact amounts will be determined by the terms of the escalation provisions of the contracts between Quintette and the Japanese steel industry.

As a result of adjustments to the price that Quintette has been receiving since the price review began on April 1, 1987, the ruling requires Quintette to reimburse the Japanese steel industry approximately $46 million.

Paul Kostuik, Quintette's president and chief operating officer, said, "We will have to study the ruling carefully before we can determine what effect it may have on the company. Our primary goal is to ensure the long-term well being of Quintette and its employees."

DETROIT (MAY 29) PR NEWSWIRE - Spurred by national sales that for the first time topped the $1 billion mark, Yellow Pages is now the fourth-largest advertising medium in the country. Total Yellow Pages revenues for 1989 exceeded $8.3 billion, an increase of 7.1 percent over 1988. This revenue growth rate was second only to magazines.

Yellow Pages 1989 revenue equaled $8,329,664,945, up from $7,781,000,000 in 1988. Of this, $1,010,630,743 was revenue from national advertising sales and $7,319,034,202 from local sales. Both national and local sales realized a 7.1-percent growth rate over 1988.

Revenue figures for YPPA were compiled by Ernst & Young, an independent national accounting firm with offices in Detroit.

YPPA is an international advertising trade association comprised of 140 publisher companies, 155 authorized selling representatives and 30 associate members. Collectively, the association's publisher members produce more than 90 percent of all directories published in the U.S. and account for almost 99 percent of all revenue generated by Yellow Pages advertising in the United States.

ATLANTA (MAY 29) PR NEWSWIRE - Hayes Microcomputer Products, Inc. today announced immediate North American availability of Hayes V-series ULTRA Smartmodem 9600 (ULTRA 96).

ULTRA 96 provides CCITT V.32 for 9600 bps modulation enhanced with CCITT V.42bis error-control and data compression for data throughput up to 38.4 Kbps.

ULTRA 96 is compatible with Hayes V-series Smartmodem 9600 fast turnaround "Ping-Pong" protocol for 9600 bps and 19.2 Kbps throughput. The product also supports other modem standards including V.22bis (2400 bps), V.23 (1200/75 and 75/1200 bps), V.22 (1200 bps), and V.21 (300 bps), as well as industry standards 103 (300 bps) and 212A (1200 bps).

ULTRA 96 offers advanced features in error-control and data compression by providing compliance with CCITT V.42 as well as CCITT V.42bis which offers up to four-to-one throughput. In addition, ULTRA 96 is compatible with modems supporting Hayes Adaptive Data Compression and MNP 5, providing a smooth transition to CCITT V.42bis.

In addition to high speed capabilities, the product implements CCITT X.32 (Dial X.25), bringing all benefits of the packet switched network directly to the workstation. Benefits include end-to-end error-control communications over VAN packet switched networks and simultaneous communication sessions to one or multiple host locations. When used with

software such as Smartcom III that supports the Hayes AutoStream technology, ULTRA 96 allows up to four simultaneous virtual connections over one physical link. This Hayes modem and software combination multiplies the cost-savings advantage of communications on packet switched networks.

ULTRA 96 incorporates U.S. Patent 4,549,302, the Hayes Escape Sequence with Guard Time, which allows the modem to reliably escape from the on-line mode of operation (receiving/transmitting data) to the command mode (interpreting the Hayes Standard AT Command Set) without being accidentally triggered by transmitted data.

Best known as the leader in the microcomputer modem market, Hayes develops supplies and supports computer communications equipment and software for personal computer and computer communications networks. The company distributes its products through an international network of authorized distributors, dealers and original equipment manufacturers.

NORCROSS, GA (MAY 29) PR NEWSWIRE - Immucor, Inc. (NASDAQ-NMS: BLUD), maker of blood bank reagent systems and related products, announced today its intent to acquire its German distributor. The distributor, known as Immucor GmbH, has annual revenues in excess of $6 million, and would continue to be run by its current management team. The proposed acquisition is subject to the negotiation of definitive agreements and Immucor Board approval. Therefore, terms of the proposed acquisition were not disclosed.

The German company, founded in 1984 by its current President, Josef Wilms, markets blood collection bags, HLA products, and Immucor's blood bank reagents and Capture(TM) products. Approximately 40 percent of the company's revenues are Immucor products.

Commenting on the agreement, Edward L. Gallup, president of Immucor, Inc. said, "This merger should enable Immucor to continue to expand its international business at a time when economic and political developments, particularly in Eastern Europe, are extremely attractive. Additionally, we will be properly positioned as the European Economic Community comes together in 1992.

Founded in 1982, Immucor manufactures and sells a complete line of reagents and systems used primarily by hospitals and blood banks in a number of tests performed to detect and identify certain properties of the

cell and serum components of human blood prior to blood transfusion.

CINCINNATI (MAY 29) PR NEWSWIRE - E. Thomas Arington, president and CEO of Duramed Pharmaceuticals, Inc. (NASDAQ: DRMD) announced today the signing of a joint venture agreement with Atral/Cipan, one of the world's largest manufacturers of bulk antibiotics located in Lisbon, Portugal. The agreement grants Duramed the exclusive U.S. marketing rights to all FDA approved finished dose antibiotic products manufactured by Atral/Cipan. The initial products to be covered by the agreement are Amoxicillin (Amoxil), Cephalexin (Keflex) and Tetracycline (Achromycin, Tetrex). Arington noted that the agreement provides Duramed with an introduction to the major therapeutic class of antibiotics and also represents a first step in the company's long- term goal of developing relationships in the international market.

Duramed Pharmaceuticals, Inc. manfuactures and sells generic drug products comprised of various dosages of prescription drugs. The company's stock is traded on the NASDAQ National Market System under the symbol DRMD.

TROY, MI (MAY 29) PR NEWSWIRE - Simtec Computer Rentals was recently selected to participate in a pilot rental program with IBM PS-2 computers. The test program, which involves one other rental company on the West Coast, is scheduled to last one year.

Simtec, a wholly owned subsidiary of Inacomp Computer Centers, Inc. (NASDAQ: INAC) (the nation's fifth largest microcomputer reseller), was chosen over several other dealers. An IBM spokesman said that they had considered several other rental firms, but selected Simtec because of its extensive activity in the rental market and its network of rental centers.

Gail Ray, president of Simtec, believes that IBM has recognized the fact that the rental industry is beginning to mature and that rental revenues are continuing to grow on a national basis. "IBM's involvement gives the rental industry added credibility," notes Ray, "and Simtec expects to benefit from IBM's promotion and advertising endeavors."

As a franchise operation, Simtec offers aspiring entrepreneurs the opportunity to tap into a growing field and, at the same time, benefit from the structure and experience of an existing network. Simtec's ties with Inacomp Computer Centers, Inc., make it unique within the computer rental industry.

Inacomp Computer Centers, Inc. markets microcomputer systems and related products and services through over 200 company-owned, dealer and affiliate locations across the country. Simtec, with its existing five company-owned locations, provides customers with short-term rental services on quality personal computers and peripherals for situations like conventions and trade shows, peak work loads, equipment failures, or product testing.

GLENDALE, CA (MAY 29) PR NEWSWIRE - Third quarter earnings for ATI Medical Inc. (AMEX: ATI) rose 41 percent while sales increased 25 percent over the prior year quarter, it was announced today. The record results represented ATI's seventh consecutive quarter of improved earnings.

Net income for the three months ended April 30, 1990 advanced to $1,062,107, or 20 cents per share, from $752,865 or 14 cents per share, in the prior year period. revenues increased 25 percent to $13,231,978 from $10,615,920 a year earlier.

For the nine months ended months April 30, 1990, net income rose 81 percent to a record $2,727,951, or 51 cents per share, from $1,507,092, or 28 cents per share, in the same period last year. Revenues for the nine months increased 29 percent to $37,365,640 from $28,890,323 in the

year-earlier period.

Paul E. Stevenson, president and chief executive officer, said sales and profit gains reflected ATI's continued penetration of the medical equipment rental market.

"ATI's growth has been, and continues to be, generated by our aggressive efforts to capture a greater share of a continually growing market," Stevenson said.

He added that ATI expects further improvement in the year ahead, based on strength of its core business and new related markets being evaluated.

In May, ATI relocated its executive offices to 1045 Palms Airport Drive in Las Vegas, Nevada 89119. The company's new telephone is 702-361-8788.

ATI Medical Inc. rents medical equipment primarily to hospitals as well as the entertainment industry through offices in major cities across the country. ATI also sells medical equipment and certain disposables and markets, through its subsidiary, CAMS, Inc., a software system to monitor equipment usage within hospitals.

CLEVELAND (MAY 29) PR NEWSWIRE - Society Mortgage Company will accept applications for mortgages with an initial rate of 7.75 percent from qualifying home buyers at 13 Society Bank offices throughout Ohio beginning June 4, Craig C. Brooks, mortgage company president, announced today.

Successful applicants will pay an interest rate of 7.75 percent the first year of their mortgages and 8.25 percent the remaining 29 years.

The mortgages will be financed from the sale of $283.6 million of mortgage revenue bonds sold by the Ohio Housing Finance Agency. Society National Bank has underwritten a portion of the agency's 1990 C and D issues.

Those applying for the mortgages are subject to income qualifications and must live in the homes they intend to finance. Applicants should have a contract to purchase their houses when they submit their forms at the following Society offices.

Society Mortgage Company is an affiliate of Society Corporation (NASDAQ: SOCI), one of the largest bank holding companies in the Midwest with assets of $15.5 billion at March 31. The holding company has 350 offices in Ohio, Michigan, Indiana and Florida. Through its affiliates, Society engages in commercial banking, consumer banking, mortgage banking and leasing, and provides trust and investment services.

WATERTOWN, MA (MAY 29) PR NEWSWIRE - Ionics, Incorporated (AMEX: ION) announced today that its Ionics Pure Solution Division in Phoenix, Ariz., has been selected to design and build an advanced ultrapure water system for Motorola (NYSE: MOT) at a major new semiconductor facility now under construction in Chandler, Ariz. The total contract value will be approximately $4.5 million. The fast-track project requires equipment to be delivered by the end of 1990.

Motorola's new facility, called the Chandler Advanced Technology and Manufacturing Center, comprises a total of 430,000 square feet in two buildings that will house research and development, plus manufacturing and support operations. The Advanced Technology Center portion of the new

facility is planned to be the most advanced BICMOS research center in the world. This project is a first for Motorola, in that it combines the full techology spectrum required to develop and manufacture advanced generations of customized integrated circuits in the same facility.

Commenting on the new project, Arthur L. Goldstein, Ionics' chairman and CEO said, "The trend in the semiconductor industry is toward fewer but very much larger 'fabs', with increasingly stringent ultrapure water specifications and instrumentation. This is the second advanced multimillion dollar ultrapure water system which Ionics Pure Solutions Division has sold for a large new 'fab' this year, and we believe it represents further confirmation of Ionics' leadership position in the field."

Ionics is a seperations technology company involved worldwide in the manufacture and sale of membranes and related equipment for the purification of water, in the supply of purified water and water treatment chemicals, and in the sale of bottled water and home water purifiers.

#90149p2674 05/29/1990 ~PR Newswire

TROY, MI (MAY 29) PR NEWSWIRE - Arbor Drugs, Inc. (NASDAQ: ARBR) today announced a 15.5-percent increase in net income and a 12.3-percent increase in net sales for the third quarter ended April 30, 1990.

Eugene Applebaum, chairman, president and chief executive officer, attributed the record performance to strong sales growth and ongoing expense discipline.

Arbor's third-quarter net income was $2,269,000 or $.24 per share, up from $1,965,000 or $.21 per share, in the comparable period of fiscal 1989.

Net sales for the third quarter were $82,799,000 vs. $73,747,000 last year. Comparable store sales increased 7.8 percent for the quarter.

Net income for the first nine months of the current fiscal year was $8,326,000, up 24.4 percent over last year's $6,694,000. Earnings per share for the nine months increased from $.70 to $.87.

Sales for the first nine months of the year were $252,468,000, up 13.6 percent from $222,183,000 in the first nine months of the prior year. Comparable store sales were up 9.3 percent for the nine-month period.

The board of directors of the Troy-based retailer today also declared a regular quarterly cash dividend of $.04 a share, payable July 3, 1990, to

holders of record as of June 19, 1990.

Commenting on the results, Applebaum said: "Our third-quarter reflects the success of our continuing emphasis on pharmacy as the core of our operation and the overall convenience of our traditional drugstore format. The profitable growth recorded for both the three- month and nine-month periods, as well as the favorable outlook for the drugstore industry in general, provides optimism for another outstanding year."

Applebaum also noted: "We are pleased to have recently been named the 1989-1990 Michigan Company of the Year by the Detroit Free Press. This prestigious award, for which all publicly held corporations in Michigan were considered, recognizes the excellence of the entire Arbor organization."

Arbor Drugs, the nation's 22nd-largest drugstore chain, opened one drugstore in the third quarter and another four stores thus far in the fourth quarter of the current fiscal year. The company currently operates 96 drugstores in Michigan.

NEW YORK (MAY 29) PR NEWSWIRE - Former U.S. Secretary of Energy John S. Herrington has been elected chairman of the board of directors of Harcourt Brace Jovanovich, Inc. (NYSE: HBJ) (HBJ), it was announced today by the company following a meeting of the board.

Harcourt Brace Jovanovich, Inc. has been traded on the New York Stock Exchange since 1961. It is one of the world's largest book publishers.

At the same meeting, William Jovanovich, chairman, submitted his letter of resignation to the board. He urges that John Herrington be named as his replacement and relinquished his dual role as chairman of the board and chairman of the executive committee, effective immediately. Jovanovich, age 70, is retiring but will serve as an editor for HBJ, capping a career of more than 43 years with the company he led to international prominence.

John Herrington has served as a member of the company's board of directors since May 1989. He has served on the board's executive committee and finance committee.

Peter Jovanovich, president and chief executive officer, was today elected chairman of the executive committee, replacing William Jovanovich. He also serves on the board's finance committee.

HBJ is the nation's leading elementary and secondary school textbook publisher. It is one of the three publishers of college textbooks in the United States. It is the largest scientific and medical book and journal publisher in the U.S. The company is one of the two largest for-profit publishers of tests and test scoring.

Notable works published over the years by HBJ include: Abraham Lincoln by Carl Sandburg; Collected Poems, T.S. Eliot; The Letters of Virginia Woolf, A Passage to India by E. M. Forster; All the King's Men by Robert Penn Warren; Babbitt by Sinclair Lewis; The Color Purple by Alice Walker; Free to Choose by Milton Friedman; The Group by Mary McCarthy; The Name of the Rose by Umberto Eco; The Origins of Totalitarianism by Hannah Arendt; and 1984 by George Orwell.

HBJ also has an insurance business, with headquarters and almost all of its staff in Orlando, Fla. It consists of underwriters of life and health insurance as well as agents and brokers of property and casualty insurance. It also publishes 11 state farm magazines. On a combined basis, its life and health coverage in fifty states makes it rank in the top 10 percent of legal reserve life insurance companies in the United States in

premium income, insurance in force, total assets, and statutory net income.

FAIRFAX, VA (MAY 29) PR NEWSWIRE - CACI Marketing Systems, a division of CACI International Inc. (NASDAQ: CACIA), has released new shopping center data on more than 30,000 shopping centers within the United States. Created with information from the National Research Bureau, this is the largest database of shopping centers available.

In addition to CACI's comprehensive demographic and marketing information, these new data also include: name, address, telephone number, leasing agent, and gross leasable area (GLA) of each center, complete tenant listing; name and GLA of all anchors; marketing strategy; average lease rate; year opened; number of stores; parking places and acres; space available and the number of levels.

Also included in the database is the distance of every shopping center from any designated site, total number of shopping centers and GLA in the designated area, types of shopping centers, and year centers were built by GLA. This data is available for any geographic or postal area, or any size radius around a specific location.

This new database is available either in standard or customized formats. To assist clients, CACI is releasing three standard reports: Shopping Center Market Summary Report. Shopping Center Location Report, and Shopping Center Detail Report.

#90149p2682 05/29/1990 ~PR Newswire

STAMFORD, CT (MAY 29) PR NEWSWIRE - The ABB Asea Brown Boveri Group (ABB) reported today in Zurich that orders received for the first three months of 1990 amounted to $7.6 billion, an increase of 42 percent over the corresponding period of 1989 (three months 1989: $5.4 billion). This represents approximately a 14 percent increase in orders received, excluding acquisitions, divestments and exchange rate fluctuations. Substantial increases in orders received were reported by the Power Plants Industry, Transportation and Environmental Control Business segments.

Large orders included a $73 million contract for reactive power compensation systems from Canada, a $115 million wastewater plant from Egypt, and a $120 million contract from Denmark for the class IC/3 intercity trains.

Revenues for the first three months of 1990 totaled $6.1 billion, which was 39 percent higher than revenues for the corresponding period of 1989 (three months 1989: $4.4 billion). Excluding acquisitions, divestitures and exchange rate fluctuations, revenues increased by 9 percent. The order backlog on March 31, 1990, was $23.4 billion.

ABB Group operating earnings after depreciation for the first three months of 1990 totaled $333 million, which is an increase of 45 percent compared to the corresponding period last year (three months 1989: $229 million). Earnings after financial items amounted to $215 million, an increase of 25 percent, compared to $172 million for the first three months of 1989. Good earnings growth was reported by the Power Transmission, Power Distribution and Financial Services Business segments. Income before taxes amounted to $239 million.

The acquisition of Combustion Engineering (C-E) was completed in early 1990, and C-E was consolidated by ABB at the beginning of 1990. Total purchase price for C-E was $1.56 billion. Through this acquisition, ABB in North America doubles its total sales to approximately $7 billion, with some 40,000 employees. Recently ABB has announced its intention to sell three C-E units. For two of the units, sale and purchase agreements have been entered into. These units are Georgia Kaolin, for a sales price of $520 million, and C-E Minerals, for a sales price of $150 million.

The forecast that earnings after financial items for the full year 1990 will increase from 1989 remains.

The ABB Group, Zurich, is the world's leading electrical engineering company with total annual sales of about $25 billion and 215,000 employees in 140 countries.

RALEIGH, NC (MAY 29) PR NEWSWIRE - Acton Corporation (AMEX: ATN), AMEX $3.75 Cumulative Preferred Stock (ATNPR), today announced that it has reached a preliminary agreement to purchase the furniture operations of Hickory Furniture Company for $44.5 million dollars.

Under the terms of the agreement, Hickory White Company, a new Acton subsidiary, would purchase the furniture operations of Hickory Furniture Group, Inc., Hickory Manufacturing Company, White Furniture Company, KayLyn, Inc. and Chaircraft, Inc.

The furniture operations would continue to be headquartered in High Point and operate under the name Hickory White with current management continuing to operate the business. For the calendar year 1989, the furniture operations to be purchased had sales of $61.5 million which produced earnings before interest and taxes of around $4.9 million. The operations consist of seven production facilities located in Hickory, High Point, Mebane anbd Hillsborough, North Carolina.

Hickory Furniture Company beneficially owns approximately 40 percent (54 percent on a fully diluted basis) of the common stock of Acton and controls about 76 percent of the voting power of Acton's voting stock. The transaction was negotiated by independent special committees of the Boards of Directors of Acton and Hickory Furniture Company, each having their own counsel and outside advisors.

The transaction is subject to, among other things, (1) the execution of a definitive purchase agreement, (2) the obtaining of a bank loan by Hickory White of approximately $21 million, and (3) the receipt by Acton's independent special committee of a confirmatory written opinion from its investment advisor that the price to be paid is fair to the shareholders of Acton (other than Hickory Furniture Company). It is anticipated that the closing of the transaction could take place within the next two weeks.

Acton Corporation is primarily engaged in specialized automobile insurance underwriting, real estate development and the operation of a cable television system.

#90149p2684 05/29/1990 ~PR Newswire

DEARBORN, MI (MAY 29) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) announced today that Ingham County Circuit Court Judge Thomas L. Brown

yesterday refused to reinstate a preliminary injunction against CMS Energy Corporation and its subsidiaries which was vacated in a unanimous decision May 23 by the Michigan Court of Appeals and remanded to the Circuit Court.

The preliminary injunction, sought by the Michigan attorney general and the Michigan Public Service Commission (MPSC), would have prohibited CMS Energy Corporation and its subsidiaries, including Consumers Power Company from transferring or using the $1.5 billion in debt and equity interests received from Midland Cogeneration Venture (MCV) in exchange for assets from the abandoned Midland nuclear plant.

The company believes this court decision, announced in an extraordinary holiday session, further enhances the prospects for the proposed MCV sale/leaseback to go forward and supports its position in related court proceedings. CMS Energy also believes that this decision, along with the Court of Appeals decision, further supports the company's view as to the lack of jurisdiction by the MPSC over CMS Energy's non- utility business activities including its MCV interests.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility.

ATHLONE, IRELAND (MAY 29) PR NEWSWIRE - Elan Corporation plc (AMEX: ELN) Chairman and CEO Donald E. Panos today announced the financial results for the year ended March 31, 1990.

Revenues for the year ended March 31, 1990 were 30,234,000 Irish pounds (U.S. $47,625,000) compared with 16,171,000 Irish pounds in the previous year, an increase of 87 percent. Net income rose to 3,296,000 Irish pounds (U.S. $5,191,000) compared to a profit of 1,663,000 Irish pounds for fiscal 1989, an increase of 1,633,000 Irish pounds (U.S. $2,572,000). Earnings per share increased from 11 pence to 21 pence (U.S. 33 cents).

Commenting on the year's results, Panos said, "It gives me great satisfaction to report the continuing growth of Elan. The growth in our revenue and profits was achieved on strong licensing, manufacturing and royalty income. Elan is continuing to expand its business, broaden its revenue base and invest in its future. Our decision to invest in the

development, clinical testing and registration of products under our own control was the cornerstone for our success this year. Our financial results have proved these decisions to be right, and we look forward to continued improvement of the next year.

Panos went on to say, "The company will continue with the pragmatic, conservative fiscal approach tied to innovative technology development and the continuing desire to ensure that our destiny is under our own control. We will therefore continue to invest in development of products which will yield the best returns, and we intend to continue our policy of licensing products only to those companies that we believe will obtain a satisfactory share of the potential market for our technologies. We believe that this strategy will result in the best long term profit growth for the company.

#90149p2687 05/29/1990 ~PR Newswire

WEST CHESTER, PA (MAY 29) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston) announced today that the U.S. EPA has recently completed a favorable on-site compliance review of Weston's laboratory procedures.

As a result, Weston's voluntary withdrawal from performing EPA volatile organic sample analyses at a unit of the firm's Lionville, Pa., analytical laboratory will terminate on June 6, 1990.

Last February, Weston entered into a Consent Judgment with the EPA in which the company agreed to voluntarily exclude a unit of its Lionville Analytics Division facility from performing a limited set of volatile organic sample analyses, funded by the EPA, for a period not to exceed twelve months. The Analytics Division's three other full service laboratories were not affected by the withdrawal.

The EPA's recently concluded favorable review indicated satisfaction with the improvements made to Weston's laboratory procedures and practices, and as a result, the EPA will not seek an extension of Weston's voluntary withdrawal beyond the minimum four-month withdrawal period.

"The termination of this voluntary withdrawal will allow this unit of Weston's Lionville laboratory to again bid upon and perform all EPA work. We are very happy to have satisfied the EPA's requirements in the minimum time allotted and we look forward to a continued strong and favorable relationship with the Agency," said Weston Chief Operating Officer William J. Marrazzo.

Weston is a recognized leader in the environmental engineering, design and

consulting industry. As a full-service environmental and health and safety firm, Weston provides nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management services.

Weston's clients include many Fortune 500 companies and most major cities in the country. The company is a principal provider of services to the U.S. Department of Defense and the Department of Energy.

Weston is headquartered in West Chester and operates a network of four analytical laboratories and 44 offices, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington.

CONTACT: Thomas J. Tuffey, executive vice president of Weston, 215-430-3040

#90149p2688 05/29/1990 ~PR Newswire

LOWELL, MA (MAY 290 PR NEWSWIRE - WLT Systems, Inc. today set a new standard for mail-order PC buyer-protection with the introduction of a limited three-year warranty and three years of on-site service, free, for its WLT PC Express family of industry-standard personal computers.

The new buyer-protection plan, which surpasses by as much as two years those offered by leading competitors in the direct-response PC marketplace will be applied to all present as well as new customers of WLT PC Express systems.

WLT Systems also lowered prices by five percent on all PCs, bundled 80386-based systems with two megabytes (2MB) of main memory, and reduced prices up to 30 percent on disk-drive and add-on-memory options.

The new three-year warranty covers the central processing unit (CPU), keyboard, monitor, monitor controller, disk drives, co-processors, additional memory, tape back-up, and mouse purchased on the same order.

WLT Systems reduced prices by 5 percent on all WLT PC Express models, which are based on 80286, 80386, and 80386SX microprocessor technology.

WLT Systems also lowered prices on selected peripheral and memory add-ons. Systems based on 80386 microprocessors now come standard with 2MB of memory at no additional charge. The price of a high-performance, 321MB Enhanced Small-Device Interface (ESDI) drive has been lowered from $2,085 to $1,749, and the price of a 1MB Single In-line Memory Module (SIMM) has been reduced to $150 from $220.

The base configuration for 80286-based systems includes the central

processing unit (CPU) with 1MB of memory, a 1.2MB or 1.44MB diskette drive two asynchronous serial ports and one parallel port, and a keyboard. The Micro Channel-based MC-316S-5 model includes the CPU, 2MB of memory, a 1.44MB diskette drive, on-board VGA video, three ports (one asynchronous, one parallel, and one mouse port), and a keyboard.

All systems are available immediately for purchase or lease. They can be ordered from the WLT PC Express catalog either by calling a toll-free number, 800-272-9771, or by FAX at 508-656-8540.

WLT Systems, Inc., a wholly owned direct-response subsidiary of Wang Laboratories, Inc. (AMEX: WAN), sells, services, and supports WLT PC Express products in the U.S. The company is headquartered in Lowell, Mass., with assembly and distribution facilities in Torrance, Calif.

HOUSTON (MAY 29) PR NEWSWIRE - DI Industries, Inc. (AMEX: DRL), announced today that its subsidiary, Alamo Machine and Tool, has purchased oilfield rig-up and supply yards in both Houston and Odessa, Texas, from Rigs-R-Us, Inc., for a total of $1,050,000.

The purchase and sale of equipment is intended to allow Alamo Machine and Tool to continue with its functions of supplying equipment to the oil and gas industry, assembling and rigging up of equipment for overseas and domestic operations and certain supply store functions for specialty equipment. Wally McClanahan has been hired as marketing manager for the Houston facility.

This represents a portion of the acquisitions announced in DI's March public offering in which the firm raised $15 million of new funds. The parent, DI Industries, Inc., recently released its best quarterly earnings since 1983.

DI Industries, Inc., is a holding company with firms in oil and gas contracting, commercial drilling, oil and gas exploration and production and heavy equipment sales.

#90149p2698 05/29/1990 ~PR Newswire

EXETER, NH (MAY 29) PR NEWSWIRE - Tyco Laboratories, Inc. (NYSE: TYC)

announced today that, through its Grinnell Corporation subsidiary, it has entered into an agreement with Wormald International Limited to acquire all of Wormald's operating assets, including the Wormald name.

Wormald, a publicly held Australian company whose shares are traded on the Australian Stock Exchange, is a worldwide fire protection and detection company with major contracting, manufacturing and distribution facilities located throughout the United Kingdom, Scandanavia, and Continental Europe; Australia, New Zealand, Asia, and many other countries. Wormald also has substantial operations in the United States and Canada.

Expected to operate at a fiscal 1991 sales rate of US$1.1 billion, Wormald's businesses are complementary to Tyco's Grinnell Fire Protection operations, both geographically and by product lines.

Wormald companies, covering all aspects of fire protection, have dominant market positions in many other countries around the world, while Grinnell is the largest fire protection company in North America.

Annual Geographic Sales Forecast (US$, 000s)

Location	Wormald	Tyco	Combined Total
U.S. and Canada	$210	$2,300	$2,510
U.K. and Europe	565	35	600
Pacific Rim and other	325	15	340
	---	---	---
	$1,100	$2,350	$3,450

Wormald adds to Grinnell's product line the advanced technology used to provide special hazards protection for the chemical, petrochemical, aerospace and off-shore oil industries, among others; plus a complete line of fire extinguishers. Other Wormald operations manufacture, distribute and install many types of fire fighting and fire detection equipment throughout the world.

Wormald's strong position in the West German and Austrian markets will allow Grinnell to participate in the opportunities arising from the reunification of the Germany's and the opening of other Eastern European markets. Equally important are the Wormald operations located in the United Kingdom and other parts of Europe which can take advantage of the positive economic implications in 1992.

There are many other synergies relating to the utilization and broader distribution of fire detection and suppression equipment now being manufactured by each of the companies. Grinnell manufactures all of the equipment utilized in automatic sprinkler systems whereas Wormald only manufactures a portion.

NEWBURGH, NY (MAY 29) PR NEWSWIRE - Atlantic Coast Airlines/United Express, a division of WestAir Holding Inc. (AMEX: WAH), announced today that it will inaugurate non-stop service to Washington's Dulles International Airport from Stewart International Airport.

Non-stop flights will commence August 1 with four daily roundtrips.

In addition to Stewart International, United and/or United Express also serve New York's LaGuardia, Kennedy, Newark, White Plains/Westchester County, and Islip/Long Island.

United Express will provide the only non-stop service to Washington, D.C., and also timely connections from Washington's Dulles to more than 100 daily flights on United Airlines to destinations across the country and

around the world. In addition, passengers boarding United Express at Stewart now have convenient access to Europe as well, with United's new daily service to Frankfurt, Germany.

United Express will serve Stewart International Airport with its new pressurized Embraer Brasilia jet-props. The Brasilia is the fastest and one of the most technologically advanced aircraft in regional airline service today, with a cruising speed of 350 mph. In addition to a complimentary snack and beverage service, an extensive cocktail selection is offered onboard the 30-passenger aircraft.

As a marketing partner with United Airlines, United Express offers its customers many United Airlines benefits, including worldwide reservations, advance seat selection and boarding passes. Members of United's popular Mileage Plus frequent flier program earn a minimum of 500 miles on all United Express flights, and senior citizens may participate in United's Silver Wings program which offers a variety of travel-related discounts.

Washington-Dulles based Atlantic Coast Airlines/United Express began service in December 1989, with 48 daily departures to six cities. Since that time, the airline has doubled in size, currently serving 12 cities in six states from Dulles. In addition to today's announcement, United Express previously announced that it will begin service to Columbia, S.C., June 1, Pittsburgh June 15 and Shenandoah Valley, Va., July 15, bringing the total number of cities served from Washington-Dulles to 16, and total daily departures to 122.

Atlantic Coast Airlines/United Express is a division of WestAir Holding Inc., headquartered in Fresno, Calif. WestAir Holding Inc. is the largest regional airline company in the United States, operating over 850 daily flights to 56 cities in 13 states and the District of Columbia. In early 1989, the company was named "Regional Airline of the Year" by Air Transport World Magazine.

NEW YORK (MAY 29) PR NEWSWIRE - Sir Gordon White, chairman of Hanson Industries, the U.S. arm of Hanson PLC (NYSE: HAN), announced today that Hanson has sold its Marvin Electric Manufacturing Company business unit to Hubbell Inc. (AMEX: HUB) for $18.5 million in cash.

Marvin Electric, which is also known by the name Marco Lighting, is based in Los Angeles. It manufactures a wide range of incandescent and high intensity discharge lighting, including recessed lighting fixtures,

vandalproof fixtures, and low voltage luminaires. Hanson acquired Marvin Electric as part of its 1987 acquisition of Kidde, Inc.

For the fiscal year ended Sept. 30, 1989, operating profits were $2,003,000 on sales of $32,247,000. For the latest six months, ended March 31, 1990, Marvin Electric reported operating profits of $392,000 and sales of $13,971,000. Net asset value was $9,669,000.

Hanson Industries has also recently sold, in separate transactions not previously announced, other businesses and assets, excluding Marco, for a total of more than $31.8 million in cash and $11.7 million in notes. In the fiscal year ended Sept. 30, 1989, the companies divested, excluding Marco, recorded sales of $90,460,000 and pre-tax losses of $86,000. Net asset values aggregated approximately $33 million.

These divestitures included: -- Industrias Alta Mar -- a manufacturer of fishing nets in Mexico; -- Rau Fasteners -- a manufacturer of metal fasteners; -- Isles Industries -- a manufacturer of metal work stations and benches; -- Newport Plastics Corporation -- a manufacturer of reinforced plastics; -- Theurer Trailers -- a manufacturer of highway trailer vans; -- The El Paso Plant of Baltimore Spice -- which processes capsicum; -- Craig Systems Corp.-- a manufacturer of test chambers and shelters; -- Surplus real estate.

Hanson PLC is a British-American industrial management corporation. In the U.S., Hanson Industries' operations include SCM Chemicals, Jacuzzi Whirlpool Bath and Spa Products, Grove Crane, Ames Tools, Universal Gym, Endicott Johnson and Frye Footwear, Hanson Lighting Group, Kaiser Cement, Weber Aircraft, Farberware Cookware, and Gold Fields Mining, among others.

In the United Kingdom, Hanson's holdings include Imperial Tobacco, Ever Ready Batteries, ARC Aggregates, London Brick, Butterley Brick, and Smith Meters.

DENVER (MAY 29) PR NEWSWIRE - Apache Corp. (NYSE: APA) today announced the completion of its CL&F A-3 well in the KK sand of Gibson Field in Terrebonne Parish, La. The well flowed 7.1 million cubic feet (MMcf) of gas per day and 91 barrels of condensate per day from perforations between 14,700 and 14,805 feet. The flow rate was gauged on a 16/64-inch choke with a flowing tubing pressure of 3,441 pounds per square inch. Following recent acquisitions of additional interests, Apache increased its working interest in the well from 37.7 to 89.3 percent.

The CL&F A-3 is expected to be hooked up to pipeline in early June. Apache expects initial production of between eight and nine MMcf of gas per day and 110 barrels of condensate per day.

Apache is an independent energy company engaged in exploration, development, production and marketing of natural gas and crude oil. The company's securities are traded on the New York and Midwest Stock Exchanges (symbol APA).

DALLAS (MAY 29) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) today announced that it has purchased the minority shares of common stock of its Dallas-based subsidiary, Grace Drilling Company, that were owned by subsidiaries of Panhandle Eastern Corporation. As a result of this transaction, Grace Drilling is now a 99.45 percent owned Grace Energy subsidiary.

Grace Drilling shares were issued to a subsidiary of Texas Eastern Corporation in September 1986 in exchange for 40 land-based drilling rigs and related assets. In February 1987, Grace Drilling issued additional common shares to a subsidiary of Panhandle Eastern in exchange for 22 land-drilling rigs and related assets. Panhandle Eastern acquired Texas Eastern in June 1989.

This stock purchase signifies Grace Energy's long-term commitment to the onshore drilling business. Grace Drilling, with 183 rigs, the largest onshore drilling contractor in the U.S., experienced a significant improvement in its first quarter 1990 results versus the prior year quarter, primarily due to increased utilization rates, from 29.0 percent in 1989 to 35.5 percent in 1990, and firming margins.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of oil and natural gas; and in coal mining.

LONDON (MAY 29) PR NEWSWIRE - Anangel-American Shipholdings Limited (NASDAQ: ASIPY) today announced third quarter income of US$8,439,000 (US$0.47 per share), after charging depreciation of $2,109,000 ($0.12 per share), for the three months to March 31, 1990. For the three months to March 31, 1989, the comparative figures had been $5,752,000 ($0.56 per share) and $170,000 ($0.02 per share), respectively.

Management noted that cash flow from operations of $10,157,000 ($0.59 per share) had improved over the comparative period ($5,512,000 or $0.57 per share) despite the substantial increase in the company's share base over the intervening period.

For the nine months to end March 1990, net income now stands at $30,837,000 ($1.79 per share) after depreciation of $4,786,000 ($0.29 per share). Vice President I. C. Davis commented that management expected earnings to remain on target for the year and that, despite the recent fall in freight rates, the company's own cash flow remained largely unaffected.

The company also announced that on May 2, 1990, it acquired the remaining 74.9 percent interests in the 48,500 DWT product tanker MT "Anangel Intelligence," built 1982, for $10,000,000 cash and the issue of 973,700 $10.00 junior preference shares, which will pay dividends at a rate of 1 percent above six-month LIBOR.

ST. LOUIS (MAY 29) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) today kicked off its second annual nationwide food drive, Feed America '90. During the next three weeks, employees from coast to coast will sponsor various fund-raising and food-gathering events to collect more than 500,000 pounds of non-perishable food and other necessities.

The drive will be held May 29 through June 15 at most McDonnell Douglas facilities across the country, including St. Louis; Huntsville, Ala.; Huntington Beach, Calif.; and Titusville, Fla.

Last year, McDonnell Douglas cast aside the traditional Christmas food drive in favor of a more effective strategy. It hosted its first companywide summer food drive during the time of year when most relief agencies report critical food shortages. The result was the most successful food drive in the history of the corporation. More than 450,000 pounds of food and toiletries were collected and $165,780 was raised for additional foodstuffs.

"At the time of our food drive last year, many of the agencies we helped had pantries that were virtually empty," said Bonnie Brandt, McDonnell Douglas manager of employee volunteer programs. "By holding summer food drives, we hope to increase awareness in our communities that hunger is a year-round issue. Nearly 31.9 million people in our country go hungry each day. We can't feed all of them, but we can put a spotlight on this problem that pervades our nation."

ATLANTA (MAY 29) PR NEWSWIRE - Contel Corp. (NYSE: CTC) today announced that its Contel ASC division has signed a five-year, $12 million contract with IBM for a video network.

Under this agreement, Contel ASC will provide satellite transmission services, network monitoring and control, and maintenance for IBM's Corporate Education Network (CENET). CENET is an interactive educational network that provides instructional programs for engineering, finance, manufacturing, planning and information systems telecast to employees at major IBM locations.

"We're very pleased that IBM has chosen us to provide its distance learning network," said A.W. Perigard, Contel ASC president. "Our company has been in the business of providing video networks to major corporations since 1983. Over the years, we've developed the technical expertise that has

built our reputation as a quality provider of video networking. Distance learning is becoming a growth market in the video arena."

CENET consists of 24 IBM sites throughout the United States that serve as classrooms and three sites that serve the dual function of both a studio and classroom.

The three studio sites in Briarcliff Manor, N.Y., Thornwood, N.Y., and Dallas can operate with eight 1.544-Mbps (T-1) outbound channels to the remote classroom sites.

From the remote classroom sites, eight shared 56-kbps channels will carry return audio and data which allows the students to interact with the teaching site.

Contel ASC will provide small earth stations that use single-carrier per channel (SCPC) technology to transmit the video, audio and data signals. The entire network is fully redundant to ensure high reliability. In addition, the network has been designed to provide additional space segment and classrooms for additional growth.

Contel ASC will also provide network monitoring and control from its Network Operations Control Center (NOCC) in Atlanta. The NOCC will be able to monitor and control all active components of the VSAT network and diagnose any problems. As turnkey provider for this transmission system, Contel ASC will also provide preventive and ongoing maintenance.

Rockville, Md.-based Contel ASC provides data communications networks using satellite-based technology to domestic and international customers. Contel Corp. has more than $3 billion in annual revenues and sales.

CONTACT: Brian Farley of Contel, (404) 391-8217, or David Wonderling of Contel ASC, (301) 251-4460.

NEW YORK (MAY 29) PR NEWSWIRE - Vernitron Corporation announced today that Connecticut Superior Court Judge Nicholas A. Cioffi determined that Kollmorgen Corporation (NYSE: KOL) had violated his prior order for failing to submit to the special masters panel the issuance of preferred stock to the Tinicum group. The judge awarded attorneys' fees to Vernitron but did not grant Vernitron's request for recision of the preferred stock transaction.

Stephen W. Bershad, chairman of Vernitron, stated, "Clearly Kollmorgen deserved more than a slap on the wrist for a blatant disregard of a court order but sometimes justice works in strange ways. We look forward to the

outcome of this Thursday's vote which will be the real test of how shareholders react when management puts its own re- election ahead of shareholder rights."

CONTACT: Stanley J. Kay of Daniel H. Burch, 212-688-6840, both of Dewe Rogerson, for Vernitron

RICHMOND, VA (MAY 29) PR NEWSWIRE - Ryland Acceptance Corporation Four (RAC Four) recently priced $315,000,000 of collateralized mortgage bonds (Series 94). The issue, underwritten by Kidder, Peabody & Co. Incorporated, was collateralized by GNMA certificates. An election will be made to treat the collateral securing the bonds as a real estate mortgage investment conduit (REMIC) for federal income tax purposes.

The mortgage certificates will have a weighted average pass-through rate of approximately 10.00 percent and a weighted average remaining scheduled term to maturity of approximately 29 years.

Priced at a prepayment speed of 140 PSA, Series 94 (consisting of 13 classes) had the following characteristics:

CLASS	COUPON PCT.	AMOUNT (000s)	AVERAGE LIVES (YR)	STATED MATURITY
94-A	9.50	$45,395	2.5	5/22/10
94-B	9.50	70,000	3.4	6/22/13
94-C	9.50	21,000	5.6	6/22/13
94-D	9.50	37,642	8.0	7/22/15
94-E	9.85	12,000	11.5	11/22/17
94-F	9.40	42,000	11.5	11/22/17
94-G	9.50	7,434	1.6	6/22/93
94-H	9.50	6,159	4.0	6/22/95
94-I	9.50	22,495	7.7	6/22/00
94-J	9.50	20,843	11.7	9/22/03
94-K	929.890625	160	9.5	6/22/20
94-Z(A)	9.50	22,942	20.0	6/22/20
94-R	9.50	6,930	0.3	6/22/20

(A) Compound Interest Bonds The payment date for the bonds will be the twenty-second day of each month, beginning July 22, 1990. Interest will be paid or accrued 21 days in arrears on all classes.

It is anticipated that Series 94 will be rated AAA by Standard & Poor's Rating Group, and Aaa by Moody's Investors Services, Inc., and close on June 29, 1990. RAC Four expects to transfer the GNMA certificates and other assets collateralizing the Series 94 bonds to a separate

limited-purpose corporation or trust to further protect the ratings.

Ryland Acceptance Corporation Four is a limited-purpose finance subsidiary of Ryland Acceptance Corporation, which is an indirect, wholly owned subsidiary of The Ryland Group, Inc. (NYSE: RYL), one of the nation's largest homebuilders.

LANDOVER, MD (MAY 29) PR NEWSWIRE - Hechinger Company (NASDAQ-NMS: HECHA, HECHB), which operates a chain of specialty retail do-it-yourself home centers, today announced sales and earnings for its first quarter, which ended May 5, 1990.

Sales for the quarter were up 25 percent to $344.7 million from $274.9 million last year. Earnings, before the non-recurring cumulative effect of adoption of SFAS 96, Accounting for Income Taxes, increased 15 percent to $8.4 million, 23 cents per fully diluted share, from $7.3 million, 21 cents per fully diluted share, last year. Comparable store sales were up 8 percent during the quarter.

During the quarter, the company added one new unit, with the opening of a new Hechinger store in Bel Air, Md., north of Baltimore. The Company closed the quarter with a total of 108 stores, including 87 Hechinger stores, 15 Home Quarters Warehouse stores and six Triangle Building Centers.

In May, the company opened its 16th Home Quarters Warehouse store in Gastonia, N.C., near Charlotte. HQ is scheduled to enter the New England market this year with its first four Boston stores. The first of these expansive facilities is scheduled to open in the town of Norwood, a southern suburb of Boston, this summer. A new HQ Warehouse store is also under construction in Columbus, Ga., and Home Quarters plans to expand its presence in Alabama with the opening of two additional units in Birmingham and its first store in Montgomery. HQ has also announced plans to enter the Cincinnati, Ohio, Louisville, Ky., and Memphis, Tenn., markets.

The Company's Annual Stockholders' Meeting will be held at Martins Crosswinds in Greenbelt, Md., on June 28 at 10 a.m.

#90149p2732 05/29/1990 ~PR Newswire

PITTSBURGH (MAY 29) PR NEWSWIRE - A world record for current carried by a practical high-temperature superconductor device has been set by an electrical lead jointly developed by Westinghouse Science & Technology Center, Pittsburgh, and the U.S. Department of Energy's Argonne National Laboratory, near Chicago.

In tests at Westinghouse, the lead carried 2,000 amperes of current, twice as high as its 1,000-ampere design rating and nearly 10 times higher than currents previously reported for power devices using high-temperature superconductors. The lead also reduced boiloff of liquid helium, used to

cool practical superconducting devices, by up to 40 percent compared to conventional leads.

Superconductors are materials that have no resistance to direct-current electrical flow. High-temperature superconductors are recently discovered ceramics that become superconductors at temperatures above that of liquid nitrogen.

Conventional leads -- used to transmit electricity from room-temperature power supplies to superconducting devices operating at temperatures near absolute zero -- are made of metals, such as copper, along their entire length. Copper's resistance to electrical current flow produces heat, which it transmits to the liquid helium used to cool the superconductor, causing the liquid to boil off.

In many superconducting power devices a large fraction of the operating cost is for refrigeration to recondense the boiled-off helium. Where it is inconvenient or too expensive to recondense -- or replace -- lost helium, such as in superconducting sensors in outer space, helium boiloff could limit the device's useful life.

By using high-temperature superconducting ceramics in the low-temperature part of the lead, it may eventually be possible to reduce helium boiloff by 95 percent, to one-twentieth that of conventional leads. Operating in a temperature range where they are superconductors, the ceramics virtually eliminate resistive heating. Helium boiloff is further reduced because ceramics do not readily transmit heat to liquid helium.

The Westinghouse-Argonne lead is about 25 inches (64 centimeters) long and about three inches (7.4 centimeters) in diameter. It uses an array of 17 rectangular bars made from a composite of silver and the high-temperature superconductor, yttrium-barium-copper oxide.

#90149p2734 05/29/1990 ~PR Newswire

LAS COLINAS, TX (MAY 29) PR NEWSWIRE - M/A/R/C Inc. (NASDAQ: MARC) today announced that it intends to investigate and may challenge a "strategic alliance" formed between Information Resources, Inc. (NASDAQ: IRIC) and BASES Burke Institute, Inc. Recent announcements related to this alliance have led M/A/R/C's management to believe that Information Resources' proposed activities may be prohibited under an agreement entered into by M/A/R/C and Information Resources last year.

Information Resources recently announced plans to enter into a business

venture with BASES Burke to offer modeling and testing services for new products, product line extensions and product restages. However, in connection with M/A/R/C's June 1989 purchase of Information Resources' simulated test marketing businesses, known as the ASSESSOR and Custom Projects Groups, Information Resources agreed not to operate a survey-based new product test marketing business for a period of three years after the closing of the acquisition. This agreement was designed to protect M/A/R/C's investment in the ASSESSOR and Custom Projects Groups.

M/A/R/C's legal counsel has served written demand that Information Resources furnish a written statement describing the nature of its proposed relationship with BASES, and that Information Resources refrain from any action that would violate the 1989 agreement.

Cecil B. "Bud" Phillips, M/A/R/C's chairman and chief executive officer, said today, "If Information Resources intends to re-enter the lines of business that M/A/R/C recently purchased from that company, we will have to seek redress for related violations of Information Resources' obligations to M/A/R/C. M/A/R/C dealt with Information Resources in good faith, and we will expect good faith treatment in return."

M/A/R/C Inc., based in Las Colinas, is the largest custom marketing research company in the United States serving the private sector. Its services include custom marketing research, marketing research systems, simulated test marketing and database marketing.

SOUTH LAGUNA, CA (MAY 29) PR NEWSWIRE - Pacifica Publishing Corporation, the South Laguna publisher and trade show company, today announced that it has been acquired by Gralla Publications of New York with effect from May 15, 1990. Terms of the agreement have not been disclosed.

Pacifica publishes two trade publications and operates trade shows in conjunction with each magazine: Action Sports Retailer serves the active lifestyle market with emphasis on surfing, volleyball, boardsailing and skate products and apparel; Outdoor Retailer serves the camping, backpacking, climbing, fishing, hunting and Nordic skiing and related outdoor activities markets.

"We are very pleased to be associated with Pacifica's people and products" commented Gralla's president & CEO, Robert N. Boucher, Jr. "The growth of these publications and trade shows during the last ten years has been one of the great success stories in the publishing industry, and is a

commentary on the talent and vision of Pacifica's people. We're excited at the prospect of working closely together," Boucher stated. "The acquisition of Pacifica's excellent magazines and trade shows greatly enhances Gralla's already strong position in the retailing and sportswear markets."

Pacifica was founded in 1979 by partners Jeff Wetmore and Steve Lewis. Action Sports Retailer magazine was launched in 1980, growing over the years and giving rise to the Actions Sports Retailer Trade Expo, a major trade show for manufacturers and retailers in the active lifestyle marketplace. The Action Sports Retailer Trade Expo is now held three times per year in San Diego and Atlantic City, and has become a major industry event. Outdoor Retailer was established in 1981 and has also enjoyed excellent growth. The Outdoor Retailer Expo is held twice a year and has become the premier trade show event for manufacturers and retailers of specialty outdoor products.

With the acquisition of Pacifica, Gralla now publishes 21 business magazines serving retail, real estate, construction, travel, and vision care industries, including Impressions, the leading publication serving the imprinted sportswear market. The company also owns and operates 23 trade shows, including the Imprinted Sportswear shows and the Premium Incentive Show. Gralla is part of the magazines and exhibitions division of United Newspapers plc, the international publishing and information services company headquartered in London.

NEW YORK (MAY 29) PR NEWSWIRE - Kenneth Sitomer, president and chief executive officer of Russ Togs, Inc. (NYSE: RTS), announced today that the company has purchased all worldwide rights to the Villager apparel name. This new agreement supersedes one made by Russ Togs last November in which it acquired licensing rights for women's apparel. No purchase price was announced by the company.

Sitomer stated "We are delighted with this acquisition. It supports the confidence we have had in the Villager when we signed the exclusive licensing agreement last fall. We rightfully believed that with Russ Togs substantial financial resources and manufacturing and merchandising expertise, the Villager label could grow substantially.

"The initial response to our fall line, the first one we created for the label, far exceeded our expectations. Furthermore," Sitomer said "a

number of other manufacturers have approached us with an interest in licensing the Villager name for other products that would further enhance a consistent image of the sportswear. The positive retail response, coupled with the opportunity to license globally as well as in the United States and control the image and distribution, made the purchase an easy decision."

The Villager division, headed by Larry Meltzer, features comfortable fashion-directed American lifestyle dressing for the mass market. The company is headquartered at 1411 Broadway, New York.

RENO, NV (MAY 29) PR NEWSWIRE - The Mills-Jennings Company (NASDAQ: JKPT) said its delisting from NASDAQ and trading halt on the Philadelphia Stock Exchange was caused by additional delay in filing its 10-K for the year ended Nov. 30, 1989.

Since March 1, the company's common shares have been trading under a requested exception to the required filing. But at a hearing on May 24 NASDAQ ruled against continued trading until the 10-K is filed. The Philadelphia exchange then ordered a trading halt. The company said it is appealing NASDAQ's decision.

Company officials said Deloitte & Touche, its auditors, planned to complete the consolidated financial statements by June 15 and that the 10-K would be filed by June 22.

In a letter of May 21 to Mills-Jennings' management, Deloitte & Touche said the delay in audit work was due to the 1989 acquisition of Mast Keystone and the transfer of controlling interest of E & S to Cher Ami, a Mills-Jennings subsidiary.

ROCHDALE, MA (MAY 29) PR NEWSWIRE - In a major step toward reducing ozone depletion and global warming, The ROVAC Corporation -- which is headquartered in Rochdale -- today announced that it has entered into a joint venture to commence the immediate production and marketing of its ozone-protective, automotive air conditioning systems.

On May 15, 1990, ROVAC concluded negotiations which have established a 50/50 joint venture with Autocam Corporation, a major supplier to the automotive industry, with production facilities in the Grand Rapids, Mich. area.

Under the joint venture agreement, ROVAC and Autocam have organized a new corporation, Emerald Compressor Systems, Inc. This company will conduct the sale, marketing, distribution and packaging of automotive air-conditioning systems utilizing ROVAC's patented, ozone-protective compressor technology. Autocam will manufacture and supply ROVAC's compressors to the joint venture company and will also be responsible for funding the operations of Emerald.

According to Raymond E. Shea, Jr., vice president of ROVAC, the company will earn one half of the profits generated by the new joint venture.

These funds will be derived, chiefly, from the installation of original and aftermarket equipment in automobiles and light trucks throughout the United States, Canada and Mexico. In addition, ROVAC anticipates receiving $410,000 over the next two years under the agreed-upon arrangement for exclusively licensing its compressor technology to the joint venture company.

Due to the current limitations of mechanical compressors, chlorofluorocarbons (CFCs) have been universally used to date as the refrigerant in air conditioning systems. However, the technological breakthrough by ROVAC is the company's development of a patented compressor which can operate with ecologically safe refrigerants.

John C. Kennedy III, president of Autocam, said he anticipates that his company will invest approximately $5 million in the joint venture project. "This is a significant program for both companies," he explained. "We expect to start our sales activity in the automotive aftermarket almost immediately and hope to be successful in the first year. There is a 10-million vehicle market available for annual penetration, where we plan to sell 100,000 units in less than two year's time." "For us," he added, "this translates into approximately $60 million in gross sales and we hope to be looking at a reasonable profit margin to share with ROVAC."

#90149p2746 05/29/1990 ~PR Newswire

BOSTON (MAY 29) PR NEWSWIRE - Workingmens Corporation (NASDAQ: WCBK), the parent company of Workingmens Cooperative Bank, today announced results for the fourth quarter and fiscal year ended April 30, 1990.

The corporation reported losses of $1.9 million or $1.61 per share and $3.4 million or $2.79 per share for the quarter and year ended April 30, 1990, respectively. The comparable three and 12 month figures at April 30 1989 were losses of $976,000 or 77 cents per share and $940,000 or 74 cents per share.

The losses for the fourth quarter and year end are due principally to a major increase in reserves for loan losses by the corporation's subsidiary Workingmens Cooperative Bank. The increase in the provision for possible loan losses, and writedowns and losses on other real estate owned and acquisition, development and construction loans amounted to $2.4 million for the fourth quarter and $4.9 million for the year ended April 30, 1990, up from $3.0 million for the previous fiscal year. The bank's non-performing loans were $13.0 million at year end, and real estate owned totaled $9.1 million.

President and Chief Executive Officer, John E. McDonald, said the continued weakness in the local real estate market, combined with higher interest rates and slower economic activity, contributed to the level of non-performing loans.

Consolidated assets of Workingmens Corporation were $248.1 million on April 30, 1990, a decrease of 5.5 percent since the start of the fiscal year. Total deposits decreased 4.0 percent for the year to $214.1 million reflecting management's decision to curtail growth. Total stockholders' equity was $20.9 million at year end, representing 8.44 percent of total assets. The book value per share was $17.44.

Workingmens Corporation is the holding company for Workingmens Cooperative Bank, a Massachusetts chartered cooperative bank with five offices in Greater Boston. The bank's deposits are insured by the Federal Deposit Insurance Corporation (FDIC) and the Share Insurance Fund (SIF) of the Co-operative Central Bank.

Workingmens Corporation is traded in the NASDAQ system under the symbol "WCBK".

#90149p2748 05/29/1990 ~PR Newswire

WASHINGTON, NC (MAY 29) PR NEWSWIRE - Reginald M. Fountain, Jr., president and CEO of Fountain Powerboat Industries, Inc. (AMEX: FPI) reported that sales for the second quarter ended April 1, 1990, reached $7,242,468, an increase of 96 percent over second quarter March 31, 1989,

sales of $3,689,471. Net income for the current three month period was $269,122, or $.06 per share, up substantially from $11,000 or $.002 per share in the comparable quarter last year.

First half sales rose 31 percent to $10,033,118 from $7,648,179 for the first six months last year. The company incurred a loss for the six month period of $620,132 or $.14 per share versus a year earlier six month loss of $75,000 or $.02 per share.

In commenting on the results, Fountain said that traditionally, the first two quarters of our fiscal year have produced losses because it is the slow sales season, as one would expect in the fall and winter quarters. This year, because of the extremely soft marine market, Fountain Powerboats elected to pursue an aggressive advertising and marketing program. The extra cost incurred during this period is reflected in the results and will be continuing in future quarters. In addition, extra expenses for racing and new market introductions are included in expenses for the first six months. These expenses were incurred in order to prepare us to grow at a faster pace in the future.

Fountain further stated that the number of boats sold in the second quarter increased to 78 from 42 a year ago. For the first half, 113 boats were sold compared with 88 in the first six months of fiscal 1989. "Second quarter sales reflect the increased demand for our boats not only in the traditional markets of the Great Lakes and eastern seaboard, but increased sales to the international market and west coast of the United States.

Fountain Powerboat Industries, Inc., through its wholly owned subsidiary, Fountain Powerboats, Inc., designs, manufactures, and markets high-performance deep-water sport boats and sport fishing boats noted for style, performance and quality construction.

BRIDGEWATER, NJ (MAY 29) PR NEWSWIRE - National Starch and Chemical Company has completed the acquisition of the business, goodwill and assets of Electro-Materials Corporation of America (EMCA), a subsidiary of Rohm and Haas Company (NYSE: ROH), Philadelphia. EMCA, which supplies cermet thick film (CTF) pastes to the hybrid microcircuitry market, has modern state-of-the-art facilities in Montgomeryville, Pa. and Cambridge, England and had sales in 1989 in excess of $8 million. Terms were not disclosed.

National will combine the business, product lines, and technology of Remex Products, a CTF supplier which it purchased in 1986, with those of EMCA. EMCA-Remex Products, together with National's subsidiary Ablestik Laboratories will offer extensive thick film and specialty adhesive and coating product lines to the hybrid microcircuitry market.

This acquisition also provides National with a polymer thick film paste product line whose use is growing rapidly in the flexible and rigid printed circuit markets.

The entire family of electronic materials and adhesive products are marketed worldwide.

National Starch and Chemical Company, a Unilever Company headquartered in Bridgewater, N.J., is a worldwide manufacturer of adhesives, resins, specialty chemicals and specialty starches, with 1989 sales in excess of $1.5 billion.

NEW YORK (MAY 29) PR NEWSWIRE - Citibank Private Bank said today that Henry B.W. de Vismes has joined its investment division as head of international investments. The investment division is the asset management arm of Citibank Private Bank, the largest private bank in the United States.

De Vismes joins Citibank from London-based merchant bank Kleinwort Benson Group, where he was managing director of Kleinwort Benson International Investment and president, Kleinwort Benson Investment Strategies. De Vismes joined Kleinwort Benson in 1971 at which time he was given responsibility for the management of the Kleinwort Benson International Equity Fund, the second oldest international equity fund in the United States. He managed that fund for 19 years.

In this newly created position, de Vismes has specific responsibility for building an international equity management capability located in the United States to serve both domestic and offshore investors who want their portfolios managed here.

"The addition of Mr. de Vismes will significantly strengthen Citibank's investment organization and specifically our global investment capabilities," said Stewart B. Clifford, division executive of the investment division. "Mr. de Vismes has extensive international investment expertise and will be working as part of a team of experts to guide international investment activities for U.S. clients, working closely with the Private Bank's investment centers in London, Switzerland, Hong Kong, Singapore and Japan."

De Vismes will report to James R. Hocking who recently joined Citibank Private Bank as chief investment officer of its U.S. investment division.

Citibank, with worldwide assets of $233 billion, is the largest bank in the United States with 3,300 locations in 43 states and 90 countries. The investment division of the Private Bank provides both tailored portfolio management services and funds to individuals, including liquidity, fixed income, equity and balanced management, as well as trust and estate planning, custody, and international investor services.

PHOENIX, AZ (MAY 29) PR NEWSWIRE - Rudy R. Miller, chairman and chief executive officer of StatesWest Airlines Inc. (NASDAQ: SWAL), announced the airline entered into separate transactions valued at approximately $40 million involving the acquisition of ten planes, an ATC Flight Simulator, spare engines and parts with Beech Aircraft Corp. of Wichita, Kan.

Miller stated, "We are taking delivery, in July, of our seventh Beech 1900 pressurized prop-jet and have agreed to take delivery of two additional planes in 1990 and seven in 1991. StatesWest presently has six Beech 1900s in service. The aircraft has proven to be the best all around 19 passenger plane for the markets we now serve and for new markets we are presently evaluating."

StatesWest Airlines commenced flight operations Oct. 1, 1986 and on April 5, 1990, entered into a joint marketing service agreement with USAir (NYSE: U) to become effective July 15, 1990.

USAir is the dominant major carrier in California. As part of the agreement, StatesWest will operate under the name USAir Express and all of the company's flights will carry USAir's designator code in the airline reservation system.

The company operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County, San Diego, and Santa Barbara, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca and Laughlin, Nev./Bullhead City, Ariz. StatesWest operates 88 daily departures between these locations.

HAUPPAUGE, NY (MAY 29) PR NEWSWIRE - United-Guardian, Inc. (AMEX: UG) announced today that the U.S. Patent Office has granted it a patent for its Renacidin Solution, an effective solvent for many types of kidney stones.

Renacidin Solution already has Orphan Drug Status, which was granted to it by the U.S. Food and Drug Administration. United-Guardian is now awaiting

FDA approval for the marketing of this drug. The patent will extend United's exclusivity for approximately an additional ten years beyond the time period allotted by the Orphan Drug Status.

Since United estimates that sales of Renacidin Solution will reach approximately $5-6 million within one year after beginning marketing, it is expected that this extension, resulting from the issuance of the patent, could be worth an additional $50-60 million in revenues.

"Because of the potential importance of Renacidin Solution," said Dr. Alfred R. Globus, chairman and CEO of United-Guardian, "we are considering an arrangement with a major drug firm to assist us in attaining maximum market penetration."

"Renacidin Solution is not only effective in dissolving large kidney stones (called 'staghorns' because of their shape) made of struvite and apatite," he further explained, "but can keep the indwelling catheters of geriatric patients, paraplegics and quadriplegics open for long periods. This a particular boon to nursing homes and hospitals."

United-Guardian is a manufacturer of pharmaceuticals, health care products medical devices and cosmetic bases.

#90149p2767 05/29/1990 ~PR Newswire

BETHPAGE, NY (MAY 29) PR NEWSWIRE - Grumman Corporation (NYSE:GQ) has been awarded a $16.4 million contract by the U.S. Army Strategic Defense Command, Huntsville, Ala., for Phase I of the neutral particle beam space experiment program.

Under the twelve-month Phase I program, Grumman will conduct the preliminary design for a neutral particle beam accelerator space experiment. The program is the next evolutionary step in development of a space-based neutral particle beam for the Strategic Defense Initiative, following a series of earlier design studies and technology demonstrations The Grumman team includes McDonnell Douglas, TRW, SAIC, and the Los Alamos National Laboratory.

Thomas A. Guarino, president of Grumman Systems Group and acting president of Grumman Space Systems division, said, "We believe this award recognizes both our dedication to the overall neutral particle beam program and our significant investment in the development of particle beam accelerator technology.

"The neutral particle beam space experiment is also a natural extension of

our involvement in related projects, the ground test accelerator (GTA) at Los Alamos National Laboratory and the continuous wave deuterium demonstrator (CWDD)," Guarino added. The Army Strategic Defense Command supports these projects in addition to previous neutral particle beam development.

The neutral particle beam is a type of directed-energy weapon that is a key SDI candidate component. The neutral particle beam is a tightly focused, high-energy stream of electrically neutral atomic particles traveling near the speed of light. The beam is the heart of a weapons detector system that will attempt to discriminate between missile-launched warheads and decoys, enabling the defense to concentrate on destroying warheads. During battle, a neutral particle beam could also be used to destroy missile boosters and warheads by disabling their guidance systems or by detonating the high-explosive devices that actuate the warhead itself.

Although Grumman Corporation is best known as a leading maker of military aircraft and aerospace systems, other businesses include integrated information processing systems, emergency vehicles, and aluminum truck bodies. The company is headquartered at Bethpage, N.Y., and employs 28,000 worldwide. Sales were $3.56 billion in 1989.

NEW YORK (MAY 29) PR NEWSWIRE - To better serve its public finance clients in Florida, Kidder, Peabody & Co. Inc. has added an office in Miami, headed by Richard Montalbano, formerly managing director at Shearson Lehman Hutton Inc.'s Public Finance investment banking office in Miami.

Montalbano, a Kidder senior vice president, will complement client services being provided by Kidder, Peabody's Tampa office, headed by David Becker. John Rodstrom, a vice president with Kidder based in Florida for the past five years, also will be working out of the Miami office.

At Shearson, Montalbano was responsible for the structuring and marketing of tax-exempt financings in excess of $6 billion throughout the state of Florida. He served as senior banker for a number of refunding transactions convention centers, stadiums, arenas, electric, water and sewer facilities, hospitals, airports, parking projects, and housing revenue bonds in addition to tradition general obligation and special obligation bond issues.

Prior to joining Shearson, Montalbano was first vice president at Drexel

Burnham Lambert, responsible for all of its Florida public finance operations. He also served as finance director for Dade County, Fla., from 1977 to 1981, and as finance director for the city of St. Petersburg, Fla. from 1975-1977.

Kidder, Peabody has been manager or senior manager for a number of public finance projects in Florida including the Broward, Pinellas, and Hillsborough county and Tampa resource recovery plants, the Melbourne water and sewer improvement projects, Tampa water and sewer system projects, and numerous projects for the West Coast Regional Water Supply Authority.

Kidder is co-senior banker to the Florida State Housing Finance Authority and was recently appointed senior banker for a $60 million City of Homestead Electric Authority project.

"As one of the fastest growing - and most forward-looking - states in the country, Florida has placed priority attention on infrastructure development," noted Paul Stach, Kidder, Peabody managing director and head of the Municipal Finance Department.

"We're pleased to be a part of the state's development and are committing the resources necessary to enhance that focus as the needs increase. Dick Montalbano's experience and expertise certainly add to our ability to be responsive to the state's requirements."

#90149p2770 05/29/1990 ~PR Newswire
PHOENIX, AZ (MAY 29) PR NEWSWIRE - Zila, Inc. issued the following:

From annual sales of $70,000 in 1985, to million dollar quarters in 1990, Zilactin sales have rocketed nationwide, making the non-prescription mouth sore gel a fast rising contender in the over-the-counter canker sore/cold sore pain relief market. A new national survey underscores how fast Zilactin is overtaking its drug store competition.

American Druggist magazine reports in its April 1990 issue that in chain drug stores nationwide, 63.2 percent of consumers ask their pharmacist's advice when shopping for canker sore preparations.

8.9 percent of the time, says American Druggist, chain store pharmacists recommend Zilactin, which has been available nationally only three yeas and which has never been supported by the multi-million-dollar consumer ad campaigns that drive its competitors' sales.

Among chain store pharmacists, Zilactin out-scored such heavily promoted brands as American Home Products' Anbesol and Marion Laboratories' Gly-Oxide, and such long-time staples as Camphophenique and Herpecin L. Zilactin's high ranking on the American Druggist survey is also noteworthy because this is the product's first appearance on the list; Zilactin is so new that in prior years it didn't make the survey's four percent recommendation cut.

This year's magazine survey was based on responses from 402 chain and independent pharmacists, 27 percent of a nationally representative sample to whom questionnaires were mailed.

Pharmacists recommend Zilactin for two reasons: published clinical proof of its ability to kill the pain and speed the healing of canker sores, and strong consumer satisfaction.

Since 1988, three respected dental journals have published peer-reviewed articles validating Zilactin's unique properties. One article, by researchers at the University of Alabama School of Dentistry and Dental Oncology, found that Zilactin was more comfortable for the patient, easy to apply and relieved pain up to four times longer than the current best-selling product.

Owing to exceptionally strong product recommendations from dentists and pharmacists, Zilactin sales have soared from $70,000 in FY 1985 to $2.6 million in FY 1989, and $1.9 million in the first six months of FY 1990. This in the near total absence of consumer advertising.

Manufacturer Zila Pharmaceuticals, Inc. (NASDAQ: ZILA), of Phoenix, has steadily expanded its patent protection for the unique bioadhesive formula that is the basis for Zilactin and its newer sister products - ZilaBrace for inner mouth sores caused by braces and other orthodonture, ZilaDent for the painful sores related to dentures, and soon-to-be-introduced Zilactol, a new clear liquid formulation for the treatment of fever blisters (herpes simplex I) on the lips.

#90149p2772 05/29/1990 ~PR Newswire

LOS ANGELES (MAY 29) PR NEWSWIRE - The team that developed ARCO (NYSE: ARC) EC-1 Regular, the first gasoline reformulated to reduce emissions from older vehicles, has won ARCO's first Environmental Achievement Award, it was announced by President Robert E. Wycoff.

The award will be given annually to an individual or group within ARCO

whose innovative projects provide important environmental benefits while enhancing performance and efficiency.

"EC-1 has revolutionized gasoline blending and made ARCO a leader in the search for clean-burning fuels," said Wycoff in presenting the award to EC-1 team members Jack S. Segal, Linda Cohu, Eric G. Lingman and Larry A. Rapp of ARCO Products Company, the company's refining and marketing division. The team is based at APC's Engineering and Technology Center in Anaheim, Calif.

Since going on sale in Southern California last September, Wycoff noted, "EC-1 has made 'reformulated gasoline' a household word and changed the agenda of clean fuels legislation. It's hard to think of another product that has had such a profound national policy influence."

EC-1 Regular is an unleaded gasoline designed for pre-1975 cars and pre-1980 trucks without catalytic converters that otherwise run on leaded gasoline. Such vehicles make up 15 percent of the cars and trucks in Southern California but account for more than 30 percent of the area's vehicular pollution.

In developing EC-1, the ARCO Products team created a blend that is lower in sulfur, benzene, aromatics, and vapor pressure than conventional regular gasoline, resulting in significantly lower emissions of carbon monoxide and reactive chemical components that are precursors to smog. An octane enhancer, MTBE, is added so that EC-1 retains the same octane level as ARCO's regular leaded gasoline.

ARCO tests show that if all current users of leaded gasoline in Southern California switched to EC-1, about 350 tons of pollutants would be removed from the air each day.

The EC-1 team received a cash award of $25,000 to be used to enhance the winning project, provide seed money for additional projects, or support a worthy program of their choice outside the company.

CHICAGO (MAY 29) PR NEWSWIRE - The shares of Oce-van der Grinten NV (NASDAQ: OCENY) commenced trading yesterday on the stock exchanges of Zurich, Geneva and Bale. Oce's shares are already traded on the stock exchanges in Duesseldorf and Frankfurt/Main; in Paris (Marche hors cote); in the United States on the NASDAQ System; as well as on the company's home stock exchange, the Amsterdam Bourse.

Oce, international manufacturer of design engineering and office systems copying equipment, has its home base in Venlo, The Netherlands and North American headquarters in Chicago.

Given Switzerland's importance as an international financial center, the new listings are aimed at further expanding international trading of the company's shares, while lowering transaction costs for Swiss investors. Some 5 percent of Oce's outstanding shares are currently held by Swiss investors.

Oce is the parent company of an international group of companies renowned worldwide for advanced products and systems for the presentation of information on paper comprising: multi volume copiers and copying supplies for standard and network office applications; copying and plotter systems for design engineering offices; printing and publishing systems; graphic film and photo-sensitive materials.

Oce's products and systems are largely developed, produced and marketed within the group, which employs 11,000 people in 90 countries, and in some 20 of which it has its own operating companies.

LONG BEACH, CA (MAY 29) PR NEWSWIRE - The Earth Technology Corporation, (NASDAQ: ETCO), has expanded its services in the Western United States to include asbestos and air quality consulting.

Under the newly formed Asbestos and Air Quality Division, Western Region, the company provides a full-range of asbestos consulting services from initial survey and inspection through project specification and design and quality assurance air monitoring, to final clearance inspections and testing.

In addition, the company's in-house optical and electron miscroscopy laboratory provides both asbestos bulk analysis to confirm the presence, type and percentage of asbestos and air sample analysis to determine airborne asbestos contamination.

In cases of "sick building syndrome," the company's indoor air quality consulting services determine the causes of what can be numerous indoor environmental quality problems through on-site inspections and when necessary, testing programs and corrective actions are implemented.

Directing the operation of the Alternative Ways Division, Western Region, is Paul Cronin, regional manager. Cronin has over three years of experience in operations management and business development in the asbestos industry.

He formally served as business development manager for Hygienetics Inc., where he was responsible for sales and marketing of asbestos consulting services in California.

Robert Delbridge, Asbestos and Air Quality Division, Western Region, business development manager, is responsible for sales and marketing. Delbridge has three years of experience in operations management and business development in the California asbestos industry.

He has over 12 years of experience in sales, marketing and product and business management. Before joining the company, he served as the manager of asbestos services for Dames & Moore.

The Asbestos and Air Quality Division provides asbestos and air quality consulting services for commercial, industrial and retail property owners and managers nationwide.

The Earth Technology Corporation is a 500-person, national environmental consulting firm specializing in the analysis of complex environmental and engineering problems for government and private industry.

WASHINGTON (MAY 29) PR NEWSWIRE - Arianespace announced today that it has signed a contract with the French Space Agency, CNES (Centre National D'Etudes Spatiales) to launch the Helios military observation satellite.

Helios is being jointly developed by France, Italy and Spain under the direction of the General Directorate for Armament, DGA (Delegation Generale pour l'Armement).

Helios will be launched into sun-synchronous orbit by an Ariane 40 vehicle on a dedicated mission. Scheduled for the end of 1993, the launch will take place at the Guiana Space Center in Kourou, French Guiana.

CNES is responsible for the overall Helios system architecture and the space segment of this program.

Matra Espace is the industrial prime contractor for the satellite, which comprises a dedicated military payload and the multi-mission platform developed within the framework of the SPOT and Helios programs. Mass at lift-off will be approximately 2,500 kg (5,500 lbs).

Helios is a tripartite program, in which Italy has a 14 percent share and Spain seven percent. Each country will install its own receiving station and image processing facilities.

With this contract, the 10th signed since the beginning of the year, Arianespace's order book now stands at 39 satellite launch contracts worth some 16.6 billion French Francs (or U.S. $2.8 billion). This backlog represents a four-year workload.

Arianespace is an industrial and commercial company, a world leader in the provision of commercial space transportation services. Arianespace also markets and sells Ariane launch services and handles the launches that take place from the Guiana Space Center in French Guiana. Arianespace Inc., a wholly-owned subsidiary of Arianespace, is responsible for marketing launch services in the United States; also a liaison office in Tokyo assures an Arianespace presence in Japan and in the Pacific region.

NEW YORK (MAY 29) PR NEWSWIRE - Already the major service-station operator on many of the nation's busiest expressways, Mobil Corporation announced today that it was awarded a contract to operate 10 units on the Massachusetts Turnpike.

"We are extremely pleased that the Massachusetts Turnpike Authority has chosen Mobil to operate these facilities," said Robert J. McCool, Mobil's vice president for U.S. marketing. "This is a vote of confidence in Mobil's ability to deliver quality services and products to the motoring public."

Mobil also operates stations on Connecticut's Wilbur Cross, Merritt and I-395 parkways as well as the Connecticut Turnpike, the New Jersey Garden State Parkway and the Illinois Tollway system. Mobil is also heavily represented on expressways in Florida, New York, and Maine.

In addition to improvements in the overall appearances of the Massachusetts Turnpike stations, Mobil will upgrade the facilities to meet state environmental regulations and Mobil's own environmental standards. Mobil has committed to equip all of the facilities with Stage II vapor recovery systems and to replace the existing steel product tanks with new fiberglass tanks.

Mobil assumed operation of these stations May 18, and continues, for a period, to accept credit cards of those companies being replaced.

NEW YORK (MAY 29) PR NEWSWIRE - Ogden Corporation (NYSE: OG) announced today the ERC Field Services Corporation, a Fairfax, Va., based business unit of Ogden's subsidiary, ERC Government Systems Co., Inc., was awarded a 4-year, $58.3 million contract from the U.S. General Services Administration to provide Information Technology (IT) ADP Technical Support services for software definition and design for its National Capital Zone.

Under this contract, offices of federal agencies located within the District of Columbia and approximately ten adjacent counties and cities in Maryland and Virginia will receive technical support services for software definition and design for new ADP systems. The region houses many of the largest information systems used by the federal government.

ERC's Systems Engineering staff will support software lifecycle initiation and development phases for client agencies, including feasibility studies, cost-benefit analyses, and other types of evaluations; identifying functional and data requirements; and developing systems/subsystem, program, and data base specifications. ERC plans to manage the contract form its Fairfax headquarters and expects to expand its information technology staff significantly. Historically, this is the largest single contract won by the company and further enhances ERC's position as a provider of advanced technology solutions to the federal government.

ERC Government Systems, also headquartered in Fairfax, is a $90 million technology services firm that serves government and industry in the defense and space technologies, software and systems engineering, and engineering and support services markets, worldwide. It is evolving into a leading supplier of services for the design, development, and implementation of advanced, automated information systems.

CHICAGO (MAY 29) PR NEWSWIRE - British Airways (NYSE: BAB) and United Airlines today announced an exclusive promotion offering roundtrip Concorde travel to London this summer at the first class fare for passengers connecting at New York and Washington, from selected United gateways.

This unique offer, subject to government approval, is the latest benefit of the two airlines' marketing agreement, which offers fully automated connections from any British Airways gateway to any United Airlines or United Express gateway, worldwide, in either direction.

Passengers may travel to London on British Airways Concorde at the regular First Class fare this summer when they purchase a roundtrip ticket, and complete the domestic portion of their travel in First Class on United Airlines, from one of the following gateway cities: Atlanta, Chicago, Dallas/Ft. Worth, Detroit, Denver, Los Angeles, Orlando, Philadelphia, Pittsburgh (via United Express), San Diego, San Francisco, Seattle and Tampa.

The offer is valid from June 1 to Aug. 31, with eastbound stopovers only, in Washington or New York.

"We are happy to provide our valued first class passengers the opportunity to fly British Airways' supersonic Concorde to London," said John C. Pope, United Airlines executive vice president-marketing and planning. "Like all of the joint products we have put in place with British Airways, this represents true value added for our customers."

"This new initiative with our partners at United is another example of our highly successful marketing merger, giving British Airways and United customers the best of both worlds," said Michael Batt, British Airways senior vice president, marketing, North America.

The carriers report their global marketing agreement, now entering its third year, has boosted traffic considerably. Revenues between the two carriers have increased significantly on an annual basis.

Further information on this offer, and on British Airways' or United Airlines' schedules and fares, may be obtained by contacting travel agents or by calling the airlines direct.

NEW YORK (MAY 29) PR NEWSWIRE - Damon Group Inc. (NASDAQ: DMNG), formerly American Magnetics Corporation (NASDAQ: DMNG), announced today the results of its second quarter, ended March 31, 1990, which incorporates the second quarter ended Feb. 28, 1990, of its Damon Corporation unit.

For the three and six months ended March 31, 1990, total revenues were $51.7 and $101.9 million, respectively, as compared to less than $1 million in the same periods in 1989. Operating profits for the three and six months of fiscal 1990 were $4.1 and $9.2 million, respectively, compared to operating losses of less than $1 million during the prior-year periods. For the three and six months ended March 31, 1990, Damon

Group reported a net loss of $1,886,000, or $.38 per share, and $2,701,000 or $.54 per share, respectively, compared to losses of $371,000, or $.08 per share, and $531,000, or $.11 per share, respectively, in the year-ago periods. The net loss for 1990's second quarter and year to date includes substantial amortization of goodwill associated with the acquisition of Damon Corporation.

As a result of the acquisition of Damon Corporation on May 30, 1989, and the classification of the electronic products operation of Damon Group as a discontinued operation, Damon Group's real estate operations are the only business segment included in the consolidated operations of Damon Group for the three and six months ended April 1, 1989. Robert L. Rosen, chairman of the board and chief executive officer of Damon Group, noted that fiscal 1990's increased sales and operating profit were generated by Damon Corporation's medical service business which has become the principal business segment of Damon Group.

Rosen also noted that, as previously reported, Damon Group has announced the signing of a contract to sell its electronic products operations for $12 million, consisting of $8 million in cash and a $4 million subordinated note. The sale is expected to be completed by June 15, 1990, and is not subject to financing. Additionally, during April 1990, the name of the parent company was changed from American Magnetics Corporation to Damon Group Inc.

BOISE, ID (MAY 29) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) announced today that it has signed a letter of intent to acquire Centennial Engineering Inc., a Colorado engineering firm. Centennial, headquartered in Arvada, Colo., is a major regional transportation engineering and construction management firm with offices in Oakland and Irvine, Calif., as well as Salt Lake City, Utah, and Colorado Springs, Colo.

Centennial provides services for highway, airport, rail and commercial real estate projects.

"Centennial is a successful, well-established firm with an excellent reputation and a strong presence in the prospering California transportation market," said William M. Agee, chairman and chief executive officer of MK.

"This acquisition sharpens our focus and expands our operations in markets that are important to MK over the long term. The transaction is a good fit for both companies. We are looking forward to Centennial being a part of MK," said Agee.

Morrison Knudsen Corp., headquartered in Boise, is an engineering, design, construction, rail systems and mining company with a primary commitment to environmental restoration and hazardous waste activities.

HOUSTON (MAY 29) PR NEWSWIRE - Republic Waste Industries Inc. (NASDAQ: RWIN) today announced that it has entered into a letter agreement to acquire certain assets of Boyas Excavating Inc. The assets to be acquired include those used in the operation of the company's excavation, demolition and materials handling business.

Boyas is headquartered in Cleveland and has been in business since 1947. For the year ended December 1989, the company had revenues of $29,284,499, operating income of $3,903,621 and income prior to bonus, profit sharing and taxes of $3,316,474. Net income for the year was $1,515,288.

"We are pleased to have Pete Boyas and his family and employees as part of the Republic team," commented James D. Lee, president of Republic. "Boyas' experience in landfill construction, demolition and materials handling is a significant addition to our waste management services."

Completion of the transaction is subject to the execution of a definitive agreement, completion of due diligence and the approval of the board of directors of Republic.

Republic Waste Industries Inc. is a waste management company specializing in environmental engineering and the processing, disposal and collection of solid waste.

PHOENIX, AZ (MAY 29) PR NEWSWIRE - Rudy R. Miller, chairman and chief executive officer of StatesWest Airlines (NASDAQ: SWAL), announced the airline entered into transactions valued at approximately $90 million involving the acquisition of eight planes, spare engines, and parts with Boeing Canada Ltd. of Downsview, Ontario.

Miller stated, "StatesWest has placed an order for delivery of four Boeing Dash 8-100 regional prop-jets and acquired options for an additional four aircraft. The airline anticipates the first four planes to be delivered over the next nine months."

W. James Lane, president of the airline stated, "The pressurized 37 passenger Dash 8-100 is an advanced regional airliner which offers 6-foot-4 1/2-inch headroom, lavatory facilities, over-head storage bins and comfortable seating comparable to the Boeing 737 jets."

Lane continued, "We are excited about adding larger aircraft to complement our growing fleet. StatesWest passengers will enjoy in-flight service and amenities found on most of today's commercial jets."

Miller concluded, "The airline will have one of the newest and most technologically-advanced aircraft fleet in the United States with approximately 24 planes in service by the end of 1991. Our corporate goal is to become one of the largest regional carriers in the Western United States in the 1990s. We project hiring between 1,000-1,200 new employees over the next 36-48 months and we will have a major economic impact on the State of Arizona."

StatesWest Airlines commenced flight operations Oct. 1, 1986 and on April 5, 1990, entered into a joint marketing service agreement with USAir (NYSE: U) to become effective July 15, 1990. USAir is the dominant major carrier in California. As part of the agreement, StatesWest will operate under the name USAir Express and all of the company's flights will carry USAir's designator code in the airline reservation systems.

The company operates one of the youngest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County, San Diego and Santa Barbara, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca and Laughlin, Nev./Bullhead City, Ariz. StatesWest operates 88 daily departures between these locations.

ANCHORAGE, AK (MAY 29) PR NEWSWIRE - Martech USA, Inc. (NASDAQ: MUSA) today announced that it will be signing a letter of intent with Hungary's Ministry of Environmental Protection to provide hazardous waste clean-up services at some 60 abandoned military bases in Hungary. The formal announcement will be made jointly by Keresztes K. Sandor, Minister of Environmental Protection of the Republic of Hungary and Ben. C. Tisdale, chairman of the board of Martech USA, Inc. at a signing ceremony tomorrow at the Hungarian Parliament Building at 12:30 p.m., Hungarian time. Terms of the proposed agreement will not be disclosed.

According to Tisdale, Martech will serve as prime contractor to the government of Hungary, placing a project manager in Budapest and providing technical expertise and supervision to Hungarian subcontractors. The company will train and supervise personnel provided by a Hungarian subcontractor. Remediation is expected to be initiated by the end of June.

Tisdale noted that Martech will provide its patented soil washing machine to clean up various contaminated soil sites. The machines provided for the Hungarian projects will be built in either Hungary or Czechoslovakia.

Martech USA provides a comprehensive range of environmental remediation services as well as specialized marine and marine construction services.

NOTE: The signing ceremony will be held on Wednesday, May 30, 12:30 p.m. (Hungarian time) at the Hungarian Parliament Building in Budapest. Present will be Keresztes K. Sandor, Minister of Environmental Protection of the Republic of Hungary. Media interested in covering this ceremony are requested to call Doug Sherk, Morgen-Walke, 415-243-8603 or Paul Steidler, Morgen-Walke, 212-986-5900.

BALTIMORE (MAY 29) PR NEWSWIRE - Farboil Co. today announced the acquisition of the Passive Electronic Encapsulants business from Plaskon Electronic Materials Inc. and the formation of a new Electronic Encapsulants Division at the company.

Terms of the acquisition were not disclosed. Plaskon Electronic Materials is a subsidiary of Rohm and Haas Co. (NYSE: ROH).

As a result of the acquisition, Farboil Co. obtains Plaskon's "passive" product lines of powder coatings and molding compounds for use in electronic devices including capacitors, resistors, coils, and other components. Farboil also acquires the powder coating and molding compound lines used to produce these products. This production equipment will be moved from Plaskon's facility in Toledo, Ohio, to a dedicated building at Farboil's facilities in Baltimore County, Md.

Farboil Co. President Harry Wechsler said the new division would be headed by Milton Gottschalk, currently Plaskon's business manager for the passive product line. The new division's technical director is Robert K. Rosler, formerly vice president of quality assurance.

Farboil Co. is a leading manufacturer of powder coatings and other chemical products with a 50-year history in the coatings industry. It operates on a 21-acre site in Baltimore.

#90149p2827 05/29/1990 ~PR Newswire

LOS ANGELES (MAY 29) PR NEWSWIRE - First Interstate Bank of California has announced a new Drive for Cleaner Air auto loan program beginning June 1 to run in tandem with Unocal's highly publicized SCRAP project. The two programs are designed to help reduce air pollution in the region by lowering the number of cars not equipped with smog-control devices.

Richard J. Stegemeier, chairman, president and chief executive officer of Unocal Corp. said, "We welcome First Interstate's participation in this

important effort. Their special automobile loans should be an additional incentive to those who wish to join our SCRAP project and replace their vehicles with newer models."

Unocal will pay $700 for seven thousand 1970 model year or older cars and pickup trucks (subject to certain limitations and qualifications), which then will be scrapped and recycled. On average, these vehicles emit 15 to 30 times more pollutants than newer automobiles.

First Interstate Bank will arrange special financing on select 1982 or later model used cars and pickup trucks costing up to $7,000. The program includes lower monthly payments and lower out-of-pocket costs.

To qualify for the bank's program, residents of the greater Los Angeles basin must present documentation from Unocal to First Interstate branches showing they have scrapped their old cars. They are required to place a $700 payment or 10 percent of the purchase price (whichever is greater) as a down payment, and must meet standard loan approval and employment/income verification requirements and pay appropriate tax and license fees.

Terms for the Drive for Cleaner Air program include providing loans for up to five years for the purchase of 1986 and later vehicles; providing loans for up to four years for 1982-85 vintage autos; discounting the auto loan documentation fee from $50 to $25; reducing used car loans by 0.5 percent from the bank's current prevailing rates; and allowing Drive for Cleaner Air loan customers to take advantage of the bank's standard 0.5 percent reduction for automatic payments. The loan program will end on Oct. 15, 1990.

"We're happy to support Unocal's efforts to encourage people to retire their older smog-producing vehicles and replace them with newer models with emission-control systems," stated William E. B. Siart, chairman, president and chief executive officer, First Interstate Bank of California.

First Interstate Bank of California is the principal subsidiary of First Interstate Bancorp (NYSE: I), the nation's largest retail and business banking organization with 27 wholly owned banks in 14 states and nearly 1,200 offices. First Interstate Bank of California serves customers statewide through 332 offices.

DOMINGUEZ, CA (MAY 29) PR NEWSWIRE - Pic 'N' Save Corporation (NASDAQ: PICN) said today that it offered to either adjourn its annual meeting until Aug. 15, or call a special shareholders' meeting for Aug. 15, if

Girard would suspend its solicitation efforts until after July 15, the deadline for bids, so that Pic 'N' Save's management and board could concentrate all of their efforts on the sale. Girard rejected the offer.

"We feel it is in all of the shareholders' interests, including Girard's, for the board to be able to concentrate its full energies on the sale of this company. We have only asked Girard to wait until after the bidding process is complete, so that the auction is not disrupted," Pic 'N' Save said.

"By July 15, shareholders will have a chance to see how the auction was conducted, whether Girard bid and what their bid was. We think it is important for shareholders to base their votes on full information," the company said.

Pic 'N' Save currently operates a chain of 190 retail stores in the Western and Southern United States and the New York Metropolitan area. These stores specialize in new, close-out, variety general merchandise which is sold at substantial reductions from original retail prices.

#90149p2830 05/29/1990 ~PR Newswire

SUNDSVALL, SWEDEN (MAY 29) PR NEWSWIRE - SCA Group (NASDAQ: SCAPY) of Sweden today reported consolidated earnings after financial items for the first four months of this year of 957 million Swedish kronor (SEK) compared to the SEK 1,046 million earned during the same period of 1989.

A number of publicly-listed Swedish companies report financial results every four months rather than quarterly, as is the practice in the United States. SCA's shares are traded on NASDAQ in the form of American Depository Receipts (ADRs) One ADR represents one SCA share.

Fully-diluted earnings per share before extraordinary items amounted to SEK 3.39 after a theoretical tax charge compared to SEK 3.43 in the year-earlier period. Profits from forestry and energy operations contributed earnings per share of SEK 1.23 compared to SEK 1.06 in the first four months of 1989.

The financial results were released today during the SCA Group's annual meeting in Gothenburg, Sweden.

The group's consolidated net sales increased by seven percent during the January 1 - April 30 period to SEK 8,659 million from SEK 8,062 million in the year-ago period.

Operating profit, including shares of earnings at associated companies, amounted to SEK 1,084 compared to SEK 1,090 million last year.

"Earnings for the first four months fell by nine percent compared to the same period in 1989, which was a very strong period for SCA," said Sverker Martin-Lof, president and chief executive officer of the SCA Group. "Meanwhile, earnings for the first four months of 1990 are six percent above the average for all of 1989 and seven percent above the final four months of 1989. Still, we maintain our forecast that for 1990 as a whole, earnings will be about 10 percent lower than in 1989."

Carl-Erik Feinsilber, president and chief executive officer of AB Industrivarden, was elected to SCA's board of directors today at the company's annual meeting of shareholders in Gothenburg. The other board members and their deputies were all re-elected.

Feinsilber, 59, is also a board member of the following Swedish companies: AGA, Bahco, Ericsson and Handelsbanken.

Also at the annual meeting, SCA shareholders approved the proposed annual dividend of SEK 2.90.

CLEARWATER, FL (MAY 29) PR NEWSWIRE - Fortune Financial Group, Inc. (NASDAQ: FORF) has elected John R. Torell III, a New York banker, to its board of directors and to the board of Fortune Savings Bank, its principal subsidiary.

He succeeds Dan Carlisle, who retired after 16 years as a Fortune director. Carlisle, 66, is president of Clearwater's Carlisle Motors, Inc., a Lincoln-Mercury dealership. Torell, 50, is an associate with Private Capital Partners, Inc., a merchant banking company. Prior to joining that firm last October, he was chairman, president and chief executive officer of CalFed, Inc., and its major subsidiary, California Federal Bank.

Torell also is a former president of Manufacturers Hanover Corp. and Manufacturers Hanover Trust Co. He spent 27 years with that bank and rose through the ranks after starting as a management trainee in 1961.

He is a 1961 graduate of Princeton University. Torell is also a director of American Home Products and a member of the advisory council of Columbia

University's School of Business. He and his wife Anne have three children.

"We welcome John Torell's years of banking industry experience and financial expertise; I'm sure he will make a valuable addition to the board," said John A. Moran, Fortune Financial's chairman and chief executive officer.

Moran also praised Carlisle's contributions as a director and thanked him for his service to the company, which included chairing the board's audit committee and serving on the executive compensation committee. "Fortune is fortunate to have had the benefit of Dan's wisdom and foresight for so many years," Moran said.

Fortune Financial Group's common stock is traded on the NASDAQ National Market System under the symbol "FORF."

OCALA, FL (MAY 29) PR NEWSWIRE - Microdyne Corporation (NASDAQ-NMS: MCDY) today announced increased sales and earnings for its second quarter ended April 29, 1990. Sales were $6,552,000 -- a 28 percent increase over the prior year's second-quarter sales of $5,095,000. Operating income was $244,000 in the current quarter compared to $50,000 for the same quarter last year. Net income was $326,000 ($0.08 per share) -- a 72 percent increase over the prior year's $189,000 ($0.05 per share).

For the first six months of the fiscal year, Microdyne's net income was $167,000, or $.04 per share, on revenue of $11,080,000, vs. net income of

$240,000, or $.06 per share, on revenue of $9,502,000 for the same period a year earlier. Contract delays experienced in the first quarter had a positive impact on second-quarter results but adversely impacted on six-month results.

Kenneth G. Harple, president and chief executive officer, commented, "The significant improvement in second-quarter income and net income is a direct result of improved manufacturing efficiencies through the continuing implementation of MRP II during this quarter. Microdyne will receive Class A rating in MRP II on June 15, 1990. Other contributing factors include expanded efforts in marketing and sales and shipments of recently introduced products."

During the quarter, on April 2, 1990, the company completed its acquisition of Acurex Corporation's telemetry business unit, which now operates as Wireless Data Corporation, a wholly owned Microdyne subsidiary.

Also during the quarter, the company's new PC technologies division completed major product introductions. These products included pcX25, a terminal emulation software package, and Vmos/3 and Vmos/MU, multi-user and multi-tasking software packages. Microdyne also secured technology and licensing agreements with Vidtech, a supplier of products for the desktop video and multi-media workstation markets.

Microdyne Corporation, based in Ocala, is a diversified engineering and manufacturing company involved in aerospace telemetry receivers, satellite communications, systems design and integration, and products for the PC workstation market.

HOUSTON (MAY 29) PR NEWSWIRE - Reliability Inc. (NASDAQ: REAL) today stated that it is not aware of any information that would cause the recent unusually high volumes of trading activity and fluctuations in its stock price. As previously announced, results of operations for the second quarter of 1990 are expected to reflect a reduction in revenues, compared to the first quarter of 1990. Although the company will show an operating loss for the second quarter, the company's financial and cash position remains strong, and unused lines of credit are available. The semiconductor industry's book-to-bill ratio has remained strong during the past several months. New orders received by Reliability have exceeded shipments during the second quarter of 1990 and indications are that order activity may increase further during the remainder of 1990.

Reliability Inc. is based in Houston with operating facilities in Durham, N.C.; Singapore; Slough, England; Tokyo; San Jose, Costa Rica; and Nenagh, Republic of Ireland. The company maintains technology centers in Sunnyvale, Calif., and Wakefield, Mass.

Reliability and its subsidiaries manufacture burn-in and test equipment, loading and unloading equipment, and other peripherals for sale to manufacurers and volume users of integrated circuits. The company also manufactures a line of power sources, including DC-to-DC power converters, and provides conditioning and testing services for integrated circuits in Singapore and Durham. After-sales installation and field service of equipment is available to customers worldwide.

NEW YORK (MAY 29) PR NEWSWIRE - Unocal International Corporation, a wholly owned subsidiary of Unocal Corporation, (NYSE: UCL) said today that it has completed the sale of its oil and gas subsidiary, Unocal Norge A/S, to Total Marine Norsk A/S, for $322 million (U.S.).

The sale has been approved by the Norwegian Ministry of Finance and the Ministry of Petroleum and Energy.

Total Marine Norsk A/S is a subsidiary of Total Compagnie Francaise des Petroles, headquartered in Paris, France.

The principal asset of Unocal Norge A/S is an 18 percent interest in the Veslefrikk field. Unocal Norge also has interests ranging from 10 to 25 percent in three other Norwegian petroleum production licenses.

"The sale of our Norwegian subsidiary is part of Unocal's effort to redeploy assets to areas offering our company greater opportunities for long-term growth," said Unocal Chairman, President and Chief Executive Officer Richard J. Stegemeier. The company is continuing its exploration and production efforts in both the U.K. and Dutch sectors of the North Sea.

Unocal's aftertax net cash flow from the sale is estimated at $325 million (U.S.). The gross proceeds from the transaction, including reimbursement of costs, is $341 million (U.S.). The company expects to record an aftertax gain of approximately $130 million (U.S.) from the sale.

Unocal Corporation is a fully integrated, high technology earth resources company whose worldwide operations comprise all aspects of energy production. The company also manufactures and markets a wide range of

petroleum products, chemicals, fertilizers and specialty metals.

SAN FRANCISCO (MAY 29) PR NEWSWIRE - Chevron International Oil Co., a wholly-owned subsidiary of Chevron Corporation (NYSE: CHV), has reorganized to improve its ability to capitalize on business opportunities foreseen in Europe and the Middle East.

Effective June 1, Mark Elliott is appointed to the new position of vice president, Europe/Middle East, based in London. He will become Chevron International's senior executive in the region, coordinating all of the Corporation's new business strategies in the area as well as Chevron International's ongoing businesses in Europe, the Middle East and West Africa.

Chevron International conducts international cargo trading, markets aviation fuels outside the United States, markets marine fuels, lubricants and aviation fluids worldwide, and markets liquified natural gas produced in Australia.

Chevron Corporation's European businesses include oil and gas production, refining, fuels marketing, chemicals, shipping, trading and technology licensing. On Jan. 1, Chevron set up Regional Strategy Teams for three regions, to ensure that Chevron businesses work more closely to identify and pursue business opportunities. Elliott will be regional coordinator for Europe/Middle East.

In addition, Herb Long is appointed to Chevron International's new position of general manager, planning and development, based in San Francisco. His group will include a new strategic planning function for Chevron International businesses as well as support for Chevron businesses in Europe/Middle East and Asia/Pacific.

The planning and development group also will absorb many of the duties of the Foreign Operations Staff and the Logistics and Trading Staff, which formerly were part of the corporation's headquarters complement.

SAN BRUNO, CA (MAY 29) PR NEWSWIRE - The Board of Directors of North Lily Mining Co. (NASDAQ: NLMC) today announced the results of the company's first quarter of 1990.

For the three months ended Mar. 31, 1990, the company sold 14,180 equivalent ounces of gold at average price of $400 per ounce as compared to the sale of 14,509 ounces sold in 1989 sold at an average price of $419.

As a result of the lower gold prices and lower production, sales revenue decreased from $6,097,956 in 1989 to $5,677,951 in 1990.

Costs of sales decreased from $2,638,959 ($182 per ounce) in 1989 to $2,468,809 ($175 per ounce) in 1990.

Depreciation and amortization increased from $1,757,728 ($121 per ounce) in 1989 to $2,850,536 ($201 per ounce).

Primarily as a result of the additional depreciation and amortization expenses, the company reported a net loss of $1,255,687 (6 cents per share) for the first quarter of 1990, as compared to net income of $41,197 for the three months ended Mar. 31, 1989.

Working capital increased by $3,827,785 to $8,115,294 primarily as a result of the sale of the Fork Lake and Transom Lake properties which were sold for proceeds of approximately $3 million.

Development of the decline at the Jolu Mine has now advanced to the 395 meter level. A deep drilling program is now being conducted to check for extension of the ore zone below this level. Further advance of the decline will be made pending the result of the deep drilling program.

North Lily Mining Co. is a minerals development company with operations in the United States, Canada and Chile. North Lily is listed on NASDAQ under the symbol NLMC.

PARIS (MAY 29) PR NEWSWIRE - Le Cordon Bleu, the renowned cuisine and pastry school in Paris has just completed the acquisition of the Cordon Bleu Cookery School, London. The acquisition is a key move in Le Cordon Bleu's strategy to protect its trademark and brand name, and to expand internationally. The purchase was announced by Andre J. Cointreau, president and owner of the prestigious Paris school.

"Le Cordon Bleu has established a long tradition of excellence in culinary

training, and this marriage allows us to use the trademark which reflects that tradition worldwide," comment Cointreau. "With the London acquisition, our group can defend and protect that trademark in the U.K. and Commonwealth countries as well as worldwide because of the rights we already hold in Paris," he continues. "Because of the success of the Paris school and our high enrollment there, the London school also allows us to offer a Cordon Bleu product outside of France, opening up many more opportunities for interested students. We also look forward to instituting exchange programs between the two schools."

The Cordon Bleu Cookery School in London was founded by Rosemary Hume in 1933, based on the classical cuisine methods she learned at Le Cordon Bleu previously unaffiliated with the London school. Plans for the London school include renovation of classrooms, installation of new equipment, and updating of the program while respecting the spirit of the school. "Our goal is for the Cordon Bleu name to reflect a consistent, exclusive standard of reference worldwide," adds Cointreau. Currently, Cointreau is planning an "Open House" at the London school in October, when he will bring his entire team of award-winning chefs from Paris for a day of cooking demonstrations.

The purchase of the London school continues the international expansion program launched by Cointreau when he acquired Le Cordon Bleu, Paris from its longtime owner, Madame Brassart, in 1984. Cointreau is a direct descendant of the famous founders of the Cointreau linqueur producers, and since 1979, he has been managing director of the Groupe Heritiers Renaud Cointreau. Since purchasing Le Cordon Bleu, the Paris school has more than tripled in size and enrollment. It has a team of seven master chefs who teach the elements of French haute cuisine to both amateurs and professionals. The school's new, state-of-the-art premises in the heart of Paris were opened in 1988 by the French Minister of Economy and Finance.

Le Cordon Bleu, founded in Paris in 1895, is the oldest private academy for French classical cuisine. Today, it continues to teach the traditions of French cooking to students from more than 50 countries.

HASTINGS, MN (MAY 29) PR NEWSWIRE - Micro Display Systems Inc. today announced results for its third quarter ending March 31, 1990.

The company had net sales for the quarter of $742,765 compared with sales of $413,048 for the same period a year ago. The net loss was $393,746 or $.03 per common share versus a loss of $955,376 or $.14 per common share

for the third quarter last year.

Jerome B. Crary, chairman and chief executive officer, said, "We are pleased with the company's continued progress towards profitability. While we had planned to achieve that goal by the end of the third quarter, the required capital infusions to obtain product to fill existing orders was not available until recently."

Micro Display Systems Inc. designs, produces and markets a line of high resolution full- and dual-page video display systems for the microcomputing industry. The products serve the desktop publishing, computer-aided design and drafting (CADD), word processing and general office automation markets.

The company's common stock is traded on the National Quotation Bureau "Pink Sheets."

PHOENIX, AZ (MAY 29) PR NEWSWIRE - Rudy R. Miller, chairman and chief executive officer of StatesWest Airlines Inc. (NASDAQ: SWAL), today announced the appointment of Mary A. Nance as senior vice president/corporate communications, Donald G. Brady, vice president/maintenance and James A. Pickett, assistant vice president/planning for the airline.

W. James Lane, president, stated, "StatesWest has made a major commitment to seek out the best possible management talent to assist the airline in implementing our corporate commitment to expanded growth in the 1990s."

Nance has 20 years financial, administrative management and investor relations experience. Nance held previous management positions with The Miller Group, ITT Educational Services Inc. and General Motors Acceptance Corp.

Brady has rejoined the airline full time as vice president of maintenance. Brady has been serving as a consultant to the airline since his semi-retirement in September 1989. He originally joined the airline in 1986. His 40-plus year airline career includes 10 years as director of maintenance with jet carrier Frontier Airlines.

Pickett has 20 years of airline planning and management experience. Pickett was co-founder of Air Midwest Inc. and served as senior vice president for 11 years. He has been an active airline industry consultant to numerous airlines prior to joining StatesWest's management team.

StatesWest Airlines commenced flight operations Oct. 1, 1986 and on April 5, 1990, entered into a joint marketing service agreement with USAir (NYSE: U) to become effective July 15, 1990. USAir is the dominant major carrier in California. As part of the agreement, StatesWest will operate under the name USAir Express and all of the company's flights will carry USAir's designator code in the airline reservation systems.

The company operates one of the newest fleets of regional prop- jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County, San Diego and Santa Barbara, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca and Laughlin, Nev./Bullhead City, Ariz. StatesWest operates 88 daily departures between these locations.

ATLANTA (MAY 29) PR NEWSWIRE - Abrams Industries Inc. (NASDAQ: ABRI) reported that for the year ended April 30, revenues were $54,956,988 and net earnings were $1,527,653, or $0.51 per share, compared to revenues of $50,331,871 and net earnings of $1,435,567, or $0.48 per share, for fiscal 1989.

For the fourth quarter ended April 30, revenues were $14,344,408 and net earnings were $489,734, or $0.16 per share, compared to revenues of $13,142,606 and net earnings of $605,559, or $0.20 per share, for the

fourth quarter last year. All figures are based on 2,994,039 shares outstanding and all current figures are unaudited.

Backlog at April 30 was approximately $31,200,000, compared to approximately $20,900,000 at April 30, 1989. The increase in backlog is primarily attributable to the Construction Segment, which recently contracted to build several new retail stores and expand several others.

The board of directors, at its meeting held on May 29, declared a cash dividend of $0.05 per share (44th consecutive quarterly dividend) with a record date of June 12 and a payment date of June 29.

Abrams Industries Inc., headquartered in Atlanta, is entering its 66th year and operates in three industry segments: Construction, Manufacturing and Real Estate.

GREENWICH, CT (MAY 29) PR NEWSWIRE - W.R. Berkley Corporation (NASDAQ: BKLY) today announced senior management changes at two of its regional property casualty insurance companies. Donald J. Veldkamp, president of Tri-State Insurance Company of Minnesota, was elected president of Union Insurance Company, Lincoln, Neb. Succeeding Veldkamp as president of Tri-State is Curtis W. Bloemendaal, previously senior vice president-underwriting. Both companies are wholly owned property/casualty subsidiaries of W.R. Berkley Corporation and write commercial and personal lines coverages in the Great Plains and upper Midwestern states. Union Insurance is headquartered in Lincoln and Tri- State in Luverne, Minn.

Veldkamp, age 50, joined Tri-State in 1968, was elected treasurer in 1971, vice president in 1973, executive vice president in 1978 and president in March 1980. Veldkamp attained his certified property casualty underwriter (CPCU) designation in 1976. At Union Insurance Company he succeeds Richard J. Kline who recently resigned.

Bloemendaal, age 46, joined Tri-State in 1963 as an underwriter. He was elected vice president of marketing in 1980, underwriting vice president in 1985 and senior vice president in 1987. He received his certified property casualty underwriter (CPCU) designation in 1987.

W.R. Berkley Corporation is a holding company whose subsidiaries operate in three major segments of the insurance business: regional property casualty insurance; specialty lines of insurance (including excess and surplus lines, commercial transportation and reinsurance); and insurance

services operations (including management of alternative insurance market mechanisms).

DETROIT (MAY 29) PR NEWSWIRE - United Way for Southeastern Michigan announced today at its 41st annual meeting the election of Robert S. (Steve) Miller Jr., executive vice president of Chrysler Corporation, as chair of the board of directors.

Miller succeeds Charles T. Fisher III, chairman and president, NBD Bancorp and NBD Bank.

Also elected was Kenneth Whipple, president, Ford Financial Services Group Ford Motor Company, as the first vice chair. Whipple will also be leading this year's United Way Torch Drive as general chair. The goal for the 1990 campaign is $66,750,000.

In Fisher's remarks he commended the 1989 United Way Torch Drive General Chair Robert A. Lutz, president, Chrysler Motors Corporation, his team of volunteers and the generous contributors in the tri-county area for the outstanding effort they demonstrated. The success of last year's campaign resulted in $62.9 million being raised to support local human services.

"We applaud the efforts of United Way-supported agencies who are responding to the urgent problems in our community such as homelessness, unemployment, hunger, substance abuse, juvenile delinquency and the problems of the aged. We need to increase our efforts to fund the growing volume of services these agencies are receiving," Fisher said at the meeting.

Also elected an officer was Robert C. Stempel, president, General Motors Corporation, as vice chair of the board. He joins vice chairs: Alfred R. Glancy III, chairman and CEO, Michigan Consolidated Gas Company; Edgar A. Scribner, president, Metropolitan Detroit AFL-CIO Council and Joan B. Warren.

Kenneth E. Millard, president, Michigan Bell, was re-elected as secretary of the board. Verne G. Istock, vice chairman of NBD Bancorp and NBD Bank was elected treasurer of the board.

New vice presidents elected were Fisher; Gerald Greenwald, vice chairman of Chrysler Corporation; John E. Lobbia, chairman, president and CEO, Detroit Edison Company; Ernest Lofton, vice president, International Union

UAW; Gerald V. MacDonald, chairman and CEO, Manufacturers National Bank of Detroit; Stan Marshall, vice president, International Union, UAW; Eugene A. Miller, chairman and CEO, Comerica Inc.

Approximately 500 United Way for Southeastern Michigan officers, board members, volunteers and contributors attended the meeting which was held at the Hyatt Regency in Dearborn.

NEW YORK (MAY 29) PR NEWSWIRE - Albert J. Neupaver of McMurray, Pa., has been appointed general manager of Ametek's (NYSE: AME) Specialty Metal Products division, it was announced today by Peter A. Guercio, group vice president of the Fortune 500 industrial manufacturer.

As general manager, Neupaver succeeds Guercio who was recently named to a new position responsible for the operations of Ametek's Industrial Materials group which includes the Specialty Metal Products division.

In his new position, Neupaver will be responsible for managing the Specialty Metals' operations in Wallingford, Conn., and Eighty Four, Pa. Ametek purchased the producer of high-purity metal powders and clad composites from Pfizer Inc. in January 1988. Neupaver joined Pfizer as a production engineer in June of 1977 and held various management positions in his tenure with that company. He has served as divisional vice president-composite and metal powder products for the past two years.

Born in Belle Vernon, Pa., Neupaver served in the U.S. Navy and attended the U.S. Naval Academy where he earned a bachelor of science degree in mechanical engineering, graduating with distinction, ranking first in his engineering class. He later attended the University of Pittsburgh where he was awarded a master's in science and metallurgical engineering in 1980 and a master's of business administration degree in 1982.

Neupaver is a qualified nuclear submarine officer and currently serves as a commander in the U.S. Navy Reserves. He is also president of the Metal Powder Industries Federation's Metal Powder Producers Association and an active member of the American Powder Metallurgy Institute, the American Welding Society and the American Metals Society. Neupaver has co-authored numerous articles for the American Powder Metallurgy Institute and American Metals Society.

A native of Belle Vernon, Neupaver, 39, and his wife Barbara, are the parents of three children and reside in McMurray, a Pittsburgh suburb.

Ametek, listed on the New York Stock Exchange since 1930, had sales in 1989 of more than one-half billion dollars.

MIAMI (MAY 29) PR NEWSWIRE - Eastern Airlines today said it will offer special discount fares during June, ranging from $49-$99 each way, for seniors 62 and over and youngsters 12 to 21.

The mileage-based fares are $49 one way for flights up to 300 miles; $69 for 301-1200 miles and $99 for trips over 1,201 miles. Rates are $10 more each way during peak travel times.

"We're putting nationwide travel on sale for students and seniors who can travel on short notice during June," said George Brennan, vice president-marketing. "While other recent industry fare initiatives are restricted to a few days a week, our fares are good any day, without advance purchase."

Eastern said the fares are available in all domestic markets and good for travel beginning May 30. Travel must be completed by June 27. No advance purchase is necessary and all tickets are fully refundable. A three-day minimum stay and proof of age are required.

Off-peak rates are available for travel noon Tuesday through Thursday and Saturday. Senior/youth fares are available for purchase beginning May 30.

Samples of the seniors/youth fare are as follows:

City Pairs	Off-peak/Peak
Atlanta - Charlotte	$49/$59
Philadelphia - Atlanta	$69/$79
Boston - Ft. Lauderdale	$99/$109
Baltimore - Orlando	$69/$79
Atlanta - Seattle	$99/$109
San Francisco - Washington	$99/$109
Chicago - Jacksonville	$69/$79
New York - Los Angeles	$99/$109
Phoenix - Miami	$99/$109
Savannah - Atlanta	$49/$59

#90149p2886 05/29/1990 ~PR Newswire

CARMIEL, ISRAEL (MAY 29) PR NEWSWIRE - S.P.I. - Suspension and Parts Industries Ltd. (NASDAQ: SPILF) today announced its results of operations for the first quarter ended March 31, 1990.

For the three-month period ended March 31, 1990, net sales totaled approximately $4,892,000 as compared with approximately $4,369,000 for the first quarter of 1989. The net loss for the three-month period ended March 31, 1990, equaled approximately $343,000, or 10 cents per share, as compared with a net loss of approximately $188,700, or 6 cents per share, for the same period last year.

The company stated that despite a 12 percent increase in sales this quarter compared with the same quarter last year, the company suffered a loss primarily as a result of continuing technical and efficiency production problems which have escalated production costs.

In addition, the loss for the quarter was attributable to various provisions, which totaled approximately $256,000, relating to an increase in taxes on imports, an adjustment to the total contract price of an order from the Israeli Ministry of Defense as required by the terms of the contract, and an expected loss on an order for M-109 road wheels. In addition, during the quarter, the company received $108,000 from a customer as a result of a settlement relating to a contract dispute with that customer.

The company also stated that while the portion of export sales decreased during the quarter, the portion of sales to the Israeli Ministry of Defense increased, which sales were expected to provide better profit margins to the company.

The new management team at S.P.I., headed by Moshe Oren-Pines, has implemented a stringent recovery plan focused on reducing overhead and improving quality control and efficiency. In addition, the company is continuing to work toward obtaining profitable future orders and penetration of the commercial market of its products.

Headquartered in Carmiel, Israel, S.P.I. designs, develops, manufactures and markets components for the suspension systems of a wide variety of military armored vehicles, including steel road wheels and support rollers sprocket wheels, track components and road wheel arms. The company believes it is currently one of the leading suppliers of steel road wheels used as spare parts by the United States armed forces, and supplies

substantially all the requirements of the Israel defense forces for steel road wheels, sprocket wheels, road wheel arms and certain track components.

MINNEAPOLIS (MAY 29) PR NEWSWIRE - E.F. Johnson Co. -- the radio communications unit of Minneapolis-based Diversified Energies, Inc. (DEI) (NYSE: DEI) -- said today that it has increased to about 92 percent the ownership interest that it has in AmeriCom Corp., a privately held Atlanta Ga.-based manufacturer of network switching systems for mobile radios.

Financial terms were not disclosed.

Through two previous investments, E.F. Johnson acquired the majority interest in AmeriCom and became the sole manufacturer of AmeriCom's trunked mobile network switching systems.

In a related action, Julian H. Edwards has been named president of AmeriCom -- replacing Charles Parrish who sold his ownership interests to E.F. Johnson. Edwards previously held numerous management positions at Control Data Corporation, including president of TRES Systems Inc., which was a software development unit of Control Data. Parrish will continue to serve as a consultant to AmeriCom.

"Our expanded investment in AmeriCom reinforces our belief that AmeriCom's trunked mobile radio switch technology is the 'next generation' standard for specialized mobile radio (SMR) applications in the United States and

international trunked radio markets," said John D. Somrock, president and chief executive officer of E.F. Johnson.

Somrock said AmeriCom will retain its commitment to open architecture and the support of multiple manufacturers for AmeriCom-compatible equipment.

E.F. Johnson is headquartered in Minneapolis. Its parent company, Diversified Energies, Inc., is an energy services, products and communications corporation that is traded on the New York Stock Exchange under the symbol: DEI.

ST. PAUL, MN (MAY 29) PR NEWSWIRE - ZEOS International Ltd. (NASDAQ: ZEOS) has announced it is co-sponsoring the First International Computer Forum to be held in the World Trade Center, Moscow, USSR, June 14 through June 17.

Soviet co-sponsors of the forum include the State Scientific Company "Intellectual Technology," the Central Scientific and Research Laboratory "Menatep," the Scientific and Production Amalgamation "Radon," Health Care Center, and the International Computer Club.

The event includes conferences and a trade exhibition and will be attended by representatives from Soviet industrial and government organizations interested in computer technology.

ZEOS International is providing personal computer workstations to Soviet software and hardware companies for use during the show. In addition, the president of ZEOS International, Greg Herrick, will be a keynote speaker at the event and ZEOS representatives will conduct a technical forum on the use of personal computer workstations in business and industry.

Concerning ZEOS' activity in the Soviet Union, Herrick said, "We are interested in the long-term opportunities of the Soviet computer market. Our early presence in this marketplace is important in realizing its long-term potential. We intend to demonstrate that ZEOS computer systems provide a very good value for Soviet buyers. This is a particularly opportune time for ZEOS in light of President Bush's recent Soviet trade initiative. The Bush proposal, presently subject to COCOM approval, would remove licensing requirements for most of the ZEOS product line."

Commenting further, Herrick noted, "We are in the process of negotiating with a major trading company to handle the cash transactions. In addition we are now arranging for the service of our equipment in the Soviet Union. In April, several Soviet computer maintenance technicians completed preliminary service training in our Minnesota factory."

ZEOS International Ltd. manufactures and markets, direct to end users, ISA and EISA (Industry & Extended Industry Standard Architecture) personal computer systems and workstations based on the Intel 80386 and 80486 microprocessors worldwide under the ZEOS name.

ROCHESTER HILLS, MI (MAY 29) PR NEWSWIRE - A flashing light signaling device manufactured by Sonic Alert, Inc. of Rochester Hills was credited with saving the lives of three members of a deaf family in a recent

apartment house fire in Springfield, Ohio.

817 S. Limestone Street in Springfield is an older apartment building with four flats. At 11:42 a.m. Tuesday, May 15, the one- and three-year-old children of Pamela Hamilton were playing with a cigarette lighter in the bedroom of their first-floor apartment.

According to Springfield Fire Chief Danny Wise, when Mrs. Hamilton opened the door to the bedroom, "the fire was all in the walls of the bedroom so she went around (to the other apartments) waking everyone."

As the fire rapidly spread throughout the building, Tyrone Wilkins, age 23, and his wife Kimberly, age 18, both totally deaf, were in the living room of their second-floor flat diapering their ten-month-old daughter, Renee.

Some 16 months earlier, Tyrone's father, Victor Wilkins of Inkster, Mich., in anticipation of the birth of his grandchild, had purchased a Sonic Alert Baby Cry Signaler which causes lights to flash when activated by the sound of a baby's cry.

As flames engulfed the building, frantic neighbors desperately tried to alert the deaf Kimberly and Tyrone Wilkins. So loud were the knocks and screams that they activated the Sonic Alert Baby Cry Signaler, which caused lights to flash throughout the Wilkins' flat.

Warned by the flashing lights, Mr. and Mrs. Wilkins grabbed baby Renee and promptly exited the burning building. Less than two minutes later, the building was completely engulfed by flames. According to Chief Wise, the Sonic Alert Baby Cry Signaler "probably saved their (the Wilkins family) lives."

Tyrone's father said that when he heard about the fire and the role of the Sonic Alert Signaler, "my heart just leaped out of my chest .... For a few dollars spent, it was a cheap investment to save lives."

Sonic Alert, the world's largest manufacturer of signaling devices for the hearing impaired, was founded in 1976 by its president, Adam Kollin. The then-21-year-old Kollin was trying to rig flashing light signaling devices to enable his grandmother, who had become deaf, to be alerted when the telephone, doorbell or alarm clock rang.

When the system he developed worked so well for his grandmother, Kollin discovered that deaf and hard-of-hearing people throughout the world needed this equipment. After further refinement of the product, Kollin was awarded a patent by the United States government.

CONTACT: Adam Kollin of Sonic Alert, Inc., (313) 656-3110; or Joseph Katz of Katz and Associates, (313) 281-4773, for Sonic Alert.

PITTSBURGH (MAY 29) PR NEWSWIRE - USX (NYSE: X) Chairman Charles A. Corry announced today that the board of directors has elected Victor G. Beghini vice chairman-energy and a member of the board of directors of USX.

He succeeds William E. Swales, who is retiring at age 65. Beghini, 55, has been president of Marathon Oil Co. since 1987 and will continue to perform those duties as well as his new responsibilities.

From offices in Houston, Beghini will oversee activities of the USX energy subsidiaries, Marathon Oil Co. and Texas Oil & Gas Corp. He serves on the board of directors of both companies.

A native of Greensboro, Pa., Beghini was graduated from Pennsylvania State University in 1956 with a B.S. degree in petroleum engineering. He joined Marathon Oil Co. that same year and held a variety of staff, production and management positions for the company throughout the United States in the years that followed.

In early 1978, he was elected vice president, supply & transportation for Marathon. Later that year, he became a member of Marathon's board of directors. In January 1984, he was elected president of Marathon Petroleum Co.

Beghini assumed responsibilities as senior vice president, domestic exploration and production, for Marathon Oil Co. in 1985. He became senior vice president, worldwide production the following year.

He was elected president of Marathon Oil Co. in September 1987. At the same time, he was elected to the board of directors of Texas Oil & Gas and to the USX corporate policy committee.

Beghini is a member of the board of directors of the American Petroleum Institute, is immediate past chairman of the Natural Gas Supply Association and is a member of the National Petroleum Council. He is a member of the 25 Year Club of the Petroleum Industry and the Society of Petroleum Engineers. He is a registered professional engineer in the state of Louisiana.

Swales is concluding a 36-year career with Marathon Oil. He was president of the company from 1985 until his appointment as vice chairman-energy in 1987. He began his career in 1954 as a geologist. In the years that followed, he held management positions in the United States, United Kingdom, Latin America, Africa and Australia.

In 1974, he was elected vice president-production, international. He was elected to the Marathon board of directors the following year. In 1977, he became senior vice president-production, international. In 1984, he was elected senior vice president, exploration and production, of Marathon Oil and chairman of Marathon International Oil Co., the posts he held at the time of his election as president of Marathon in 1985.

Swales is a director of PNC Financial Corp, Pittsburgh National Bank and OHM Corp. He is a member and director of the American Petroleum Institute and a member of the National Petroleum Council, American Association of Petroleum Geologists, the Society of Petroleum Engineers, the American Geological Institute and the 25 Year Club of the Petroleum Industry.

LOUISVILLE, KY (MAY 29) PR NEWSWIRE - Capital Holding Corporation (NYSE: CPH) today announced that it has filed a shelf registration statement with the Securities and Exchange Commission for $300 million of debt securities. Combined with the company's existing shelf registration statement, this will permit the company to issue up to $509 million in debt securities, including $109 million of unissued medium-term notes. Such debt securities may be offered as separate series in amounts, at prices and on terms to be determined at the time of the sale or sales.

The purpose of the filing is to facilitate the future issuance of debt securities as needed. Once debt securities are issued under the registration statement, the net proceeds to be received by the company will be used for general corporate purposes.

The company may sell debt securities to or through underwriters, and also may sell debt securities directly to other purchasers or through agents. Underwriters may include Goldman, Sachs & Co., or another underwriter or may be a group of underwriters.

Capital Holding is one of the nation's five largest shareholder-owned life insurance organizations, with $15.4 billion in assets and $45.1 billion of life insurance coverage in force.

The corporation offers a broad range of financial services and products through agents, direct-marketing media, investment professionals and retail locations. Its common stock is listed on the New York and Pacific Stock Exchanges under the ticker symbol CPH; its preferred stock is listed on the New York Stock Exchange under the symbol CPHF.

MEMPHIS, TN (MAY 29) PR NEWSWIRE - Federal Express Corporation (NYSE: FDX) announced today that arbitrator George Nicolau has issued his final decision in the Federal Express pilot merger arbitration. The arbitration resulted from the acquisition by Federal Express of Tiger International. The hearings began Dec. 7, 1989.

"This decision is the result of hundreds of hours of testimony and thousands of pages of exhibits presented to the arbitrator by each pilot group," said chairman and chief executive officer Frederick W. Smith.

"The decision will now permit the company to integrate the two pilot groups and achieve greater efficiencies in its air operations," said Smith. We will begin operating under the single list as soon as it is practical."

BEVERLY HILLS, CA (MAY 29) PR NEWSWIRE - Michael Douglas and Melanie Griffith will star in Twentieth Century Fox's "Shining Through," written and to be directed by David Seltzer, it was announced today by Roger Birnbaum, president, World-wide Production for Twentieth Century Fox. The film, which will be made in association with Sandollar Productions, will start filming Sept. 4 in London and Berlin.

A romantic spy thriller set during World War II, "Shining Through" chronicles the daring adventure of a Brooklyn-born secretary working in the New York office of the OSS, who persuades her boss to send her on a one-time mission to gather information in the home of a high-ranking Nazi officer in Berlin.

Though fluent in German, which she leanred from her immigrant parents, she is untrained for her task and finds herself literally "lost" in Berlin, cut off from all spy contacts, relying solely on her street-smarts to survive.

Douglas plays her boss, a Wall Street lawyer serving his country as an executive of the newly formed OSS, who risks his own life infiltrating behind enemy lines to rescue her.

Roger Birnbaum commented: "We are especially happy to be reunited on this project with Michael Douglas, Melanie Griffith and David Seltzer, three talented people who have made great movies at Fox before. 'Shining Through ' which combines their talents for the first time, is a picture we are very proud to be making."

Michael Douglas comes to "Shining Though" fresh from the international critical and boxoffice triumph of his fifth film for Twentieth Century Fox, "The War of the Roses," in which he co-starred with Kathleen Turner and Danny DeVito.

Previously for Fox, Douglas produced and starred in the blockbusters "Romancing the Stone" and "Jewel of the Nile" and starred in Peter Hyams' "The Star Chamber" and Oliver Stone's "Wall Street," for which he won an Academy Award.

Melanie Griffith's performance as the indomitable Tess McGill in Fox's hit comedy "Working Girl," directed by Mike Nichols, won her an Oscar nomination. This fall she stars with Michael Keaton and Matthew Modine in John Schlesinger's psychological thriller "Pacific Heights," a Morgan Creek Production for release by Twentieth Century Fox.

Among the other roles that have made her one of today's most highly regarded young actresses are the outrageous Lulu Henkel in Jonathan Demme's "Something Wild" and soft-voiced sex starlet Holly Body in Brian De Palma's "Body Double."

NEW YORK (MAY 29) PR NEWSWIRE - Ammirati & Puris has completed the repurchase of all of its stock from Omnicom Group, Inc. and has become an independent advertising agency once again.

"We are pleased to have reached the conclusion of an amicable parting with Omnicom, and we are looking forward with great excitement to building our future as a mid-sized and independent advertising agency," said Martin Puris, president and chief executive officer of Ammirati & Puris. "We wish to express our appreciation to the management of Omnicom for its cooperation throughout the negotiation of this accord.

"With the repurchase behind us, we look forward to refocusing all of the energy of Ammirati & Puris on what we do best -- creating exceptional advertising of our clients."

Ammirati & Puris was acquired in 1987 by Boase Massimi Pollitt, which was,

in turn, acquired by Omnicom in 1989.

With billing of over $200 million, Ammirati & Puris is especially known for its campaigns for BMW, Club Med, Schweppes and UPS.

SPRING VALLEY, NY (MAY 29) PR NEWSWIRE - Par Pharmaceutical, Inc. (NYSE: PRX) announced today that it had completed the acquisition of the 40 percent minority interest in its Indianapolis subsidiary, Quad Pharmaceuticals, Inc., from three individuals who had been Quad's senior management, thus making Quad a wholly owned subsidiary of Par.

Par said that the cost of the acquisition consisted of $2 million in cash, $1 million in Quad notes payable over a four-year period, and 408,165 shares of Par stock. Based on Friday's closing price of $5.63 of the Par stock, the transaction has an indicated value of approximately $5,300,000. The number of shares is subject to upward adjustment in the future in the event that a registration statement covering the 408,165 shares has not become effective by Aug. 27, 1990. Also, if such a registration statement has not become effective by Dec. 26, 1990, Par may be required to redeem the shares for $2,500,000, giving the transaction a total value of $5,500,000. Par said that it expects to file a registration statement covering the 408,165 shares on or before next week. In connection with

the issuance of these shares, the three individuals granted a proxy to Kenneth I. Sawyer, Par's president, to vote all the shares of common stock they own on any matter on which common shareholders may vote. Par also said that the three individuals resigned their positions with Quad upon the closing of the transaction, and that Quad is being operated by Par management personnel.

Kenneth Sawyer, said, "This acquisition represents a major step toward achieving our goal of reestablishing Par as a premier supplier of generic pharmaceuticals. Together with the major restructuring of Par's management and the internal policies and procedures that we have put in place, we believe that the acquisition of Quad will allow us to exercise the necessary leadership throughout the company to meet our commitment to maintain the confidence of the FDA and the public in the quality of our products and the integrity of our management. This action will also enhance Par's ability to offer a broad line of pharmaceuticals, from Quad's injectable drugs to Par's oral solid, topical, and oral liquid products."

#90149p2935 05/29/1990 ~PR Newswire

MILAN, ITALY (MAY 29) PR NEWSWIRE - The board of directors of Ferruzzi

Finanziaria S.p.A., the holding company for the Ferruzzi Group, today announced results for the year ended Dec. 31, 1989.

The new structure of the group has radically changed the composition of the consolidated income statement. Gross operating income reflects only those activities directly managed by the group, while the operations transferred to the Enimont joint venture contribute to net income only as an investment accounted for under the equity method.

To allow for meaningful year-to-year comparisons, 1988 operating figures (which included 15 months of Cerestar results and 13 months of Central Soya results) were restated to exclude those operations conferred to Enimont and to adjust for other factors.

Consolidated net income for the Ferruzzi Group in 1989 was 1,535 billion lire, a nine percent increase over the 1,410 billion lire reported for 1988. Consolidated sales revenues for 1989 were 16,520 billion lire, up 11 percent over last year's 14,857 billion lire.

The group's gross operating margin was 1,974 billion lire, a decrease of 11 percent versus last year's 2,218 billion lire, due to the reduction in margins in the chemical sector which was not fully offset by improvements in the agro-industrial, engineering and construction, and service sectors.

Consolidated income net of minority interest was 311 billion lire versus 561 billion lire for 1988. The fact that there was a decrease in this figure while the total net income increased, is primarily attributable to extraordinary items (both income and expenses) which impacted the parent company and its subsidiaries in various ways.

These results include the extraordinary losses of 159 billion lire experienced by the trading sector (due largely to disturbances created in the Chicago commodities market by changes in that market's rules) and the effects of less favorable taxation for 1989. Total aggregated sales for all of the Ferruzzi Group's businesses were in excess of 50,000 billion lire.

Consolidated net financial indebtedness at year-end 1989 was 8,077 billion lire, a reduction of 18 percent from the 9,864 billion lire at year-end 1988. Total net equity was 9,248 billion lire at Dec. 31, 1989, for a debt/equity ratio of 0.87 at year-end, versus 1.10 for the prior year. The group employed approximately 44,500 people during 1989.

In parallel with the transactions that have restructured the group's manufacturing operations, Ferruzzi Finanziaria has begun a restructuring of its financial sector holdings by reducing the group's commitments in the insurance sector.

CONTACT: Guido Negro of the Ferruzzi Group, Italy 011-39-2-6270-5627, or David Kronfeld of Kekst and Company, (212) 593-2655, for the Ferruzzi Group.

HIROSHIMA, JAPAN (MAY 29) PR NEWSWIRE - Ceremonies marking the grand opening of Mazda Motor Corporation's new European Research and Development Representative Office were held today in West Germany. Kenichi Yamamoto, chairman of Mazda Motor Corporation in Japan, was on hand along with government and business leaders to officially open the new facility in Oberursel on the outskirts of Frankfurt, West Germany.

Completed in November of 1989, the new facility represents an investment of some 5 billion yen ($33.3 million at the exchange rate of $1 equals 150.40 yen), and covers 11,000 square meters (118,000 square feet).

The European R&D Representative Office is Mazda's fourth R&D operation. Others are located in Hiroshima and Yokohama (Japan) and in California and Michigan in the United States(a). Having an R&D operation in Europe will enable Mazda to closely tailor future products to the needs and tastes of the European market. Primary activities at the new R&D center include mid- and long-term product planning and design as well as product development strategies for the European market.

Seiji Tanaka, director and general manager of the European R&D Representative Office, stated, "After nearly two years of construction, it is a great pleasure to have this grand opening ceremony for our new European R&D Representative Office." Tanaka continued, "Just as Europe has its own long tradition and history, so does Japan, and through the years, each has developed in its own respective ways. We are determined to develop new values and standards by blending the best of each background. The results of these efforts will be automotive products tailored to meet the specific needs of the various European markets where we sell our cars and trucks. We already have 77 designers and engineers on staff. Of that number, 42 are European and 35 are Japanese," Tanaka said.

(a) -- Mazda R&D of North America, Inc. is headquartered in Irvine, Calif. with other offices in Ann Arbor and Flat Rock, Mich. Irvine R&D serves as Mazda's North American design center. Its activities also include product planning, advanced product development and evaluation. Ann Arbor's R&D activities mainly center on emission certification procedures, while the Flat Rock office conducts local parts development and air conditioning system engineering.

#90149p2945 05/29/1990 ~PR Newswire
SAN JOSE, CA (MAY 29) PR NEWSWIRE - 88open Consortium Ltd., today announced an agreement with Softsel/Microamerica to distribute 88open certified software for the burgeoning UNIX market. The agreement provides an established channel of distribution for shrink-wrapped UNIX applications to users of 88open ABI compliant systems.

Current certified systems include high performance MC 88000 RISC-based systems from Motorola, Data General, Sanyo/ICON, Tektronix, Opus, Dolphin and Norsk Data. Other companies including Unisys and Harris, have compliant family introductions planned.

"Softsel/Microamerica is absolutely committed to making UNIX software available as an off-the-shelf product," said David Wagman, co-chairman of Softsel/Microamerica. "These efforts and activities of 88open in establishing compliance standards will go a long way towards simplifying our jobs. We are delighted whenever powerful forces, such as 88open are successful in establishing binary standards."

While the UNIX market is predicted to grow faster than any other segment of the computer market, the lack of a well established mechanism for mass distribution of application software has been one of the key inhibitors to the acceptance of the UNIX system.

This agreement opens the flood gates by combining the shrink-wrapped UNIX application software certified by 88open with the established PC distribution strength of Softsel/Microamerica.

Applications certified by 88open are binary compatible on multiple vendors' UNIX System V computers based on Motorola's MC 88000 RISC microprocessor. Software vendors certify their applications by complying to 88open's UNIX System V.3 ABI and passing binary compliance tests. Certified software carries the 88open certification seal.

This agreement is announced in conjunction with UNIX International's worldwide ISV recruiting program. "UNIX International is delighted to have the support of 88open and Softsel/Microamerica in establishing shrink-wrapped UNIX System V applications," said Peter Cunningham, president and chief executive officer of UNIX International.

"These activities are further demonstration of the industry's commitment to UNIX System V, and are characteristic of the support UI receives from its members."

In a related move, 88open announced an innovative program that offers complete 88000-based systems, coprocessor boards, software and certification test suites free of charge to DOS ISVs who wish to port to UNIX System V, Release 4. The first 500 ISVs that meet capability and technical requirements will receive systems and software, valued at $14,000 each, at no charge.

BOCA RATON, FL (MAY 29) PR NEWSWIRE - Office Depot Inc. (NASDAQ: ODEP) announced that it expects to open nine new stores in the second quarter bringing the total number of stores open at the end of the second quarter to 89. The company intends to have 115-125 stores open by the end of calender year 1990.

Several of the company's new stores will open later in the second quarter than planned causing sales to be slightly lower than originally anticipated. Gross margins are being negatively affected by pricing pressure in the important electronics category, as well as in certain competitive markets; however, the company expects offsetting improvement

in gross margins primarily due to the benefit derived from improved loss control at its stores.

Jack Kopkin, executive vice president and general merchandise manager, has announced his plan to retire in July, 1990. The company is initiating a search for a successor.

Office Depot operates America's largest chain of high volume office supply stores that sell first-quality brand name office products primarily to small and medium size businesses. The company currently has 83 stores in 15 states in the Southeastern and Central states.

#90149p2954 05/29/1990 ~PR Newswire

MINNEAPOLIS (MAY 29) PR NEWSWIRE - Minntech Corp. (NASDAQ: MNTX) reported today record earnings and revenues for the year ended March 31, 1990. Net earnings for the year were $2,045,000 or $.75 per common share on revenues of $24,276,000, compared to earnings of $893,000 or $.38 per common share on revenues of $18,703,000 last year. Revenues for the year ended March 31, 1990, increased by $5,573,000, or 30 percent, from the prior year.

Year-end results include a $110,000 credit to earnings ($.04 per share) related to a change in accounting for patent application costs. The company has changed from expensing patent application costs as incurred to capitalizing and amortizing them. This change conforms the company's accounting with the prevailing practice in the medical device industry.

Dr. Louis C. Cosentino, president, reported "Our after-tax profitability in fiscal 1990 reached 8.4 percent of revenues. In addition, fourth-quarter revenues reached $6,959,000 and fourth quarter after-tax profits rose to $703,000, which is more than 10 percent of total revenue. Our emphasis on profitability is clearly producing results. We also have excelled in revenue growth. Our five-year average revenue growth is 27 percent. We look forward to the coming year with excitement and optimism."

Minntech Corp. is a leading medical device manufacturer with advanced technology in electronics, solutions, fibers and plastics. The company's core technologies are being applied to the businesses of dialysis, reprocessing/sterilants, cardiosurgery and water purification. Minntech Corporation's common stock is traded on the national over-the-counter market under the NASDAQ symbol: MNTX.

ATLANTA (MAY 29) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has announced that it is filing an application with the U.S. Department of Transportation for authority to begin service between Atlanta and Moscow on May 1, 1991, under terms of a new air agreement between the United States and the Soviet Union to be signed later this week during the Bush and Gorbachev summit. Proposes May 1, 1991, Inaugural for service to Soviet Union.

In its application, Delta proposes three flights weekly from its Atlanta

hub to Moscow, via Frankfurt. In addition, the airline said it will soon seek to expand its U.S.S.R. service to include flights to Leningrad and Tbilisi.

"We have actively pursued the opportunity to begin service to the Soviet Union for some time now, and we're very pleased that our two governments are so close to this important step," said Ronald W. Allen, Delta's chairman of the board and chief executive officer. "The increased contact between the people of the Soviet Union and the people of the United States made possible by this needed expansion of air service will be an important step in solidifying the improving relations between our two countries."

Delta initially will operate three weekly flights between Atlanta and Moscow utilizing L-1011 international-range aircraft. Flights will depart Atlanta on Tuesday, Thursday, and Saturday at 7:30 p.m., arriving in Moscow at 4:45 p.m. the following day. Return flights would leave Moscow Monday, Thursday and Saturday at 8:45 a.m., and arrive in Atlanta at 3:10 p.m.

Delta's application for authority to serve the Soviet Union was filed pursuant to the Memorandum of Consultation signed in Washington on May 28, 1990. The agreement significantly broadens air services between the two countries, allowing the U.S. to designate four additional carriers to serve the Soviet Union beginning April 1, 1991. In addition to Moscow and Leningrad, U.S. carriers would be allowed to serve other cities, including Tbilisi in Soviet Georgia.

NEW YORK (MAY 29) PR NEWSWIRE - Kenneth A. Brause has been appointed

director of investor relations for Bankers Trust New York Corporation (NYSE: BT), it was announced today by William C. Jennings, the banking firm's chief financial officer.

Brause will be responsible for coordinating Bankers Trust's communications with investors, security analysts and rating agencies.

He succeeds Ashley Weare, who will retire on June 30. During his 35 years with Bankers Trust, Weare also served as controller of the corporation and as assistant to the chairman. While with the controller's department, he developed the corporation's first formal planning and control system.

Brause joined Bankers Trust in 1986, as an analyst in the strategic planning department and later served as assistant to the controller of the corporation. His most recent responsibilities, for financial analysis support to senior management, will be continued in his new role. Before joining Bankers Trust, he was with Booz Allen & Hamilton.

Brause is a 1985 graduate of The Wharton School, University of Pennsylvania, where he earned a B.S. degree in economic, summa cum laude. He is currently a participant in the Weekend MBA Program at the University of Chicago.

WASHINGTON (MAY 29) PR NEWSWIRE - AT&T today announced it will provide a computerized message center, telephones and fax machines for the estimated 5,000 journalists and technicians expected to cover the summit meeting between President Bush and Soviet Union President Gorbachev opening here this week.

The message center and equipment have been installed at the George Washington University Smith Center where a temporary press room has been set up by the United States Information Agency to handle the thousands of reporters from around the world covering this week's summit.

Anyone trying to reach reporters at the Smith Center during the summit should call the AT&T Message Center at 202-416-5773. AT&T attendants will answer these calls, take the message and type the name of the person for whom the message is intended into the system using AT&T 615 terminals. The person's name will be automatically alphabetized and appear on each of five, 35-inch monitors mounted in 12- foot columns. Two monitors will be located near the entrance to the Smith Center and three others in the area where briefings will occur. Names will scroll on the screen continuously

until the recipient retrieves the message form an AT&T attendant at the Message Center.

AT&T is also supplying 800 telephones to the Smith Center for reporters making outbound calls and who have ordered service in advance from C&P Telephone. For those who did not order service, AT&T is also supplying 30 phones equipped to handle credit card calls and five other phones that can handle cash transactions. Six AT&T fax machines will also be available to the media.

MINNEAPOLIS (MAY 29) PR NEWSWIRE - ADC Telecommunications Inc. (NASDAQ: ADCT) released final results for the quarter and six months ended April 30 1990, today. Orders of $60,727,000 for the quarter were 17.5 percent greater than the $51,669,000 recorded in the quarter ended April 30, 1989. Year-to-date 1990 orders were $123,229,000, 37.3 percent greater than the $89,727,000 recorded in the six months ended April 30, 1989.

Net sales for the quarter ended April 30, 1990, were $60,195,000, a 31.7-percent increase over the quarter ended April 30, 1989 ($45,697,000). For the six months ended April 30, 1990, net sales were $122,238,000, 40.0 percent greater than the $87,292,000 of net sales in the six months ended April 30, 1989.

Net income for the quarter and six months ended April 30, 1990, was $4,737,000 ($.36 per share) and $10,560,000 ($.80 per share), respectively. These amounts represent 18.9-percent and 48.7-percent increases over net income of $3,984,000 ($.30 per share) and $7,100,000 ($.54 per share) for the quarter and six months ended April 30, 1989, respectively.

The increases in orders and net sales reflect quarterly and year-to-date volume increases in the termination/access and transmission product groups. Quarterly and year-to-date 1990 net sales of copper transmission products reflect the July 1989 purchase of Kentrox Industries Inc.

"The increases in net income were attributable to gross profit increases resulting from more favorable sales product mix and factory efficiencies associated with greater sales volume in 1990," stated Charles M. Denny, Jr., chairman and chief executive officer. "The gross profit increases were reduced by higher operating expenses, lower interest income, goodwill amortization and a higher effective income tax rate. The lower interest income and goodwill amortization reflect the July 1989 acquisition of

Kentrox. Given the results achieved in the first half of 1990 and the information now available to us, and barring unforeseen events, we believe that the company's results for the second half of the year will be comparable to the first-half results," added Mr. Denny.

ADC Telecommunications Inc. designs, manufactures and markets a wide variety of electronic and electromechanical circuit management devices used by telephone companies and in large private telecommunications networks.

Net sales for the quarters and six months ended April 30, 1990, and 1989, classified by product group, detailed statements of income for the quarters and six months ended April 30, 1990, and 1989, and balance sheets as of April 30, 1990, and Oct. 31, 1989, follow.

PHILADELPHIA (MAY 29) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMC) (IMM) announced today that it has received two separate orders totalling approximately $2 million for the purchase of Ultraphone(R) wireless radiotelephone systems.

These orders are scheduled to be shipped in the second quarter of 1990. The first order in excess of $1.3 million was received from a major international telephone company for five Ultraphone systems to be used for industry and tourism. According to Jim Bracknell, executive vice president of IMM, "This is the largest single purchase order received to date for Ultraphone, and it represents a significant entry into the international market." He commented further, "IMM has begun to establish a network of distributors who will market the Ultraphone system internationally."

The second purchase order valued at more than $600,000 was received from a large independent U.S. telephone company for Ultraphone systems that will provide wireless communications services to their customers.

IMM is a world leader in wireless digital access technologies. The company is engaged primarily in the production, sale and installation of Ultraphone, a digital radiotelephone system. Ultraphone systems are currently operated by telephone companies in the United States, Canada and Mexico.

WASHINGTON (MAY 29) PR NEWSWIRE - Smart cards, those credit card-sized vinyl wafers with built-in integrated chips, will soon be able to function as identification cards by displaying their owners' portraits, according to an announcement today by Polaroid Corporation (NYSE: PRD) in Washington at the Smart Card Applications and Technologies Conference & Exposition.

Polaroid is previewing the PhotoBond Security System, a film and laminating system that will be the first capable of permanently bonding full-color photographic portraits to vinyl cards without covering the chip contact points or adding significantly to the thickness of the card. The new system can also be used with magnetic stripe cards and paper documents such as diplomas, professional licenses and certificates of title.

Personal photos have proven to be the most effective means of confirming entitlement as well as providing access and area control. Studies have shown that personalizing identification with photographs adds to the pride and responsibility of the bearer.

Previous attempts to add pictures to smart cards have covered the metal contact points, making the chips inoperative, or wrapped the cards in thick protective pouches exceeding the tolerances of industry-standard card readers. Other problems included poor picture quality and emulsions that scratched easily or could be replaced by bogus pictures.

PhotoBond pictures, including a durable overlaminate, add no more than two mils to the thickness of the cards and are sized to avoid the card contact areas. Because PhotoBond images are transparent, they display company seals, logos and visible or invisible security emplems printed on the card surface. Working as a team two experienced operators can produce as many as 60 PhotoBond cards per hour.

As with all Polaroid instant photography, an operator using a PhotoBond system can confirm on-the-spot that the equipment has performed satisfactorily and that the photo has captured the subject properly. In addition there is no time spent traveling back-and-forth to a laboratory, no confusion matching portraits to documents and no fear of cards being lost in the mail.

No price has been set for the system, which will be available in limited quantities later this year.

RALEIGH, NC (MAY 29) PR NEWSWIRE - Texfi Industries, Inc. (NYSE: TXF) today reported that it achieved record sales of $67,090,000 in the second quarter of 1990, or 13 percent above sales of $59,461,000 in the second quarter of 1989. The sales increase was primarily the result of acquiring Kingstree Knits, a T-shirt manufacturer, late in fiscal 1989.

Net income for the three-month period ended May 4, 1990, was $1,496,000, compared with $3,412,000 in the second quarter of 1989. Texfi has now reported 16 consecutive profitable quarters. Earnings per share were $.09 versus $.34 per common share a year ago.

L. Terrell Sovey Jr., chairman and chief executive officer stated, "Although operations showed improvement over the first quarter, we continued to curtail most manufacturing schedules during the period because of slow order activity. Furthermore, the relocation and consolidation of three narrow fabrics operations from New England to North Carolina continued to adversely affect results.

"However, the second half of fiscal 1990 appears to be substantially better than the first half. Unfilled orders are now 26 percent ahead of the same period a year ago, and most of our operations will return to more normal schedules. In addition, the narrow fabrics consolidation should be behind us by the end of June.

"Based on Texfi's overhead expense now being reduced to nearly 5 percent

of sales, and assuming incoming order activity remains good, the third and fourth quarter results should be much improved and will allow us to finish the year in a very positive fashion."

Texfi Industries, Inc. is in the business of manufacturing and marketing various textile and apparel products.

#90149p3003 05/29/1990 ~PR Newswire

SAN JUAN, PUERTO RICO (MAY 29) PR NEWSWIRE - The board of directors of First Federal Savings Bank of Puerto Rico (NASDAQ: FFPR), responding to regulatory requirements, announced today that it has suspended payment of its quarterly 13 cent-per-share dividend for the quarter ending June 30, 1990, on the 3,850,000 total outstanding common stock held by its shareholders.

Chairman and Chief Executive Officer Mariano J. Mier, who made the announcement following the board's decision, indicated, "This action was taken in response to regulatory capital requirements stipulated under the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA)."

The bank, according to Mier, does not meet newly enacted core capital requirements but is, nonetheless, in compliance with two other regulatory capital requirements imposed by FIRREA -- tangible capital and risk-based capital.

"Once the bank reaches new core capital requirements mandated by FIRREA, we would resume payment of quarterly dividends to our stockholders," Mier said.

First Federal, with $84,287,369 as of March 31, 1990, in total capital, or 4.3 percent of total assets computed following generally accepted accounting principles (GAAP), has been in discussions with regulators since August 1989 and is in the process of negotiating an exchange, repurchase, or redemption of $34,293,800 in FDIC-held permanent preferred stock, considered part of the institution's capital previous to the enactment of FIRREA regulations in August of 1989. The outcome of this transaction, according to Mier, would significantly improve the core capital position of the institution.

First Federal Savings Bank of Puerto Rico is in non-compliance with core capital regulatory standards due to the FIRREA spurred disallowance of $34,293,800 in previously accepted cumulative perpetual preferred stock held by the Federal Savings and Loan Insurance Corporation Resolution Fund.

The amount of capital in preferred stock held by FDIC had originally been transferred to the thrift in 1981 as $35 million in income capital certificates as part of a supervisory agreement through which the regulatory agency assisted the institution following three consecutive years -- 1980-1982 -- of losses totaling $58 million that produced an accumulated capital deficit of $25 million.

The $35 million capital infusion, coupled with the recruitment of a new board of directors and a management team headed by Mier, currently chairman of the board and chief executive officer, helped turn the institution, in less than a decade, from a traditional thrift, earning the regulatory label of a "Phoenix" institution -- the only one of the five so named to survive the industry's troubles -- into a top-rated diversified financial services institution.

First Federal currently operates a 28-branch network in Puerto Rico and the U.S. Virgin Islands and three in Florida, operating under its mainland subsidiary First Florida Savings Bank. Additionally, the bank operates First Tropical Mortgage, an Orlando-based mortgage origination company, established to service the growing Hispanic community of central Florida.

WASHINGTON (MAY 29) PR NEWSWIRE - U.S. Sen. Robert C. Byrd (D-W.Va.) announced today the award of a $15.7 million lease, over a 20-year period, to an Eastern Panhandle firm for locating the U.S. Coast Guard's national Operations Computer Center at a Berkeley County, W.Va., site.

Byrd said the General Services Administration (GSA) awarded the contract to Ken Lowe of Panhandle Venture II, Shepherdstown, W.Va., for the construction of a 35,770-square-foot, single-story masonry building at Liberty Business Park along Route 9 in Berkeley County.

"The location of the Coast Guard's national computer center in West Virginia will be a boon to the state's economy -- to the tune of $5 million annually," Byrd said. "The center, when fully operational, is expected to employ 70 to 90 people, including military, civilian and support personnel and will strengthen the Coast Guard's ability to wage war against drug traffickers."

The Coast Guard made its decision to move to the Eastern Pandhandle after reviewing sites in West Virginia, at Byrd's request, for the relocation of its national computer center from Governor's Island, N.Y.

GSA officials told Byrd that under the build-to-lease contract, construction is expected to begin by July 1990 and should be completed by May 1991.

"I am told the new building is expected to be completed and ready for occupancy by June 1991," Byrd said. "This is great news. I am anxious to see this project move forward."

Byrd said the computer center is an active military unit that supports Coast Guard search and rescue and law enforcement missions, the Marine Safety Information System, the Joint Maritime Information Element and the war against drugs.

ANN ARBOR, MI (MAY 29) PR NEWSWIRE - Great Lakes Bancorp (NASDAQ-NMS: GLBC) today announced that it has filed a registration statement containing an offering circular with the Office of Thrift Supervision for the issuance of up to 1,500,000 preferred units, each consisting of one-tenth share of noncumulative perpetual preferred stock, Series A, and one warrant to purchase one-quarter share of Great Lakes' common stock. In addition, the underwriters have been granted a 30-day option to purchase up to 225,000 additional preferred units. The price will be $10 per unit; the minimum purchase will be 100 units.

Quarterly dividends will be paid, if declared, at an annual rate of $10 per share of preferred stock through June 30, 1995. Subsequently, the dividend rate will adjust quarterly to 250 basis points over the one-year Treasury Bill rate, multiplied by the $100 stated value of the preferred

stock. However, the dividend rate for any quarterly period will not be less than $10 per annum or greater than $15 per annum.

The offering will be underwritten by Roney & Co. and The Ohio Company. A prospectus describing the offering will be available from Roney & Co., One Griswold, Detroit, MI 48226, or from The Ohio Company, 155 E. Broad St., Columbus, OH 43215.

Great Lakes Bancorp has 60 branches in Michigan and Indianapolis, and operates Dollar Federal Savings Bank, a subsidiary with five branches in the north Cincinnati area. Great Lakes also operates Great Lakes Mortgage Co., a mortgage banking subsidiary. With $3.5 billion in assets, Great Lakes Bancorp is Michigan's second-largest savings bank.

Note: An offering circular relating to these securities has been filed with the Office of Thrift Supervision but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the offering circular becomes effective. This news release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

SAN DIEGO (MAY 29) PR NEWSWIRE - The board of directors of Imperial Corporation of America (ICA), parent company of Imperial Savings Association (ISA), will not seek a stay pending appeal from a ruling last week by Judge Judith N. Keep denying its motion for a preliminary injunction to prevent the appointment of a receiver for ISA.

Instead, a spokesman for ICA said the company will pursue its appeal rights in the ordinary course. ICA determined that consistent with its obligations to its creditors and shareholders, and in light of the comprehensive ruling issued by Keep, the likelihood of obtaining a stay pending appeal seemed remote. In addition, the issues would require fuller briefing than would be possible within existing time constraints which required that any motion for stay be heard by the Ninth Circuit Court of Appeals today.

#90149u0144 05/29/1990 ~United Press International

(MAY 29) UPI - The Texas Longhorns received the kind of pitching they felt they needed Monday in the final game of the Central Regional in the NCAA baseball tournament. But the Cal State-Fullerton Titans did, too.

Chris Gaskill and a stingy Texas defense combined to limit the Titans to 3 runs, but James Popoff, pitching on two days rest, hurled a four-hit shutout, leading Cal State-Fullerton to a 3-0 win over Texas and a berth in the College World Series.

''Popoff had great command of his pitches,'' Texas Coach Cliff Gustafson said. ''And he didn't have to throw many early in game. He got a lot of ground balls and his infield took care of every one of them.''

Popoff, who pitched in Saturday's 6-3 win over Creighton, held Longhorn batters to four hits and struck out three while improving to 13-4.

The Titans, 36-21, swept through the regional without a loss, beating Texas, last year's College World Series runner-up, twice in as many days. The Longhorns, 51-17, dropped Sunday's contest, 5-2.

Gaskill, the Texas sophomore who got credit for the win in the Longhorns' 11-9 victory over Creighton Sunday, pitched a complete game. He surrendered nine hits and struck out six to finish the season at 7-4.

''There is no way I thought we could get nine innings out of Chris,'' Gustafson said. ''If you would have told me before the game that he would go nine and only give up three runs, I would have liked our chances.''

Cal State-Fullerton returns to the College World Series, which begins Friday in Omaha, Neb., after missing the playoffs last season.

-- AROUND THE NCAA --

In other tournament action Monday, Oklahoma State knocked off Arizona State 10-5, to take the West II regional title; Stanford held off San Diego State 6-2, winning the West I crown; Mississippi State nipped Florida State 4-3, grabbing the South II championship; Georgia Southern edged South Alabama 5-4 in the Midwest; LSU outlasted Southern Cal 7-6; and North Carolina State faced Miami in the Atlantic.

Oklahoma St. 10, Arizona St. 5

At Tempe, Ariz., Oklahoma State's Steve Dailey hit a three-run homer and drove in five runs to lead the Cowboys, 53-16, to the championship of the West II. Dailey, a left fielder, was 3-4 in a Cowboy attack that produced three runs in the first inning, one in the third and three in the fourth to build a 7-0 lead before the Sun Devils, 52-16, scored one in the fifth.

Stanford 6, San Diego St. 2

At Stanford, Calif., Mike Mussina throttled San Diego State, giving up

only three hits to back a 13-hit attack and lead the Cardinal, 56-10, to the championship of the West I. The Cardinal, which won it all in 1987 and 1988 but failed to make the trip last year, was undefeated in the regional. Loser Kevin Nielsen gave up two runs and three hits in the first inning and was followed by three relievers.

Mississippi State 4, Florida State 3

At Starkville, Miss., Jon Shave's two-out single in the eighth inning capped a three-run outburst, pacing Mississippi State to the title in the South II. The Bulldogs, 49-19, trailed 3-1 in the eighth inning off Florida State loser Brad Gregory, 5-2. Bobby Reed, 15-2, went the distance for the Bulldogs.

Georgia Southern 6, South Alabama 5 At Wichita, Kan., Rob Fitzpatrick homered and drove in four runs to lead Georgia Southern to the title in the Midwest. Georgia Southern, 50-17, got four runs in the fifth off loser Mike Zimmerman, 12-7, who went the distance, giving up nine hits and striking out 10. Joey Hamilton, 18-3, went the final 5 2-3 innings for Georgia Southern.

LSU 7, Southern Cal 6

At Baton Rouge, La., Rich Cordani's two-run homer in the bottom of the seventh inning helped Louisiana State defeat Southern California for the South I crown. The victory sent LSU to the College World Series for the fourth time in the last five years. Mark LaRosa pitched the last 2 2/3 innings to record the win, his second of the tournament, to up his record to 6-2.

#90149u0164 05/29/1990 ~United Press International
(MAY 29) UPI - Kirby Puckett knew sooner or later that he would regain the hitting form that made him the league's best hitter last season.

That time came Monday afternoon when Puckett slugged two home runs, the second being a three-run shot in the seventh inning, to lift the Minnesota Twins to a 6-4 victory over the Baltimore Orioles.

''I'm seeing the ball a lot better now,'' Puckett said. ''Sooner or later, I knew I was going to start to hit. I've worked too hard for it not to.''

The 1989 batting champion, who spent the afternoon pretending to be a home run king, didn't change his hitting approach even though it produced tremendous results.

''I was just trying to hit the ball, I wasn't trying to get a home run,'' the All-Star outfielder said.

With the Orioles leading 4-2 in the seventh and after Junior Ortiz and Dan Gladden reached base, Puckett ripped a 2-2 pitch from reliever Joe Price over the fence for his eighth homer of the year.

''That's why (Puckett) is called one of the impact players in the game. When he swings the bat, something's going to happen,'' Twins Manager Tom Kelly said.

Baltimore manager Frank Robinson said Price was playing the percentages when he offered the breaking ball to Puckett, a fastball hitter.

''It's not always the type of pitch that is going to get a batter out,'' Robinson said. ''Any pitch will get a guy out, but sometimes, he's going to hit anything you throw at him, espcially a guy like Puckett. He's just a tremendous player.''

Gene Larkin and Gary Gaetti provided solo shots for the Twins, who have won five straight.

Juan Berenguer, 4-0, picked up the victory in relief and John Candelaria worked the ninth for his second save. Price, 0-2, took the loss.

The Orioles took a 1-0 lead in the first when Joe Orsulak tripled and scored on a sacrifice fly by Cal Ripken.

Puckett evened the score in the first with his seventh homer of the year.

In the second inning the Orioles took a 2-1 lead on Randy Milligan's first homer.

The Orioles extended their lead in the third. After Phil Bradley walked with one out, Orsulak reached on a fielder's choice and David West yielded two straight walks to load the bases. Orsulak then scored easily from third when West unleashed a wild pitch.

Rene Gonzales' RBI groundout in the fourth pushed the Orioles' lead to 4-1.

Larkin closed the deficit to 4-2 in the fourth on his third homer of the season.

Gaetti capped the scoring with his sixth of the year in the eighth inning.

In other AL games, Cleveland topped California 3-0 in 10 innings, Kansas City edged Detroit 3-2, Seattle nipped Milwaukee 4-3, Chicago clipped New York 2-1, Boston beat Texas 4-3 and Toronto shaded Oakland 1-0.

In the NL, it was: Chicago 5, San Francisco 1; Pittsburgh 6, Los Angeles 5; Montreal 4, Atlanta 1; Houston 5, St. Louis 1; and San Diego 9, Philadelphia 5. New York at Cincinnati was postponed by rain.

-- AROUND THE AL --

Indians 3, Angels 0, 10 innings

At Anaheim, Calif., Brook Jacoby singled home the game's first run with one out in the 10th inning and Cory Snyder followed with a two-run homer, helping Cleveland snap California's seven-game winning streak. Jim Abbott, 2-4, allowed just two infield singles through nine innings before Candy Maldonado's single began the rally. Cecilio Guante, 2-2, earned the victory and Doug Jones pitched his 16th save.

Royals 3, Tigers 2

At Kansas City, Mo., Bret Saberhagen won his third consecutive complete game to lead Kansas City to its third straight victory. Saberhagen, 4-3, hasn't lost since May 1 and has surrendered just four runs over his last three starts. Brian DuBois, 2-3, took the loss.

Mariners 4, Brewers 3

At Seattle, Darnell Coles delivered a two-run, pinch-hit single through a drawn-in infield, helping the Mariners snap a four-game slide. With the victory, Seattle improved its home record to 9-14. Milwaukee has dropped the first six games of an 11-game road trip. Erik Hanson, 5-3, was the winner.

White Sox 2, Yankees 1

At Chicago, light-hitting Robin Ventura drove in the winning run with a two-out single in the seventh inning, sending New York to its third straight loss. Eric King, 4-0, allowed three hits in eight innings and Bobby Thigpen picked up his 15th save. Tim Leary, 3-5, took the loss.

Red Sox 4, Rangers 3

At Arlington, Texas, Tony Pena doubled home the tying and go-ahead runs in the eighth, extending the Rangers' home slide to a club record-tying eight games. Boston broke its own three-game losing skid while the loss dropped Texas into last place in the AL West for the first time in three years.

Blue Jays 1, Athletics 0

At Oakland, Dave Stieb hurled a three-hitter and kept Rickey Henderson off the bases, helping Toronto halt the Athletics' six-game winning streak. Stieb, 6-2, struck out three and walked one in recording his first complete game of the season and extending Toronto's winning streak to four games.

#90149u0181 05/29/1990 ~United Press International

(MAY 29) UPI - A senior Nicaraguan Contra official said Monday that the U-S-backed rebels will NOT be disarmed and disbanded by the scheduled June 10th deadline. The Contra official says his group would have to demobilize one-thousand rebels a day to meet the deadline in less than two weeks. His comments come amid growing acrimony between the Contras and Nicaragua's Sandinista army.

A Missouri Highway Patrolman says authorities may NEVER determine what caused a two-car head-on collision along a rural highway Monday. The crash killed six people, including four members of an Arkansas family. A six-year-old member of the family survived the accident. He is listed in critical condition.

Panama's foreign minister says he wants to stem the illegal flow of drugs. But he said Monday that his willingness to stop drug trafficking does NOT extend to turning over jurisdiction of Panamanian waters to the U-S Coast Guard. A current U-S proposal calls for Panama to allow Coast Guard vessels to patrol the Latin American nation's waters to curb drug running.

Authorities in Los Angeles are trying to determine what sparked an operating room fire Monday morning that fatally burned a traffic accident victim. The victim had just undergone surgery when the sheets on her gurney caught fire. Investigators are testing equipment and materials in the charred U-C-L-A Medical Center operating room to determine the cause

of the blaze.

#90149u0185 05/29/1990 ~United Press International
(MAY 29) UPI - Britain's Northern Ireland Secretary says his talks Monday with Irish Prime Minister Charles Haughey could bring about an end to the political stalemate in Northern Ireland. Secretary Peter Brooke and Haughey discussed Brooke's proposal to bring together the two major political parties in Northern Ireland and bring about local rule in the embattled region.

Archbishop of Canterbury Dr. Robert Runcie told U-P-I Monday that he discussed with Argentine President Carlos Menem the presumed continued captivity in Lebanon of British hostage Terry Waite. Runcie said Menem, who is of Syrian descent, has promised Argentina would do what it could to assist to allay British anxieties regarding the situation.

#90149u0191 05/29/1990 ~United Press International
(MAY 29) UPI - If the Pittsburgh Pirates wind up winning the National League East, they will remember what happened on Memorial Day.

Jose Lind stroked a two-run, bases-loaded single with two out in the ninth inning and Don Slaught scored on a throwing error by right fielder Hubie Brooks, capping a five-run rally that lifted the Pittsburgh Pirates to a 6-5 victory over the Los Angeles Dodgers.

Making the victory all the better was the fact that the Pirates felt Dodger starter Tim Blecher threw behind Slaught, who once required six hours of surgery when he was hit in the face by a pitch.

Slaught calmly took first base, but Bobby Bonilla led a benches-clearing argument around the mound, and home plate umpire Mark Hirschbeck issued the mandatory warning.

''It was one of the most exciting comebacks I've seen in all my years here '' said four-year veteran Bob Kipper, one of four Pirate pitchers used in the game.

''I think they think I'm a head-hunter,'' Belcher said. ''One pitch gets away from me, and now I'm a head-hunter. That's not right.''

With the Pirates trailing 5-1, Wally Backman opened with a single off reliever Pat Perry and advanced on a double by Jay Bell. Backman scored on a wild pitch, Bell moving to third. Andy Van Slyke walked and Bell scored on a forceout by Bonilla, making the score 5-3. One out later, Sid Bream

singled Bonilla to third.

After Jay Howell, 1-3, replaced Perry, Gary Redus ran for Bream. Slaught followed with a walk to load the bases. Lind then singled to right, tying the score. On the play, Brooks fielded the ball and threw past home, allowing Slaught to score and snapping Los Angeles' five-game winning streak.

''I just can't believe it. I absolutely can't believe it,'' Los Angeles Manager Tom Lasorda fumed. ''We had that game in our hands.''

Bill Landrum, 1-0, pitched the ninth for the victory.

In other games, Chicago downed San Francisco 5-1, Houston defeated St. Louis 5-1, Montreal topped Atlanta 4-1, and San Diego outlasted Philadelphia 9-5. New York at Cincinnati was rained out.

In the American League, it was: Minnesota 6, Baltimore 4; Cleveland 3, California 0 in 10 innings; Kansas City 3, Detroit 2; Seattle 4, Milwaukee 3; Chicago 2, New York 1; Boston 4, Texas 3; and Toronto 1, Oakland 0.

-- AROUND THE NL --

Cubs 5, Giants 1

At Chicago, Jerome Walton hit a two-run triple and a sacrifice fly, helping the Cubs overcome a call in which crew chief Harry Wendelstedt took a home run from Ryne Sandberg by overruling third-base ump Bill Hohn. Mike Harkey, 5-1, went five innings before leaving with a stiff right shoulder.

Astros 5, Cardinals 1

At Houston, Bill Gullickson, 3-3, notched his 100th NL victory, Alex Trevino drove in two runs and Ken Caminiti added a two-run homer, handing St. Louis its fourth straight loss. Dave Smith pitched 1 1-3 innings to record his ninth save. Greg Mathews, 0-5, was the loser.

Expos 4, Braves 1

At Atlanta, Mike Fitzgerald belted a two-run homer and Andres Galarraga added a solo shot, leading Montreal in a game delayed 2 hours and nine minutes by rain. Expos starter Dennis Boyd allowed one hit over three innings before suffering a strained hip flexor while batting in the third. He will miss at least one start. Kevin Gross, 6-3, allowed five hits over six innings.

Padres 9, Phillies 5

At Philadelphia, Tony Gwynn singled home pinch-runner Joey Cora in the ninth, snapping a tie and giving San Diego its fourth victory in its last five games. Mark Grant, 1-0, was the winner. Jeff Parrett, 2-3, took the loss. Padres starter Bruce Hurst held the Phils hitless for six innings.

-30- 3870

#90149u0259 05/29/1990 ~United Press International

FORTESCUE, N.J. (MAY 29) UPI - The Coast Guard refloated a cruise ship mired for two days in the sands of the Delaware Bay early Tuesday after its 885 passengers were ferried ashore and its fuel tanks emptied, officials said.

Coast Guard spokesman James Weakley said the 642-foot M.V. Regent Star ''popped up'' by 2 a.m. after an approximate hourlong, high-tide effort to free it from the sandy bay floor, where it grounded early Sunday.

''It's afloat, and now we're trying to get it to Big Stone Beach anchorage and to assess what if any damage there is,'' said Weakley. He said there had been no immediate reports of pollution.

The vessel was to be guided to the lower Delaware Bay near Slaughter Beach Del.

Earlier plans to refloat the 24,000-ton cruise ship, which had settled on its own anchor, were canceled because of fears the anchor could rip the hull, puncture the bottom tanks and spew fuel into the bay.

Petty Officer David Oney, a Coast Guard spokesman, said the late-night transfer of the fuel into tanks tucked in the inner reaches of the ship was difficult because it had become cold and thick sitting in the bottom tanks.

The ship ran aground with 1,306 passengers and crew aboard about 1 a.m. Sunday after the Bahamian-registered Regent Star suffered a small fire in the engine room that cut power to the ship's engines and its steering.

The ship, owned by Regency Cruise Lines, then drifted into the sand in 22 feet of water about 5 miles off Fortescue. No one was injured in the grounding, officials said.

The 885 passengers left the ship around 4:15 p.m. and boarded the Cape May-Lewes ferry, which was chartered by Regency Cruise Lines. They cheered as the ferry docked at Lewes, Del., six hours later.

The passengers were taken off the ship as both a safety precaution and for their convenience, Coast Guard and Regency Line officials said.

Some passengers told a local radio station they were given little information about the situation by cruise ship operators.

Chartered buses waiting near the pier carried passengers to Philadelphia, the cruise ship's original destination, and to airports in Newark, Baltimore, Washington, D.C., and on Long Island, said Ann Burguieres, a spokeswoman for the cruise line.

Crew members were being left aboard because of limited ferry space and because they were needed to operate the ship.

The ship was heading for Philadelphia at the end of a cruise from Nassau in the Bahamas when it grounded.

The ship maintained regular food and beverage service using emergency power and passengers were treating the unintentioned extensions of their holidays as an excuse to celebrate, Burguieres said.

''I hear we missed quite a party,'' she said.

An attempt to use a pair of tugs to pull the ship into deeper water at high tide Sunday afternoon failed.

#90149u0275 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - President Bush, tan and refreshed from a four-day vacation, called a series of meetings with aides Tuesday in final preparation for this week's summit with Soviet President Mikhail Gorbachev.

Bush promises to be rested as well as ready when he and Gorbachev hold their opening meeting of the post-Cold War era at the White House Thursday.

''We've got a big agenda and I look forward to it,'' Bush said Monday before returning to the White House from a long Memorial Day weekend at his summer home in Kennebunkport, Maine.

Bush called a series of pre-summit meetings Tuesday and Wednesday with a parade of top administration officials.

''Two days of intensive consultations,'' said Bush, who is also boning up for the talks with a pair of ''big fat'' briefing books.

Bush and Gorbachev will hold talks at the White House Thursday and Friday, and then spend much of Saturday at the presidential retreat of Camp David, Md.

On Sunday, the two leaders are to hold a joint news conference at the White House.

Arms control, conventional forces and chemical weapons will be among the top summit topics.

Bush has conceded, however, that U.S.-Soviet differences over German reunification and the Baltic republics' drive for independence may impede overall progress in superpower relations.

In addressing a Memorial Day ceremony Monday in Kennebunkport, the president said he would welcome Gorbachev with ''open arms.''

''But we (the United States) must stand on our principles when we discuss world peace. We must stand on our principles when we discuss the stability of Europe, or the fate of the countries around the world that yet are not free,'' he said.

''And that's exactly what I plan to do - refurbished, I might add, by these beautiful four days right here in our beloved Kennebunkport.''

The summit coincides with mounting problems at home for Gorbachev. He faces ethnic unrest as well as economic woes underscored by a recent wave of panic buying by consumers fearing dramatic price increases.

Bush, asked if Gorbachev is in danger of losing power, said, ''My own personal opinion is that he is pretty darn strong.''

He also stressed, though, ''It's not our business in the United States to sort out the other person's economic problems. We've got some of our own.''

''But it is our business to understand them, to make clear to him what we can do and those things we can't do,'' he said.

''And so I'm taking a lot of time to try to assess the economic situation there.''

MANAGUA, NICARAGUA (MAY 29) UPI - A high-ranking Contra official said the scheduled June 10 deadline for the U.S.-backed rebels to completely disarm and disband would not be met.

The comments Monday came as the rebels and Nicaragua's Sandinista army stepped up their war of accusations.

''It is impossible to disarm and demobilize 1,000 combatants a day,'' said Alejandro Ortega, referring to more than 10,000 rebels still carrying weapons in security zones in Nicaragua where disarmament is to occur.

Contra leaders broke off talks with the government Friday after they allegedly heard a report that up to 19 Contra irregulars were killed by Sandinista troops last week near the border between Matagalpa and Zelaya provinces, about 200 miles northeast of Managua.

Members of an Organization of American States commission sent to investigate the incident said they were unable to find any information that the killings had occurred.

The official Sandinista newspaper,Barricada, said Monday the report was false and accused the Contras of inventing the incident.

The Sandinista army continued to accuse Contra guerrillas Monday of alleged minor crimes and attacks on civilians.

A written statement bearing the Defense Ministry stamp said ''the Contras continue violating the (April 19) cease-fire ... with terrorist attacks on the civilian population and economic targets.''

The statement accused rebels of stealing 100 head of cattle in the Atlantic Coast region last week and taking more than $2,000 worth of other items near Matagalpa.

One Contra source said the government of President Violeta Chamorro asked Contra leaders Monday to resume talks in an effort to speed disarmament.

The talks have been mostly about government pledges to provide the Contras with land, money, food, jobs and other needs after the demobilization is completed. There was no word on when the talks might resume.

Contra leader Israel Galeano, known as Commander Franklin, said last week there would be a mass demobilization of rebels Wednesday in each of the five security zones in Nicaragua where they have concentrated for the disarmament process.

Another Contra leader, Oscar Sovalbarro, alias Commander Ruben, said the disarmament was still under suspension until further notice, and he did not say whether the Wednesday demobilization was still planned.

Some 1,000 Contras in Nicaragua and another 700 in exile in Honduras have surrendered their weapons, according to U.N. officials who have estimated

there are more than 15,000 Contras.

#90149u0313 05/29/1990 ~United Press International

(MAY 29) UPI - Officials in Poughkeepsie, New York, say a custody exchange between a man and his estranged wife turned bloody Monday when the man pulled a pistol. The man had placed the couple's 10-month-old son in his car and then brandished a handgun. He fatally shot his wife and her mother before turning the gun on himself. He survived his self-inflicted wound.

The Coast Guard has started pumping fuel out of the tanks of a cruise ship mired on the sandy bottom of the Delaware Bay off the New Jersey coast. The M-V Regent Star's fuel is being transferred from its bottom tanks in hopes the 642-foot vessel can be dislodged from the bay's bottom at high tide early Tuesday morning. Earlier, the ship's 885 passengers were ferried to shore after spending Sunday night aboard the stranded vessel.

The Irish Republican Army admitted Monday that I-R-A hitmen mistakenly gunned down a pair of Australian lawyers vacationing in Holland. The fatal attack occurred Sunday night in Roermond , a town popular with British troops stationed in Holland. The two triggermen fled across the border into Belgium after shooting the attorneys. Police have offered a 72-thousand-dollar reward for information leading to the capture of the gunmen.

Government officials in Singapore Tuesday ordered tobacco manufacturers to withdraw thousands of so-called ''Children, Don't Smoke'' posters. The official ban follows a public outcry which criticized the advertisements as misleading. The posters- placed in tobacco retail outlets- showed a boy with a cigarette in his mouth. Critics charged the ad used reverse psychology to lure children to pick up the habit to prove their maturity.

-30- 1847

#90149u0321 05/29/1990 ~United Press International

BAGHDAD, IRAQ (MAY 29) UPI - President Saddam Hussein opened a three-day Arab summit with harsh words for the United States and Israel, but the meeting's potential impact on this week's U.S.-Soviet summit appeared weakened by the absence of rival President Hafez Assad of Syria and other leaders.

The United Arab Emirates news agency, WAM, said others not attending Monday were Algerian President Chadli Benjedid, Moroccan King Hassan II, Sultan Qaboos of Oman and Lebanese President Elias Hrawi. The agency gave no reasons for their absence.

Saddam, addressing the opening session of the three-day summit, sharply attacked U.S. policy toward Arab nations and warned Israel against attacking any Arab nation.

His hard-line statements, which diplomatic sources said were aimed at portraying the Iraqi leader as the champion of the Arab world, came as Monte Carlo Radio broadcast unconfirmed reports of an Israeli military mobilization along its borders.

''If Israel commits any aggression or carries out a strike (against Arabs) we will hit back strongly,'' Saddam said. ''If it uses mass destruction weapons against our nation, we will use all our mass destruction weapons against it. ... We will not give up any Palestinian territory.''

Saddam said the United States was to blame for what he called Israel's aggressive policy, because the United States provides Israel with material and political assistance. He said it was up to Arabs to speak with a single voice to persuade Washington that U.S. interests lie in friendship with the Arabs.

Arab League officials said the closed-door Baghdad meeting was convening ahead of the Washington summit between Soviet leader Mikhail Gorbachev and President Bush to try to present to the superpowers with a united Arab front and solid proposals for Middle East peace.

Diplomatic sources, however, said the absence of the five Arab leaders was likely to weaken Arab efforts at unity.

In other summit developments:

-OPECNA, the official news agency of the 13-member Organization of Petroleum Exporting Countries, quoted Iraqi Foreign Minister Tariq Aziz as saying oil would also be discussed at the summit. The cartel is trying to persuade chronic overproducers, such as Kuwait and the United Arab Emirates, to reduce output to stop falling prices of crude.

-State-owned Baghdad Radio said ''the pan-Arab summit will focus on the mass Soviet Jewish migration (to Israel) and the Western smear campaign against Iraq.''

Arab leaders began their deliberations at a time of increased tension in the Israeli-occupied West Bank and Gaza Strip, after an Israeli man last week shot to death seven Palestinian laborers near Tel Aviv.

The killings sparked riots in the occupied territories and in neighboring Jordan, which hosts a large Palestinian population.

Palestine Liberation Organization leader Yasser Arafat addressed the U.N.

Security Council in Geneva Friday and reiterated his commitment to the Middle East peace process and urged the United Nations to send military patrols to the Gaza Strip and West Bank.

But Israel, stating it had conquered the territories in 1967 after ''Arab aggression'' and was solely responsible for security there, immediately rejected Arafat's call for U.N. forces.

Assad, who had made it clear he would not attend any summit held in the capital of his arch ideological foe, Iraq, has quietly brushed aside Arafat's appeals for Arab unity.

The Syrian leader maintains cool ties with Arafat, and hosts a number of radical, anti-Arafat Palestinian groups.

Iraq, on the other hand, has been one of Arafat's main backers and, unlike Syria, has not questioned Egyptian and U.S. attempts to promote dialogue between Israel and a non-PLO Palestinian delegation.

(MAY 29) UPI - Houston authorities say at least 13 people were injured Monday when part of a crowd at a rap music concert got upset over delays during the free event and began throwing bottles. Police say they made about six arrests... including two on gun possession charges. The trouble broke out at Hermann Park, where an estimated 10-thousand people gathered for a radio station-sponsored concert that included the bands Queen Latifah, Doc, and 2 Live Crew. At least 100 police cars were called to quell the disturbance. The disorder forced authorities to cancel the rest of the concert and close the park.

Primary elections are being held Tuesday in Kentucky and Arkansas. In Kentucky, Democrat Harvey Sloane is expected to get the nod over fellow Democrat John Brock to earn the right to challenge G-O-P Senator Mitch McConnell in November. Arkansas election officials expect slightly more than half of the state's registered voters to cast ballots. The Arkansas vote will determine who'll vie for governor in November.

The Mexican government announced Monday that it will NO longer allow the trade of sea turtle skins and shells. The move follows intensive efforts by U-S and Mexican environmental groups to preserve endangered turtles, such as the olive ridley. A spokesman for the environmental group Greenpeace says if the decree is properly enforced, it may lead to an end of the use of turtle skins and shells for Japan's fashion industry.

(MAY 29) UPI - Around the world... around the clock... the latest news from U-P-I.

President Bush is back in Washington after a four-day holiday weekend in Kennebunkport, Maine. Bush scheduled a series of meetings with aides today to make final preparations for his meetings with Soviet President Gorbachev. Bush promises to welcome Gorbachev with ''open arms.'' Their first meeting will be Thursday.

Canadian leaders are preparing to welcome Soviet leader Gorbachev with what sources say are velvet gloves. He's due in Ottawa today for a two-day visit. Relations between Canadian Prime Minister Mulroney and Gorbachev have been testy at times.

About 100 residents of Walnut Creek, California, had to evacuate their homes on Memorial Day. A two-month-old earthen dam at a flood project collapsed during a heavy rain. The flood-waters created small lakes as deep as 10 feet. Damage is estimated at about one-Million dollars to homes and dozens of parked vehicles, that were swamped by the water.

People who live along the Trinity River in southern Texas report the high waters around their homes have started to recede. But officials say it will be weeks before the discharge from the Lake Livingston Dam is back to normal.

A crowd threw rocks and bottles outside a police station in Jersey City, New Jersey, yesterday. Police say the violence began when a television crew arrived while the crowd was protesting the arrest of four men who had been drinking on a street corner. Police say one of the arresting officers was hit and the other was knocked down.

#90149u0523 05/29/1990 ~United Press International

WEST PALM BEACH, FL (MAY 29) UPI - A woman shot at point-blank range by a gunman dressed as a clown died of her injuries, Palm Beach County deputies said Tuesday.

Marlene Warren, 40, died Monday night at Palms West Hospital in Loxahatchee. She had been in critical condition since the shooting Saturday.

Sheriff's deputies said they were investigating several leads but would not elaborate.

The gunman wore a clown suit, a red fuzzy wig and a white mask with a red bulb nose and big red smile. When Warren answered the door of her home, he handed her a basket of flowers and balloons then opened fire, shooting her in the mouth.

There was no indication of a motive.

#90149u0583 05/29/1990 ~United Press International

JOHANNESBURG, South Africa (MAY 29) UPI - Black leader Nelson Mandela underwent minor surgery during a medical examination and was in satisfactory condition Tuesday at a private clinic, his wife and hospital officials said.

''His health is not in any danger and he'll be spending a couple days with us,'' Park Town Clinic general manager Gordon Cohen told reporters outside the Johannesburg clinic.

Cohen said the 71-year-old Mandela's condition was ''satisfactory'' and

his spirits ''excellent.''

''He came in for a routine checkup and during the routine checkup a minor operation was performed,'' Cohen said. ''It was not related to his prostate and no way indicative of a serious condition and he is well on his way to recovery.''

A medical source at the clinic said Mandela underwent a vasectomy but hospital officials would not go beyond Cohen's announcement. In 1985, while still incarcerated, Mandela underwent surgery for the removal of an enlarged prostate.

Mandela was admitted to the clinic Monday in advance of his departure next week on a trip that will take him to neighboring Botswana and then Paris. Later in the month, the African National Congress leader makes a 10-day, eight-city visit to the United States.

Mandela's wife, Winnie, visited the clinic Tuesday and said the European trip will not be disrupted as a result of her husband's hospitalization.

''He is here for ordinary routine checks and the trip to Europe is on,'' Mrs. Mandela said. ''It will not be affected at all by his being hospitalized here.''

Mandela's gruelling foreign and local trips since his Feb. 11 release have raised some concern among aides over his ability to maintain the pace. He returned last week from a six-nation African tour and addressed two rallies in South Africa over the weekend.

ANC spokesman Ahmed Kathrada said Mandela would be undergoing a ''major test'' that required him to remain at least overnight in the suburban clinic and would have an examination in connection with the 1985 prostate operation.

He said Mandela would also have ''a few days rest'' before his sixth foreign trip.

Mandela, who turns 72 on July 18, had consistenly impressed visitors during his 27 years in prison by his good health and fitness. But he fell ill with tuberculosis in 1988 and was hospitalized in Cape Town for more than a month.

Following his recovery, Mandela was transferred to a rural prison farm where he remained until his release on the orders of reformist President Frederik de Klerk.

Mandela, who led an ANC delegation in the first formal talks with the minority white government this month, is said to undergo daily blood

pressure checks but has not been admitted to a clinic overnight since his release.

PARIS (MAY 29) UPI - Top seed Stefan Edberg was brushed aside in straight sets Tuesday by Spaniard Sergi Bruguera, the first time ever the No. 1 man has lost in the opening round of the French Open.

Bruguera, ranked 46th in the world, thoroughly thrashed Edberg in the Center Court match, 6-4, 6-2, 6-1.

The last time a top-seeded man lost in the opening round of a Grand Slam was in 1967, when Spaniard Manuel Santana fell to American Charlie Pasarell, 10-8, 6-3, 2-6, 8-6.

Santana also was the No. 1 seed at the 1965 French Open when he defaulted in the opening round.

Jennifer Capriati, the 14-year-old American whiz, won the first Grand Slam match of her career, defeating Sylvie Testrud of France, 6-1, 6-1.

#90149u0713 05/29/1990 ~United Press International

BEIJING (MAY 29) UPI - Three sun-burned adventurers in a dusty 78-year-old car led a wheezing convoy of 61 battered vehicles into the Chinese capital Tuesday, completing a 10,000-mile journey that began two months ago in London.

''This was a completely hedonistic adventure. The point was simply to have fun,'' said Graham Rankin, 43, who drove the vintage Lancia Simplex with its owner, John Bryden, and another partner, Clive Press.

''The car was beautiful,'' Rankin said. ''She held up well indeed, except that we kept blowing tires. We used 24 tires altogether.''

The Lancia was the oldest car to negotiate the London-to-Beijing route, which passed through France, West Germany, Austria, Yugoslavia, Greece, Turkey and the Soviet Union before entering China.

Sixty-one vehicles, including two motorcycles, a motorcycle with a sidecar several Land Rovers and a tiny 1962 English Morris joined the London-Beijing Challenge 1990, which began April 17 and was inspired by a 1907 auto race from the Chinese capital to Paris.

''It hasn't been possible to drive across Russia and China since the last

time it was done in 1907,'' Rankin said. ''We have a romantic attraction to the race because our car is very similar to the car that won in 1907.''

Michael Hoffmann, 24, said that after China's crackdown in Beijing's Tiananmen Square last year, he hesitated about taking part in a project sanctioned by the hard-line political leadership.

''There was a moral question about whether to do this since the Chinese were really hyping it,'' said Hoffmann, who drove the equipment-stuffed Morris with Colin Moles.

''But then again, it was a once-in-a-lifetime thing. China's been my dream since I was this big so when the opportunity came, I just did it. We are all travelers, not politicians.''

Several participants said they passed through western China's Xinjiang province without knowing that at least 22 people were killed there in two days of conflict between ethnic Moslems and Chinese troops in the area.

''We heard that something had happened in Urumqi but people didn't want to talk about it,'' Hoffmann said. ''We noticed the concern for security as soon as we entered China from the Soviet Union.''

Participants nevertheless were awed by the giant crowds who greeted their passage through China.

''The crowds were enormous,'' said Hans Aebi, 45, a Swiss mechanic who drove a powerful 1920 Rolls-Royce Silver Ghost with his wife, Jill. ''You didn't ever know if you wouldn't run someone over and kill them.''

#90149u0751 05/29/1990 ~United Press International

(MAY 29) UPI - The latest news details and developments... from around the world and across the nation... by United Press International.

President Bush has a series of meetings lined up with aides today and tomorrow in final preparation for his summit conference with Soviet President Gorbachev.

Bush promises to be rested as well as ready when he and Gorbachev hold their opening meeting Thursday. The president returned to Washington last night after four days of rest and relaxation at Kennebunkport, Maine.

Bush says he and Gorbachev have a big agenda to deal with.

Arms control, conventional forces and chemical weapons will be among the top summit topics. Bush has conceded that super-power differences over

German reunification and the Baltic republics' drive for independence may impede overall progress in super-power relations.

Bush and Gorbachev will hold talks at the White House Thursday and Friday, and then spend much of Saturday at the presidential retreat of Camp David.

On Sunday, the two leaders plan to hold a joint news conference at the White House.

The Soviet leader is on his way to Canada. Gorbachev, his wife, Raisa, and Foreign Minister Shevardnadze have left Moscow and will arrive in Ottawa today .

Gorbachev will spend the better part of two days in Canada in private meetings with Prime Minister Mulroney and other officials. Sources say Canadian leaders will reat Gorbachev with velvet gloves.

#90149u0777 05/29/1990 ~United Press International

(MAY 29) UPI - The first Memorial Day since 23 fresh graves were dug for G-I's killed in the invasion of Panama brought special remembrances of them.

At Fort Sam Houston in San Antonio... Navy Captain Ron Pearson said the soldiers and sailors who invaded Panama were- in his words- ''doing what they were trained to do.'' Pearson added- ''Freedom is ours because others paid a price for our lives. God bless them all.''

President Bush also paid tribute to the servicemen who died in the December invasion that ousted Panamanian dictator Manuel Noriega . Speaking at a Memorial Day ceremony in Kennebunkport, Maine, Bush said- quote- ''The day of the dictator is over and democracy and freedom are winning all around the world.''

Vice President Quayle laid a wreath at the Tomb of the Unknowns at Arlington National Cemetery outside Washington, where 214-thousand servicemen and women are interred.

An estimated two-thousand people gathered for a wreath-laying at the Vietnam Veterans Memorial. It is inscribed with the names of 58-thousand 175 Vietnam war dead and missing from the last war.

In Nome, Alaska, a group of Soviet veterans of World War Two participated in a belated Memorial Day celebration. A charter plane carrying 55 Soviets arrived too late for the city's parade. But that didn't let that get in the way of a reunion that brought dozens of old allies together for the first time in 45 years.

They met while thousands of American warplanes were delivered to Moscow via Alaska and Siberia from 1942 to '45. Soviet pilots and mechanics who were stationed in Alaska for the Alaska-Siberia project returned for the first time since the war ended and the Cold War took its place. American vets plan to visit the Soviet union next year.

#90149u0798 05/29/1990 ~United Press International

(MAY 29) UPI - A Nicaraguan rebel source says President Chamorro has asked Contra leaders to resume talks in an effort to speed disarmament.

The deadline for the U-S-backed rebels to disarm and disband is June 10th. A high-ranking Contra official says the deadline won't be met.

He says it's impossible to disarm and demobilize one-thousand combatants a day. He says more than 10-thousand rebels still carrying weapons in the security zones in Nicaragua where disarmament is to occur.

United Nations officials estimate one-thousand Contras in Nicaragua and another 700 in Honduras have given up their weapons. U-N officials estimate there are more than 15-thousand Contras.

Contra leaders broke off talks with the government Friday after they allegedly heard a report that up to 19 Contras were killed by Sandinista troops. Nicaraguan officials say the report is false.

Members of an Organization of American States commission said they could NOT find any information to verify the killings.

Former Surgeon General Everett Koop told graduating medical students at Brown University yesterday the U-S health care system has become a moral and economic ''burden'' on society.

Speaking at the university campus in Providence, Rhode Island, Koop said the health care system needs to be changed, adding that Americans are-quote- ''deeply disturbed about the state of their health care system.''

The former surgeon general attributed part of the problem to rapidly developing areas in medical technology. Koop said people expect quick cures for diseases such as AIDS, but added fighting disease takes much longer.

Koop urged the students to shun the idea of a nationalized health care system. He said the United States is ''infatuated'' with the idea but noted similar systems in other countries have NOT worked and lead to-quote- ''an erosion of quality, productivity, innovation, and creativity.''

#90149u0820 05/29/1990 ~United Press International
TOKYO (MAY 29) UPI - More than 70 percent of the Japanese surveyed are opposed to paying more for U.S. military forces staying in Japan, according to a poll published Tuesday in the leading newspaper, the Asahi Shimbun.

The survey conducted by the Asahi Shimbun and Louis Harris Organization also showed about half of both Americans and Japanese surveyed think the U.S.-Japan Security Treaty is beneficial.

The newspaper said 48 percent of the Japanese surveyed think the treaty is good for Japan, showing a 5 point decrease from 1988. About 54 percent of the Americans surveyed said they support the treaty.

The poll, however, showed that Japanese who think the treaty is not beneficial increased 5 percent from two years ago to 23 percent, the highest in 20 years.

Asahi said the growing negative view of the U.S.-Japan military treaty is because of the end of the Cold War, drastic changes in Eastern Europe and recent developments in nuclear disarmament.

In the opinion poll, 71 percent of the Japanese said they are opposed to easing the U.S. military burden by increasing Japan's share in expenses of maintaining the U.S. forces in Japan, while 16 percent supported the idea.

In comparison, 78 percent of American think Japan should pay more for the U.S. forces.

Japan is currently paying about 40 percent of expenses of the 50,000 U.S. service men and women and their dependants.

The polls showed that 71 percent of the Americans surveyed said Japan should not depend on U.S. military forces and should build up their own defense capability.

#90149u0830 05/29/1990 ~United Press International
BEIRUT, LEBANON (MAY 29) UPI - Lebanese workers observed a general strike Tuesday to protest spiralling inflation and took part in a rally to denounce President Elias Hrawi for not improving the ailing economy.

''The government is starving the people,'' said a sign brandished by demonstrators who toured the largely deserted streets of the Moslem sector

of the capital.

Antoine Bishara, president of the Confederation of Trade Unions, which called for the general strike, said in a statement the peaceful protest was ''a warning.''

''Trade unions will escalate their action through demonstrations and sit-ins if the conditions do not improve,'' Bishara said in a statement.

Most businesses and schools were shut in Beirut and other areas.

Complaints by the working class have heightened following the dramatic climb in the war-torn nation's inflation rate. In addition, the Lebanese currency has rapidly depreciated against the U.S. dollar and other foreign currencies.

Officials have called 1990 one of the worst economic years since the flare-up of the civil war in 1975.

Lebanon's aging infrastructure has suffered because of the inter-Christian fighting and a ''war of liberation'' that Christian Gen. Michel Aoun launched last year to drive out Syria's 35,000 troops.

The bulk of the country's factories are in the Christian region.

Fouad Abi Saleh, head of the Association of Lebanese Industrialists, said in a statement Monday the inter-Christian violence has inflicted severe damage and estimated losses at industrial plants at about $500 million.

In the east side of the capital, some businesses opened in territory controlled by Aoun's troops but shops and banks closed in areas controlled by militiamen of Samir Geagea, Aoun's rival.

The rival forces, meanwhile, exchanged sporadic gunfire in a setback to a Vatican-mediated truce declared last weekend. The inter-Christian warfare broke out Jan. 31 when Aoun declared his intention to disband Geagea'smilitia.

#90149u0832 05/29/1990 ~United Press International

BONN, West Germany (MAY 29) UPI - West German Chancellor Helmut Kohl began negotiations Tuesday with opposition leader Hans-Jochen Vogel, whose Social Democratic Party is increasingly divided over plans to form a German economic union on July 2.

The meeting between the conservative-led coalition government and the SPD is seen as an attempt to work out a compromise over the current dispute

involving the economic, currency and social union with East Germany.

Speaking before the meeting, Vogel said he did not expect the negotiations to be completed within a single day.

''This is not a chat by the fireside,'' he said.

The East and the West German governments have already signed a draft treaty, which will still have to be ratified by the two German parliaments before it goes into effect on July 2.

Kohl will need the support of the SPD to get the two-thirds parliamentary majority needed for ratification of the treaty.

Both the West German and East German government, including the East German SPDm support the treaty.

The West German SPD is apparently not only at odds with its sister party in East Berlin and the government in Bonn, but also with itself.

In recent days the party has been increasingly divided over the issue, with mounting internal criticism directed at leading SPD member Oscar Lafontaine, who said the party should oppose the document in Parliament.

Other top SPD officials have insisted they would support the treaty but ask for additional clauses, including one that would offer East Germans better protection from unemployment - a likely side-effect of economic union.

Lafontaine, who is due to challenge Kohl in December elections, has however denied there was any split within the West German SPD.

#90149u0839 05/29/1990 ~United Press International

KABUL, Afghanistan (MAY 29) UPI - Delegates to a grand tribal assembly began a final day of deliberations Tuesday on constitutional changes that would allow a multi-party system in the country, as rebel-fired rockets slammed into the city for a ninth day.

More than 750 representatives from around the country, cabinet ministers, national assembly members and judges met in a movie theater for the second day of the grand council, known as a Loya Jirgah.

The delegates later Tuesday were expected to approve amendments to the constitution, committing the war-torn country to political pluralism and liberalizing almost all sections of the economy.

As the delegates met, the sounds of rockets fired by U.S.-backed guerrillas echoed throughout the city. The number of shells and casualty details were not immediately known.

At least 20 people have died and more than 100 have been wounded in guerilla rocket barrages against Kabul since May 19 in what officials say is an attempt to disrupt the Loya Jirgah.

In his opening address Monday, President Najibullah announced he has sent proposals for ending the 12-year-old civil war, including a new offer of a nationwide referendum, to President Bush and Soviet leader Mikhail Gorbachev for consideration at their summit in Washington later in the week.

#90149u0931 05/29/1990 ~United Press International

(MAY 29) UPI - Stock prices on the Tokyo Stock Exchange closed lower for the first time in six trading sessions Tuesday under pressure from profit taking and some arbitrage selling.

The blkue-chip Nikkei Average of 225 selected issues, which gained 397.73 points or 1.2 percent on Monday, fell 373.94 points to 32,817.67.

The broader-based Tokyo Stock Exchange Index of all listed major shares, a 14.11-point gainer Monday, lost 22.39 points to 2411.66.

An estimated 800 million shares changed hands, compared with 765 million shares on Monday.

Declines outpaced advances 650 to 327, while 154 issues remained unchanged.

Elsewhere in Asia, stock prices closed lower for the first time in five trading sessions Tuesday on the Hong Kong Stock Exchange, but late bargain hunting and favorable political signs from China trimmed the losses.

The key Hang Seng Index eased 10.95 points to 3,048.55. The closely-watched index gained 133.61 points over-all last week.

Among the narrower indexes, utilities lost 4.45 points, financials added 6.64, industrials fell 24.15 and properties shed 17.50 points.

An estimated 1.2 billion shares chnaged hands, compared with 1.6 billion shares last Friday.

Markets were closed in Hong Kong on Monday, for a national holiday.

In Singapore, stocks closed slightly higher in light trading on the

Singapore Stock Exchange as bargain hunters moved in following four days of losses.

The key Straits Times Industrial Index rose 0.87 points to 1,558.20. The narrower All Singapore Index rose 0.25 points to 435.86.

An estimated 63.8 million shares changed hands.

In Australia, stock prices closed higher on the Sydney Sharemarket amid a better-than-expected report on Australia's trade picture for April.

The key All Ordinaries Index gained 9.8 points to 1,495.0. The closely watched All Industrials Index gained 13.9 points to 2,330.1 and the All Resources Index added 3.8 points to 855.3.

An estimated 68.3 million shares chnaged hands.

-30- 2190

#90149u0955 05/29/1990 ~United Press International

TAIPEI, TAIWAN (MAY 29) UPI - Taiwan's top military leader was confirmed as prime minister Tuesday during a raucus session of Parliament that met behind barbed wire to thwart angry demonstrators in the street outside.

Defense Minister Hou Pei-Tsun, who is to begin his six-year term on Wednesday, was approved, 186-27, after a seven hour free-for-all that ended only when police were called onto the floor of the legislature to restore order.

Opposition members bitterly denounced Hou's appointment by President Lee Teng-Hui as counter to the democratic reforms promised by Lee for the Asian island nation of 18 million.

About 2,000 demonstrators, many wearing headbands reading 'Oppose military intervention in politics,' fought a running 10-hour battle with about 5,000 police in riot gear near Parliament in downtown Taipei.

Witnesses said the protesters hurled rocks, trash cans and paint at the police, who responded by beating them with truncheons and blasting them with water cannons.

Authorities said four policemen were injured. One of them was seriously burned when protesters threw firebombs into the Lai Lai Sheraton hotel where police had gathered behind barricades.

The demonstrators also hurled Molotov cocktails at the government's Information Office and burned a bus and a car, witnesses said.

Twenty protesters and two reporters were treated for injuries at the National Taiwan University, an official there said.

Inside the legislature, which was protected by barbed wire, the vote was delayed for seven hours as 21 members of the opposition Democratic Progressive Party staged their own protest, kicking their seats over in disgust and grabbing microphones from deputies of the ruling Kuomintang - or Nationalist Party.

The opposition lawmakers, all wearing vests reading 'Oppose a soldier leading the Cabinet,' occupied voting booths in an attempt to prevent Nationalist lawmakers from casting their ballots.

At one point, Speaker Liang Su-Jung's chair was hurled from the dais by angry legislators and the speaker had to call in 100 police to restore order.

Hou, 71, on Saturday resigned his commission as a four-star general but opposition leaders contend he is still too closely connected with the military.

The Parliament is controlled by Kuomintang members elected in China before the Kuomintang fled the Communists in 1949 to Taiwan.

The Kuomintang lawmakers, most in their 70s and 80s, still hold a majority of seats in the chamber even though they have not faced voters in more than four decades.

-30- 2797

#90149u0956 05/29/1990 ~United Press International

(MAY 29) UPI - Deputies in the Russian Parliament elected Boris Yeltsin their president today. Yeltsin is a maverick communist who is President Gorbachev's chief critic. Today's vote is the third one. Yeltsin led the polling but failed to gain a clear majority in two earlier ballotings. Today he defeated Politburo member Alexander Vlasov . Vlasov was NOT a candidate on either of the earlier ballots. He had dropped out of competition last week, but returned to it today.

Soviet President Gorbachev left Moscow today on his way west. Gorbachev will arrive in Canada's capital later today. After two days of meetings in Ottawa, Gorbachev will fly to Washington for meetings with President Bush. Bush says he's ready for the summit. He says he was refreshed by four beautiful days at Kennebunkport, Maine. He returned to Washington with a healthy-looking tan.

A report of a new Soviet concession came as President Gorbachev prepared to leave on his trip to Canada and the United States. The report says a

controversial Soviet radar station in Siberia is being dismantled to help pave the way for a new U-S-Soviet strategic arms reduction treaty. Both Presidents Reagan and Bush made it clear there would be NO new strategic arms reduction treaty with Moscow as long as the station existed.

Drexel Burnham Lambert might be preparing for a come-back on Wall Street. A report today says Drexel's brokerage unit plans to file for bankruptcy protection today. The brokerage unit conducted the bulk of the company's junk bond, merger and stock brokerage business. It stopped normal operation February 13th, when its parent firm filed for bankruptcy.

The Louisiana House marked Memorial Day by approving legislation to dramatically reduce penalties for a person convicted of assaulting someone who desecrates Old Glory. The measure now goes to the Louisiana Senate. The sponsor of the measure... Democrat James David Cain... explained his reasoning this way- quote- ''I am sick and tired of marijuana-planting, dope-smoking hippies burning the American flag.''

#90149u0961 05/29/1990 ~United Press International

(MAY 29) UPI - At least 13 people were hurt and six others arrested at a rap music concert in Houston yesterday. Members of the crowd at the free holiday concert began throwing bottles because of delays. Concert-goers sat and stood in humid 90-degree heat for about two hours before Queen Latifah went on stage for a 15-minute performance. Then, there was another delay.

Police officials in Jersey City, New Jersey, say a tense situation was ignited once television cameras began rolling. A crowd outside a police station began throwing bottles and rocks yesterday when the t-v crew arrived. The crowd had gathered after four men were arrested for drinking in public and assaulting two police officers taking them into custody.

Two primary elections are being held today... in Kentucky and Arkansas. Kentucky has a U-S Senate race and a congressional race. Democrats Harvey Sloane and John Brock seek the right to face Republican Senator Mitch McConnell in November. Arkansas has one congressional district at stake.

The Coast Guard says a cruise ship that was stranded on a sand bar in Delaware Bay for two days does NOT appear to be taking on water. The M.V. Regent Star was freed from the sand bar this morning. After the ship reaches anchorage, it will undergo further inspection. The ship's 885 passengers were removed from the ship and most of the fuel was dumped yesterday to lighten the ship.

-30- 1575

#90149u0989 05/29/1990 ~United Press International

LONDON (MAY 29) UPI - Stock prices were higher in moderate trading at midday Tuesday on the London International stock exchange.

The blue-chip Financial Times 100-stock index, which fell 11.5 points last Friday, was up 17.2 points to 2,282.8. The narrower top 30 industrial average was up 11.9 points to 1,811.9.

Volume amounted to around 155 million shares compared with 223 million shares traded during the same period Friday.

Markets in London were closed Monday for a bank holiday.

On the economic front, shortly after the market opened, the Central Statistical Office reported Britain's real gross domestic product, measured by the output of goods and services, rose 0.4 percent in the first quarter from the fourth quarter of 1989.

Market forecasters were expecting the report to show a range of no growth to a 0.3 percent rise in the first quarter.

The output based GDP is considered the most reliable guide to short-term movements in the economy.

Analysts said prices, which opened slightly lower, moved higher after the report was released.

Additionally, market watchers said prices were boosted by the stronger British pound on global foreign exchanges.

On the London Foreign Exchange, the British pound firmed against the U.S. dollar in early trading as investors returned after Monday's bank holiday.

The pound opened higher at $1.6950 compared with $1.6900 at the close last Friday.

On the trading floor, among some of the international issues, Imperial Chemical Industries climbed 29 cents to $18.93, Barclays Bank PLC gained 2 $6.16 and British Petroleum gained 2 cents to $5.09.

Among the some of the day's other highlights were three stocks trading ex-dividend: Allied Lyons lost 22 cents to $7.12, Rank Hovis McDougall fell 19 cents to $5.52 and British Airways PLC eased 6 cents to $3.23.

NEW YORK (MAY 29) UPI - Housing starts fell 10 percent in the first

quarter of 1990 to 275,738 compared with 307,080 in the like 1989 period, it was reported Tuesday by F.W. Dodge, a construction information service division of McGraw-Hill Inc.

Among the 25 largest areas for new construction of houses, condominiums and apartments, only six posted gains for the period. They were: Seattle, Detroit, Chicago, Charlotte, N.C., Houston and Milwaukee.

The top two areas for first-quarter housing starts were in Southern California. Leading the nation was the combined region of Los Angeles/Long Beach with 8,528 units, down 24 percent from the same quarter a year ago. Riverside/San Bernardino was second with 7,991 units, a 26 percent decline.

Rounding out the top 10:

-Atlanta, 6,608 units, down 28 percent;

-Seattle, 6,475 units, up 52 percent;

-Washington, 6,404 units, down 27 percent;

-Detroit, 5,068 units, up 50 percent;

-Chicago, 4,727 units, up 12 percent;

-Orlando, Fla., 4,607 units, down 21 percent;

-San Diego, Calif., 4,306 units, down 7 percent;

-Las Vegas, Nev., 3,895 units, down 49 percent.

George A. Christie, vice president and chief economist of F.W. Dodge, said a ''clampdown'' on the high-risk lending practices of the savings and loan industry dampened the housing market, although its primary intent was to curb excesses in commercial real estate development.

Christie indicated early data indicates a deepening decline in housing starts for the second quarter of 1990.

LITTLE ROCK, AR (MAY 29) UPI - Gov. Bill Clinton, seeking a fifth term, and Rep. Bill Alexander, D-Ark., faced challenges for renomination Tuesday as voters picked candidates for the fall general election.

With a weather forecast of sunny skies and temperatures in the 80s, state officials estimated about 600,000 voters, or slightly more than half of

those registered in Arkansas, would cast ballots in the primary races.

Besides the contests for governor and Alexander's congressional district, Democrats were choosing a state Supreme Court justice. There was no Republican candidate for the vacancy on the court.

If runoffs are necessary, they will be held June 12.

Alexander, a 22-year congressional veteran who represents northeast and eastern Arkansas, faced opposition in the Democratic primary. He was the only Arkansas congressman challeged for renomination.

Political observers said there could be an upset in Alexander's district, but polls showed the incumbent leading his nearest opponent 53 percent to 35 percent.

Alexander, 56, is seeking a 12th term in the House. He drew strong opposition came from Mike Gibson, 43, the city attorney in Osceola, Alexander's hometown. The winner faces Republican Terry Hayes of Heber Springs in November. Sen. David Pryor, D-Ark., had no opposition in either the primary or the November election.

Most of the limelight has fallen on the governor's race, where Clinton, 43, is seeking a fifth term as the state's chief executive. Only one of his Democratic challengers, Tom McRae, 51, a former Peace Corps volunteer and former director of the Winthrop Rockefeller Foundation, has been able to garner much support. If Clinton wins re-election, he will have served as governor longer than anyone in Arkansas' history.

The Republican primary for governor featured Rep. Tommy Robinson, R-Ark., and Little Rock lawyer Sheffield Nelson in a close race. Both men are former Democrats.

#90149u1109 05/29/1990 ~United Press International

MOSCOW (MAY 29) UPI - The Baltic republics of Lithuania, Latvia and Estonia declared Tuesday that Soviet President Mikhail Gorbachev has no authority to represent them during his summit with President Bush.

A declaration by the foreign ministers of the three republics, signed in Latvia during the weekend but released Tuesday as Gorbachev left for Canada and the United States, said they would not recognize any agreements signed by Gorbachev as binding on the Baltic states.

In the last 10 weeks each of the Baltic republics - annexed by the Soviet Union in 1940 under the Soviet-Nazi non-agression pact - has declared its independence from the Soviet Union.

Gorbachev has declared the independence declarations illegal and imposed an economic blockade against Lithuania in an attempt to force them to back off their unilateral declaration.

The situation in the Baltic republics will be high on the agenda of the Bush-Gorbachev summit. Bush has said the crisis and the Soviet hard-line response casts a cloud over the talks.

''The republic of Estonia, the republic of Latvia and the republic of Lithuania are declaring that the president of the U.S.S.R. has no legal authority to represent them during the upcoming summit,'' the foreign ministers' declaration said.

''The governments ... will not recognize any obligations or stipulations relating to the Baltic states which may result from bilateral agreements

concluded between the two superpowers,'' it said.

But it added that the three Baltic nations would ''welcome agreements between the U.S.A. and the U.S.S.R. that assist the Baltic states to restore their state independence.''

#90149u1112 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The Supreme Court Tuesday agreed to decide if a series of federal anti-abortion regulations violate the Constitution because they bar family planning grant recipients from discussing the procedure.

The court will hear arguments next term in two cases brought by doctors and the state of New York seeking review of a ruling by the 2nd U.S. Circuit Court of Appeals that upheld the regulations. A decision in the case is not likely before 1991.

At issue are a series of regulations that are part of the Public Health Act of 1970. The act, commonly referred to as Title 10, authorizes the secretary of health and human services to make grants to both private and public family planning clinics.

Title 10 gives out some $200 million to about 4,000 clinics nationwide, which serve nearly 5 million low-income women per year. The law barred funding to groups that provided abortion as a means of ''family planning'' but allowed recipients of Title 10 funds to inform patients about abortion.

In 1988, the Reagan administration, which opposed abortion, barred any funding to groups that counseled women about abortions, told them where they might get an abortion or merely told patients about abortion.

The regulations where challenged in federal courts on a variety of grounds including the claim that the ban on discussing abortion with a patient violated the First Amendment guarantee of freedom of speech.

While the regulations were eventually upheld by the 2nd U.S. Circuit Court of Appeals in this case, they were struck down in the 1st U.S. Circuit Court of Appeals.

As a result, the state of New York, which handed out nearly $6 million in Title 10 grants in 1987-88, doctors, health clinics, groups supporting abortion rights and the federal government asked the court to review the matter.

In seeking high court review, New York noted that 15 percent of its family planning budget comes from Title 10 funds.

''If clinics (that receive money from the state) choose to comply with the regulations' ban on abortion counseling and referral, the delivery of high quality care to poor women will be serverely compromised,'' the state said.

Family planning clinics, in a separate appeal, also sought high court review.

The federal government said that ''in view of the plain conflict among the circuits and the importance of the questions presented, we believe review by this court is appropriate.''

A number of public health organizations and women's groups also supported high court review, as did the states of Alaska, California, Connecticut, Maine, Nebraska, Oregon and Texas.

#90149u1120 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The Soviet Union appears to have begun dismantling a controversial radar facility in Siberia that has loomed as an obstacle to a strategic arms reduction treaty, administration officials said Tuesday.

Although Soviet President Mikhail Gorbachev promised last fall that the radar station near Krasnoyarsk would be torn down, officials said the United States only recently obtained evidence that the process has begun.

If demolition continues, it would remove a serious point of contention in time for Gorbachev and President Bush to announce an agreement at their summit this week on the major elements of a strategic arms reduction pact.

The United States has branded the Krasnoyarsk facility a ''clear violation'' of the 1972 Anti-Ballistic Missile Treaty and demanded its unconditional dismantlement before conclusion of an accord on strategic weapons.

The ABM Treaty required future ballistic missile early warning radars to be placed at the periphery of national territory and oriented outward. The United States has noted that Krasnoyarsk is 750 kilometers from the nearest border and aimed not outward but across 4,000 kilometers of Soviet territory.

After the United States first questioned the legality of the radar in the summer of 1983, the Soviets contended it was designed not for ballistic

missile early warning but for space tracking.

The Reagan administration maintained that position even after the Soviets permitted a congressional delegation to inspect the huge facility in September 1987. In a bid to allay U.S. concerns, Gorbachev announced a moratorium on further construction in October 1987 and later suggested it might be preserved as an international space research center.

Efforts to salvage the facility were all but dropped last year with the admission by Soviet Foreign Minister Eduard Shevardnadze that Krasnoyarsk was indeed a violation of the ABM Treaty limitations on large phased-array radars.

Backed by the Senate, which would have to ratify any strategic arms reduction treaty, President Ronald Reagan and Bush both have told the Soviets that no such agreement could be concluded as long as Krasnoyarsk remained standing.

U.S. and Soviet negotiators met during the weekend in a continued drive to nail down the final details of the first strategic arms agreement in a decade, which Bush and Gorbachev plan to present as the major achievement of a summit that begins Thursday and is likely to be dominated not by arms control but political disputes over German unification and Lithuanian independence.

#90149u1128 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The Supreme Court refused Tuesday to review a ruling that protected Illinois officials from being sued after they placed a child with abusive foster parents despite repeated warnings about the foster family.

The court rejected the case brought by the child and her biological mother. The mother accused Illinois social workers of placing her 11-year-old daughter, Michelle, in the home of her aunt and uncle after they were warned of drug, alcohol and physical abuse that occurred inside the home. At issue in the case was whether state officials can be held liable for their actions if they place a person in their custody at risk of injury, or whether they are immune from such lawsuits.

A federal court ruled in 1988 that the officials were accountable for their actions, saying if the Illinois Department of Children and Family Services ''had never existed, Michelle almost certainly would never have sustained abuse.''

The Court of Appeals, however, reversed the lower court and ruled that public officials performing discretionary functions are protected against

lawsuits seeking monetary damages unless their conduct violates a person's constitutional rights.

The family members, only identified by their first names in the suit, are seeking more than $1 million in damages from the Illinois DFCS for failing to protect Michelle from physical and sexual abuse despite repeated warnings.

The case began when Michelle, then 11, and her adopted brother, Ronnie, were placed in the custody of the state DCFS after complaints her mother, an admitted alcohol abuser, physically abused them.

The mother, according to the suit, warned DCFS case worker Booker Bobbit not to place Michelle with her aunt and uncle because substance and physical abuse frequently occurred between family members.

The child was placed with her aunt and uncle. At a temporary custody hearing, where the mother reiterated her concern for Michelle's safety, the court appointed another case worker but did not prohibit Michelle from being placed at that house. She continued to remain there.

The case was yet assigned to another case worker, who had Michelle removed from her aunt and uncle's home. Days later, the child admitted she had been sexually abused by her uncle and adult cousins.

In criminal court, all three pleaded guilty to charges stemming from the sexual assault. Her uncle was put on probation, and her cousins were sent to prison.

#90149u1139 05/29/1990 ~United Press International

LONDON (MAY 29) UPI - A band and a crowd attired in 1920s fashions will be part of the red-carpet send-off Wednesday for 100 passengers making a special trip from London to Istanbul aboard Europe's historic train, the Orient Express.

The original Orient Express, Europe's most famous railroad service, was started in the late 19th century but discontinued after World War II, financially unable to compete with airlines and faster and cheaper trains.

It was made famous by its illustrious clientele, including members of European royalty, diplomats, spies and femme fatales. Its heyday was in the Roaring '20s.

On June 1, 1889, the original Orient Express set out on the first all-rail journey from Paris to Constantinople, now Istanbul. The last trip was made in September 1939.

Goodwood Travel, a tour operator based in Canterbury, England, is recreating the London-to-Istanbul trip. A hundred passengers are making the journey at a cost of $5,900 each.

The Orient Express's original Pullman Cars are scheduled to leave Victoria station Wednesday and arrive in Istanbul Monday.

The cars belonged to France's Compagnie de Wagons-lits and were discarded after the service was discontinued. They were designed by Georges Nagelmackers, who, after visiting the United States, decided to create a European equivalent to the plush Pullman cars he saw there.

They were restored by two investors, Albert Glatt in Zurich and James Sherwood in London, and are now used for leisure trips.

The 17-car Nostalgie-Istanbul includes a bar salon with a pianist, four dining cars, a shower car and hairdressing salon.

The train will take the travelers across the English Channel to France and continue through West Germany, Austria, Hungary, Yugoslavia, Bulgaria and Turkey. The total distance is 2,166 miles.

Stops are scheduled in Salzburg, Vienna, Budapest, Sofia and finally Istanbul, where the group will fly back to London in three hours aboard the Concorde supersonic jet.

A band and party dressed in 1920s costumes will see the travelers off from London. They will be treated lavishly en route - champagne and fine meals, a private performance by the Vienna Boys' Choir, fireworks, a Danube Cruise, music, dancing are among the highlights.

They will spend three nights in the restored gold-and-blue luxury cars, and two nights in posh hotels in Vienna and Istanbul.

The trip proved so popular that a second trip has been added to leave London Sept. 21, Goodman said.

#90149u1157 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The Supreme Court let stand Tuesday a ruling that states cannot place tougher reporting rules on arbitration agreements that securities dealers require as a condition to opening a brokerage

account.

The court refused to hear the case brought by the state of Massachusetts seeking review of a ruling by the 1st U.S. Circuit Court of Appeals.

At issue are arbitration agreements commonly required by securities brokers. The agreements send any disputes to arbitration instead of costly and lengthy court battles. The agreements are covered by the Federal Arbitration Act of 1982.

Massachusetts, however, sought to regulate the agreements by adopting a rule in 1988 that barred securities dealers from requiring customers sign such agreements.

The Securities Industry Association, a trade group, and securities dealers challenged the rule in federal court arguing the regulations conflicted with federal law.

Federal courts struck down the regulations, ruling that Constitution prevents states from regulating in areas controlled by the federal government.

In seeking high court review, the state noted that the use of mandatory arbitration agreements has been growing and ''review by this court is necessary to determine the extent of state authority to protect investors in the formation of arbitration agreements.''

Massachusetts was supported in its request by 30 other states.

89-894 Michael J. Connolly et al. vs. Securities Industry Association, et al.

#90149u1167 05/29/1990 ~United Press International

JERUSALEM (MAY 29) UPI - An angry crowd jeered journalists and stoned cars carrying Arab passengers outside a funeral parlor Tuesday shortly before an Israeli man killed in a bomb explosion was buried.

The man, Shimon Cohen, was fatally wounded Monday when a pipe bomb blew up in Jerusalem's Mahane Yehuda market as it was crowded with holiday shoppers preparing for the Jewish holiday of Shavuot.

Two radical Palestinian groups claimed responsibility for the blast, which prominent Palestinians from the occupied territories condemned.

The explosion came eight days after an Israeli civilian, impersonating a soldier, opened fire on Palestinian workers and killed seven of them near

the Israeli town of Rishon Le Zion.

Acting Prime Minister Yitzhak Shamir sent a telegram to Cohen's family, expressing his condolences and saying Israeli authorities would not rest before the attackers were caught and punished.

Shamir and Jerusalem Mayor Teddy Kollek visited the wounded in Jerusalem hospitals Tuesday.

At the Jerusalem funeral parlor where Cohen's body was taken before burial young Jews threw stones at the cars of passing Arabs and attacked an Army Radio vehicle with bottles and stones. Other journalists also were harassed.

No uniformed police officers were initially in sight despite police promises to protect journalists, Army Radio reported. Two youths, however, were detained, the radio reported.

''Go and film in Gaza and we will see,'' some Israelis yelled at journalists. ''You are causing all the mess.''

In the Israeli-occupied territories, the military lifted much of the curfews remaining on the Gaza Strip Tuesday, except in the Dir el Balah refugee camp.

Curfews also were maintained on four West Bank Palestinian communities.

The entire Gaza Strip and much of the West Bank were placed under curfew shortly after the Palestinian massacre in an effort to quell rioting and prevent further violence.

Military sources said Tuesday a Nablus hospital reported a woman was injured by a rubber bullet Monday and died. An initial military investigation showed rubber bullets were fired during a stone-throwing incident, but no injuries were reported. Israel Radio said the woman was injured while standing in a doorway of her house and died during surgery.

Since the start of the 29-month-old Palestinian uprising, at least 675 Palestinians have been killed by Israeli civilians or soldiers.

-30- 2656

#90149u1196 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The Supreme Court let stand Tuesday a ruling that likely will send to trial claims that Georgia's system of appointing and paying lawyers for poor criminal defendants violates the Constitution.

The court refused to hear the case brought by Georgia seeking review of a

ruling by the 11th U.S. Circuit Court of Appeals.

At issue in the case was the technical question of whether those bringing the suit could legally do so in federal court. A federal district judge ruled the claim, brought by a Georgia criminal defendant, could not be brought and dismissed the case before trial.

However, the appeals court reversed that ruling and reinstated the case.

Seeking high court review, Georgia contended the appeals court decision to reinstate the case would terminate a state's 11th Amendment protection against such suits. Further, it would sanction federal intrusion into state judicial proceedings.

But lawyers for Horace Luckey III, one of a class of criminal defendants named in the suit, argued against Supreme Court review and asked that the case be remanded to U.S. District Court for trial.

The lawyers initially brought the suit to district court in 1987, seeking to force Georgia to pay public defenders more, to appoint counsel earlier in the criminal process, and to provide more defense services and expert resources.

The district court dismissed the suit but the appeals court reversed that ruling and reinstated the case in 1988. The state of Georgia then appealed to the Supreme Court.

The case began in 1987 when Luckey's lawyers contended that funding for such defense services in the state were ''far below'' the national average on a per case basis and ''far below the amount needed to provide constitutionally adequate services.''

Luckey's lawyers, citing consistent delays in the appointment of public defenders and a lack of resources for effective counsel, charged that Georgia failed to overhaul that portion of the legal system and thereby violated a defendant's right to a fair trial.

Nine other states filed petitions supporting Georgia's bid for high court review, saying they have a vital interest in preserving their independence and avoiding federal intrusion in state criminal proceedings. Those states were Idaho, Indiana, Puerto Rico, Florida, Pennsylvania, Missouri, Connecticut, New Mexico and Montana.

89-1516 Joe Frank Harris, Gov., et al., vs. Horace Luckey, III, et al.

#90149u1218 05/29/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 29) UPI - The 12-nation European Community adopted sweeping safety regulations for work with video display terminals Tuesday, including periodic breaks and the right to regular eye examinations.

The mandatory rules also call for glare-free and swiveling screens, ''adequate spacing'' between characters and lines, and adjustable seats with a footrest if requested.

The EC action is in the form of a directive, which requires each national government to adopt implementing legislation by Dec. 31, 1992. Display units put into service after that date must meet the new regulations, and existing equipment must be modified by the end of 1996.

''Compliance with the minimum requirements for ensuring a better level of safety at workstations with display screens is essential for ensuring the safety and health of workers,'' said the EC council of ministers, the group's decision-making body.

Britain abstained from the unanimous decision because it wanted the rules limited to display screens hooked to computers.

''We just felt the rules are too broad and could potentially apply to too many devices,'' said a British official. ''The term 'video display' unit was coined for computers and we felt the rules should be so limited.''

Certain equipment with a very small display, such as calculators and cash registers, are exempted from the rules.

Laptop and other portable computers are also exempted, but only if they are ''not in prolonged use at a workstation.'' In other words, employers cannot avoid the regulations by buying portable computers for stationary workers.

Officials said most countries already have laws that incorporate many of the new rules, which were adopted by the EC Labor and Social Affairs Council.

Under the regulations, daily work at display screens must be ''periodically interrupted by breaks or changes of activity.'' Workers are entitled to eye tests before beginning work at display screens and then ''at regular intervals.''

The EC council also adopted a new directive on the manual handling of heavy loads, including proper training, in order to reduce the risk of back injuries.

#90149u1241 05/29/1990 ~United Press International
OAKLAND, CA (MAY 29) UPI - Earth First! has hired a private detective to investigate the bombing case against two of the radical environmental group's members.

Earth First! co-founder Mike Roselle said the private investigator would look into elements of the case that may have been missed by Oakland police the FBI, and federal Alcohol, Tobacco and Firearms agents.

Roselle charged that authorities wrongly immediately suspected Judi Bari, 40, and Darryl Cherney, 33, of being responsible for a pipe bomb that went off in their car while they were driving in Oakland last Thursday.

Police Lt. Mike Sims denied the group's charges. He said police will look into "the nature and motivation" of death threats Bari and Cherney said they had recently received.

Bari and Cherney, who claimed they were victims of a bombing, faced arraignment Tuesday on charges of possessing and transporting an explosive device and possession of an explosive device in a public place. Cherney also faced a charge of possession of a booby trap.

Bari was to be arraigned at Highland General Hospital, where she was being treated for her injuries. Cherney posted $100,000 bail gathered by his supporters Monday night and was to appear in Oakland Municipal Court for an afternoon arraignment.

Authorities believe Bari had to know the bomb was in the back seat of her car because she had placed a guitar case on top of it, according to unidentified law enforcement sources cited by newspaper reports.

Nails, wire and duct tape similar to the material used to make the bomb were reportedly found in the Mendocino County homes of the pair and in Cherney's van.

The explosion occurred while the two were driving to Santa Cruz to promote Redwood Summer, a campaign to prevent the logging of redwood trees on California's north coast.

Environmentalists have staged demonstrations for the pair in Oakland and other cities. Police dispersed a 24-hour vigil outside the Oakland Police Department on Monday because of complaints from citizens "having to walk over them" to get into the police administration building. Roselle said Greenpeace is paying for the private investigator and other environmental groups nationwide have offered financial support.

RANGOON, BURMA (MAY 29) UPI - The main opposition party headed for a landslide victory Tuesday, securing a two-thirds majority in Parliament and marking a historic moment in Burma's 30 years of military rule.

The military government has conceded the opposition National League for Democracy, whose top leaders are still under arrest, won by a landslide and pledged to surrender power once a new constitution is drafted.

The opposition won 323 seats in the new 486-member legislature, including 59 of the 61 seats in the Rangoon division, according to returns coming in by telephone to the party headquarters.

The elections commission continued announcing results in the press, radio and television. The official results also showed the main opposition led the polls with the highest number of votes followed by the well-financed, pro-military National Unity Party.

The main opposition captured somewhere between 46 and 80 percent of the vote while the pro-military party got between 10 to 43 percent, according to early estimates.

U Kyi Maung, an opposition leader who won a legislative seat, said he was confident that the party would get an overwhelming majority and be able to form a strong government.

The multi-party elections Sunday were the first in Burma in 30 years. The military government, which brutally crushed a democracy movement in September 1988, has said it would hand over power after the drafting of a new constitution.

International human rights organizations said before the elections that a free and fair election was not possible because of widespread abuses of power by the military regime.

Nearly 1,000 people were killed in the 1988 crackdown by Gen. Ne Win, who took power in a 1962 coup.

The victorious opposition party's Secretary-General Aung San Suu Kyi has been under house arrest since July 20. Party President Tin U, arrested at the same time, has been sentenced to three years in prison.

Burma, which the military has insisted on calling by its Burmese-language name Myanmar, was one of the most prosperous countries in Southeast Asia when it won independence from Britain in 1947. It was the world's leading exporter of rice and also exported teak, crude oil, jade, rubies and sapphires.

#90149u1284 05/29/1990 ~United Press International

JERUSALEM (MAY 29) UPI - The defense lawyer for convicted war criminal John Demjanjuk offered new evidence Tuesday from a Polish couple suggesting Demjanjuk was not the sadistic Nazi death camp guard ''Ivan the Terrible.''

The Israeli Supreme Court heard the evidence after news programs in Britain and the United States earlier this year aired reports that a Polish couple living near Treblinka death camp knew Ivan the Terrible and that his name was Marchenko, not Demjanjuk.

The evidence is based on the testimony of Kazmir Dudek, a shopkeeper in a village near Treblinka, and his wife, Maria, who claimed to have been the mistress of Ivan the Terrible.

Dudek told Polish investigators in 1986 that Ivan Marchenko was among several Ukrainian guards from the Nazi death camp who frequented his shop between 1942 and 1943, the period in which more than 850,000 Jews and others died in Treblinka gas chambers.

Both said Demjamjuk was not Treblinka's Ivan the Terrible.

The couple also described Ivan as having dark hair, while Demjanjuk had light hair. Several Treblinka survivors also testified that Ivan had dark hair but they identified Demjanjuk as the hated guard.

''Ivan the Terrible was Ivan Marchenko and couldn't be the appellant

standing before you,'' Demjanjuk's lawyer, Yoram Sheftel, argued on the 10th and final day of his presentation.

The defense maintains that Demjanjuk, a retired autoworker from a suburb of Cleveland, is a victim of mistaken identity and that he was among Red Army soldiers in Nazi prison camps when most of the people died at Treblinka.

''What emerges from all of this, your honors, is that the appellant (Demjanjuk) must be acquitted, not simply because of reasonable doubt, but because there is not a single shred of real evidence to prove that he is Ivan the Terrible,'' Sheftel told the court hearing the appeal.

The prosecution is expected to argue that Demjanjuk used the name Marchenko because it was his mother's maiden name. One justice suggested that perhaps Demjanjuk used the name Marchenko to avoid being identified as the Treblinka guard.

Sheftel pointed out that Dudek said Ivan the Terrible made no effort to conceal his identity, and sometimes boasted about his reputation.

The lawyer also asserted that Marchenko was a common name among Ukrainians and distributed photocopies from a Cleveland telephone directory. The pages were filled with Marchenkos, spelled several ways.

Prosecution arguments, which are expected to last at least two weeks, begin Thursday.

(MAY 29) UPI - Soviet President Gorbachev and Foreign Minister Shevardnadze are on their way to Ottawa, Canada, this morning to meet with Canadian Prime Minister Mulroney . Gorbachev arrives in Washington late tomorrow for the summit with President Bush. Before leaving Moscow, Gorbachev told a key Communist Party meeting the Russian Parliament should NOT elect Boris Yeltsin as president of the Soviet republic.

But Yeltsin was elected to the powerful post today and vowed to- quote- ''spare nothing, neither health, nor time, so that we can escape the crisis situation and lead Russia to better times.'' Yeltsin's stunning victory made him the leader of the republic that makes up three-quarters of the Soviet Union and is home to half of its 285-Million people. The outspoken Communist is a strong critic of Gorbachev.

President Bush says he'll be rested and ready when Soviet President Gorbachev arrives in Washington for the summit. Bush says he plans to hold two days of very intensive meetings with top adminstration officials in preparation for the talks. Bush and Gorbachev will meet at the White House Thursday and Friday and spend much of Saturday at the Camp David presidential retreat.

The town of Malden, Massachusetts, will hold a parade through the downtown district today to celebrate the home-coming of former hostage Frank Reed. The educator, who was released by his Moslem captors after 44 months in captivity in Lebanon, arrived in Malden Sunday and shared an emotional reunion with his 91-year-old mother whom he has NOT seen since 1982. Reed plans to return to a hospital near Washington, D-C, tomorrow to continue his recuperation.

WEST BERLIN (MAY 29) UPI - West Germany's official Cartel Office said Tuesday that it would object to the proposed participation of the Daimler Benz AG and MAN AG firms in the Spanish commercial vehicle manufacturer Enasa.

A spokesman for the office said the two West German companies had been informed of the decision, which he said was taken because it was concluded such a participation would negatively affect competition.

He said MAN and Daimler Benz have until July 2 to respond to the notification and that no final decision will be taken before mid-July.

MAN subsidiary MAN Nutzfahrzeuge AG has announced plans to acquire a 60 percent participation in Enasa from the Spanish Grouppe Instituto Nacional de Industria.

Daimler Benz intends to buy 20 percent of Enasa, leaving Grouppe Instituto with 20 percent.

The two West German firms had earlier agreed to a plan for their participation in Enasa under which MAN would handle the construction of vehicles over 7.5 tons while Daimler Benz would produce vehicles of lower weight.

(MAY 29) UPI - African National Congress leader Nelson Mandela underwent a minor operation during a routine medical examination today at a private clinic and is in satisfactory condition. Hospital officials say the procedure was NOT related to Mandela's prostate and is in NO way indicative of a serious problem. A medical source at the clinic says Mandela underwent a vasectomy. Mandela's wife, Winnie, visited her husband at the clinic and said his European trip will NOT be disrupted by his hospitalization.

As Americans spent the weekend remembering those who died during war time, at least 22 people died violently in street gang clashes, shootings, and stabbings in Los Angeles. Gang rivalries are being blamed for at least 10 of the killings and the critical wounding of a nine-year-old boy who got in the way of a gang bullet as he played in front of his home in South Central L-A Friday night.

Police in Poughkeepsie, New York, say a man who shot and killed his wife and her mother last night in front of a police officer has died of a self-inflicted gunshot wound to the head. The man had arranged to meet his wife to turn over the couple's 10-month-old son after visiting with the child during the weekend. The officer had been called to the scene to

protect the mother.

NASA engineers have replaced a faulty cockpit display and are working to fix a wiring problem aboard the shuttle Columbia. The spacecraft is scheduled to lift off early tomorrow morning from Cape Canaveral during a pre-dawn launch. A crew of seven will use four telescopes to study the most violent stars and galaxies in the universe. Air Force meterologists are predicting favorable weather conditions at launch time.

#90149u1405 05/29/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 29) UPI - The Hubble Space Telescope locked securely onto a celestial target during the first test of its most advanced guidance system, the project's lead scientist said Tuesday.

The successful "fine-lock" with the telescope's "fine guidance sensors" over the weekend encouraged engineers to think they can overcome lingering vibrations in the 12-ton telescope and begin final work to focus the instrument's near-perfect optical system, said NASA astronomer Edward Weiler.

"We held fine-lock for an hour or two and held it through the day-night transition," said Weiler as he awaited launch of the space shuttle Columbia on a ten-day mission aimed at complementing the Hubble telescope.

"The only time we achieved fine-lock before that was just for a few seconds and then we got knocked out," he said. "This time we achieved fine-lock and we held it for an hour or two."

The $1.5 billion telescope was placed into orbit April 25 by the crew of the space shuttle Discovery for a 15-year exploration of the universe that is expected to revolutionize astronomy.

Since being deployed, NASA engineers have struggled with a series of problems as they carefully activated the complex observatory's many systems. Most of the problems have been solved but analysts were still trying to eliminate two small abnormal movements in the telescope, including a tiny vibration that occurs whenever the telescope goes into or out of sunlight as it sails around the planet at some 17,000 mph.

The key to the telescope's operation is its ability to firmly lock onto astronomical targets, allowing its instruments to take long exposures of extremely dim objects.

Design specifications call for a guidance accuracy of seven thousandths of an arc second, which translates into being able to keep a laser beam inside the diameter of a dime at a distance of 200 miles, the distance

between New York and Washington. Before this weekend's test, engineers had only been able to achieve "coarse-lock" with the telescope, which is less accurate, Weiler said.

"They've been working now, looking at all the data from all the glitches. They've been changing gains and changing thresholds ... and just working the system and finding out how this system needs to be tweaked to perform the way it's supposed to perform," he said.

"We're bringing down the amount of glitches," he said. "(The movements are) getting smaller and smaller. Instead of being able to hold it on a dime in New York, maybe a quarter. And we're bringing it down."

The success with the fine-lock system means engineers could begin the second and final phase of precisely focusing the telescope so the instrument can study stars, planets and galaxies in more detail then ever before. "That's our goal for the next week or two - to get it into focus," said Weiler. "People are pretty upbeat."

#90149u1459 05/29/1990 ~United Press International

KUALA LUMPUR, MALAYSIA (MAY 29) UPI - Eight Hong Kong citizens sentenced

to be hanged for drug offenses were reunited with their families for the last time Tuesday after authorities rejected pleas for clemency from the British government.

With Malaysia's largest mass hanging set for dawn Wednesday, the Supreme Court also turned down attorney Karpal Singh's last-ditch application for a stay of execution.

Singh argued that the Board of Pardons, which turned down an appeal by the eight in March, had acted unconstitutionally because the seven condemned men and one woman did not have legal representation at the time.

In ruling Singh's argument was irrelevant, the court virtually ended the last legal recourse.

''It looks very gloomy,'' said Singh.

John Jenkins, first secretary of the British High Commission, said appeals by Britain's Prime Minister Margaret Thatcher and High Commissioner Nicholas Spreckley to Malaysian Prime Minister Mahathir Mohamad also were rejected.

Relatives turned to Malaysia's monarch, Azlan Shah, in a separate petition for clemency. Although it is within the constitutional power of the king to grant a pardon and reduce the sentences to life imprisonment, there is no precedent for his intervention.

''It's unlikely the king will intervene in view of the government's rejection of the British appeals,'' Singh said.

The Malaysian government has turned down all appeals for clemency since introducing the death sentence for drug related offenses 15 years ago. Since then 90 people, including 19 foreigners, have been executed for drug offenses.

The eight Hong Kong nationals were arrested in Penang in October 1982 after customs officials found 28 pounds of heroin concealed in the bottom of five suitcases.

All denied knowledge of the presence of the drug, but five were found guilty of trafficking and the other three of helping them. They were sentenced to be hanged under the harsh drug laws, among the toughest in the world.

As news of the rejected appeals reached the condemned, tearful farewells marked their last visits with relatives.

Waitress Hau Tsui Ling, 32, the only woman in the group, was allowed to

visit over the weekend with her 13-year-old daughter for the first time in eight years.

But British diplomatic officials complained they were not given sufficient notice of the date of the hangings to organize visits by all the family members still living in Hong Hong.

The officials said two of the condemned men had offered to donate their corneas after death.

Under Malaysian law, the death penalty is mandatory for possession of more than half an ounce of heroin or morphine, two pounds of opium or 0.4 pounds of marijuana.

Two Australians, Kevin Barlow and Brian Chambers, were hanged in 1986 in a case that sparked international criticism. Derrick Gregory, from Britain, was hanged in July.

Amnesty International has also made a plea for clemency, saying it was seriously concerned by the increasing use of the death penalty in Malaysia.

#90149u1460 05/29/1990 ~United Press International

LONDON (MAY 29) UPI - Cadbury Schweppes PLC said Tuesday it has agreed to pay $212 million for the majority of the non-cola soft drink operations of Source Perrier of France.

Cadbury Schweppes said in a statement the transaction involved Perrier's London-based Compagnie d'Exploitation de Boissons Refraichissantes, its Oasis, Atoll, and Bali soft drink brands, its bottling rights for Gini drinks and other related assets in France.

The statement indicated the purchase would consolidate Cadbury Schweppes' position as the second largest soft-drink producer in Europe after the Coca-Cola Co.

Cadbury Schweppes said its cash offer is pending any adjustments after an assessment of the worth of the various soft drinks divisions. The sale will be financed by loans, with 75 percent payable after the assessment and the balance due Dec. 15, Cadbury Schweppes indicated.

Source Perrier, which was recently shaken by detection of impurities in Perrier, its main mineral water product, would retain its French bottling rights for Pepsi-Cola.

''This acquisition from Source Perrier is a key step in the development of our beverages business in Europe,'' Cadbury Schweppes Chief Executive

Dominic Cadbury said. ''It gives us the No. 2 position in the important and growing French market and brings additional volume to continue our European bottling network.''

Cadbury said the French soft drink market was underdeveloped with an average consumption rate of 37 liters per capita, which is half the total for Britain and one quarter that of the United States.

The acquisition will double Cadbury's output volume in France to about 300 million liters. The group's total European output, excluding Britain, is about 1 billion liters.

Cadbury said the group would concentrate on the Oasis brand, and may sell smaller brands Bali and Atoll. Cadbury Schweppes holds the Coca-Cola bottling rights in Britain and nearly 25 percent of the nation's soft drink market, but he said it was unlikely Oasis will remain available in Britain.

#90149u1522 05/29/1990 ~United Press International
WASHINGTON (MAY 29) UPI - Vladimir Yakovlev, a 31-year-old Soviet entrepreneur, Tuesday unveiled the U.S. edition of what he hailed as the first privately owned Soviet-American weekly business newspaper.

Commersant, which began publishing in the Soviet Union in January, is expected to be available in English in the United States by September 1, Yakovlev said.

The newspaper originally began publishing in 1908 but was suspended after the 1917 revolution.

Now, faced with a crumbling national economy, the Soviet Union has begun courting international business. Although McDonald's brought cheeseburgers to Red Square earlier this year, many U.S. business executives remain

cautious about investing in Soviet projects.

Yakovlev attributes this reluctance to a lack of accurate information.

''We used to get a lot of American guys who were sure there was a new Eldorado in the Soviet Union and were disappointed,'' Yakovlev said. ''We explain accurately in each issue what is profitable and what is not.''

The newspaper, which its editor called the Soviet Union's answer to The Wall Street Journal and Business Week, is designed to offer U.S. business executives a clear picture of business opportunities in the Soviet Union.

Calling Commersant ''a radical departure for Soviet journalism,'' Yakovlev said the newspaper's goal is to provide ''a factual and objective approach to the practicalities of business.''

Named for a Russian word for ''entrepreneur,'' Commersant is written by Soviet journalists, economists, entrepreneurs and dissidents. It is not affiliated with the Soviet government.

In addition to domestic and internation business news, the newspaper features a weekly report on the ruble's value on the ''black market,'' updates on joint ventures, economic reform and government projects.

Other features include news of trade fairs and visits to Moscow by foreign government officials and business executives.

A 12-page prototype of the U.S. edition included articles on the real value of the ruble, the upcoming U.S.-Soviet summit and a survey of Soviet consumer prices.

Yakovlev said the U.S. edition will carry advertising, but don't look for full-page ads touting U.S. products. Instead, the newspaper hopes to specialize in business-to-business ads that can serve as a directory of business services and contacts.

The newspaper's Russian-language edition already has a circulation of 350,000, Yakovlev said, adding he is confident about the prospects for the English-language edition.

In addition to his duties as editor of Commersant, Yakovlev is chairman of FACT, a Soviet business information service with 400 employees. Raised in a family of journalists, he graduated in 1979 from Moscow University with a degree in international journalism.

(MAY 29) UPI - The Soviet republic of Russia has a new president. The Congress of People's Deputies today elected Soviet President Gorbachev's staunchest opponent, Boris Yeltsin, to the post. The renegade communist received 535 votes... four more than necessary to put him over the top. Just last week, Gorbachev blasted Yeltsin for trying to break up the Soviet Union and of abandoning socialism.

Soviet leader Gorbachev and his wife Raisa are scheduled to arrive in Ottawa today, leaving behind a nation in protest over new price increases. The entire Politburo turned out to see the couple off at Moscow's airport, while panic buying continued in the country. Gorbachev and Foreign Minister Shevardnadze will spend two days in Canada in talks with Prime Minister Mulroney, before heading to a superpower summit in Washington, D-C.

Taiwan's top military leader is the nation's new prime minister, following a seven-hour free-for-all session of Parliament that met behind barbed wire to guard against stampeding demonstrators. Defense Minister Hou Pei-Tsun was approved as police tried to fight off some two-thousand protesters outside. The demonstrators say Hou's appointment counters democratic reforms.

More than 70 percent of the Japanese surveyed are opposed to paying more for U-S military forces staying in Japan. The poll by a leading Tokyo newspaper and Louis Harris Organization shows that 71 percent of the Japanese opposed easing the U-S military burden by increasing Japan's share in expenses of maintaining the American forces in Japan. Only 16 percent of those polled supported the idea.

(MAY 29) UPI - Shipping companies say drug smugglers are eluding customs inspectors by using powerful magnets and suction cups to attach nets full of contraband to the underside of cargo vessels. Shipping company executive Robert Randolph calls it ''the hottest technique around.'' Randolph told a Florida newspaper that his firm and at least one other shipping company hired scuba divers to inspect the bottoms of ships arriving at Port Everglades.

A nature guide for New York City's Parks Department says his new bosses are trying to squeeze him out of his job. For four years, ''Wildman'' Steve Brill has pointed out edible weeds on his nature walks. Now his bosses are telling him to lay off. The weeds, they say, may be contaminated with dog urine and pollutants. Brill, a weed-eater himself, says he always washes the greens first.

#90149u1552 05/29/1990 ~United Press International
KATMANDU, NEPAL (MAY 29) UPI - Senior leaders of the ousted royal regime formed two political parties with the same name Tuesday after attempts to unite into a single party failed.

Both of the parties are called the National Democratic Party but they are headed by two former prime ministers under the old regime, which was ended by weeks of widespread pro-democracy demonstrations in March.

King Birendra, bowing to pressure from the democracy movement, created a multi-party government and promised constitutional and election reforms.

Both of the new parties support the move toward multi-party democracy, a free economy and a non-aligned foreign policy with close ties to neighboring countries.

But the group was split over who should assume leadership, which resulted in the two competing parties, one of which is perceived to be more hard-line than the other.

WASHINGTON (MAY 29) UPI - The Wisconsin State Investment Board has acquired 5 percent of the outstanding shares of Houghton Mifflin Co., a Boston-based publisher.

The board purchased 715,600 shares of Houghton Mifflin's 14.3 million outstanding shares, according to a Schedule 13D filed Monday with the Securities and Exchange Commission.

The Wisconsin State Investment Board is an independent state agency responsible for several public trusts in Wisconsin. Under its general policies, the board makes acquisitions for investment purposes only and supports the management of companies in which it invests.

Houghton Mifflin, which publishes textbooks and reference books, has annual revenues of about $368 million.

WASHINGTON (MAY 29) UPI - The Supreme Court ruled unanimously Tuesday that federal law allows employees of schools on military bases to bargain with the government over salary and fringe benefits.

In a opinion written by Justice Antonin Scalia, the court ruled that

teachers and other employees at an Army base in Georgia may bargain over their labor union's wage and benefits proposals.

The high court, in reviewing a decision by the Federal Labor Relations Authority, said employees at two elementary schools at Fort Stewart were allowed, and in fact required, to bargain through the labor union representing them.

The controversy arose when during collective-bargaining negotiations for the two schools, operated by the base for dependents of military and civilian personnel, the Fort Stewart Association of Educators union sought a 13.5 percent wage increase. The proposals also involved paid leave and mileage reimbursements.

The government, however, maintained that applicable federal law prohibits bargaining over wages for this class of employees.

The Authority rejected that contention and held that the union's proposals were negotiable. The 11th U.S. Circuit Court of Appeals upheld the Authority's decision.

Seeking high court review, the government said other federal courts have reached different conclusions on the issue.

''As these cases illustrate, the forty-odd categories of federal employees affected by the questions presented here involve a large and diverse group '' the government said. ''Whether they may negotiate over the amount of compensation they receive is a question of great importance to the employees and their agencies.''

#90149u1592 05/29/1990 ~United Press International

BALTIMORE (MAY 29) UPI - Astronomers reported Tuesday discovery of what may be the largest visible structure in the solar system - a 20-million-mile-long cloud of sodium streaming away from Jupiter.

A team from Boston University said it found a huge cloud-like structure, or nebula, made of sodium atoms stretching from Jupiter into interplanetary space.

Pictures taken by the scientists show the cloud has a visible span of at least 20 million miles - 400 times the radius of Jupiter, the largest planet in the solar system.

"This is an enormous structure, perhaps the largest, permanently visible feature in the solar system," said Michael Mendillo, an astronomy professor who led the study based on telescope observations made at the McDonald Observatory in Texas from November through February.

For about 15 years, astronomers have known that Jupiter and Io, its moon, are surrounded by sodium clouds but the size of those clouds had not been determined and it was thought they remained relatively close to the giant planet.

"As we moved the telescope further and further from Jupiter, we kept on detecting sodium - fainter, but still there," said study's co-author Jeffrey Baumgardner, who termed the length of the sodium cloud "startling."

The sodium atoms, thought to originate from volcanic eruptions on Io, appear to collide with electrically charged particles in Jupiter's powerful magnetic field, which sends the sodium hurtling into space in a fast, narrow jet, researchers said. To underscore the role of magnetic fields in the cloud's formation, the researchers dubbed the newly discovered structure a "magneto-nebula."

The Boston astronomers, who announced their findings at a meeting of the American Geophysical Union, said they will describe further details of the immense cloud in a paper submitted to the scientific journal Nature.

Also at the geophysical meeting, Penn State researchers Tuesday presented further evidence that small, icy comets may be continually bombarding Earth.

John Olivero, a meterology professor, and his colleagues said they originally set out to disprove the icy comet theory, first proposed in 1986 by L.A. Frank of the University of Iowa. Instead, to their surprise, the Penn State researchers said their work lends support to the controversial theory.

Under the theory, the melting of icy comets is responsible for unexplained releases of water vapor in Earth's upper atmosphere. Frank estimates it would take about 20 comets, each 40-foot-in-diameter and entering Earth's atmosphere every minute, to produce the water vapor releases he thinks are represented by dark spots in satellite pictures of Earth's dayglow pattern.

The upper atmosphere, which starts about 50 miles above Earth's surface, normally contains very little water vapor. The possiblity of an extraterrestial water source has important implications for our understanding of Earth's water balance and the origin of planetary atmospheres.

Critics have said they doubt 20 comets per minute could enter the

atmosphere without being observed and point out that radar searchers have not detected these small comets.

"When I first heard about the icy comet theory I was in the group of skeptics," said Olivero, whose team used a ground-based microwave radiometer to monitor the atmosphere for sudden water vapor increases that might result from comets entering the atmosphere. But after finding 111 unexplained water releases in 22,000 20-minute segments of monitoring, Olivero concluded the icy comet theory may not be wrong.

Temperature swings, instrument fluctuations, stray signals from space and water vapor migration from the lower atmosphere were ruled out as causes of the 111 water releases. "We have not come across anything that really fits except the small, icy comet theory," Olivero said.

MIAMI (MAY 29) UPI - A bar patron, angry because the manager would not let him take his drink outside, opened fire with an AK-47 assault rifle early Tuesday, killing one woman and injuring five other people. The gunman fired at least 30 bullets as he and a friend left the bar in a white midsized car, said Miami Police Sgt. David Rivero.

One bullet passed through the 3-inch steel door of the bar and hit a woman who was sitting at the bar. She was struck in the head and died instantly, Rivero said.

Five other people inside and outside the Magic City Lounge were hit in the arms, legs, back and head. All five were in stable condition at Jackson Memorial Hospital, Rivero said.

Rivero said the gunman and another man were drinking at the bar and prepared to leave about 4 a.m. Tuesday. "They were getting ready to leave the bar with a couple of drinks and the manager told them they couldn't take the drinks outside the bar because it's against the law in Florida," Rivero said. "There was a big argument between the two and the manager. The manager ushered them outside and they left and got in their car."

But as they drove away, one of the two opened fire with the fully automatic assault rifle, Rivero said. He fired at least 30 bullets, possibly more because some of the casings may have landed inside the car where police could not count them, Rivero said. Several of the injured were standing in front of the bar, and others were inside.

The two suspects escaped. Police said they did not have a good description of the men because all the uninjured witnesses either fled or denied they had been in at bar at the time of the shooting. The suspects were

described only as two black men.

The dead woman was identified as Tracy Black, 25. Police identified the other injured people as Mario Wilson, 18 and David Johnson, 25, both shot in the leg; John Ferguson, 27, who was shot once in the arm; Destiny Boykins, 18, shot in the back; and Angus Westby, 20, who was shot in the forehead.

The Magic City Lounge, an Overtown bar that is open until 5 a.m., was the scene of a similar shooting Sept. 26, 1989. In that incident, a drive-by gunman killed one person and injured six others, Rivero said.

#90149u1651 05/29/1990 ~United Press International

OTTAWA (MAY 29) UPI - Soviet leader Mikhail Gorbachev's problems followed him across the ocean Tuesday to Ottawa, where Canadians of Baltic descent planned demonstrations opposing his crackdown on Lithuania.

About 1,500 Canadians of Lithuanian, Estonian and Latvian descent were expected to arrive in the Canadian capital by Wednesday morning for demonstrations in front of the Parliament Buildings.

About a dozen Lithuanians gathered Tuesday in front of the Soviet Embassy, waving Lithuanian flags and occasionally shouting their opposition to the Soviet leader, who arrived in Ottawa at about noon.

Richard Kalendra, who has dozens of relatives in Lithuania, said he personally had nothing against the Soviet Union but is opposed to the economic sanctions imposed against Lithuania after it declared independence from the Soviet Union.

''We have the right to self-determination,'' Kalendra said. ''Gorbachev knows they have the right to independence. He's denying them that.''

Kalendra said several thousand Lithuanian descendants from various Canadian cities planned to travel to Washington later in the week to demonstrate against Gorbachev.

A small group of Lithuanians was to hold a candlelight vigil in front of the Parliament Buildings late Tuesday. About 1,500 were expected to demonstrate Wednesday when Gorbachev arrives at Parliament Hill for meetings with Prime Minister Brian Mulroney and other Canadian leaders.

Some 100,000 Canadians are of Baltic origin, about a third of them of Lithuanian descent.

Also in Ottawa, Al Juzukonis, spokesman for the Baltic Federation in

Canada, said Gorbachev's sanctions are causing critical shortages of medical supplies in Lithuania.

Juzukonis, who spoke Tuesday with Canadian politicians, said Soviet troops positioned at the Polish-Russian border forced trucks trying to enter Lithuania with medical supplies to find a different route. Another 10 tons of supplies was delayed in Paris while Lithuanian authorities tried to find a way to get them past the border.

Juzukonis said the blockade has left Lithuania, which he described as a vital Soviet medical center for heart operations and micro-surgery, critically short of antibiotics, hypodermic needles and kidney dialysis filters.

He said the election of Boris Yeltsin as president of the Russian Parliament was a positive move because Yeltsin said he would pursue a sovereignty bill modeled after Lithuania's independence declaration.

In other events, the Canadian Jewish Congress met with about 10 Canadian politicians to protest what they view as a resurgence of anti-semitism in the Soviet Union and the difficulty Soviet Jews have in flying direct to Israel.

Eric Vernon, a spokesman for the Canadian Jewish Congress, said the Soviet Union has not implemented an agreement signed last December between El-Al of Israel and the Soviet Union's national airline, Aeroflot, to provide direct flights.

#90149u1663 05/29/1990 ~United Press International

LONDON (MAY 29) UPI - Stock prices closed higher in moderate trading Tuesday on the London International stock exchange, boosted in part by a strong advance on Wall Street.

The blue-chip Financial Times 100-stock index, which fell 11.5 points last Friday, surged 26.5 points to 2,292.1. The narrower top 30 industrial average climbed 23.3 points to 1,823.3.

An estimated 390 million shares were traded, compared with 385 million shares changing hands on Friday.

Investment activity was light as dealers returned after Monday's bank holiday,but analysts said there was some encouragement in a report by the Confederation of British Industry that indicated the British economy was slowing down.

Prices surged near the close, with analysts saying investors were active

in the futures market.

On the economic front, the Central Statistical Office reported Britain's real gross domestic product, measured by the output of goods and services, rose 0.4 percent in the first quarter from the fourth quarter of 1989.

Market forecasters were expecting the report to show a range of no growth to a 0.3 percent rise in the first quarter.

The output-based GDP is considered the most reliable guide to short-term movements in the economy.

Analysts said prices, which opened slightly lower, moved higher after the report was released.

Prices were also boosted by strong early performance on Wall Street. In New Yofk, the Dow Jones industrial average was ahead 23.72 points to 2,844.64 at 1 p.m. EDT.

Among the most actively traded issues, Imperial Chemical Industries climbed 30 cents to $18.94 after the company announced it had increased its stake in Enterprise Oil. Enterprise gained 24 cents to $10.

Cadbury Schweppes advanced 19 cents to $5.53 after announcing plans to buy most of the soft-drink facilities of the French company Source Perrier.

Glaxo Holdings fell 19 cents to $12.35 amid concern over competition to the pharmaceutical company from rival Astra, which recently released a new ulcer treatment.

Among the day's other highlights, Boots gained 14 cents to $4.60, B.A.T Industries gained 19 cents to $11.36, Storehouse added 5 cents to $1.82 and Guinness gained 21 cents to $11.56.

Elsewhere in Europe, stock prices on the Frankfurt Stock Exchange closed higher in light trading. The closely watched German Stock Index, which gained 5.79 points Monday, added another 13.78 points to 1,842.74.

Traders said the advance was mostly due to technical portfolio adjustments.

On the economic front, the Federal Statitics Office in Wiesbaden reported West German wholesale sales fell 2 percent in real and normal terms during April from a year earlier, the result of a steep decline in sales of raw materials and semi-finished goods.

In a seperate report, the Bundesbank reported West Germany's M-3 money supply expanded at an annualized rate of 4.5 percent in April.

The expansion slowed slightly from March, when M-3 increased at a 4.8 percent rate.

Market watchers said the April expansion fell slightly short of the consenus of 5.0 percent expected by economists.

#90149u1678 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The chief of the Lithuanian mission in the United States said Tuesday the three Soviet Baltic states are worried about a ''Yalta-type'' superpower summit in which their rights for independence would be bargained away.

Stasys Lozoraitis, acting ambassasdor of Lithuania, read to reporters a statement he had received early Tuesday from the foreign ministers of Lithuania, Estonia and Latvia.

The statement said: ''The republic of Estonia, the republic of Latvia and the republic of Lithuania are declaring that the president of the U.S.S.R. has no legal authority to represent them during the upcoming summit.

''The governments ... will not recognize any obligations or stipulations relating to the Baltic states which may result from bilateral agreements concluded between the two superpowers.''

Lozoraitis said, ''The declaration is a warning. We are not going to accept any Yalta-type agrements.''

In 1945, the wartime allies held a summit at Yalta, on the Black Sea, in which eastern and western Europe were divided into ''spheres of influence '' with the Soviet Union being given responsibility for Eastern Europe. The Soviets later reneged on the part of the Yalta agreement calling for free elections in their sphere of influence.

''We are not against the summit,'' Lozoraitis said. ''We believe it is very necessary and usuful and President Bush will have an opportunity to sit down and discuss the problem of Lithuania and the other Baltic states.''

But he repeated that the Baltic states want the discussion limited to how to open negotiations between the central Soviet government and the Baltic governments.

Lozoraitis described the Soviet government as ''a drowning dinosaur,'' quickly losing its economic and political force. ''It's a very dangerous situation. The sooner we talk, the better.''

The Lithuanian-American Community announced plans for a series of street demonstrations and vigils that will shadow Soviet President Mikhail Gorbachev in Washington, including a June 1 candlelight vigil by Boy and Girl Scouts from Cleveland in front of the Soviet Embassy, where Gorbachev and his wife will stay.

Lozoraitis was asked if the Lithuanian community had considered the possibility the demonstrations might backfire on them by embarrassing or angering Gorbachev.

He said, ''It is not in my control. The Lithuanian-American community is much more radical than the people in Lithuania, but I think it will not get violent. I couldn't stop the demonstrations and if I could I wouldn't. This is a free country.''

Lozaoraitis said that he would like Bush to pressure Gorbachev to lift the Soviet economic blockade on Lithuania, which is now beginning to create extreme hardship.

He said the blockade, which includes a halt to external oil and gas shipments, has thrown 200,000 people out of work. He added that the republic's farmers, who should now be planting their spring crops, are in critical condition because there is no fuel available for their tractors.

#90149u1679 05/29/1990 ~United Press International

BRUSSELS (UPI) - The European Community and Japan, meeting at ministerial level for the first time in four years, agreed Tuesday to seek a reduction in the EC's nagging trade deficit with Japan.

They also agreed to closer ties in science and the environment, signing an atomic-energy agreement, and set up a working group on obstacles to EC firms' access to Japanese markets.

The 12-nation EC specifically mentioned the leather and shoe industries, and the processed food field, as problem areas.

''The European Community and the Japanese governments have recognized that there continues to be a trade imbalance,'' said Japanese Foreign Minister Taro Nakayama.

The imbalance has recently improved, and ''we agreed to keep trying,'' he said. ''We are doing much work to liberalize our markets.''

Japan says it had a $19.8 billion trade surplus with the EC last year, compared to a Japanese trade surplus of $45 billion with the United States.

Nakayama and Japan's minister for international trade and industry, Kabun Muto, met with an EC delegation led by Frans Andriessen, the Community's foreign affairs commissioner.

Due to scheduling problems, it was the first ministerial-level meeting since 1986, but they agreed to now hold such sessions at least once a year beginning in Tokyo in 1991.

Muto said one factor in the trade imbalance was the EC's choice of export products. ''We will try to help European investors to develop things welcomed by the Japanese market,'' he said.

Andriessen said he was ''realistic'' about how much the bilateral meeting accomplished, because many trade problems can only be addressed multilaterally in the 96-nation General Agreement on Tariffs and Trade.

''We had good talks and we managed to hammer out a starting position on the problems we have bilaterally and multilaterally,'' said Andriessen.

Both sides said a ''top priority'' was a successful conclusion this year of the current round of GATT talks, which have been stalled over agricultural subsidies and other issues.

The sensitive issue of Japanese auto imports into the EC was not discussed in detail. Some countries, including France and Italy, seek a long period of import quotas after the EC completes its internal market in 1992. Others, including Britain and West Germany, seek to remove quotas as soon as possible.

Muto made clear that Japan seeks to exclude from any import quotas the ''transplant'' Japanese cars built at manufacturing facilities in the EC, mainly Britain. ''Things made on European soil are European products,'' he said.

Japan reaffirmed its commitment to provide aid to the emerging democracies of Eastern Europe. The aid program of 24 wealthy nations is being coordinated by the EC executive commission.

The agreement on nuclear safety and development was signed between the Japan Atomic Energy Research Institute and the European Atomic Energy Community.

''This is an indication that the relationship between Japan and the European Community goes beyond mere trade issues,'' Andriessen said.

#90149u1685 05/29/1990 ~United Press International

WAYNESBURG, PA (MAY 29) UPI - David Spencer and his fiance, Kim Smith, spent the Memorial Day weekend mourning the memory of their black Labrador retriever, given up for dead in a traffic accident on Interstate 79 in Pennsylvania.

It was not until early Tuesday that Spencer learned his beloved pet, Shadow, had been waiting for them, guarding a lost 35mm camera and cowboy boot in the grassy median at the accident site 5 miles north of Waynesburg at an exit marked Rough Creek, where they lost her on Saturday.

The couple was heading north from their Charleston, S.C., home to visit Spencer's parents in Jamestown, Pa., where they planned to spend the holiday discussing details for their September wedding. The car hydroplaned on the rain-slick highway, spun several times and struck a guardrail.

The car's hatchback flew open on impact and a rear window shattered.

''I'm not sure which way Shadow went out,'' Spencer said Tuesday in a telephone interview. The couple's other dog, a cocker spaniel named Checker, survived the accident held tightly in Kim's lap.

''We looked around the area for about two hours and didn't have any luck '' Spencer said. ''Of course, the grass is really high there and it was pouring rain and the creek - we couldn't hear her if she was wimpering because the water was splashing. And then the tow truck came.''

A passerby who helped search for the dog finally claimed to have found her dead.

''Looking back, I guess he was just trying to spare us because he knew we wouldn't leave until we found her,'' Spencer said.

It was Shadow's loyalty to the man who adopted her on an Easter Sunday two years ago when she showed up at his doorstep, homeless and weak from malnutrition, that ultimately reunited them. It was also diligent detective work by Pennsylvania State Police, friends and family members.

The dog was spotted Sunday afternoon and troopers who went to the accident site had difficulty separating her from the camera and boot she guarded, growling whenever they approached.

''I had to use two ropes to drag her away and literally tie her to a guardrail,'' said Trooper Donald Booher, who took Shadow to a nearby animal shelter. ''She really wanted to get back to this property that was the only thing that even resembled her master - the scent, you know.''

Police, fearing a hitchhiker had been abducted or injured and the dog left

behind, issued an alert that was carried by radio and television stations. A detective who is a relative of the Spencer family prompted some phone calls that ultimately made a match.

''We had kind of a bad weekend and then we got the good news,'' Spencer said.

He and Kim and his mother passed by the accident area again on Monday as they were heading back to South Carolina - but after the police had retrieved Shadow.

''It was a tearjerking moment when we passed by that spot,'' he said. ''We thought about it later. We didn't have the radio on. We were just sitting there talking and then had a moment of silence for her as we drove past.''

They'll make another trip to Pennsylvania on Wednesday, with two stops planned: an auto repair shop and the animal shelter, but maybe not in that order.

#90149u1691 05/29/1990 ~United Press International

CAMBRIDGE, MA (MAY 29) UPI - Harvard University President Derek Bok announced his resignation Tuesday after two decades at the helm of nation's oldest college, saying an ambitious new fund-raising campaign requires ''fresh energy.''

''It has been an extraordinary privilege to serve so long as president of Harvard,'' Bok said in a statement announcing he will step down in July 1991, the end of the 1991 academic year.

''I cannot imagine another job that would have been so stimulating and absorbing. As Harvard plans for the challenges of the 1990s, however, and prepares to launch a major capital campaign, it is time for me to step down and allow a new president to provide fresh energy and continuity of leadership throughout the next decade.''

University spokesman Peter Costa said the major fund-raising campaign was expected to begin in the fall of 1991.

The university said a search committee would be formed shortly to help select a new president.

Harvard, established in 1636, is the nation's oldest college.

Bok, 60, took over as Harvard's 25th president on Oct. 11, 1971, and moved quietly but firmly to bring change to the huge complex along the banks of the Charles River.

His tenure saw a number of education innovations, including establishment of the Core Curriculum, requiring all undergraduates to take certain subjects.

Bok is also credited with developing the John F. Kennedy School of Government into a major professional school that prepares men and women for posts in government.

But his more recent years in office were marked by controversy over the university's hiring and investment practices and critics said Bok was too slow to act upon the mood for change at Harvard.

Student protesters criticized the university's hiring and tenure practices as sexist and racist and its investment policies as insensitive to racial inequality in South Africa.

In a dramatic sign of controversy at Harvard Law School this spring, students occupied the dean's office and Professor Derrick Bell announced in April that he would take an unpaid leave of absence until a black woman was appointed to a tenured post at the prestigious law school.

The 1980s were marked by similar protests over Harvard's failure to rapidly and totally divest from companies doing business in South Africa.

Bok, a 6-foot tall, trim man who once played college basketball, succeeded Nathan A. Pusey in the president's post at a time when the university was rocked by protests stemming from the Vietnam War.

His appointment was a break with the past. Unlike past presidents of the university, Bok did not graduate from Harvard College. He was a Stanford University man. However, he did earn his law degree from Harvard Law School.

''It is almost impossible for me to think of Harvard without Derek Bok as president,'' said Henry Rosovsky, a member of the Harvard Corporation, the school's governing body. ''He had cared deeply about improving every aspect of Harvard. He has also been a most thoughtful leader of higher education in America.''

#90149u1711 05/29/1990 ~United Press International

KHARTOUM, SUDAN (MAY 29) UPI - Sudan issued an appeal Tuesday for food and medical aid for 300,000 people left homeless by earthquakes last week in the south of the country.

Brig. Dominique Kassiano, a member of the ruling military junta, urged

regional and international humanitarian organizations to send assistance to the Juba area, 770 miles south of Khartoum.

A series of major tremors flattened several shanty towns, leaving 300,000 people homeless, and threatened to change the course of the Nile river, authorities said.

''The victims need food, blankets and tents,'' Kassiano said, quoted by the official Sudan News Agency.

A bigger earthquake than the one that hit San Francisco last October, registering 7.5 on the Richter scale, struck an area about 60 miles northeast of Juba on May 20. It hit such a remote area that no casualties and little damage was reported.

However, aftershocks almost as powerful struck closer to Juba - a provincial capital of about 250,000 people - on May 24-26.

They felled government buildings in Terekeka, 36 miles north of Juba, damaged property in Juba itself and put huge cracks in the banks of the Nile.

SUNA quoted local observers as saying they feared the Nile might change course if any further tremors struck.

Latest reports from Terekeka said the entire town had been demolished by the earthquakes and at least 7,000 people had already fled to Juba in search of shelter and food.

Coordinating damage reports, Western relief officials said last week, has been made particularly difficult in the Juba area because southern Sudan is in the throes of a seven-year civil war. Juba itself has been under attack by rebels of the Sudanese People's Liberation Army for more than a year.

#90149u1731 05/29/1990 ~United Press International

NEW YORK (MAY 29) UPI - CBS announced its new schedule Tuesday which includes five nights of new lead-off shows, a new slot for Connie Chung and such well-known names as Burt Reynolds, Lucie Arnaz, Edward Woodward, and Audrey Meadows. Not returning are most of the mid-season replacements and such old standbys as "Falcon Crest," "Wiseguy," "Paradise," and "Tour of Duty."

"Wiseguy" will be back later in the season, but with Ken Wahl and the Vinnie Terranova character to be phased out in favor of a new agent, to be played by Steven Bauer. "Paradise" remains under consideration.

CBS has scheduled seven hours of new prime-time programming for the 1990-91 television season, including four comedies and five dramas to join 13 returning series, according to Jeff Sagansky, president of CBS Entertainment.

The CBS mandate, Sagansky said: "To broaden our demographic base with shows that lower the average age of our audience and attract more family viewing in the 8:00 o'clock time period."

In addition to the announced schedule, Sagansky said, in the wings CBS has "Wiseguy;" a new drama starring Sharon Gless, "The Trials of Rose O'Neill;" Norman Lear's first comedy in 15 years which was not ready for fall airing; an animated half hour, "The Family Dog," from Steven Spielberg and "Batman" director Tim Burton; a half-hour comedy based on the movie "Big," and a live action-animated series, "The Pink Panther."

A number of returning shows have new time periods, and "Saturday Night with Connie Chung" has become "Face to Face With Connie Chung" on Mondays - a move that was so successful when tried this month that Sagansky referred to Chung as "Our Lady Of The May Sweeps."

The new comedies, with all times Eastern: "Uncle Buck," to air Mondays, 8-8:30 p.m. Kevin Meaney stars in the role created in the hit film by John Candy. He plays an ill-mannered immature uncle who becomes the head of his late brother's household and learns to handle three kids. Audrey Meadows has a recurring role as the children's grandmother.

"Lenny," to air Wednesdays, 8-8:30 p.m. Lenny Clarke stars a Lenny Callahan, a blue-collar guy who always has an answer to life's problems, even if he didn't quite get the question.

"Evening Shade," to air Friday, 8-8:30 p.m. Burt Reynolds stars in a comedy written and co-produced by Linda Bloodworth Thomason, the creator of "Designing Women." Reynolds plays a married man who moves his city-raised family back to the small town where he grew up.

"Four Alarm Family," to air Saturdays, 8-8:30 p.m. Gregory Harrison goes "My Three Sons" one further and stars as the widowed father of three sons and a daughter. He's also the captain of the local firehouse.

"The Hogan Family," to air Saturdays, 8:30-9 p.m. The cast remains intact as the show moves from NBC to CBS for the start of its sixth season.

The one-hour series are: "WIOU," to air Wednesdays, 10-11 p.m. John Shea, Helen Shaver, Harris Yulin, Dick Van Patten, and Mariette Hartley are among the ensemble cast of this drama about the news department of a fading big-city television station.

Sagansky was particularly high on "WIOU,"saying, "It should be one of the most talked about and critically well-received new shows of the season." He compared its approach to "St. Elsewhere" and "L.A. Law."

"The Flash," to air Thursdays, 8-9 p.m. Eastern time. John Wesley Shipp stars as a reluctant hero with superhuman speed in this action-adventure based on the classic comic book.

"The Hammersmiths," to air Thursdays, 9-10 p.m. Lucie Arnaz, Rick Rossovich and Don Murray star in what is described as a poignant and funny story about a big family.

"Over My Dead Body," to air Fridays, 9-10 p.m. Edward Woodward stars as a burned-out crime novelist with a past connection to Scotland Yard who solves crimes with the help of a young San Francisco woman who works as an obituary writer.

"The Green Machine," to air Saturdays, 9-10 p.m. Gil Gerard and Joanna Pacula are among a group of scientists who are strugging to save the Earth from its worst enemy - us.

The CBS fall lineup looks like this:

Monday - "Uncle Buck," 8-8:30 p.m.; "Major Dad," 8:30-9 p.m.; "Murphy Brown," 9-9:30 p.m.; "Designing Women," 9:30-10 p.m.; "Face to Face with Connie Chung," 10-11 p.m.

Tuesday - "Rescue 911," 8-9 p.m.; "CBS Tuesday Movie," 9-11 p.m.

Wednesday - "Lenny," 8-8:30 p.m.; "Doctor, Doctor," 8:30-9 p.m.; "Jake and the Fatman," 9-10 p.m.; "WIOU," 10-11 p.m.

Thursday - "The Flash," 8-9 p.m.; "The Hammersmiths," 9-10 p.m.; "Knots Landing," 10-11 p.m.

Friday - "Evening Shade," 8-8:30 p.m.; "Bagdad Cafe," 8:30-9 p.m.; "Over My Dead Body," 9-10 p.m.; "Dallas," 10-11 p.m.

Saturday - "Four Alarm Family," 8-8:30 p.m.; "The Hogan Family," 8:30-9 p.m.; "The Green Machine," 9-10 p.m.; "48 Hours," 10-11 p.m.

Sunday - "60 Minutes," 7-8 p.m.; "Murder, She Wrote," 8-9 p.m.; "CBS Sunday Movie," 9-11 p.m.

#90149u1732 05/29/1990 ~United Press International

OTTAWA (MAY 29) UPI - Soviet President Mikhail Gorbachev, facing the most severe test of his leadership yet, Tuesday pleaded for ''dialogue and trust'' from other nations at the start of his Canada trip preceding his summit with President Bush.

Among more than 1,000 people who welcomed Gorbachev, who was accompanied by his wife, Raisa, and Foreign Minister Eduard Shevardnadze, at the Canadian Forces Airport in Ottawa were 850 boisterous school children who waved Russian and Canadian flags and shouted words of greeting.

After reviewing a 100-member Honor Guard dressed in scarlet tunics, white gloves and white pith helmets, Gorbachev unexpectedly waded into the milling crowd.

A smiling Gorbachev spent several minutes greeting the children in marked contrast to his lack of impromptu walkabouts in Moscow where he has been sharply criticized for his economic reforms.

Gorbachev left behind a series of crises ranging from the election of his political rival, maverick communist Boris Yeltsin, as president of the largest Soviet republic, to conflict over Baltic independence to renewed nationalist violence in the Caucasus.

Before departing, the Soviet leader told a key Communist Party meeting that the Russian Parliament should not elect Yeltsin as president of the republic. But Yeltsin, an outspoken Gorbachev critic, was elected later Tuesday by a four-vote majority.

Panic buying continued in the Soviet Union with reports that some republics like the Ukraine will not implement the price rises envisioned in a new economic plan being debated in Parliament.

Canadian officials have said Gorbachev's visit is an opportunity to bolster the Soviet leader's economic and political reforms and reassure Russians they are part of the global community.

''Today, dialogue and trust between political leaders, countries and nations are especially important,'' Gorbachev said in his brief arrival address to the airport crowd.

Gorbachev also invoked memories of World War II and recalled Canada as a Soviet ally, implying that such alliances must be maintained in peacetime.

Gorbachev said he wanted to be partners with Canada and other nations ''on the project of a modern European home.''

''This is a time of dramatic change in the world,'' Gorbachev said, adding he he planned to exchange views with Prime Minister Brian Mulroney and other political leaders on bilateral relations, the European process and current world problems.

Gorbachev and Bush will meet in Washington Thursday to discuss, among other issues, the political map of Europe after the unification of Germany. Gorbachev insists that a unified Germany not be a full member of NATO, while Bush says it must be in the Western military alliance.

Mulroney, like Bush, was to try and persuade Gorbachev that a reunified Germany should be a full NATO member.

Gorbachev planned to visit Mulroney at the prime minister's official residence before meeting with Governor General Ray Hnatyshyn. On Wednesday he was to lay a wreath at the National War Memorial and make a public address at the National Art Gallery before departing for Washington.

About 1500 Baltic Canadians were expected to demonstrate Wednesday against Gorbachev's measures in that region. A handful of Lithuanians demonstrated Tuesday in front of the Soviet Embassy and were expected to hold a candlelight vigil later at the Parliament buildings.

SRINAGAR, INDIA (MAY 29) UPI - Security forces Tuesday shot dead four Moslem separatists in Kashmir on the ninth day of a strike called to mourn the death of the chief Kashmiri Moslem cleric, police and news reports said.

Security forces killed the Moslem militants in the border town of Kupwara after they crossed into the Indian state of Jammu and Kashmir from Pakistan, the Press Trust of India news agency said.

The report quoted officials as saying security forces opened fire after the militants shot at border police and ignored calls to surrender.

Other Moslem militants detonated a bomb at the residence of Bashir Ahmad Nangroo, a former state minister and member of former prime minister Rajiv Gandhi's Congress (I) Party, in Pulwama, a town near the state capital of Srinagar, 400 miles north of New Delhi, police said.

They said there were no casualties but the bomb caused extensive damage to the house.

The strike was called to mourn the death of Kashmir's chief Moslem cleric, Moulvi Farooq, who was shot dead by unidentified gunmen May 21.

Militants claim the state government killed the cleric, but officials blamed the militants for the killing.

The militants have been waging a campaign for secession of the Kashmir region since 1988, claiming separation from India is necessary because successive Hindu-dominated New Delhi administrations have ignored the interests of Kashmiris.

The separatist drive snowballed into a popular uprising in mid-January when security forces fired into a crowd of demonstrators, killing at least 35 people, including women and children. More than 400 people have been killed since then in clashes, bombings, assassinations and gun battles, security forces have rounded up hundreds of suspected militants in house-to-house searches.

Most of the 4 million Moslem residents of the region now appear to support the militants' demands for separation from India.

Shops and businesses were closed Tuesday on the ninth day of the strike marking Farooq's death and traffic was barred on most roads.

DETROIT (MAY 29) UPI - Chrysler Corp. plans to extend its buyer incentive programs to Aug. 31 after the current round expires this Thursday, although indications are buyer rebates may be less lucrative.

Chrysler dealers contacted Tuesday said the No. 3 carmaker notified them that its factory-to-customer rebate program will be extended for three months.

However, it also said the rebate amount on its 1989- and 1990-model Dodge Spirit and Plymouth Acclaim mid-sized sedans would be lowered to $750 from $1,000 - an indication that, like other top automakers, Chrysler is cutting back on offers as its car inventories near more manageable levels.

''That is all we've been told so far,'' said Bob Gasiorowki, a sales manager at Pointe Dodge in Detroit.

Last month, Chrysler sweetened its buyer incentives by lowering the annual financing rates on eligible models. Its current customer incentives range from $500 to $2,000, depending on model.

While minivans are exluded from the current offer, Chrysler confirmed it is also offering dealers a $500 discount on its long-wheelbase minivans under a program that ends July 17.

As of May 20, Chrysler had a 72-day supply of cars, while a level of about 65 days is considered normal this time of year. But industry figures show Chrysler's supply of light trucks including Jeeps and minivans is even higher at 90 days.

Chrysler's domestic car sales so far this year are down 19.2 percent, while its truck sales are down 8 percent from year-ago levels.

Separately, industry publication Automotiuve News said Ford Motor Co. once again has shunned carryover allowances and will instead offer its dealers up to $1,500 on 1990 models after the 1991 versions go on sale in late September.

Ford's year-end incentives to dealers expire Dec. 31, and are designed to help the No. 2 automaker have an orderly transition into the new model year.

Ford has been having problems getting dealers to order 1990 models for the so-called ''buildout period'' - the time during the summer months when automakers produce the last models for the model year. This has prompted Ford to idle several car assembly plants for one week at a time during April and May.

Earlier this year, industry leader General Motors Corp. said it would pay its dealers a carryover allowance of 5 percent of the sticker price on leftover 1990 models until Dec. 31 following introduction of the 1991 models.

#90149u1753 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - Somewhat nostalgic for the days when one federal agency handled health and education, two national experts urged government officials Tuesday to realize the critical role adequate health care plays in children's education.

''Studies ... link good health and better learning, but this knowledge has

not resulted in greater coordination to meet the needs of our kids,'' said Lawton Chiles, chairman of the National Commission to Prevent Infant Mortality and a Democratic gubernatorial candidate in Florida.

''Educational reform has to start at the beginning with good prenatal and early pediatric care. If we only focus on curriculum changes and forget about the brain cells for that youngster ... it all just becomes words on paper,'' former Sen. Chiles said.

Chiles and William Woodside, chairman of the Institute for Educational Leadership, developed the National Health-Education Consortium, meeting in Washington this week to discuss ways federal, state and local officials can better integrate health and education.

''It's pay now or pay more later,'' Chiles said.

The consortium said disadvantaged children often end up in a vicious cycle of poor health, poor nutrition, chronic illness and other disabilities that, if untreated or unidentified, impede their ability to learn.

Woodside said the current ''compartmentalized approach'' of dealing with health and education denies children appropriate attention and could have lasting and costly ramifications.

''It's like walking into a half-completed movie and wondering why we don't understand the plot,'' Woodside said. ''It's imperative that we develop a comprehensive view that looks at the needs of the whole child.''

Approaching health and education separately, Woodside said, has been an ''atrocious waste of resources.''

But he said the nation was ''damned both ways'' when it split the former Department of Health, Education and Welfare into two separate agencies - the Department of Health and Human Services and the Department of Education.

He indicated education had been getting squeezed by the gigantic social program bureaucracy, yet separating them broke the critical link between the issue.

#90149u1780 05/29/1990 ~United Press International

MANILA, PHILIPPINES (MAY 29) UPI - The acting armed forces chief warned Tuesday right-wing troops planned to mount another coup attempt soon against President Corazon Aquino.

''They've done it before, they've failed six times. They will fail again

if they try it,'' said Maj. Gen. Rodolfo Biazon, who also heads the national capital region defense command.

''I assure our people that the government, a constitutional democracy we would like to preserve for our people, will prevail.''

Defense lawyers, meanwhile, called Tuesday for the dismissal of charges of mutiny, murder and conduct unbecoming an officer and a gentleman against two generals and 19 officers in connection with the December 1989 coup attempt.

The defense motion again delayed the arraignment of the 21 - the first group of alleged mutineers to go on trial in the Dec. 1-9 uprising in which 119 people were killed and more than 500 wounded.

Biazon said he had received intelligence reports showing mutineers planned to take advantage of expected unrest at the start of the new school year in June.

He said he expected student protests over increased tuition fees, worker demands for wage hikes, the usual protests on Independence Day of June 12 and a possible rise in electricity rates.

Biazon said the mutineers had planned to stage a coup attempt last February. ''But they rolled it over to March and then to April, then May and since they could not do it, they are rolling it again to June,'' he said.

Biazon fielded an additional force of 2,000 soldiers in the capital on Monday in a bid to curb a series of ambushes and bombings in which a dozen people were killed last week. Communist guerrillas and right-wing groups were blamed for the incidents.

In the fourth meeting this month of a general court martial, defense attorneys denounced the lack of a ''thorough and impartial'' pre-trial investigation of the 21 officers undergoing trial.

Claiming the charges of 22 counts of murder, 50 counts of ''frustrated murder'' and mutiny were couched in general terms, the lawyers asked for specifications of the liability of each of the accused.

Defense attorney Alfredo Lazaro said most of the victims mentioned were civilian spectators who were killed in the crossfire and not by ''treachery and premeditation'' as charged.

''Why blame it on these officers when they (the victims) might have committed suicide by going the battle scene despite several warnings not to go there?'' Lazaro said.

About 2,100 officers and soldiers have either surrendered or been captured in the December uprising and are awaiting trial.

#90149u1795 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The State Department said Tuesday the United States would support sending a U.N. team of observers to the Israeli-occupied West Bank and Gaza Strip to report on the human rights situation.

The statement, by spokeswoman Margaret Tutwiler, was described by her as a shift in the previously declared U.S. policy.

Last week, Secretary of State James Baker said that the United States ''would be prepared to discuss'' a United Nations delegation, without defining the size or mission of the group.

Tutwiler said Tuesday the United States support would be limited to a small delegation under the mandate of the U.N. Security Council or Secretary General, similar to the mission to Israel led by Marrack Goulding, a U.N. official in January 1988.

A spokesman for the Israeli government said that Israel would oppose any U.N. presence as an infringement of Israeli sovereignty as occupying power. A spokeswoman for the Israeli Embassy in Washington said she wanted to study the Tutwiler statement before commenting about the new policy.

The U.N Security Council, back in New York after hearing a statement by Palestine Liberation Organization Chairman Yasser Arafat, is expected to take up the matter Tuesday.

Tutwiler said that the statements by Iraqi President Saddam Hussein, in which he once again vowed to use chemical weapons against Israel in case of an Israeli attack on Iraq, were ''outrageous, irresponsible and inflammatory.''

She said, ''Nobody should be trumpeting the use of such weapons.''

Speaking of the Arab summit in baghdad, Tutwiler said, ''This summit should not be an event that makes it more difficult to achieve peace.''

#90149u1801 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - President Bush told Iran that evidence supports the conclusion that four Iranians kidnapped in Lebanon have died, White House press secretary Marlin Fitzwater said Tuesday.

Information from international organizations, including the Red Cross, shows that ''essentially our conclusions are the same that the four individuals they were concerned about are dead,'' Fitzwater told reporters.

Iran had sought information on the four Iranians - two diplomats, a journalist and a driver - who were kidnapped in Beirut years ago.

At a recent news conference after the release of American hostages Robert Polhill and Frank Reed, Bush said he would seek further information on the fate of the Iranians as a gesture of gratitude to Iran. Iran and Syria used their influence in winning freedom for the two Americans, who were held by kidnappers in Lebanon.

''The president presented it in that context as an act of goodwill on our part and felt that any information any country had should be passed along '' Fitzwater said. ''It's a gesture we can make, but we don't put any conditions on it because it is the right thing to do.''

Fitzwater said the information was relayed to Tehran through the Swiss government. Bush had said at the news conference that information indicated the Iranians were dead.

''As the president said, we have made a major effort of collecting information from international organizations and from private sources that we have developed in the region over the years, and we passed this information along to the government of Iran,'' Fitzwater said.

''Essentially our conclusions are the same that the four individuals they were concerned about are dead,'' he said.

He added the United States wants Iran ''to know that the process has essentially been completed and they have all the evidence that we have been able to gather.''

Fitzwater said the United States gathered through intelligence sources ''more information than we had before, but the conclusions were not altered.''

#90149u1805 05/29/1990 ~United Press International
(MAY 29) UPI - Poland says it will beef up security at Soviet consulates following anti-Soviet rallies outside two Soviet missions. Moscow protested for better protection after more than one-hundred demonstrators hurled firebombs at the Soviet consulate in Krakow last week. Poland blames the riots on ''extremists.''

Afghan delegates to the grand tribal assembly in Kabul begin final debate today on constitutional changes to allow a multi-party system. Some 750 representatives meet for a second day to commit Afghanistan to political pluralism and the liberalization of the economy. The meeting took place amid rocket-fire from U-S backed rebels.

In the oil-rich west African nation of Gabon, sporadic fighting is reported between armed government opponents and the government troops in the petroleum center of Port Gentil. French T-V says at least one person was killed. A French oil company announced in Paris that normal oil production will resume at Port Gentil with a skeleton staff of 50 workers.

-30- 1170
#90149u1809 05/29/1990 ~United Press International
VIENNA, AUSTRIA (MAY 29) UPI - OPEC acknowledged Tuesday it had no ''ready solutions'' to members' cheating on production quotas and creating the current world oil glut, but warned of a major energy crisis a few years down the road.

''We admit that in the short term we have a compliance problem for which there are no ready solutions,'' said the 13-nation Organization of Petroleum Exporting Countries in an editorial in its monthly OPEC Bulletin.

''But, in the rush to criticize the organization, let our critics not overlook, as they appear to be doing, the great challenge confronting the world - meeting its increasing demand for energy,'' the editorial said.

It conceded that violations of production quotas by some OPEC members had contributed to the recent instability of global oil markets.

Cheating on quotas by Kuwait and the United Arab Emirates has contributed to weaker oil prices and prompted an emergency OPEC meeting earlier this month that promised a still-unfulfilled 1.4 million barrel cutback in daily output.

Saudi Arabia also had significantly raised production to maintain its 24.4 percent share of the cartel's total output.

''We are the first to admit that we are unhappy about the fall in prices,

concern for which prompted us to call the May emergency meeting,'' the editorial said.

In the long term, the Vienna-based OPEC predicted demand for oil would outstrip production capacity by the mid-1990s as the economies of Eastern Europe and the Third World begin to heat up.

The resulting crunch could send oil prices soaring and create long lines at gasoline pumps, it said.

''We have made it our duty ... to draw attention to this hydra-headed crisis in the hope that a well-articulated plan can be put in place while there is still time for action,'' said the editorial.

The cartel produces more than a third of the world's oil and tries to regulate prices by controlling production of its members.

To help avert a serious energy crisis, now ''just a few years down the road,'' OPEC is hoping to obtain money and technology from the industrial West to help its members increase their production capacity, the article said.

#90149u1815 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The government, which has barred importation of ostriches and other flightless birds for the past nine months, proposed new rules Tuesday that would allow the birds to be shipped to the United States.

The regulations are aimed at ensuring the birds - ostriches, cassowaries, emus, rheas and kiwis - are free of ticks and other ectoparasites. Importation was cut off last Aug. 15 due to discovery of exotic ticks on adult ostriches imported from Tanzania.

Agriculture Department officials identified the ticks as African Bont ticks and Bont-legged ticks. The ticks, which can transmit the diseases heartwater and East Coast fever, had not been detected during a 30-day quarantine at a privately owned facility in Mundelein, Ill.

State and federal officials examined the farms in Texas, Oklahoma, Ohio and Illinois where the tick-carrying ostriches were sent after release from quarantine. No evidence of heartwater or East Coast fever was found.

Heartwater is an often fatal disease of cattle, sheep, goats and other ruminants. Like East Coast fever, it does not affect humans.

In addition to modifying quarantine rules, the regulations include

procedures for importing eggs from flightless birds for breeding. They also would prohibit shipments of flightless birds from passing through the United States en route to another country.

Ostriches, emus, rheas and cassowaries are rattites, a family of tall flightless birds. Ostriches are the largest birds in the world, often reaching a weight of 300 pounds.

Emus are swift-running Australian birds and the rhea is from South America. Cassowaries, found in Australia and New Guinea, are similar in appearnce to emus but have neck wattles and a horny casque on their heads.

Kiwis are small flightless birds from New Zealand.

NEW YORK (MAY 29) UPI - Top management, and not labor, is the major stumbling block to improving the quality of U.S. products and services,

according to an employee survey released Tuesday.

A majority of the respondents, 61 percent, believed the quality of their work was not an important measure of job performance, and one-third said their companies provide little motivation for employees to improve quality according to a survey of 11,128 employees conducted by the Brooks International, a Montvale, N.J.-based management consulting firm.

Only 26 percent said management does an excellent job of rewarding those who make quality improvement recommendations, the survey showed.

More than 90 percent said they felt a personal responsiblity for meeting quality standards, and 52 percent said most employees continually try to improve the quality of the work they do, the survey said.

The survey was conducted between January and November 1989 among employees at 12 major companies in six industries - heavy manufacturing, food processing, transportation, insurance, telecommunications and utilities.

Three-fourths of the respondents were labor, and 25 percent was management who oversee at least one employee, Brooks said.

More management than labor said they felt quality of work was not an important measure of job performance and also said they do not get a chance to improve work quality.

Only 45 percent of all respondents said they felt management is committed to achieving and maintainting the highest quality levels possible.

''These data indicate a trend we are witnessing in more and more companies: the increasing alienation of middle management contrasted with increasing pride of the work force in the quality of the products they produce,'' said Richard E. Kristensen, executive vice president at Brooks. ''Improved quality requires comprehensive behavioral change and must result from treating the organization as an integrated system.''

#90149u1873 05/29/1990 ~United Press International

NEW YORK (MAY 29) UPI - The stock market held its sharp gains late Tuesday in very light trading, bouncing back from Friday's sell-off which was led by the technology sector.

The Dow Jones industrial average, which fell 34.63 Friday, was up 22.53 to 2843.45 at 3 p.m. EDT. The market was closed Monday for the Memorial Day holiday.

Advances led declines 948-500 among the 1,946 issues crossing the New York Stock Exchange tape. Volume before 3 p.m. amounted to about 104,000,000 shares, compared with 100,560,000 in the same period Friday.

Prices were mixed in light trading on the American Stock Exchange.

Analysts said they saw the sharp advance in prices through early afternoon as signaling the end of the period of consolidation of the gains from the May rally rather than the end of the rally.

''It's the market's way of telling us that the consolidation we've had which culminated Friday (with a 34-point decline in the Dow industrials) was enough of a correction,'' said Alfred Goldman, market strategist with A.G. Edwards & Sons Inc. in St. Louis.

He also said the rebound in the technology sector after its sell-off Friday helped spark Monday's rally.

''The tech sector has bounced back after Friday and that's the type of leadership the market likes to see,'' Goldman said. ''It's good to have the high techs back in motion even if a lot of it's just recovery from what we gave up Friday.''

The sharp drop Friday was sparked by a dismal earnings forecast from Adobe Systems, a California software firm. The company predicted that earnings for the second quarter would be far below analysts' expectations. The news hit computer stocks hard and dragged down the rest of the market. Adobe plunged in over-the-counter trading Friday but was up in afternoon trading Monday.

Analysts said they expected trading to remain light before the release of May employment data prior to the Big Board's opening Friday.

On the trading floor as of 3 p.m. EDT, Varity was the most active issue, higher.

Philip Morris followed, up moderately after sliding last week on Health and Human Services Secretary Louis Sullivan's announcement that he would like states to ban cigarette vending machines as a way of keeping tobacco products out of the hands of children.

First Interstate was third, slightly lower. IBM was also active, rallying as technology issues rebounded from Friday's sell-off. The stock was also said to benefit from a favorable article in Barron's.

Among the other blue chips, AT&T, General Electric, Coca-Cola and General Motors were higher while Merck, which paid its dividend Monday, bucked the trend with a decline.

Elsewhere in the technology sector, Compaq Computer, Digital Equipment and Motorola gained.

In other trading, Tyco Labs was sharply higher after agreeing to buy Wormald International Ltd., an Australian maker of fire protection equipment, for stock and $350 million in cash.

And Time Warner jumped after a report, also in Barron's, quoting a money manager as calling the stock ''undervalued.''

Hillhaven led the Amex issues, unchanged.

#90149u1885 05/29/1990 ~United Press International

MOSCOW (MAY 29) UPI - The Soviet Parliament dropped a no-confidence

challenge Wednesday and deferred action on the government's plan for a modified market economy until President Mikhail Gorbachev returns from his Washington summit.

The government's announcement of planned price hikes last week sparked panic buying across the country and led Moscow authorities to impose a passport system limiting purchases to residents of the Soviet capital for two weeks.

The 525-seat Supreme Soviet overwhelmingly rejected a bid by radical deputies to hold an unprecedented no confidence vote in the government of Prime Minister Nikolai Ryzhkov.

The deputies voted 312-44 with 19 abstentions against placing the no-confidence proposal on its agenda.

Throughout the day, speaker after speaker attacked the government plan to move toward a regulated market economy as not being completely thought out.

By late afternoon, the deputies sought to have separate votes on the plan and the price increases for bread. By that time, the deputies had worked out three different draft resolutions.

Anatoly Lukyanov, the chairman of the Parliament, then asked whether the legislators wanted to put off action for ''the period of a week,'' and the motion passsed without opposition.

The deferral of the vote averted political embarrassment in the face of widespread public anger and evident dissatisfaction among deputies.

It also may have spared embarrassment for Gorbachev, who Sunday night addressed the nation on television and appealed for them not to panic and accept a transition to the market.

On the eve of his Tuesday departure for the summit with President Bush, Gorbachev convened a high-level meeting of lawmakers and Communist Party officials to discuss the economic program.

Some delegates expressed despair at the entire exercise, noting that the Ukrainian leadership has vowed it will never raise prices under the plan. Newly elected Russian Republic President Boris Yeltsin has already rejected Ryzhkov's plan.

Mikhail Bronshtein, an economist and deputy from Estonia, said the Supreme Soviet in the future might have to confine itself to passing broadly phrased conceptual legislation, leaving it to each republic to legislate for its inhabitants.

Ryzhkov answered questions for 40 minutes from deputies challenging his economic program, which would triple the price of bread and other grain products on July 1 and increase the cost of other basic goods beginning Jan. 1.

''We must not fool ourselves or the people,'' Ryzhkov told members of the Supreme Soviet. ''It is senseless to try to make the transition to a market economy under the present pricing system.''

Ryzhkov, in a feisty exchange with lawmakers, said price hikes are an essential first step toward ending the country's economic crisis.

After Ryzhkov spoke, lawmakers began discussion of a resolution that would send the economic-reform package to committee for revision.

Ryzhkov took the floor after three days of debate in which 89 deputies spoke on the economic package, with many saying it offers few concrete steps beyond price hikes that will further burden the Soviet people.

He defended his program's strategy of gradual movement to a market economy saying it would be too destabilizing for the government to free immediately all prices now under state control in the Soviet Union.

''The country is not ready for a forced transition to a market and neither is public opinion,'' Ryzhkov said.

Implementation of the economic plan may prove difficult even it gains approval in the Soviet Parliament.

Lawmakers in the Ukraine, the country's second-largest republic and its historical bread basket, approved a resolution Monday expressing disapproval of the national economic program and directing the local government to devise its own strategy.

Yeltsin, elected president of Russia on Tuesday, said the giant republic should develop its own economic program.

DETROIT (MAY 29) UPI - The U.S. subsidiary of Japan's Ogihara Iron Works Ltd. has been chosen by Ford Motor Co. to make steel body parts for the carmaker's next generation Lincoln coupes to debut for 1993, a trade publication said Tuesday.

It is the third major job to be awarded by Ford to Ogihara America Corp., based in Howell, Mich., said MetalWorking News, noting that the firm is believed to have won the work without having to quote bids against other suppliers.

Ford spokesman Jay Meisenhelder had no comment, citing the company's policy of declining to discuss future product or sourcing plans.

Ogihara America, formed in the mid-1980s, also makes steel stampings for Ford's Lincoln Continental and Town Car. All Lincolns are built at Ford's Wixom, Mich. plant.

The latest contract makes Ogihara America one of the largest independent steel stampers to Ford's U.S. operations. Ford also gets stampings for its North American vehicles from Budd Co. and Canada's Magna International, as well as its own in-house stamping operations.

Parts to be made under the new contract include body side and quarter panels, roofs, fenders, deck lids and doors, the weekly trade publication said.

The new Lincoln coupes replace the current Mark VII model that first bowed

in late 1983 as a 1984 model.

They are to retain rear-wheel-drive and V8 engine power, although plans call for them to be equipped with a new 32-valve, 4.6 liter V8 produced at Ford's Romeo, Mich., engine plant that began operations earlier this year after being converted from a tractor plant.

#90149u1896 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - Calling their plan ''a revolutionary change in the way we give foreign aid,'' Democratic senators announced a proposal Tuesday that would try to use U.S. assistance to help American businesses overseas.

A bill to be offered by Sens. Lloyd Bentsen, D-Texas, David Boren, D-Okla. and Robert Byrd, D-W.Va., would cut programs that provide cash to foreign governments and shift the money to capital projects such as roads and dams that could create opportunities for U.S. businesses.

At the same time, it would make it more difficult for foreign contractors to receive U.S. aid and would authorize $320 million annually in loans for U.S. companies seeking business in Eastern Europe and other overseas markets.

The senators said the United States risks losing business opportunities in Eastern Europe unless it follows the approach of countries such as Japan and West Germany, which require recipients of their foreign aid to use to money to buy their products and services - a practice known as ''tied aid.''

''When are we going to wake up? Are we going to be like Rip Van Winkle and 20 years from now ... say, 'How did we sleep through these changes?''' Boren said. ''Let's wake up. Let's do something to save America's competitive position.''

The Bush administration opposes tied aid on philosophical grounds, but has moved in that direction to stop other countries from employing the practice.

''We're fully in accord with the spirit and thrust of the legislation. My only objection is that it's more money than we need,'' said Eugene Lawson, vice chairman of the Export-Import Bank, which finances exports.

Lawson announced May 15 that $500 million in existing funds would be used for tied aid in Asia to fight similar practices by U.S. competitors.

However, the Democrats faulted the administration for moving too slowly

and for not doing enough to fight tied aid in other areas of the world.

Boren complained that of $800 million sent to to Poland in 1990, nearly 80 percent had no strings attached. By comparison, he said, Japan and West Germany gave Poland $3 billion, with more than 80 percent of it ''in the form of credits that could only be used to buy goods in their own countries.''

''Today's press conference is the first step in making a revolutionary change in the way we give our foreign aid,'' Boren said. ''It is time we adjust to what our economic competitors are doing.''

Bentsen said Canada, Japan, West Germany, France, Italy and Britain provided more than $10 billion in tied aid in 1988, while the United States spent less than 5 percent of that amount. He said experts estimate that the United States loses $5 billion in sales annually because of tied aid.

The bill to be introduced when Congress returns to work in June would do nothing to help U.S. production of goods such as electronics and clothing. Instead, it would help companies involved in telecommunications, energy, environmental protection and construction, advocates said.

#90149u1909 05/29/1990 ~United Press International

ANNAPOLIS, MD (MAY 29) UPI - Naval Academy officials Tuesday issued a general order intended to stop future incidents of hazing or harassment of female midshipmen at the academy.

Superintendent Virgil Hill Jr. issued the four-part plan, saying he wants to reaffirm the rights of all midshipmen at the 145-year-old institution following charges of hazing raised by a female midshipman who resigned from the academy. The order states that any upperclass midshipman who violates rules governing physical contact with plebes can be thrown out of the academy.

The female midshipman who resigned this month, Gwen Dreyer, complained that male classmates handcuffed her to a urinal and took photographs of her. She said that she was taunted for trying to bring charges and complained the punishment for such conduct was inadequate.

Hill's order prohibits "horseplay" between classmates if it involves a midshipman against his or her will. The academy also will institute a hotline, allowing students to report violations to leaders and remain anonymous.

Finally, the order moves to implement a program to educate midshipmen on the issue of sexual harassment and equal opportunity, beginning with midshipmen entering the academy July 3 in the class of 1994.

The order comes after Hill's announcement that he would implement a command-managed equal opportunity program, instead of continuing the current board made up of students.

"These are aggressive steps to ensure that all midshipmen remain free from any form of harassment and to ensure that all our policies are fully understood and absolutely adhered to," said Hill.

Dreyer's resignation from the academy resulted in action from higher Navy officials as well. On May 23, Navy Secretary H. Lawrence Garrett III asked Inspector General Rear Adm. Ming Change to review incidents at the academy and determine if corrective action was necessary. An investigation is continuing.

Dreyer, who was reached by telephone at her mother's home in Encintas, Calif., told United Press International that Hill's program appears to be the right step to take. "I think anything that they do to improve the

system is outstanding," she said. "It's more than I hoped for."

Dreyer said she intended to resign with little fanfare, but family members persuaded her that she could help improve conditions for women at the academy. "That's the only reason I came out with it in the first place," she said.

A chapter of the National Organization for Women protested outside the academy Monday. Some female midshipmen responded to the march by saying that hazing is an accepted way of life at the academy and the practice brings "cohesion" to the corps.

Midshipman Susan Slaven said hazing is part of the training process at the academy and suggested that those who can't take it, do not belong in the military.

Meanwhile, a Naval Academy instructor completed an informal survey saying that most midshipmen believe the attitude that something is wrong only if you get caught is prevalent at the academy.

The survey was conducted by Capt. Grant Holcomb, an electrical engineering instructor, and it also showed that most midshipmen do not feel they are being prepared to lead combat missions. The Annapolis Capital obtained a copy of the survey results, in which 200 seniors and juniors at the institution were questioned.

The survey said that 97 percent of those questioned have witnessed classmates demonstrating a lack of integrity and more than half believe academy heads ignore disciplinary problems rather than addressing them.

#90149u1924 05/29/1990 ~United Press International

CHICAGO (MAY 29) UPI - Grain futures closed mixed and soybeans were sharply lower Tuesday on the Chicago Board of Trade, amid reports that weather forecasters were not expecting rains as heavy as they had predicted earlier.

Soybean futures reached new lows for the session, with November falling to a six-week low. Traders reported heavy selling from locals.

The dip in the soybean complex was attributed to revised forecasts for the Midwest, which called for lighter rain than originally expected.

The pressure on prices carried over to soybean meal and soybean oil, which also experienced sharp declines.

Corn closed mostly lower in quiet trading, with the weight on prices

attributed to the drop in soybean futures. Traders said sharp declines in the oats market around midday may also have held corn futures down.

Wheat trading was quiet for most of the day, but massive fund buying helped the market close on a strong note.

At the close, soybeans were off 12 to off 14 3/4, corn off 1 1/4 to up 2, wheat up 4 1/2 to up 13 and oats off 6 3/4 to off 8 1/4 cents.

(MAY 29) UPI - Bush administration officials say the Soviet Union appears to be dismantling a radar complex in Siberia that loomed as an obstacle to cutting strategic arms. Officials say if the facility is demolished, it removes a point of contention in time for Soviet President Gorbachev and President Bush to announce an agreement at the Washington summit. U-S officials say the radar station violated the 1972 Anti-Ballistic Missile Treaty.

Angry Israeli demonstrators today jeered at journalists and stoned cars carrying Arab passengers outside funeral services of a Jewish man killed in a bomb explosion yesterday. Two radical Palestinian groups claimed responsibility for the blast at a crowded market. The explosion occurred eight days after an Israeli civilian killed seven Palestinians in a shooting spree.

The Supreme Court is set to decide another abortion dispute. The court has agreed to rule on the constitutionality of a federal rule which bans publically funded clinics from discussing abortions with their patients. Two years ago, the Reagan administration barred any funding to groups that even hinted abortion as a family planning option. A decision isN'T likely until next year.

A radical environmental group has hired a private detective to check into claims that two of its activists were targets of an assassination plot. Leaders of Earth First! say police wrongly charged Judi Bari and Darryl Cherney of transporting a pipe bomb that went off in their car while they were driving in Oakland, California last week. The two say the bomb was planted there.

#90149u1933 05/29/1990 ~United Press International

LIBREVILLE, GABON (MAY 29) UPI - Army troops fought sporadic gun battles Tuesday with opposition militants in the petroleum center of Port Gentil, regaining control of the city as oil companies announced a resumption of operations.

One Gabonese parachutist was killed and at least six civilians, including several children, were injured during a day of brief firefights between several hundred regular army troops and opponents armed with shotguns and pistols, according to witnesses and Gabonese National Radio.

Despite the fighting, the French petroleum company Elf Aquitaine, which extracts 70 percent of Gabon's total oil output, said it would resume normal operations immediately with a skeleton staff of about 50 technicians still in Port Gentil.

Elf, which evacuated 646 workers from Port Gentil during the past several days, said it expected production should reach 60 percent of normal capacity by Tuesday evening and 80 percent by Wednesday.

The French company said Tuesday evening it decided to resume production following the ''return of calm'' in Port Gentil ''permitting its personnel to take up their duties under sufficiently secure conditions.''

Most of Gabon's oil extraction and production facilities are in the port city.

A second major foreign oil company present in Gabon, the British-Dutch Shell, said in a statement released in London that it had evacuated about 130 people in the past several days but that it had ''maintained operations with the minimum of interruption.''

Faced with a drop in production to 20,000 barrels a day compared to an average of 270,000, President Omar Bongo threatened Monday night to cancel Elf's exploration rights if it did not resume operations within several days.

An undetermined number of persons were arrested by the army Tuesday in the poorer neighborhoods of Port Gentil, the economic center of Gabon located 80 miles south of the capital of Libreville.

Among those arrested was Nang Bekale, who emerged as the leader of the armed bands that have controlled the city since last Wednesday, when riots erupted across the central African country following the mysterious death of opposition leader Joseph Redjambe.

The political opposition charges that Redjambe, who was found in a hotel room with syringe marks on his stomach, was killed by the government and that the recent introduction of a multi-party system is a ploy to keep the government in power.

Redjambe has still not been buried because the government fears his funeral would lead to widespread protests and further rioting.

Apparently under pressure from France, Bongo hesitated before using the army against the demonstrators, but the dramatic drop in oil production convinced him to declare a state of siege in Port Gentil and its surrounding region Monday night and to send in the army to re-establish order.

''Our philosophy is that of negotiation and dialogue, but if our message is not understood we have to adopt stronger measures,'' Army Chief of Staff Idriss Ngari told reporters before leaving on an inspection tour of Port Gentil.

French troops stayed away from the fighting but continued to protect some 800 to 900 French citizens still in the city who had gathered in several centers.

About 2,000 French residents were evacuated from Port Gentil and Lambarene where rioting also caused serious damage, to Libreville over the weekend, with some of those going onto France.

Bongo promised that the process of democratization will continue despite the riots and said his government is doing everything it can to investigate Redjambe's death.

This month, the Gabonese Parliament voted to allow the establishment of a multi-party system for the first time since the country achieved independence from France in 1960.

(MAY 29) UPI - Archbishop Desmond Tutu says he feels the United States has the greatest commitment to ending apartheid in South Africa. Tutu made the remarks today as he was leaving Cincinnati after a weekend visit to rally support for the fight against the discriminatory system. He said U-S sanctions have forced the South African government to the bargaining table and he urged Americans to keep up the good work.

Voters across Arkansas go to the polls today to pick candidates for the fall general election. State officials estimate that about half the number of registered Arkansas voters will cast ballots in primary races. Democratic Governor Bill Clinton is seeking nomination to a fifth term against several challengers. Congressman Bill Alexander, also a Democrat, seeks a 12th term in the House.

Thunderstorms clouded the Midwest today and soggy Texas got more rain as downpours swelled engorged rivers and streams. Heavy showers across central Ohio caused flooding. Hundreds of people in three southern Ohio

counties were forced to evacuate due to high water. Heavy rain fell in west Texas... and isolated showers fell along the Gulf of Mexico.

Three sun-burned adventurers arrived today in Beijing, China, more than one month after leaving London in a 78-year-old vintage car. Their car led 60 other vehicles that took part in the London-to-Beijing challenge. The winning auto was the oldest to complete the 10-thousand mile journey. The winners say their only problem was flat tires. They used 24 tires during the race.

#90149u1943 05/29/1990 ~United Press International

NEW YORK (MAY 29) UPI - An environmentalist with a penchant for chomping Central Park's weeds quit his job with the Parks Department Tuesday, saying his ''ignorant'' new boss was forcing him to lie about the dangers of foraging for natural foliage.

''Wildman'' Steve Brill, who has led more than 15,000 people on nature tours in the city's parks, pointing out edible weeds, said he was resigning from his job with the city because of irreconcilable differences with Parks Commissioner Betsy Gotbaum.

Speaking at a Central Park news conference under a steady downpour, the 41-year-old Brill said Gotbaum wants him to tell participants on his tours that the weeds may be contaminated by dog urine and pollution and make them sick.

Brill, who earned $10.25 an hour working for the city, said he had spoken to experts who told him a New Yorker was more likely to be mugged in Central Park than suffer an illness from eating its plants. He said he always tells people on the tours to wash the weeds before eating them.

''I'm so hampered by the Parks Department that I can't work with them anymore,'' Brill said.

''Gotbaum doesn't have any environmental training at all. She seems to be ignorant about the environment, and unfortunately close-minded as well.''

But Gotbaum said she was ''surprised'' by Brill's resignation, explaining that she thought park officials had come to an agreement with the balding naturalist a few weeks ago about the terms of his job.

Gotbaum said the department only had asked Brill to tell the people on his tours that the plants ''could'' be dangerous.

She said she was more concerned about the effect on the parks' ecology of tour participants picking bagfuls of plants, so park officials had asked

Brill to point out and describe the weeds, but not harvest them.

''We don't want people taking things out of the park,'' she said. ''By encouraging people to take things out of the park, where do we stop?''

Brill has worked for the Parks Department since 1986, when he was arrested for digging weeds in Central Park. Then-Parks Commissioner Henry Stern worked out a compromise with the environmentalist, dropping the charges and hiring him to work for the department.

Brill said at the news conference that he would continue to lead his free tours in the city's parks, even if he faced being arrested by park rangers.

''Whatever works to keep hands-on environmental education alive in the city, I'll do,'' Brill said. ''I will continue to lead my tours, with or without Gotbaum's blessing.''

#90149u1947 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - Yields for 13-week T-bills increased Tuesday at the government's weekly auction but declined for 26-week T-bills.

The Treasury Department auctioned $8.4 billion of 13-week bills at an average discount of 7.80 percent, up from 7.74 percent at last week's auction. The latest rate is the highest since April 30, when the auction yielded 7.91 percent.

The government also sold $8.4 billion of 26-week bills at an average discount of 7.74 percent, down from 7.79 percent last week and the lowest since May 14, when the rate stood at 7.68 percent.

The discount rate understates the actual yield to investors.

The investment, or coupon-equivalent, rate was 8.07 percent on the 13-week bills at an average price of $9,802.80 per $10,000 face value. The rate on the 26-week bill was 8.17 percent at an average of $9,608.70 per $10,000.

#90149u1949 05/29/1990 ~United Press International

ST. PAUL, MN (MAY 29) UPI - Soviet President Mikhail Gorbachev will be able to read road signs in Russian on his visit to Minnesota June 3 and state highway workers are planting flowers and repainting the highways in preparation.

Gov. Rudy Perpich took part in the unveiling of Russian language road signs Tuesday near the Minneapolis-St. Paul Airport.

The signs say, ''Welcome, President Gorbachev'' and ''Peace and Friendship: Greetings from Minnesota,'' ''Minnesota-USSR Partners in Progress.'' They are written in both English and Russian.

Transportation Commissioner Len Levine said the signs will enable the state to communicate to the Gorbachevs and the Soviet delegation ''how pleased we are that they have chosen our state to visit.''

More than 50 different messages in Russian and in English will appear on signs around the metropolitan area.

Lucinda Lamont, spokeswoman for the transportation department, said the signs are being placed on some of the possible routes the Gorbachev motorcade will be traveling. ''They are not necessarily the routes the motorcade will be taking. The Secret Service only gives us general guidelines,'' she said.

But on the expected route out of the Twin Cities, there will be a sign saying, ''Goodbye President Gorbachev,'' she said.

The city is speeding up the planting of 260,000 petunias and marigolds scheduled to be in place for the July 6-15 Summer Olympic Festival. They are being planted a month ahead of time.

Highway crews are planting the flowers on the interstate between St. Paul and Minneapolis, repainting the highway lines, cleaning up trash and mowing the roadside.

In addition, the department said there will be no road construction on any routes that could potentially be used by the Gorbachev delegation. Russian-English broadcasts on Traffic Radio KBEM-FM will be featured throughout the day June 3.

''These special efforts are in keeping with Gov. Perpich's desire to do everything possible to make President and Mrs. Gorbachev and the other Russian visitors feel right at home during their Minneosta visit,'' Levine said.

#90149u1959 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The Supreme Court agreed Tuesday to decide the constitutionality of a Michigan law that makes life imprisonment mandatory for suspects convicted of possessing more than 650 grams of cocaine.

The court will hear arguments next term in the case brought by Ronald Harmelin, who was sentenced by a Michigan judge to life without parole in

1987 after his conviction for cocaine possession. A decision is not expected before next year.

Harmelin, who represented himself before the court, called the mandatory life term for possessing more than 650 grams of cocaine cruel and unusual punishment and cited the Eighth Amendment's prohibition of sentences that are disproportionate to the crime committed.

Except for first-degree murder, Harmelin said there was no other crime in Michigan for which the punishment is mandatory life without parole.

''A person with a long criminal record could commit the foulest atrocities such as holding people captive for years as sexual slaves, hacking off limbs or poking out eyes of children ... without even the possibility of receiving a sentence as high as Ronnie Harmelin,'' he wrote in his appeal to the high court.

Under federal law, a first offender convicted of possessing the same amount of cocaine could get a prison term of five to 40 years with eligibility of parole, Harmelin argued.

''To be thrown into prison for life without possibility of release really is a horrible thing to happen to a person,'' he said. ''To take away everything that people hope and dream for in their lives ... with no hope of redemption is a most profoundly harsh thing for a government to do to one of its citizens.''

Harmelin was convicted of possessing more than 650 grams of cocaine and illegal possession of a firearm in Oakland County Circuit Court in Michigan. Judge Gene Schnelz imposed mandatory life imprisonment without parole on April 30, 1987.

The state, in urging the court to reject the case, said the mandatory life sentence was not cruel or unusual. It said evidence leading to Harmelin's drug conviction seems to ''erode his contention that his crime was an isolated mistake in judgment.''

#90149u1979 05/29/1990 ~United Press International

MALDEN, MA (MAY 29) UPI - Thousands of well-wishers lined streets bedecked in yellow Tuesday to welcome home freed hostage Frank Reed, who rode past them in a parade through the downtown business district.

The band played "Tie a Yellow Ribbon" and about 2,000 onlookers cheered their native son as he rode in an open convertible for about a quarter of

a mile toCity Hall under cloudy skies.

"I'm not sure that I deserve all you've given me, but certainly I appreciate all you've given me," said Reed, who spoke briefly to the crowd when he reached City Hall. "Thank you for coming out to greet me. I love you, Malden."

The 57-year-old educator, who planned to return to Maryland for further recuperation at Malcolm Grow Medical Center, urged the crowd to remember the six Americans still held hostage. "Malden, if you didn't forget me, you won't forget the other hostages," he said.

The procession was led by local politicians and the Malden High School band, playing "Tie a Yellow Ribbon." Yellow ribbons and balloons, welcome home signs and flyers decorated stores, lamp posts and mailboxes along the parade route.

Mayor James Conway, a former schoolmate of Reed, told the crowd, "Today, we note the reunion of a family and the return of a friend. We celebrate the return to freedom of a member of our community."

Rep. Edward Markey, D-Mass., whose district includes Malden, called Reed a "living memorial ... to those who fight injustice around the world." "Hostages are being held because they are Americans. They are being punished because they are Americans. They have become symbols of our whole country," Markey said.

Young families and senior citizens, students cutting classes and local business people on lunch breaks crowded along to show Reed he was not forgotten. "We wanted to be here for him," said Tobi Misiura, who arrived an hour early to get a good spot.

"It represents what America is all about," said gift shop owner Charles Cavallaro. "I think any person who has endured all the adversity of this world and still comes back to talk about it is a hero."

"He's someone showing support for the other hostages, so we came here to support him," said Andrew Misiura, an electrician who took the day off work to watch the parade.

Reed arrived home Sunday for an emotional reunion with his 91-year-old mother, whom he had not seen since he was last in Boston in 1982, and other family members and friends.

Reed was kidnapped in West Beirut on Sept. 9, 1986. He had moved to Lebanon in 1977 and worked at the University of Beirut before founding the Lebanese International School. He converted to Islam to marry his Syrian-born wife, Fahimeh.

#90149u2074 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - U.S. and Soviet negotiators worked Tuesday to round out summit agreements on arms control and wind up a bilateral trade pact that could still fall victim to delay from the political fallout over Lithuania.

On the eve of Mikhail Gorbachev's arrival in Washington for talks on the new realities of a post-Cold War Europe, President Bush boned up on the economic and political crises that have combined to give Gorbachev the appearance of a man under siege.

While Bush met with his advisers against a backdrop of panic buying and fresh unrest in the Soviet Union, U.S. and Soviet officials tried to put

the final touches on agreements designed to serve as the tangible signs of a successful summit.

At the State Department, negotiators pursued the last major elements of a roughly one-third cut in strategic nuclear arsenals. U.S. officials also awaited an end of Soviet foot-dragging on reducing conventional forces in Europe.

Prospects for the first strategic arms agreement in a decade received a boost from a disclosure by U.S. officials that the Soviets may be preparing to tear down a controversial radar facility in Siberia.

The United States for years has branded the facility near Krasnoyarsk a ''clear violation'' of the 1972 Anti-Ballistic Missile Treaty and has demanded it be torn down before conclusion of an accord on strategic weapons.

The ABM Treaty requires future ballistic missile early warning radars be placed at the periphery of national territory and oriented outward. The United States has noted that Krasnoyarsk is 450 miles from the nearest border and aimed not outward but across 2,400 miles of Soviet territory.

Although Gorbachev promised last fall the huge complex would be demolished officials said the United States only recently obtained evidence the process may have begun.

On the economic side, eleventh-hour pre-summit talks sealed an agreement to expand commercial air service and all but wound up a trade pact considered key to Gorbachev's desire for economic integration with the West.

For all the importance the trade agreement has held for Gorbachev, who could benefit from Western goods and investment, its prospects were clouded by tension over Gorbachev's efforts to thwart independence drives by the Baltic republics and U.S. demands for de-escalation of that crisis.

State Department spokeswoman Margaret Tutwiler told reporters the English and Russian translations of the agreement were being reviewed and said that ''legally and technically, it could be signed'' at the summit.

Whether Bush would agree to go ahead with the agreement, with Lithuania near the top of the summit agenda, was left unclear.

Pressing Gorbachev for ''good-faith dialogue'' and a lifting of pressure on Lithuania, a senior administration official said that ''our entire economic relationship is, frankly, shadowed by Lithuania and the use of Soviet economic instruments against Lithuania.''

Progress toward the normalization of economic relations that Bush offered Gorbachev at their Malta summit in December also has stalled over a failure by the Soviets to enact emigration law reforms needed to qualify them for preferential tariff treatment on a most-favored-nation basis.

In the face of uncertainties on the trade front, the senior official advised reporters to ''put away your scorecards on this one about who's winning and who's losing, about what agreements are signed and trying to enumerate them.''

While past summits may have been measured by strides in arms control and other areas, the official said, ''We are now down to the bare-bones essentials, down to fundamental issues, and those are not going to be settled easily.''

''This is not a summit devoted to the celebration of agreements that we can sign,'' the official said. ''It is a summit designed to do the hard work of trying to overcome the remaining obstacles that stand in the way of transforming East-West relations.''

For Bush and Gorbachev, that will mean thrashing out disagreements not only over Lithuania but the future of a unified Germany. U.S. officials are looking for ways to allay the security concerns driving Soviet opposition to German membership in NATO, including the prospect of future curbs on German military power.

In any event, the senior official who briefed reporters Tuesday said Gorbachev was expected to arrive Wednesday evening ''as a man who's prepared to deal, who has control of the levers of decision-making that are important for the kinds of things that we want to get done.''

#90149u2076 05/29/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (MAY 29) UPI - New evidence released by a Salvadoran court shows the military tried to cover up its involvement in the Nov. 16 murders of six Jesuit priests, their housekeeper and her teenage daughter, Roman Catholic Church and Jesuit officials said Tuesday.

The court revealed late Monday that a lieutenant colonel previously not implicated in the case was involved in the destruction of registry books requested by the investigating judge as evidence in the case.

''This is just more proof of a coverup by elements of the armed forces,'' Jose Maria Tojeira, the Jesuits' regional director for Central America, told United Press International.

A court press release Monday said the log books for a military academy

from which troops conducted the mission leading to the killings ''were parted from internal control between Dec. 1 and (Dec.) 16 by order of Maj. (Carlos Camilo) Hernandez, at the time subdirector of the academy.''

The release said Lt. Yusshy Rene Mendoza, one of nine people charged with murder in the case, ''supposedly burned (the log books) at midnight on an undetermined day'' with the help of four cadets.

Court officials had said the log book could provide valuable evidence by showing who came and left the military academy on the night of the killings.

Hernandez, who has since been promoted to lieutentant colonel and become second in command of the elite Belloso Immediate Reaction Battalion, had not previously been implicated in the case. A spokesman for the unit said Hernandez was ''out on patrol'' and not available for comment.

The court said Judge Ricardo Zamora would call Hernandez and Mendoza to testify, but did not say when.

Tojeira said he and other members of the church and the Jesuit order have insisted from the beginning that more officers must be involved not only in a coverup but in the actual planning of the murders. The priests were killed during a massive rebel offensive that had thrust San Salvador into chaos.

Maria Julia Hernandez, director of the Archdiocese of San Salvador's legal aid office, told UPI the court statement ''is evidence of all the evidence they (the military) have destroyed... There is no room for doubt that this book was destroyed so the Jesuit case would not be solved.''

According to statements given to investigators by some of the accused, troops left the military academy late on the night of Nov. 15, went to the Jesuit-run University of Central America, dragged the priests from their living quarters and shot them. Their bodies were found early Nov. 16.

Two lieutenants who led the operation told the investigators that the academy's director, Col. Guillermo Alfredo Benavides, ordered them to kill the priests, saying, ''I don't want any witnesses.''

The soldiers said they shot the priests' housekeeper and her 15-year-old daughter as they cowered arm-in-arm in a back room at the priests' residence.

Benavides, Mendoza, two other lieutenants and four lower-ranking soldiers have been arrested and charged with murder in the case. A ninth soldier charged in the case deserted his unit shortly after the killings and is at large.

Many in the army believed the Jesuits, who were among Central America's leading leftist intellectuals, were aiding the rebel Farabundo Marti National Liberation Front, or FMLN.

The FMLN has waged a decade of guerrilla insurgency against successive U.S.-backed governments in El Salvador. More than 72,000 people have died in the war and related political violence.

#90149u2091 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - In joint letters, 139 House members and 51 senators urged President Bush Tuesday to discuss anti-Semitism in the Soviet Union during his summit meeting this week with Soviet President Mikhail Gorbachev.

Gorbachev has come under fire in Congress for not making forceful enough statements in opposition to reports of growing anti-Semitism and for appointing government officials with records of anti-Jewish statements.

The letters call on Bush to express ''deep concern'' about anti-Semitic incidents in the Soviet Union and to press Gorbachev to help Jews emigrate from the Soviet Union.

The letters were originally proposed by Sens. Paul Simon, D-Ill., Frank Lautenberg, D-N.J., Tom Harkin, D-Iowa, Orrin Hatch, R-Utah, Arlen Specter R-Pa., Carl Levin, D-Mich., and Charles Grassley, R-Iowa, and Reps. Tom Lantos, D-Calif., John Porter, R-Ill., Henry Waxman, D-Calif., Dante Fascell, D-Fla., Benjamin Cardin, D-Md., Mel Levine, D-Calif, Stephen Solarz, D-N.Y., John Miller, R-Wash., and Jack Buechner, R-Mo.

#90149u2133 05/29/1990 ~United Press International
JOHANNESBURG, SOUTH AFRICA (MAY 29) UPI - President Frederik de Klerk Tuesday abruptly canceled a trip to Washington next month because it would take place too close to a scheduled White House visit and speech to Congress by black leader Nelson Mandela.

The decision also avoids a possibly nasty confrontation with American anti-apartheid activists who objected to de Klerk's meeting President Bush before the American leader sees Mandela.

Senior government sources said it was now unlikely de Klerk would visit the United States this year.

As the 71-year-old Mandela rested Tuesday in a Johannesburg clinic after minor surgery and a medical examination in advance of a trip to Europe and an eight-city U.S. tour, de Klerk said he had decided to ''postpone'' his visit because of the timing controversy.

In Washington, White House press secretary Marlin Fitzwater said de Klerk's decision ''will have no impact on the Mandela visit from our standpoint and our response to Mr. de Klerk has been we are ready to see him whenever he wants, at any time.''

Fitzwater said he had no idea if de Klerk's decision was linked to protests about the timing of the visits in the United States.

''We're perfectly happy having him come at any point,'' he said. ''We have not tried to guide them one way or another in terms of timing. ... From our perspective we are willing to see either gentleman any time.''

The Johannesberg annoucement followed an uproar among American civil rights leaders, including lobbyist Randall Robinson and the Rev. Jesse Jackson, over Bush receiving de Klerk on June 18, one week before meeting Mandela during the African National Congress leader's planned visit to Washington.

ANC leaders in Washington earlier this month said it would be a ''slap in the face.'' But Mandela himself said last week who met Bush first ''makes no difference to me.''

Mandela is scheduled to address a joint session of Congress on June 26. He

arrives in the capital June 24.

Foreign Affairs Minister Roelof ''Pik'' Botha said Tuesday de Klerk ''doesn't like going to a country if there is an argument, an unpleasantness being raised in that country.'' Botha told state-run television the South African president ''has no need to creep through back doors. He goes in the front door.''

Fresh from a successful nine-nation European tour, de Klerk has no need to enter a hornets nest stirred by anti-apartheid activists that could overshadow a series of bold racial reform initiatives he began in February other government sources said.

It would have been the first U.S. trip by a South African head of government since the National Party assumed power 42 years ago on a platform of apartheid that De Klerk has pledged to abolish in favor of equal rights for the black majority.

The invitation from Bush to both de Klerk and Mandela followed the black leader's February release from 27 years imprisonment and the lifting of a 30-year ban on the ANC.

In addition to the threat of anti-apartheid demonstrations, de Klerk also faced the possibility key Democratic congressmen also would boycott meetings with him because of the timing of the trip, government sources said.

Should De Klerk delay the trip until later in the year, he could find himself in Washington during a congressional recess for elections, a situation he also wanted to avoid, they said.

''Due to a controversy that has arisen in the United States as regards the possible timing of the visit in June and also because certain important matters would require my personal attention during the next few weeks, I have decided to postpone my visit,'' de Klerk said in his statement.

''I particularly believe it is in South Africa's interest that my vist to the U.S. should take place in circumstances where I can have a broad range of discussions across the political spectrum which would make the visit most productive.''

Doctors at the Park Town Clinic Tuesda said Mandela was ''well on his way to recovery'' and his spirits were ''excellent.'' A medical source at the clinic said Mandela underwent a vasectomy for medical reasons but hospital officials an announcement that the operation had no connection with prostate surgery Mandela underwent in 1985 while still incarcerated.

Mandela's gruelling foreign and local trips since his Feb. 11 release have

raised some concern among aides over his ability to maintain the pace.

(MAY 29) UPI - Soviet leader Mikhail Gorbachev and his entourage arrived in Ottowa this morning, his first stop on a North American visit. Dozens of Canadian political officials were on hand to greet Gorbachev. In Ottawa Gorbachev and Foreign Minister Shevardnadze are expected to spend most of the time in private meetings with Prime Minister Brian Mulroney and other political leaders. Gorbachev travels to Washington late tomorrow.

Miami firefighters are battling a blaze in a downtown department store which has already sent seven firefighters to the hospital. NO one was in the building when fire broke out in a third-floor storage room of a Woolworth's store and then raced through the 71-year-old wooden structure. Firefighters eventually had to pull back because they say they could NOT stand up or see in the intense heat.

NASA engineers say they've corrected an electrical wiring problem which could have stalled the launch of the shuttle Columbia early tomorrow, but now they're facing potential weather delays. Air Force meteorologists have forecast a 40 percent chance of afternoon showers... with lightning... today. NASA woN'T pump explosive hydrogen into the shuttle's external tank until the weather clears.

There's new evidence in the case of convicted war criminal John Demjanjuk. In an Israeli courtroom today, a defense lawyer offered evidence from Polish sources suggesting that Demjanjuk is NOT the Nazi death camp guard ''Ivan the Terrible.'' Israel's high court heard evidence that a Polish

couple living near the Treblinka death camp knew Ivan the Terrible and his name was Ivan Marchenko.... NOT Demjanjuk.

ANCHORAGE, AK (MAY 29) UPI - Beaver dams helped contain 100,000 gallons of fuel that spilled from Alaska Railroad tank cars in a derailment south of Fairbanks, the state Department of Environmental Conservation said Tuesday.

Two beaver ponds along the tracks contained much of the spilled fuel, said Chuck Kleeschulte, a DEC spokesman in Juneau.

''The beavers are preventing the spill from getting worse,'' Kleeschulte said. ''No fuel is draining beyond the beaver dams.''

Nineteen cars in the 68-car southbound train derailed Monday afternoon in an isolated roadless area 40 miles south of Fairbanks, forcing response teams to use helicopters to reach the accident.

No one was injured, but the wreck damaged tracks and disrupted rail traffic, including passenger trains between Anchorage and Fairbanks that deliver tourists to Denali National Park, said Frank Singleton, a spokesman for the state-owned railroad.

The railroad was shut down between Fairbanks and Healy, just north of Denali, and Singleton said buses were being used to take tourists between the popular park and Fairbanks.

Two 20,000-gallon tank cars lost all their fuel and a third tank car lost half its fuel, Kleeschulte said. Another dozen tank cars were leaking. The tanks held jet fuel and diesel fuel from a Fairbanks refinery.

The railroad estimated the amount of fuel spilled at 100,000 gallons, Singleton said. The amount could go as high as 120,000 gallons, Kleeschulte said.

The derailed tank cars flopped over on both sides of the track in a marshy area 25 miles north of Nenana, the closest town.

Fuel spilling out of the overturned tank cars flowed into beaver-dammed ponds on either side of the tracks, where it appeared to be largely contained. But some fuel may have soaked into marshlands.

The railroad sent 41 empty tank cars to the scene and two ''supersucker'' vacuum trucks on flat cars to pump spilled fuel into empty tank cars, Kleeschulte said.

''Jet fuel evaporates quickly, but there are environmental considerations '' he said.

The railroad was using a bulldozer to build a dike to reinforce the beaver dams and build up sides of the ponds to keep the fuel contained, Kleeschulte said.

Access posed the biggest problem for cleanup crews, Singleton said. The nearest road was 10 miles away. Helicopters brought workers to the scene.

Railroad officials who confirmed there had been a derailment at first denied there had been a spill Monday night. Cause of the wreck is under investigation.

As for the beavers that inadvertently created the containment barriers, which trapped the spilled fuel in their ponds, Kleeschulte said their fate was unknown.

WASHINGTON (MAY 29) UPI - The Soviet Union's economic sanctions to thwart Lithuania's bid for independence have clouded the fate of a U.S.-Soviet trade agreement, trade experts said Tuesday.

Negotiators for both superpowers have completed the remaining details of the trade agreement, which was being reviewed Tuesday in both English and Russian translations.

But it remained unclear whether the pact would be signed during this week's summit between President Bush and Soviet President Mikhail Gorbachev.

''It is fair to say signing a trade agreement is a possibility at this point, but to my mind the decision to sign has not been made yet,'' said Timothy O'Leary, a spokesman for the Office of the U.S. Trade Representative.

''I think we have to wait and see,'' he added. ''The White House has to make a political decision whether to sign it.''

Although Bush had been eager to reach a trade agreement with the Soviet Union, his readiness ebbed in recent weeks because of the economic sanctions placed on Lithuania by the Soviets, trade experts said.

The Soviet Union is trying to thwart Lithuania's bid for independence by cutting off its supply of oil and other vital commodities.

Earlier this month, the Senate passed a resolution urging the president

not to enter into an agreement with the Soviets while the economic blockade in Lithuania continues.

''I think the president looked at that and said let's take this thing off the table,'' said James Montgomery, executive director of the East-West Forum, a Washington research and policy analysis organization.

''That seems to be the real stumbling block here,'' agreed Stephen Cohen, a professor of international relations at American University in Washington.

A senior administration official agreed Tuesday that the economic relationship between the two nations ''is, frankly, shadowed by Lithuania and the use of Soviet economic instruments against Lithuania.''

Progress toward the normalization of economic relations that Bush offered Gorbachev at their Malta summit in December also has stalled over a failure by the Soviets to enact emigration law reforms needed to qualify them for preferential tariff treatment on a most-favored-nation basis.

The wide-ranging trade agreement includes, among other items, provisions covering copyright protection for U.S. computer software and a quicker process for commercial representation in the Soviet Union.

The pact also calls for the Soviets to begin repaying $674 million in debts incurred from the lend-lease program of World War II.

In return, the Soviets would receive the lowest available tariffs in the United States, which stands to increase the amount of furs, vodka, textiles and other Soviet-made products available to American consumers.

The Soviets also would be eligible for U.S. programs such as the Export-Import Bank and the Overseas Private Investment Corp.

The two superpowers have not had a trade agreement since their military alliance ended in 1945. Trade between the two superpowers totaled about $5 billion last year.

(MAY 29) UPI - The Soviet Parliament today refused to consider holding a vote of NO confidence on the government. Radical deputies in the Supreme Soviet pushed for the vote after the government last week UNveiled planned price hikes which triggered a wave of panic buying throughout the country. Prime Minister Nikolai Ryzhkov defends the price increases as the way to economic recovery.

Vandals destroyed and splattered blood on portions of an anti-abortion display of crosses erected by volunteers in a field off a major highway near Madison, Wisconsin. Abortion foes say they built the road-side display of about 15-hundreds crosses to get passing motorists to think about why legal abortions should be stopped. Motorists alerted the property's owner of the damage.

Primary elections today in Kentucky will set the stage for a fall showdown. Democrats Harvey Sloane and John Brock challenged each other for the right to run against the G-O-P contender. On the Republican side, Kentucky Senator Mitch McDonnell is pitted against Tommy Klein, a candidate who says he's running for office because he needs a job. Seven of Kentucky's House members are involved in the primary contest.

All aboard the Orient Express for a special London run to Istanbul. A band will play as a crowd dressed in 1920's attire will be part of the red-carpet send-off tomorrow for 100 passengers on Europe's historic train. A Canterbury, England, tour operator is re-creating the London-to-Istanbul trip, for about six-thousand dollars a ticket. The original Orient Express made the trip from 1889 until 1939, when it was financially UNable to compete with airlines and faster and cheaper trains.

KARACHI, PAKISTAN (MAY 29) UPI - Prime Minister Benazir Bhutto struggled to restore calm in her home province as 14 more people died in continuing ethnic violence, raising the death toll to 75, official sources said Tuesday.

Bhutto rushed to Karachi Monday following a wave of killings by rival ethnic gangs in the strife-torn city. The victims included an opposition party senator, Moshin Siddiqui, who was slain in a sniper attack while he was on his way to a hospital to visit other victims.

More than 100 people have been injured in the violence that began Saturday in Karachi, Pakistan's largest city. In Hyderabad, curfew remained in force following a similar wave of clashes that has claimed 150 lives.

Both cities are in Sind province governed by Bhutto's Pakistan People's Party. She is under increasing pressure from the opposition to dismiss the state government.

Gen. Mirza Aslam Beg, the army chief of staff, went to assess the situation in Hyderabad, where the army took control on Sunday after thousands of people defied curfew to march in the city.

Police opened fire at the demonstrators, killing several of them.

The current wave of violence is being blamed on militant Mohajirs, descendants of Indian Moslems who migrated to Pakistan at the time of the partition in 1947.

Bhutto's 17-month-old government is increasingly being tested on different fronts - in the sharp dispute with India over Kashmir and the rising ethnic tensions in Sind.

The young leader has the dual task of appeasing the Moslem fundamentalists on the one hand and fulfilling her own election promises of social progress on the other.

#90149u2244 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The World Bank's Executive Board agreed Tuesday to "postpone" a $150 million transportation loan to China but approved a second $300 million loan for tree planting, bank officials said.

The expected decision to shelve the transportation loan was made at the request of a World Bank director who was not identified by one of the officials. The board approve the $300 million forestry loan without opposition, the source said.

According to a State Department release last week, the United States and the other members of the Group of Seven industrial democracies - Japan, West Germany, Britain, France, Canada, and Italy - decided not to support multilateral organization lending to China except for "basic human needs." The G-7 would support the tree-planting loan but not the transportation one at the World Bank's board meeting, the State Department said.

The World Bank suspended $780 million in loans to China after last June's massacre of pro-democracy demonstrators in Beijing but has since approved three loans for basic human needs such as agriculture and earthquake relief.

BOGOTA, COLOMBIA (MAY 29) UPI - President-elect Cesar Gaviria plans to create special courts modeled on Italian anti-Mafia tribunals and provide heavy security for judges to hear drug cases involving the powerful cocaine cartels, officials and diplomats said Tuesday.

Gaviria, who won election Sunday with 47.5 percent of the vote, has promised a tough war on drug traffickers. He acknowledged that Colombia's justice system is a shambles and has proved unable to effectively prosecute either the cocaine cartels or common criminals.

Gaviria left his heavily guarded apartment Tuesday for a meeting with President Virgilio Barco. The apartment - called ''el bunker'' by the local news media - is guarded by several dozen police, soldiers and bomb-sniffing dogs.

Gaviria's life is threatened by the Medellin Cartel of cocaine traffickers because of his proposed tough anti-cartel policy.

He told reporters he believes those responsible for a recent series of bomb attacks understand ''that this is a blind policy, it is a policy of hate, that this policy was rejected at the ballot box by Colombians and is

an absolutely non-conducive policy. I am confident they will abandon it.''

At present, the Colombian judicial system ''is an organization trying to judge an organization that is more powerful that it is,'' said Fernando Carrillo, a constitutional law professor and Gaviria adviser. The special courts are seen as a way to focus judicial action on drug cases.

Since 1977, at least 46 judges have been assassinated in Colombia. Judges also are poorly paid and the profession is held in low regard by Colombians, reportedly making them susceptible to bribes.

In Washington, President Bush congratulated Gaviria on his victory.

''Despite unprecedented violence waged against the system by the drug cartels, the people of Colombia were not intimidated,'' Bush's press secretary, Marlin Fitzwater, said. ''They went to the polls in large numbers and cast their ballots freely. They spoke out clearly against the violence of the drug lords. President Bush will look forward to working with the new president when he takes office.''

Gaviria's plans for rebuilding the justice system include creation of separate heavily guarded courts that would try cocaine cases exclusively, aides and diplomats said.

Gaviria also has proposed creation of judicial compounds to protect judges and their families who hear drug cases. The plan, which would include the magistrates' families, is modeled on the Italian judicial system's handling of mafia cases.

''We cannot put a few unarmed and defenseless judges in front of the powerful criminal organizations created by the narcotics traffickers,'' Gaviria said.

''Effective mechanisms are required for the protection of the judges and the construction of secure prisons so that punitive sentences are completed.''

The U.S. State Department arranged several meetings between Italian anti-mafia judges and Colombian officials. The Italians discussed with the Colombians ways to create special courts to try cases against the cocaine cartel along the lines of Italian courts that try mafia cases, said a U.S. official who asked that his name not be used.

The official said the strengthening of the judicial system was the top U.S. priority for aid to Colombia and added, ''We are going to be giving more money in this area.''

He said it was impossible to protect the 4,000 judges who might now hear

cases against drug cartel leaders. Reducing the number of judges to a few who are heavily guarded is essential, the U.S. official said.

''If you tried to move (prosecute) these cases (against top traffickers) someone would die - judges would die,'' the U.S. official said.

Carrillo said in an interview that Gaviria's proposals also include changing the way cases are investigated.

Currently, a judge is in charge of both the investigation and all other judicial aspects of a case. There is little or no cooperation between the judge and police, and a judge often passes off a difficult drug case to another judge, who in turn passes it on, he said.

Gen. Miguel Maza, head of the secret police, recently severely criticized judges for inaction in prosecuting a truck bomb explosion in December of 1989 against the police headquarters that killed 60 people. His criticisms touched off a public controversy and pointed to the lack of respect and cooperation between investigative police and the court system.

WASHINGTON (MAY 29) UPI - The Federal Reserve Board announced Tuesday approval of the application made by Long-Term Credit Bank of Japan, the 21st-largest bank in the world, to underwrite securities and sell precious metals.

Working through Greenwich Capital Markets Inc., of Greenwich, Conn., the bank will deal in mortgage securities, municipal bonds, commercial paper, consumer-related securities, futures, gold and silver, the Fed said.

The Tokyo bank is 12th largest in Japan, with assets estimated at $194 billion, and has U.S. branches and offices in New York, Chicago and Los Angeles, the Fed said.

LONDON (MAY 29) UPI - The wife and the girlfriend of two young Australian lawyers slain by an IRA hit squad in the Netherlands said in an emotional news conference Tuesday that the men were ''sitting ducks'' for the gunmen.

The London-based lawyers, Nicholas Spanos, 29, of Sydney, and Stephen Melrose, 25, of Brisbane, who had been traveling in a British-registered car, were slain Monday by three masked men in the southern Dutch town of Roermond.

Melrose's wife, Lyndal, and Spanos' girlfriend, Vicki Coss, also Australian, escaped unhurt in the attack. The women told a news conference in the Netherlands they totally supported Australian Prime Minister Bob Hawke, who condemned the ''twisted logic'' of Irish Republican Army terrorism.

''We were just sitting ducks,'' Coss said, fighting back tears. ''We were there and we did not have any forewarning of what was going on. We were totally ignorant of any sort of action.''

''I don't think that there is any emotion left to tell, any anger, or any sort of feeling to the IRA,'' Coss said. ''That may come later, but at this stage, I don't know what to think.''

Lyndal Melrose said the first warning the two couples had was the initial shots, which she described as sounding like firecrackers.

''It was a nightmare. It was something that just doesn't happen, that doesn't happen to you,'' she said. ''It was out of a horror movie.''

The IRA issued a statement acknowledging that the killings were the work of one of its active service units in the Netherlands. ''The shootings were a tragedy and a mistake,'' the IRA statement said, noting that the Australians had been mistaken for British soldiers.

''The bloody campaign by the IRA against innocent people, whether they are British citizens or not is, as far as my government is concerned, condemned without qualification,'' Hawke said in Sydney.

Police have offered a $72,000 reward for information leading to the capture of the gunmen.

The two victims were vacationing when they were shot about 11 p.m. Sunday in a crowded market square in Roermond, a Dutch town near the Belgian border and popular with off-duty British troops stationed in the Netherlands.

The Irish government, in a statement issued Monday night, ''unreservedly condemned'' the killings.

A witness, restaurant owner Renee Leenders, said he thought at first the gunfire he heard was children playing with fireworks, but when he looked across the square, which was crowded with shoppers at the time, he saw a man pointing a shotgun at another man slumped down in a car and heard the getaway car speed off.

British Prime Minister Margaret Thatcher was reportedly ''shocked and concerned'' and sent her condolences to the families of the victims and to Hawke.

A total of 16 people have been killed by IRA units in Europe in the past 10 years.

(MAY 29) UPI - Thunderstorms saturated parts of the Midwest early Tuesday driving hundreds of Ohio residents from their homes, soggy Texas got more rain and downpours swelled rivers and flooded roads in the mid-Atlantic states.

In central Ohio, heavy showers caused urban and rural flooding, with streams overflowing and roads awash, the National Weather Service said.

The rain was tapering off early Tuesday and was expected to disappear by day's end, but not before hundreds of residents in southern Ohio were forced to evacuate by high water. Officials reported evacuations in at least three counties.

Evacuees sought shelter in high school and municipal buildings. Emergency officials in Hocking County provided cots, blanket and food to those who went to the Municipal Building in Murray City, officials said.

Thunderstorms triggered several tornadoes in the Denver area, one damaging a store roof on the north side of the city.

Heavy rain pushed Fountain Creek near Colorado Springs to near-flood stage. High water flooded some street intersections in Colorado Springs and nearby Widefield and Security, with foot-deep water reported on some streets.

In the mid-Atlantic states, sometimes heavy overnight rain in Pennsylvania swelled creeks and flooded poor-drainage urban areas in the southern and northeastern parts of the state, the NWS said.

New Jersey and Delaware were placed under flood watches after heavy rains developed overnight. Flood watches were posted for parts of Maryland and downpours pelted Washington, D.C., and Virginia.

In Maryland, rain forced the closure of U.S. 50 lanes near the Kent Narrows Bridge and a section of the busy Harbor Tunnel in Baltimore.

The northbound lanes of the Harbor Tunnel under the Patapsco River were closed for about 30 minutes Tuesday morning because of flooding, toll facilities official said.

In Western Maryland, officials warned boaters to stay off the rain-swollen Potomac River. Warning markers intended to inform boaters of river depths were either submerged or had been washed away, officials said.

A low-pressure system moved slowly up the Atlantic coast, bringing clouds to parts of New England early Tuesday.

Thunderstorms gave parts of water-logged Texas little relief. A thunderstorm with heavy rain developed east of Guadalupe Pass in west Texas and isolated showers rained along the Gulf of Mexico.

Far western Texas had fair skies overnight, but the Panhandle and northern Texas faced a night of severe storms.

Isolated showers dampened northeast New Mexico as thunderstorms raced across Oklahoma.

Brisk temperatures chilled northern states with the mercury dropping to 34 degrees in Marquette, Mich, and Hibbing, Minn.

WASHINGTON (MAY 29) UPI - A federal judge refused Tuesday to separate the drug and perjury charges against Mayor Marion Barry into two trials,

ordering him to stand trial as scheduled next Monday.

Barry's lawyers had asked that the trial include only the original eight charges filed in a February indictment, arguing that the addition of six new misdemeanor counts to the indictment just three weeks ago makes it very difficult to prepare a defense on such short notice.

"We are making small progress," defense lawyer R. Kenneth Mundy told U.S. District Judge Thomas Penfield Jackson, and asked that Barry be tried on the six newest counts at a later date.

Jackson "conditionally" denied the severance request, saying the trial on all 14 counts would begin as scheduled on Monday with jury selection, and he ordered the U.S. Attorney's office to give the defense a complete list of all unindicted co-conspirators and government witnesses by Thursday. A conditional denial gives Jackson the option of changing the ruling if the prosecutors do not comply.

Prosecutors late last week gave the defense a list of 19 alleged co-conspirators and witnesses they said will testify to witnessing or being involved with cocaine use by Barry.

Assistant U.S. Attorney Richard Roberts said the government expects to call about 30 witnesses during the trial, which is expected to last about a month. "Thirty witnesses may seem like a small number, but when you talk about dumping these names on the defense on the very eve of trial, it becomes a different story," Mundy told Jackson in arguing for two trials.

Mundy still has the option of making a motion for the entire trial to be delayed, but both he and Jackson said a delay was not expected. "Absent a national catastrophe, I don't expect a continuance in this case," the judge said.

Mundy agreed, telling reporters outside the courtroom, "We want to get this trial over with if it means working day and night." A status hearing was scheduled for Friday morning.

Mundy also told Jackson that information regarding Barry's alcoholism would not be used during the trial. He previously had lambasted undercover FBI agents for reportedly offering glasses of cognac to the mayor during the sting operation Jan. 18 that culminated Barry's cocaine possession arrest.

Barry spent seven weeks at in-patient substance abuse treatment facilities in Florida and South Carolina after his arrest, receiving treatment for what he called alcoholism and addiction to prescription drugs.

There had been speculation that Barry would claim any wrongdoing was the

result of a long-term alcoholism. "We will not be calling any experts or lay people to testify what effects alcoholism had on the intent of the defendant," Mundy said.

Barry faces three felony charges of perjury, ten misdemeanor counts of cocaine possession and one misdemeanor count of conspiring to possess cocaine. Barry, 54, who is still considering a bid for a fourth term in this fall's election, would be precluded from holding office only if jailed after a conviction on one of the perjury charges.

(MAY 29) UPI - The price of U.S. gasoline shot up as much as 7 cents a gallon Tuesday on heavy buying by major refiners after the long Memorial Day weekend, pulling the depressed crude-oil market up with it.

''It was a gasoline-inspired rally that might have resulted from greater-than-expected demand over the holiday,'' said Kirk Kinnear of Soloman Brothers's Phibro division in Greenwich, Conn.

''The major oil companies were scrambling to pick up barrels of gasoline on the U.S. Gulf Coast spot market,'' Kinnear said. ''I think their Memorial Day receipts exceeded expectations.''

''It was more gasoline than anything else,'' said Tom Bentz, director of trading for United Energy Inc. in New York. ''The gasoline market set the tone.''

On the U.S. Gulf Coast cash market, prompt delivery unleaded gasoline rocketed 7.7 cents to 72.45 cents a gallon, while climbing 2.65 cents to 66.05 cents a gallon on the New York Harbor spot market.

On the New York Mercantile Exchange, unleaded gasoline for June delivery rose 2.38 cents to 65.79 cents a gallon. It sold as high as 66 cents a gallon during the day.

''We broke out technically once we got over 65 cents,'' Bentz said.

The unleaded July contract, which becomes the Merc's spot-month contract Friday, ended the day at 62.96 cents a gallon, up 1.96 cents and near its 2-cent limit.

Early in the day, crude prices were down and gasoline was holding firm on the Merc. But as the day wore on, the Gulf Coast contagion spread to the Merc driving first gasoline, then crude prices upward.

The benchmark West Texas Intermediate crude for July delivery finished the day up 18 cents to $17.98 a barrel on the Merc after trading as low as $17.45 a barrel. Trading volume was a moderately heavy 95,024 contracts.

Prompt delivery WTI on the U.S. Gulf Coast spot market jumped $1.90 to $17.95 a barrel.

On the European spot market, Britain's widely traded North Sea Brent gained 7 cents to $16.37 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - climbed 15 cents to $14.25 a barrel.

On the Merc, heating oil finished the day at 50.24 cents a gallon, up 0.58 cent.

#90149u2420 05/29/1990 ~United Press International

LOS ANGELES (MAY 29) UPI - Soviet officials announced Tuesday they have joined forces with American investment bankers in an effort to attract as much as $100 million in private investment to support the expansion of small business in the Soviet Union.

''Our task is precisely to use the experience of American small businesses to facilitate our own growth,'' Valentin M. Vologhzin, chairman of the Committee for Economic Reforms for the U.S.S.R., told a news conference.

The committee, represented by a five-member delegation making an 11-day visit to Southern California, signed the agreement last month in Moscow with Acquest International, a development and investment banking group based in Los Angeles. The agreement was expanded this week to provide for the formation of a $100 million capital fund, to be matched with Soviet funds.

Vologhzin promised that the Soviet commitment to the matching fund is ''virtually unlimited.''

Peter J. Guttridge, Acquest's chairman, said that some of the likely beneficiaries of the deal would include food companies and firms that produce material used to build housing.

Under the deal, Vologhzin said, the committee and Acquest have formed Acquest Enterprises to act as ''exclusive clearing house'' for investment proposals for new small-business enterprises in the Soviet Union.

''We're definitely not looking for get-rich-quick schemes,'' Guttridge said. ''We're looking for medium- to long-term investors.''

Investment in the Soviet Union has been hampered by the fact that its currency, the ruble, is non-convertible. As a result, deals under the

agreement are likely to involve barter arrangements, Guttridge said.

Guttridge said Acquest, which has a core staff of about a dozen employees, has specialized in real estate deals, both domestically and internationally.

(MAY 29) UPI - Soviet President Gorbachev is in Canada, where he is expected to meet Canadian Prime Minister Brian Mulroney before traveling to Washington tomorrow. The Soviet leader was accorded full military honors by the Royal Canadian Regiment when he arrived at the Ottawa airport.

Bush administration officials say the Soviet Union appears to be dismantling a controversial radar facility in Siberia. Gorbachev promised that the station would be torn down because it loomed as an obstacle to a strategic arms treaty. Its destruction may be timed to coincide with the

superpower summit.

South African President de Klerk has canceled a June trip to Washington because President Bush will be meeting with African National Congress leader Nelson Mandela later in the month. Government sources say de Klerk wants to avoid a controversy in the United States that could overshadow his racial reforms.

A grand tribal assembly ended a two-day meeting today in Afghanistan by approving constitutional changes committing the nation to a multi-party system. The political decisions came as U-S-backed rebels bombarded the capital of Kabul with rockets for a ninth consecutive day.

Today is an official day of mourning today in Armenia... where flags and buildings in the capital of Yerevan are draped in black ribbons. About 10-thousand people attended a burial for one of 25 people killed in weekend clashes with Soviet troops. A crowd of twice that size is expected tomorrow when a mass funeral is held.

#90149u2446 05/29/1990 ~United Press International

NEW YORK (MAY 29) UPI - The dollar slipped against the West German mark and other European currencies in thin New York trading Tuesday but gained nearly two yen against Japan's unit amid heavy mark-yen interplay.

Currency analysts said the deutsche mark reversed its downward trend against the yen, citing rumors of an impending German interest rate hike and moves by the West German government to settle a domestic scrap over monetary union terms.

But the dollar lacked clear direction after the holiday weekend, and few participants were inclined to take major new positions with a critical set of U.S. jobs data due at week's end.

West German Chancellor Helmut Kohl opened talks Tuesday with opposition chief Hans-Jochen Vogel, whose Social Democratic Party has sharply criticized terms of a draft accord on German economic union.

News of the German talks boosted the mark in Tokyo as the global trading day got under way. But in New York it failed to inspire.

''People basically said nothing has changed,'' corporate trading manager Hubert Pedrioli of Credit Suisse said.

In late New York trading, the dollar was changing hands at 1.6740 West German marks, off from 1.6830 at Friday's close, and was quoted at 151.22 Japanese yen, ahead from 149.30 last week.

Senior trader Bill English of the Banca Nazionale dell'Agricoltura said news of more Soviet ethnic strife helped the dollar, a traditional safe haven for investors, while uncertainty still afflicts the mark.

Analyst Lisa Finstrom of Shearson Lehman Hutton stressed the purely technical effects of a sudden reversal of market sentiment in favor of the deutsche mark over the yen in direct dealings between the units.

''There really isn't anything going on,'' she said, conjecturing that a few big Far East orders may have tipped the mark-yen balance.

Other dollar rates: 1.4105 Swiss francs, down from 1.4230; 5.6360 French francs, off from 5.66; and 1,229 Italian lire, off from 1,235.

The British pound moved up to $1.6955 from $1.69.

In Europe, the dollar declined against the major currencies as mark-yen play overshadowed the U.S. unit. ''The dollar has been on the sidelines,'' said analyst Mark Brett of Barclays de Zoete Wedd.

The dollar closed lower in Frankfurt at 1.6750 deutsche marks against 1.6795 Monday and slipped in Zurich to 1.4065 Swiss francs against 1.4205.

In London, the pound firmed up to $1.6950 from $1.6900.

The dollar moved down in Paris, Brussels and Milan, at 5.6335 francs against 5.6595, 34.39 Belgian francs against 34.555, and 1,229.75 Italian lire against 1,234.45 at Monday's close of trading.

Earlier in Tokyo, mark-yen cross-trading boosted the dollar. Players sold yen for dollars in one ''leg'' of a transaction, then sold the dollar for the mark, said Tetsuya Taura, a Sumitomo Bank chief director.

The shuffle hiked the U.S. unit against the yen, he said.

The dollar closed at 150.70 yen, up 1.25 yen from Monday's close of 149.45 yen, the Bank of Japan said.

Republic National Bank in New York closed cash gold at $367 an ounce, off from $368 Friday. The New York Commodity Exchange settled spot gold at $367.40 an ounce, down from $368.20.

In Zurich, gold closed higher at $368 an ounce against $367.50 Monday and rose in London to $367.50 an ounce against $367.25 Friday.

Republic closed cash silver at $5.16 an ounce, off from $5.23. Comex spot silver ended at $5.138, down from $5.215. Zurich silver was unchanged at

$5.25 an ounce. London silver ended at $5.17 an ounce against $5.23 Friday.

#90149u2447 05/29/1990 ~United Press International
WASHINGTON (MAY 30) UPI - A federal court judge Tuesday denied motions for a new trial in the John Poindexter case, saying the evidence against the retired rear admiral ''more than adequately'' supports the jury's guilty verdict.

U.S. District Court Judge Harold H. Greene said in an 85-page opinion that the defense's bid for a new trial was not ''in the interest of justice.''

''The evidence more than adequately supports the jury's determination of the defendant's guilt,'' Greene said.

Poindexter, 53, was convicted April 7 of five felony counts after six days of jury deliberation. He was found guilty on two counts of obstruction of Congress, two counts of making false statements to Congress and one count of conspiracy to obstruct Congress.

The retired Navy rear admiral is the highest ranking Reagan administration official convicted in the Iran-Contra scandal.

(MAY 29) UPI - The orbiting Hubble Telescope passed the first test of its most advanced guidance system. NASA technicians say they are encouraged by the super scope's ability to ''fine-lock'' on celestial targets. Engineers say the results lead them to believe they can overcome lingering vibrations in the 12-ton scope.

Firefighters in Miami are battling a blaze at a downtown department store that officials say is burning out of control, but has been contained to a 71-year-old Woolworth's store. More than 70 firefighters are fighting the fire. Seven of them have been sent to the hospital and 18 were treated at the scene for heat exhaustion.

Freed hostage Frank Reed was cheered today by hundreds of well-wishers who lined a parade route in downtown Malden, Massachusetts. Malden Mayor James Conway says the welcome was a ''simple'' one at the request of Reed's family. Reed arrived home Sunday for an emotional reunion with his 91-year-old mother.

Iran and Iraq are making moves that could lead to a resumption of the peace talks that stalled following a 1988 cease-fire in their bitter eight-year war. An Iranian official says Tehran may accept an Iraqi

proposal for a summit meeting between the presidents of both Persian Gulf nations.

The 12-nation European Community is moving to protect workers from the hazards of long hours in front of computer screens. The E-C today adopted sweeping safety regulations for video display users. Under the plan, employers must furnish periodic breaks, eye exams and adjustable seats and screens.

CAMDEN, NJ (MAY 29) UPI - A quartet from the environmental group Greenpeace Tuesday scaled a smokestack and a crane to protest the construction of a solid waste incinerator.

The four climbers unfurled banners from the heights, calling on Gov. Jim Florio to end construction of the mass burners and to push for recycling of waste instead of incineration.

The four walked onto the construction site and began climbing the structures about 3:30 a.m., said Adrew Altman, a Greenpeace spokesman.

The two climbers on the 350-foot smokestack went within about 100 feet of the top before unfurling a 100-foot-long banner that read, ''Gov. Florio: Don't Burn NJ,'' Altman said.

The other pair scaled the 130-foot crane to its apex and unfurled a 50-foot-long banner that read, ''Recycle!'' he said.

The protesters hope to halt construction at the site and plan to remain in their perches for ''a couple of days,'' said Fred Munson, another spokesman at the site.

''The climbers are ready to stay up a couple of days to stop the building of this environmental beast,'' Munson said.

CINCINNATI (MAY 29) UPI - The New York Mets, below .500 and in disarray both on and off the field, Tuesday fired Manager Davey Johnson and replaced him with Coach Bud Harrelson.

Mets General Manager Frank Cashen, speaking at a Riverfront Stadium news conference before the Mets played the Reds, said blame should also go to the front office and to the players. Nevertheless, he made Johnson the first major-league manager fired this season.

When asked why he dismissed Johnson, Cashen said: ''Because I felt our baseball club was underachieving and we needed a new direction.''

The Mets, with the second-highest payroll in the majors, were 20-22 entering Tuesday night, fourth in the National League East. They led the NL with 45 errors and were hitting .240, second-worst in the league.

Johnson was in his seventh season as Mets manager and more than three years removed from the World Series he won in 1986. For the last several years, including this one, the Mets were deemed prohibitive favorites. However, they reached the World Series just once in that span, and this season the players openly rebelled.

Sunday, Kevin Elster criticized Johnson for not ordering pitcher Jeff Musselman to retaliate after San Diego hit the shortstop with a pitch. Pitcher Ron Darling also blamed Johnson for the team's shortcomings.

Johnson has also come under fire for his handling of a star pitching staff that ranks fourth in the league in ERA. His millionaire pitchers have proved inconsistent, and the assignments have at times angered Darling, David Cone and Bob Ojeda.

Harrelson, who turns 46 next week, is one of the most popular figures in Mets history. As a skinny slick-fielding shortstop, he anchored the infield during the 1969 and 1973 seasons, when the Mets won a World Series and pennant.

He was a successful minor-league manager before joining the Mets' coaching staff in 1985. He was New York-Penn League Manager of the Year in 1984 after leading Little Falls to the league championship. He went 69-45 as a minor-league manager.

''It was great to have Buddy Harrelson within our own organization to be in a position to take over,'' Cashen said. ''Bud Harrelson has been in a Met uniform for two decades. He played with the great Met teams of the 60's. He has managed for us in the minor leagues. He is overly qualified to manage and I hope that he can lead this team to a National League pennant.''

Cashen said he had talked with the team.

''I told them we can still win and I talked with them a little bit about 'fire in the belly' and about refocusing this team to winning, because winning is what this business is all about,'' Cashen said.

Cashen said Harrelson met and talked with the club for 15 to 20 minutes.

''I really feel in my heart that this ballclub will be fired up,'' Harrelson said. ''As a player in those situations, I always felt I had something to do with the man being fired, because of not playing up to expections.''

Johnson, 47, entered the season ranked fourth in winning percentage among managers in major-league history. The highlight of his managerial career came when his 1986 team ran away with the NL East with a club-record 108-54 mark, then defeated Houston in six games and Boston in seven.

Lately, critics say, he has been unable to invigorate a gifted team that plays with little intensity.

Johnson played in four World Series with the Baltimore Orioles as part of a 13-year major-league career.

BOSTON (MAY 29) UPI - Investors Bank and Trust Co. said Tuesday it acquired Bank of New England's mutual fund custody service.

Investors Bank purchased for an undisclosed amount of money custody assets with a value of $20 billion from the troubled Bank of New England, said Eric Hayden, a spokesman for Investors Bank.

''Bank of New England didn't want to be in the business, so we bought them out,'' said Hayden.

Bank of New England, struggling with enormous real estate losses incurred last year and in the first quarter this year, has been consolidating its business lines.

The purchase is part of Investors Bank's long-term strategy to increase its overall custody business, which handled the accounting for approximately $10 billion in mutual fund assets before the buyout, Hayden said.

The buyout garnered Investors Bank assets from mutual funds run by, among others, Merrill Lynch, John Hancock, Connecticut Mutual, Smith Barney and Kidder Peabody, Hayden said.

Easton Vance Corp., a Boston-based investment management firm, owns 77.3 percent of Investors Bank.

WASHINGTON (MAY 29) UPI - Soviet boats recently seized North Korean and Japanese fishing vessels found to be using drift nets to catch salmon in international waters in the North Pacific, U.S. officials said Tuesday.

A letter received Tuesday from the Soviet fisheries attache in Washington confirmed the seizures, first reported by the Soviet news agency Tass on May 21, said Steven Springer, special agent in charge of the National Marine Fisheries Service office in Washington.

Ten vessels flying the North Korean flag and six Japanse vessels were ''detained for illegal fishing'' and were taken under escort to an undisclosed Soviet port ''for prosecution,'' Springer quoted the letter as saying.

The size and nationalities of the crews were not disclosed, and it was not clear whether all the fishermen were detained, Springer said.

Some of the North Korean boats are believed to have been among six North Korean vessels a U.S. air patrol photographed May 3 hauling in drift-net gear in the North Pacific outside U.S.-controlled waters, Springer said.

That encounter marked the first verified sighting of North Korean drift-netting on the high seas, Marine Fisheries Service spokesman Roddy Moscoso said.

Both incidents come as momentum builds in Congress and the United Nations for greater controls on the use of driftnets - curtains of monofilament mesh draped over miles of open sea that indiscriminately kill dolphins, whales, sea turtles and birds along with the fish they are designed to catch.

The May 3 photographs revealed what appeared to be a catch of salmon on the decks of the six North Korean boats, Moscoso said. Their positions and descriptions were passed on to the Soviet Union through diplomatic channels to assist the Russians in protecting their fisheries, he said.

The North Korean and Japanese boats were seized between May 19 and May 22 outside the 200-mile limit controlled by the Soviets. Although the craft were in international waters, they were seized after it was determined they were carrying a haul of 8 to 10 metric tons of Russian-spawned salmon Soviet fisheries attache V. Sukhov said in the letter.

The letter also refers to ''special equipment and fishing gear,'' Springer said. Neither the Tass dispatch nor the letter refer specifically to drift nets, but U.S. officials presume the vessels mentioned in both accounts were using them, Springer said.

Scientists from the Marine Fisheries Service, a Commerce Department agency

have reported tens of thousands of marine mammals killed by foreign driftnets in the North Pacific.

American fishermen have largely given up the practice, but the technique has remained popular among Japanese, Taiwanese and South Korean fishing trawlers.

#90149u2537 05/29/1990 ~United Press International

NEW YORK (MAY 29) UPI - The brokerage arm and other subsidiaries of Drexel Burnham Lambert Group Inc. filed for federal bankruptcy protection Tuesday to reorganize in a move analysts said could be an attempt at a comeback by the former Wall Street powerhouse.

The subsidiaries, which were not included in the parent company's filing for bankruptcy protection Feb. 13, are considering plans of reorganization that would allow them ''to utilize and realize the full value of their respective assets,'' Drexel said in a statement.

''It is anticipated that a viable reorganized entity will emerge,'' Drexel said.

The subsidiaries filed Chapter 11 petitions to reorganize under the federal Bankruptcy Code Tuesday afternoon in U.S. Bankruptcy Court in Manhattan.

The brokerage unit, which conducted the bulk of the company's junk bond, merger and stock brokerage business, ceased normal operations and has been winding down since its parent filed for bankruptcy in the largest such action in Wall Street history.

At the time the parent company said it expected to liquidate all its operations.

But industry observers pointed out that by operating the brokerage arm under bankruptcy laws, Drexel officers could reorganize the entire firm and be protected from creditors. Any such reorganization would not be feasible if just the parent remained in bankruptcy, they cautioned.

It was not clear whether Drexel would attempt to stay in business over the long term or operate just long enough to liquidate assets and pay off creditors, experts said.

Much of Drexel's holdings are in high-yield, high-risk investments known as junk bonds. Drexel was a pioneer in the junk bond market, which fueled the corporate takeover wave in the 1980s that has since slumped dramatically.

''It could operate as a continuing entity so we don't have to have a fire sale on the assets we have now,'' said Leon Marcus, an attorney representing Drexel's shareholders.

''It could be a long-term project of five or eight years,'' he added. ''There's lots and lots of securities and lots and lots of assets that have to be liquidated.''

The move also could mark a preemptive strike against the possibility of the firm's creditors forcing the brokerage arm into involuntary bankruptcy he added. Earlier this month, creditors pushed Drexel's commodiites trading and trade finance subsidiaries into involuntary bankruptcy.

''All in all, it further confuses an already confused case,'' Marcus said.

Shareholders had more than $800 million in equity in Drexel's brokerage arm at the time of the parent's bankruptcy filing, he said.

The entire firm now has $3.1 billion in assets and $2.8 billion in liabilities, according to a report published Tuesday in Newsday.

At the time of the parent's bankruptcy, the brokerage unit had $54 billion in assets.

Drexel said it has sold 87 percent of its inventory and securities positions, primarily junk bonds and stocks issued by Drexel's clients.

About 500 of Drexel's original 5,400 employees have remained at the firm since the parent's bankruptcy filing, a company spokesman said.

Among those subsidiaries filing for voluntary protection Tuesday from creditors under Chapter 11 of the U.S. Bankruptcy Code were the broker-dealer arm, Drexel Burnham Lambert Capital Group Inc., Drexel Burnham Lambert International Inc. and Drexel Burnham Lambert Commercial Paper Inc., according to the clerk's office of U.S. Bankruptcy Court in Manhattan.

The petitions were filed with U.S. Bankruptcy Court Judge Howard Buschman III.

At the height of its power, Drexel was the most profitable brokerage firm on Wall Street. It was so profitable in 1987 that Michael Milken - known on Wall Street as the ''junk bond king'' for his work at Drexel - earned $550 million for the previous year.

Later, Drexel and Milken were caught up in the government's Wall Street corruption investigations. Drexel pleaded guilty and paid $650 million in

penalities to settle felony charges in September 1969. Milken has pleaded guilty to six felonies and agreed to pay $600 million in penalties.

If the firm stays in business, questions remain about its junk bond operations, said James Prendergast, an attorney representing some of Drexel's employees.

Drexel sold the exclusive rights to its computerized junk bond reserach and analysis to Salomon Brothers Inc. last month for what was believed to be at least $1 million.

When a company files for bankruptcy protection, however, deals made in the three months before a filing can be voided, Prendergast said.

A Salomon spokeswoman said the junk bond data base has been put into full operation at Salomon Brothers.

#90149u2593 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - The State Department expressed its appreciation Tuesday to North Korea for returning the remains of five Americans listed as missing in the Korean War and called it a step toward better relations.

North Korean ambassador to the United Nations Ho Jong told United Press

International that there could be further releases of American remains but he could not say how many.

The State Department also listed a series of conditions that would have to be fulfilled before there could be further improvement in relations, including inspection of North Korean nuclear facilities and an end to North Korean support of international terrorism.

State Department spokeswoman Margaret Tutwiler said, ''The U.S. government appreciates the return of these war remains. As Secretary (of State James) Baker said, 'We are looking for a steady, reciprocal process toward better relations both between North and South Korea and between the United States and North Korea.' The return of these remains is a step in that direction.''

The North Korean government handed over the remains at the Panmunjom truce line on Monday, a procedure insisted upon by the United States. Earlier efforts to hand the remains to U.S. veterans' groups in North Korea were turned down by the State Department because they would have excluded the United Nations command and the South Korean government.

Tutwiler listed the conditions that the United States insists on before there can be further improvement in relations: ''North Korean willingness to engage in constructive talks with the Republic of Korea, satisfactory resolution of the terrorist issue, and North Korea signing of a nuclear safeguards agreement with the International Atomic Energy Agency.''

Ambassador Ho said, ''We have heard those conditions before.'' He had no response to the U.S. conditions.

State Department officials said that the United States has made those conditions clear in nine meetings held in Beijing between the political officials of the U.S. and North Korean embassies in China. There are no diplomatic relations between Washington and Pyongyang.

North Korea was listed by the State Department in April as one of those states that supports international terrorism, even though the the United States believes that North Korea was not responsible for any act of terrorism in 1989 or 1990.

The State Department blames North Korea for the November 1987 destruction of a South Korean airliner over Burma and the 1983 terrorist attack against South Korean officials in Burma in 1983.

U.S. officials also believe that a nuclear installation near Pyongyang is meant to produce weapons-grade nuclear fuel, one step on the road to producing an atomic bomb.

The return of the five sets of MIA remains raises new questions about the nearly 4,000 Americans still listed as missing in action 35 years after the end of hostilities in Korea.

In a speech soon after the end of the war, Gen. Mark Clark, a U.S. commander, said that ''thousands'' of Americans were left behind, but the State Department has said it has seen no credible information about American POWs who were not returned.

There have been persistent reports of middle-aged Caucasian prisoners being spotted in North Korea by foreign technicians. A series of recently declassified cables show that State Department officials passed on information that Caucasian prisoners were spotted by foreign diplomats. Some of the prisoners were reported in the cables to be on their way to the Soviet Union.

Senior U.S. officials said that the question of the missing Americans, while not the kind of issue that would be raised at the Washington U.S.-Soviet summit, has been raised at the working level with the Soviets.

#90149u2627 05/29/1990 ~United Press International

HEIDELBERG, MS (MAY 29) UPI - An oil well exploded in flames Tuesday outside Heidelberg, killing one person, critically injuring four others and prompting an evacuation of the rural area, authorities said.

The explosion and fire occurred shortly before 2 p.m. at an oil well belonging to R&H Oil and Gas Inc. of a Tickfaw, La., Mississippi Emergncy Management director Jim Maher said.

The cause of the explosion had not been determined.

After first removing 18 people from homes within a half-mile of the well, authorities expanded the evacuation order to include a three-mile radius, Maher said, adding that he did not know how many more people would be forced from their homes.

''There is a little more concentration of gas than we were first led to believe,'' he said. ''There is still no immediate danger, but we are doing this as a further precautionary measure.''

Maher said one person was killed in the fiery explosion, but could not elaborate on the fatality.

Lafe Jones, vice president of Southcentral Regional Medical Center in nearby Laurel, said four of five workers brought to the hospital suffered severe burns.

The workers, all listed in critical condition, were to be flown to the Mississippi Firefighters Memorial Burn Center at Greenville and the burn unit at the University of South Alabama Medical Center in Mobile, Jones said.

Maher said firefighters used a ''flame-flower'' to keep the fire going in order to burn up excess hydrogen sulfide, a foul-smelling and highly flammable gas that can be fatal if inhaled or absorbed through the skin.

Hydrogen sulfide vapors are non-irritating but can deaden the sense of smell, according to the Mississippi Department of Transportation emergency response handbook.

The explosion occurred in a sparsely populated area of east Jasper County just outside of Heidelburg, 83 miles southeast of Jackson.

Volunteer firefighters responded to the fire, but were told not to use water on the blaze, Jasper County sheriff's dispatcher Reatha Boyd said. ''The oil company is supposed to be sending in some heavy equipment. They said water wouldn't help control it.''

Maher said R&H Oil and Gas bought the oil well from Shell Oil in March. He described it as a ''worked-over well,'' meaning workers could have been trying to drill deeper to get more oil.

Dorothy Scott, a secretary at R&H Oil and Gas, which operates in Mississippi and Louisiana, confirmed that the workers ''were in the process of a workover'' on the well when the blast occurred.

The work was being done by an unknown service company, which had contracted with R&H Oil and Gas, Scott said. ''I do not know what happened when the well blew out,'' she said.

Maher also said the state was asking the Federal Aviation Administration to make the airspace around the site off limits to aircraft.

''There are a bunch of small airplanes flying around there, and somebody is going to get killed,'' the state emergency director said. ''They are flying news folks in there trying to get closeup pictures of everything that is going on.''

#90149u2637 05/29/1990 ~United Press International

WASHINGTON (MAY 29) UPI - Kyocera Corp. of Japan has bolstered its U.S. holdings by buying additional shares of Picturetel Corp., a Peabody, Mass. manufacturer of videoconferencing systems, it was disclosed Tuesday.

The additional Picturetel stock was purchased last March, when Kyocera received 2.2 million shares from a Series A preference stock issue for about $500,000, according to a filing with the Securities and Exchange Commission.

The stock acquired in the transaction - a private stock purchase not previously reported by Kyocera - was later converted in a reverse stock split to 221,000 shares.

Kyocera now owns 20.4 percent of Picturetel's shares outstanding, including: the Series A preference stock, which is convertible into an equal amount of common stock; 302,700 shares of Series B preference stock, which is also directly convertible into common stock; and 171,740 common shares.

Kyocera last January paid $561 million for AVX Corp., a New York manufacturer of ceramic, tantalum and glass capacitors used in the telecommunications and computer industries.

#90149u2656 05/29/1990 ~United Press International

SAN FRANCISCO (MAY 30) UPI - Several disgruntled Adobe Systems Inc. shareholders filed three separate shareholder suits Tuesday in San Francisco and San Jose following Friday's 30 percent stock price plunge.

Adobe jolted the market Thursday by saying earnings and revenue for the second quarter ending June 1 would be sharply below analysts' expectations.

The stock plummeted $15.25 a share Friday, despite the company on Friday slightly raising its disappointing earnings projection.

Adobe closed at $35.25 a share in over-the-counter trading Friday on 8.5 million shares. It had reached a high of $50.50 a share Thursday on anticipation of a more favorable earnings forecast by the company.

Lawyers for three shareholders sprinted to federal court in San Francisco Tuesday with lawsuits accusing Adobe co-founders John Warnock and Charles Geschke and three executives of the Mountain View, Calif.-based computer software firm of conspiring to manipulate stock prices.

The suits accuse the officials of disseminating false and misleading statements ''in order to artificially inflate the market price of Adobe securities...''

The two San Francisco class actions were followed quickly by a third suit in San Jose federal court.

In a prepared statement, Adobe described the filing of only a single lawsuit. It said, ''The company believes that the lawsuit is completely without merit and intends to vigorously contest the action.''

Adobe was formed in 1982 and developed among other programs, PostScript, a page description language for electronic printing and publishing.

One suit maintained that Adobe failed to inform the Securities and Exchange Commission of Adobe's ''rapidly deteriorating market position.''

The lawsuits tied some of the Adobe problems to the announcement in May, 1989 by Apple Computer, Adobe's largest single software customer, that Apple would develop its own software for use in its printers to compete with Adobe software.

Two months later, Apple, Adobe's largest stockholder, sold its 16.4 percent share of Adobe stock prompting a price slide of 40 percent to as low as $14 a share last year.

The suit by Donald A. Wells Jr., owner of 500 shares of Adobe stock, maintained that Adobe issued false statements at the beginning of 1990 in an effort give the investing public a rosey impression of Adobe's future prospects.

Adobe was boosted in March by an IBM Corp. decision to start offering Adobe software with its personal computer operating system.

The suits seek an unspecified amount of damages for the alleged improprieties by Adobe management.

The class action includes people who purchased Adobe stock between March 6 1990 and May 24, 1990.

Named along with Warnock, company president, and Geschke, executive vice president, were Senior Vice President Steven MacDonald, chief financial officer M. Bruce Nakao and company director David Evans.

#90149u2671 05/29/1990 ~United Press International

MOSCOW (MAY 29) UPI - Renegade Communist Boris Yeltsin narrowly won the presidency of the giant Russian republic Tuesday, capping a remarkable comeback from political disgrace despite a last-ditch effort by Mikhail Gorbachev to defeat his main critic.

Minutes after the vote was announced in the new Russian Congress of People's Deputies, Yeltsin took the podium and pledged ''to spare nothing,

neither health nor time, so that we can escape the crisis situation and lead Russia to better times.''

Gorbachev, who last week accused Yeltsin of trying to break up the Soviet Union, said in Ottawa after the vote that he now belives his rival is serious in his pledge to cooperate with the Soviet leadership. But he noted that Yeltsin has been forced to clarify his position on socialism in recent days.

''He has had to adjust his policy very seriously over the past few days, and has adjusted to the better,'' Gorbachev said. ''If he is playing political games, then we are maybe in for difficult times.''

As he left the Kremlin after his victory, Yeltsin was met near St. Basil's Cathedral by several hundred supporters brandishing his portrait and pre-revolutionary Russian flags while chanting ''Victory! Victory!''

Yeltsin, 59, mounted a hill and told the crowd that his election was ''a very serious, enormous step toward the victory of democracy in Russia.'' Then, bombarded by flowers and good wishes, he pushed through the throngs to a car.

A few hours later two small rallies of about 500 people each, one next to the Kremlin, celebrated Yeltsin's election and were told that mass support is still needed despite the populist leader's new powers. Yeltsin did not speak.

The government newspaper Izvestia rushed the election results to press Tuesday evening, printing a large picture of a smiling Yeltsin with a front-page story that overshadowed a smaller notice on Gorbachev's departure for Canada and the United States.

Yeltsin said his election could cloud Gorbachev's mood at the Washington summit with President Bush. ''At first President Gorbachev will take (the election) very hard, but gradually he will get used to this inescapable fact.''

Yeltsin's defeat of Alexander Vlasov, the incumbent Russian premier and a non-voting member of the Soviet Communist Party's ruling Politburo, ended a two-week deadlock in the struggle for the republic's effective presidency.

Yeltsin received 535 votes, four more than a needed clear majority for election as chairman of both the Russian legislature and the smaller Supreme Soviet, or permanent parliament, to be chosen from its ranks.

Vlasov got 467 votes. A third candidate, ethnic Korean businessman Valentin Tsoi, a would-be kingmaker, received 11 votes.

Yeltsin was conciliatory in triumph, thanking both his supporters and his opponents ''who sought a different point of view.''

He called for a coalition government to overcome the sharp differences in the legislature, directing deputies to set up a ''conciliation commission representing different political courses.''

The commission, to meet Wednesday, will negotiate the division of portfolios in the new government. On Monday, Oleg Rumyantsev, an organizer for the Democratic Russia bloc that orchestrated Yeltsin's victory, said the radical leader will likely offer Vlasov the No. 2 post in the Parliament as deputy chairman.

With his election Yeltsin gained a power base from which to challenge Gorbachev on issues including the pace and content of economic reform, the role of the Communist Party and the nature of the Soviet federation.

#90149u2706 05/29/1990 ~United Press International

OAKLAND, CA (MAY 29) UPI - Alameda County prosecutors Tuesday postponed the arraignment of two anti-logging activists on explosives charges while further evidence against the pair is reviewed.

The activists, Judi Bari, 40, and Darryl Cherny, 33, members of the group Earth First! were arrested last week after a pipe bomb exploded in their car while they were driving in Oakland.

The arraignment was postponed as Earth First! picked up support from other environmental groups and hired a private investigator to build a defense for Bari and Cherney.

''No charges will be filed today against either Cherney or Bari because we've decided to review all the evidence, including laboratory test results, before deciding on any further action in this case,'' said Chris Carpenter, anassistant Alameda County district attorney.

Carpenter said it could take as long as two weeks to get test results in connection with the case, but did not elaborate.

Bari and Cherney claim to be victims of an assassination attempt, possibly connected to dozens of death threats they allegedly received in recent months because of their anti-logging activity against powerful timber interests along California's north coast.

Bari was in serious but stable condition with a broken pelvis and abdominal injuries at Oakland's Highland Hospital. Cherney, who suffered

an eye injury from the nail-packed bomb, was freed from Oakland City Jail Monday night after supporters posted $100,000 bail.

The two activists appeared likely to be formally released because they could not be legally held longer than 72 hours without formal charges. However, Earth First! cofounder Mike Roselle said Bari had requested police protection in her hospital ward.

David Chatfield, national director of Greenpeace, said the environmental group would pay the fees of a private investigator hired by Earth First! lawyers to study elements of the case that may have been missed by Oakland police and federal investigators.

''This is crazy,'' Chatfield said. ''This is a real injustice that there's a 12-hour investigation (leading to the arrests) when these people have gotten eight weeks of threats.''

Roselle also said the police and FBI were wrong to immediately suspect Bari and Cherney. ''They only looked at one side of it from the very beginning,'' he said.

The activists were arrested Friday on suspicion of possessing and transporting an explosive device and possessing of an explosive device in a public place. Cherney also faced a charge of possession of a booby trap.

The explosion occurred while the two were traveling to Santa Cruz to promote Redwood Summer, a campaign to prevent the logging of redwoods on California's north coast.

Environmentalists have staged demonstrations for the pair in Oakland and other cities. Police dispersed a 24-hour vigil outside the Oakland Police Department Monday because of complaints from citizens ''having to walk over them'' to get into the police administration building.

#90149u2774 05/29/1990 ~United Press International

MIAMI (MAY 29) UPI - A suburban mayor and two council members were convicted of extortion Tuesday for accepting thousands of dollars from a businessman who needed a zoning variance to sell part of his shopping center.

A federal jury claimed to be hopelessly deadlocked early Tuesday afternoon but continued its deliberations and returned verdicts against the three officials of Sweetwater, a town of 8,200 people 15 miles southwest of Miami.

Council member Carmen Menendez, the central figure, was convicted on one

count of bribery conspiracy and one count of extortion. She faces a maximum penalty of 40 years in prison and a $500,000 fine.

Mayor Irain Gonzalez and council member Antonio Duran were acquitted of the conspiracy charge but convicted of extortion. Each faces a maximum penalty of 20 years in prison and a $225,000 fine.

U.S. District Judge Edward B. Davis set sentencing for July 30. All of the defendants remained free on bond.

The defendants were among five of the eight council members indicted in January.

Two pleaded guilty before trial. A sixth was named as an unindicted co-conspirator and testified against his collegues.

The charges involved businessman Maurice Barakat, part-owner of a shopping center who wanted to sell part of the mall but needed city approval to lift zoning restrictions.

His variance request was turned down by the council in the summer and fall of 1989. Court records indicate that Menendez approached Barakat and solicited a $11,000 bribe from him in exchange for the zoning variance.

Barakat testified that he gave her fifty $100 bills June 5, 1989 inside a letter-sized envelope that contained documents about his request. Menendez testified last week that she did not realize the money was in the envelope with the documents until later in the day.

She said she gave the envelope back to Barakat instead of going to police because, ''I don't trust the Sweetwater Police Department.'' She said she also wanted to avoid a scandal.

Barakat, however, went to the FBI. In testimony, he insisted Menendez did not return the money.

Duran and Gonzalez elected not to testify.

#90149u2783 05/29/1990 ~United Press International

LOS ANGELES (MAY 30) UPI - The Navy has told Lockheed Corp. that it could cancel the company's troubled P-7A patrol aircraft program because Lockheed has not been making satisfactory progress on the plane, the company has disclosed.

The Navy told Lockheed that ''failure to cure lack of progress under the contract terms could lead to contract termination for default.''

The company, which made the disclosure in its first-quarter report to shareholders, said it responded to the Navy's threat by saying that there is no legal or contractual basis for the program to be canceled.

A Lockheed spokesman said Tuesday that the Navy's move, which was made March 30, is ''old news'' and has not affected negotiations between the service and the company over the 1989 contract with the company to build the plane.

Lockheed took a $300 million write-down on earnings last year as a result of cost overruns on the fixed-price development contract on the plane, the successor to the P-3.

#90149u2839 05/29/1990 ~United Press International

OTTAWA (MAY 29) UPI - Parliament voted 140-131 Tuesday to approved a law that would forbid doctors to perform abortions unless a woman's health or life is endangered. The action upset both abortion advocates and opponents.

The law must be approved by the non-elected Senate before it becomes law, but that is expected to be only a formality.

Canada has been without an abortion law since January 1988, when the Supreme Court ruled the existing law unconstitutional because it restricted women's right to an abortion.

Under the new law, criminal sanctions, including a maximum penalty of two years in jail, would apply to any woman who induces her own abortion without the advice of a doctor or a doctor who performs an abortion without determining the threat to a woman's health.

Several women, representing both abortion rights and anti-abortion groups, shouted at politicians while they voted and were ejected by guards from the public gallery of the House of Commons.

Only a few members of the Conservative government voted against the government-led legislation. Conservative members who openly oppose the government have been threatened with being ejected from the caucus.

The vote was a small victory for Prime Minister Brian Mulroney, whose administration is under siege with the threat that Quebec will secede from Canada and a new value-added tax that takes effect next January. The Conservatives have only about 15 percent of public support.

Margaret Purcell, a spokeswoman for the Campaign Life Coalition in Toronto said in an interview that her anti-abortion group had hoped the

legislation would be defeated because it did not ban all abortions across the board.

Purcell she said her organization would continue lobbying politicians for a law that outlaws abortions.

Anne Burnett, a representative of the Canadian Abortion Rights Action League, said the law violates Canada's Charter of Rights and women's equality.

''It's chilling effect on doctors will limit access,'' Burnett said. ''It is going to create greater dangers for pregnant women who will have trouble finding access to abortions.''

#90149u2867 05/29/1990 ~United Press International

(MAY 29) UPI - Soviet President Gorbachev travels to North America... Baltic leaders say Gorbachev woN'T speak for them at the summit... and the famed Orient Express chugs down the track again. Those stories and more, next, from U-P-I.

Some of Soviet President Gorbachev's problems have followed him across an ocean.

The Soviet leader arrived in Ottawa early this afternoon, and was faced with Canadians of Baltic descent who planned a protest against his crackdown on nationalist movements in Lithuania, Estonia and Latvia.

Gorbachev's one-night stopover in Canada includes a meeting with Canadian Prime Minister Brian Mulroney. Gorbachev leaves tomorrow for Washington and the superpower summit.

For Gorbachev, the planned protests in Ottawa and Washington are vivid reminders of the troubles at home.

Panic buying in much of the Soviet Union continues, with reports that some republics like the Ukraine will NOT implement the price hikes called for by a new economic plan.

Armenia is the site of continued clashes between nationalists and Soviet troops.

And deputies in the Russian republic today kicked more sand in Gorbachev's face by electing renegade communist Boris Yeltsin as president.

The three Soviet Baltic states are worried about- what they call a- ''Yalta-type'' summit.

The chief of the Lithuanian mission in the United States read a statement from the foreign ministers of Lithuania, Estonia and Latvia. The ministers say that Soviet President Gorbachev will NOT be legally representing them in his upcoming summit with President Bush.

The acting ambassador of Lithuania describes the statement as a ''warning'' that the republics will NOT accept ''any Yalta-type agreements.''

In 1945, the wartime allies held a summit at Yalta dividing eastern and western Europe and giving the Soviet Union control of the east. The Soviets later reneged on part of the pact calling for free elections in their sphere of influence.

The diplomat says the Baltic states are NOT against the summit... they just want any talk concerning them limited to ways of opening negotiations leading to their independence.

#90149u2887 05/29/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 29) UPI - Hydrogen rocket fuel leaked into the shuttle Columbia's engine room during fuel loading Tuesday, forcing NASA to indefinitely delay the ship's launch on a 10-day astronomy mission.

The liftoff of the 36th shuttle mission had been planned for 12:38 a.m. EDT Wednesday, two weeks behind schedule, but the fueling process was halted when sensors detected unacceptable levels of explosive hydrogen gas in the engine compartment.

NASA spokeswoman Lisa Malone said the launch was postponed ''due to a higher-than-allowable concentration of hydrogen in Columbia's aft fuselage. The vehicle was never in an unsafe condition at any time.''

A new launch target date was not immediately known, but it appeared likely the long-awaited flight, already running two weeks behind schedule, will be delayed at least two to three days and possibly longer.

Fueling began at 4:36 p.m. when technicians began pumping a half-million gallons of liquid hydrogen and oxygen rocket fuels into the shuttle's giant external tank.

At 5:25 p.m., with 5 percent - about 20,000 gallons - of 383,066 gallons of hydrogen loaded, engineers noticed higher-than-acceptable levels of hydrogen vapor in the shuttle's aft engine room, which is pressurized with inert nitrogen to prevent any possible chance of a fire or explosion.

''Loading of liquid hydrogen was stopped when it became apparent that concentration levels in the aft were continuing to rise,'' Malone said. ''Indications at this time are that we have a leak in the orbiter's main propulsion system ... or in the liquid hydrogen system on the ground support equipment side. Engineers are troubleshooting the situation at this time.''

In a normal fueling, engineers would expect hydrogen levels of about 500 parts per million, but in Columbia's case, they detected a level of 2,875 parts per million. The ''danger'' level is considered to be 40,000 parts per million.

If Columbia is not launched by Monday, the flight will be delayed seven more days to replenish argon coolant needed by the ship's telescope payload.

It was not immediately known what caused the problem, but sources said several possibilities were under discussion, including a leak in a 4-inch hydrogen line between the shuttle and its external tank or problems with the system used to pump fuel into the spaceship.

The decision to delay the launch was a frustrating disappointment to Columbia's seven-member crew - commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 43, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46.

The launch already was two weeks behind schedule because of work to fix a faulty valve in the shuttle's cooling system.

Mounted in Columbia's 60-foot payload bay is the Astro-1 observatory, a battery of four telescopes built to study invisible X-ray and ultraviolet light from high-energy stars, galaxies, quasars and other violent objects to learn more about the structure and evolution of the universe.

Data from the Astro instruments thus will complement the visible light studies of the Hubble Space Telescope, extending humanity's vision beyond the blue end of the visible spectrum in the latest step in an unprecedented $9 billion program to explore Earth's solar system and the depths of space.

X-rays and UV radiation are blocked by Earth's atmosphere, but from Columbia's 219-mile-high orbit, scientists will be able to get their first detailed look at ultraviolet emissions from deep space as well as X-rays from a nearby supernova and other targets, possibly including as-yet-unseen black holes.

Along with studying the heavens, the Columbia astronauts also plan to teach an astronomy lesson from space that will be beamed back to school

children while ham radio operator Parise hopes to chat with two Soviet cosmonauts aboard the orbiting Mir space station.

Unlike the giant Hubble telescope, launched from the shuttle Discovery April 25, the four Astro telescopes carried into orbit aboard Columbia - three ultraviolet instruments and one X-ray telescope - will remain locked in the ship's payload bay throughout the flight.

Parker, Parise and Durrance, who all hold doctorates in astronomy, will aim their instruments at more than 230 targets, requiring Brand, Gardner and Lounge to fire Columbia's maneuvering jets more than 300 times to properly orient the spaceship.

Among the high-priority targets are quasars, the most powerful objects known, energetic galaxies, exploding stars, interstellar dust and gas, Saturn, Mars, Comet Austin and possibly black holes, collapsed stars with such intense gravity that not even light can escape.

Gigantic black holes in the cores of active galaxies may provide the energy that causes quasars to shine across the gulfs of space with such unimaginable fury, sucking stars, gas and dust into oblivion and emitting powerful bursts of X-rays in the process.

#90149u2907 05/29/1990 ~United Press International

KUALA LUMPUR, MALAYSIA (MAY 29) UPI - Eight Hong Kong citizens were hanged at dawn Wednesday in the largest mass execution for drug offenses in Malaysia's history.

Guards escorted six men to the gallows at the prison in the northern town of Taiping, while a man and woman met the same fate in Kajang Prison on the outskirts of the capital, officials said.

''I was disappointed,'' said Karpal Singh, a lawyer whose last-ditch attempt to gain a reprieve for the eight from the Supreme Court failed Tuesday.

''I stayed up all night hoping for a response from King Azlan Shah,'' Singh said. Although the monarch has the constitutional power to grant a pardon and reduce death sentences to life imprisonment, he did not spare the lives of the eight as their relatives hoped.

Prime Minister Mahathir Mohamad turned down pleas for pardons from Britain's Prime Minister Margaret Thatcher and British High Commissioner Nicholas Spreckley. A separate appeal from Amnesty International was also dismissed.

The government has turned down all appeals for clemency since introducing the death sentence for drug-related offenses 15 years ago.

The eight Hong Kong nationals were arrested in the resort island of Penang in October 1982 after customs officials found 28 pounds of heroin concealed in the bottom of five suitcases.

Au King Kor, 32, and Chan Yiu Tim, 33, both transport workers, driver Yuen Kwok Kwan, 28, waiter Li Chi Ping, 32, company supervisor Ip Tak Ming, 36, and insurance company director Ng Yiu Kwok were hanged in Taiping.

Car dealer Chow Sing, 42, and Hau Tsui Ling, 32, the only woman in the group, were exected in Kajang Prison. Magistrate Sabirin Jaafar witnessed the simultaneous hanging of Chow and Hau in two chambers.

Ng and Li donated their corneas. ''They wanted some good to come out of their terrible situation,'' said Ashe Windham, head of the consular section for the British High Commission.

The eight were reunited with their families for the last time and met with clergymen Tuesday after all hopes for a pardon were dashed.

Singh told the Supreme Court the Board of Pardons acted unconstitutionally in March in not allowing legal representation for the eight in deciding against their appeal. But the court ruled Singh's argument was irrelevant.

''The plaintiffs should have been allowed to be represented by counsel during the deliberations of the board,'' Singh maintained.

Wong Kwok Chung, Hau's former husband, arrived at the prison to claim her body. He said arrangements were made for the bodies of Hau and Chow to be cremated at a nearby cemetary with a Baptist minister officiating.

Guards at Kajang Prison said the pair had become very close during their incarceration and were allowed to visit each other in their respective cells. ''They spent a lot of time comforting each other and discussed the possibility of getting married'' if a pardon was granted, one guard said.

Wong said Hau's 13-year-old daughter, who left the prison in tears after seeing her mother for the first time in eight years, would be adopted by the woman who has been looking after her since Hau was convicted.

About 98 people, including 27 foreigners, have been hanged since the introduction of the mandatory death sentence for possession of more than half an ounce of heroin or morphine, two pounds of opium or 0.4 pounds of marijuana.

Two Australians, Kevin Barlow and Brian Chambers, were hanged in 1986 in a

case that evoked international criticism. Derrick Gregory, from Britain, was hanged in July.

Amnesty International has also made a plea for clemency, saying it was seriously concerned by the increasing use of the death penalty in Malaysia.

#90149u2929 05/29/1990 ~United Press International

(MAY 29) UPI - A department store fire in downtown Miami is under control this afternoon... after injuring more than two dozen firefighters and backing up traffic for several hours.

It's NOT yet known what caused the flames that raced through the upper floor of the three-story, 69-year-old Woolworth's building.

More than 70 firefighters battled the blaze, high humidity and intense heat as temperatures climbed in the upper-80's.

Miami Fire Chief C-H Duke says firefighters ''took a beating,'' with seven taken to a local hospital with heat exhaustion and smoke inhalation. Another was hospitalized with a knee injury, another suffered minor burns when a ceiling collapsed and 19 more were treated at the scene for heat exhaustion.

As firefighter Rick Smith described it- ''the heat was so intense you couldN'T stand up.''

Owners of the building had NOT yet installed a sprinkler system... as they were required to do by the end of this year to meet fire codes.

The nation's highest court says it will step back into the ring to settle yet another abortion dispute.

The Supreme Court today agreed to rule on the constitutionality of a federal rule banning publically funded clinics from discussing abortions with their patients.

At issue are a series of regulations commonly referred to as Title 10.

The measure hands out some 200-Million dollars to about four-thousand clinics nationwide, which serve Millions of low-income women each year.

But Title 10 is in contrast to a Reagan administration law that prohibits public funding of groups that even hint of abortion as a birth control option.

A ruling in the matter isN'T expected until next year.

The court, which last year gave states more power to regulate abortion, still has two abortion cases pending this term. Those rulings are due out next month.

#90149u2939 05/29/1990 ~United Press International

(MAY 29) UPI - White House officials say it looks like the Soviet Union is dismantling a radar facility in Siberia that for years has loomed as an obstacle to a strategic arms treaty.

Soviet President Gorbachev promised last fall that the station would be torn down... and now U-S officials say they have proof that Gorbachev was true to his word.

The demolition removes a serious point of contention in time for Gorbachev and President Bush to announce an agreement of major elements in a strategic arms treaty during their summit this week.

Washington had branded the radar station a ''clear violation'' of the 1972 Anti-Ballistic Missile Treaty and demanded its UNconditional dismantling before conclusion of an accord on strategic weapons.

Soviet efforts to salvage the facility were all but dropped last year when Soviet Foreign Secretary Shevardnadze admitted it was a treaty violation.

Maverick politician Boris Yeltsin is promising to ''lead Russia to better times'' as president of the Soviet republic.

Yeltsin won the presidency of the Russian republic today in another chapter of his remarkable comeback from political disgrace.

Yeltsin was elected to the post by the new Russian Congress of People's Deputies... despite appeals by Mikhail Gorbachev for his defeat.

Yeltsin says he's willing to put personal issues aside in his future dealings with Gorbachev as he forges new relationships for Russia.

His victory ends two-week deadlock over the leadership post.

In other political moves today in Moscow, the Soviet Parliament refused to consider holding a NO-confidence vote. Radical deputies were trying to force the issue as a challenge to the Kremlin's economic recovery program that involves steep price hikes in basic foods.

-30- 1943

#90149u2950 05/29/1990 ~United Press International
(MAY 29) UPI - Drug agents are NOT going undercover these days so much as they're going under water.

The nation's war on drugs apparently has forced traffickers to find more innovative ways of smuggling drugs across the border.

Customs inspectors say smugglers are now using powerful magnets and suction cups to attach nets full of contraband to the bottoms of cargo ships.

One shipping company, Crowley Caribbean Transport, says underwater smuggling is the ''hottest technique around.''

The method has prompted Crowley to hire scuba divers to inspect the bottoms of its ships when they arrive at Florida's Port Everglades.

The divers haveN'T found anything yet, but a company executive say the random searches will continue.

In January, customs officials discovered 265 pounds of cocaine stuffed in waterproof tubes on the bottom of a Colombian cargo ship at the Port of Jacksonville.

The Orient Express will be riding again.

Europe's historic train will leave London tomorrow in a red-carpet send-off involving a band and a crowd attired in 1920's fashions.

100 passengers are paying 59-hundred dollars each to make the journey that will end Monday in Istanbul.

The special trip is a re-creation of what was once Europe's most famous railroad service that started in the late 19th century.

The Orient Express was discontinued after World War Two because it was financially UNable to compete with airlines and faster and cheaper trains.

The train's heyday was in the Roaring 20's, when its illustrious clientele included members of European royalty, diplomats, spies and femme fatales.

-30- 1797
#90149u3050 05/29/1990 ~United Press International
OTTAWA (MAY 29) UPI - Soviet Foreign Minister Eduard Shevardnadze Tuesday reiterated Moscow's position that a reunified Germany be neutral but conceded that reunification even as a member of NATO would be a ''very useful development.''

Shevardnadze, who accompanied Soviet President Mikhail Gorbachev to Ottawa for a pre-summit visit, met for two hours with Canada's External Affairs Minister, Joe Clark. The Soviet officials will travel Wednesday to Washington for meetings with President Bush.

The two officials spent most of the session discussing events in the Soviet Union, according to Shevardnadze, but also talked about a united Germany and an expanded role for the Conference on Security and Cooperation in Europe which is comprised of Europe, North America and the Soviet Union.

Shevardnadze said Canada and the Soviet Union are in ''broad agreement'' about an expanded CSCE serving as an instrument of cooperative security, as well as taking a more active role in the areas of human rights, economic cooperation and environmental action.

But on the question of a unified Germany's future within NATO, Shevardnadze said: ''I still think a united Germany is going to be a very useful development. (But) we need to seek solutions that will serve the interests of Germany, Eastern Europe and of course the Soviet Union.''

At one point Shevardnadze joked about inviting a united Germany to join the Warsaw Pact. ''The minister (Clark) is not going to accept that,'' he added.

Shevardnadze also said he hoped it was possible to negotiate an agreement with independence-minded Lithuania. The Soviet Union imposed economic sanctions against Lithuania after it declared its independence.

The Soviet foreign minister denied that problems in the Soviet Union had weakened Gorbachev's position heading into the summit with Bush. ''I can't sense any weakening, and I work day to day with him,'' he said.

He also said the election of Boris Yeltsin as president of the Soviet republic of Russia should not be viewed as ''out of the ordinary.'' Seen against the ''backdrop of democracy, glasnost and developments in the Soviet Union,'' he said, the decision by the voters was not surprising.

Shevardnadze described as ''tragic'' clashes with militant nationalists in the Armenian capital, Yerevan, where the death toll has reached nearly two dozen. ''We have deep feelings about that,'' he said. ''We will do our best so we don't have to use force. This is one of our basic principles.''

#90149u3157 05/29/1990 ~United Press International

(MAY 29) UPI - Pakistan Prime Minister Benazir Bhutto is struggling to

restore calm in her home province as 14 more people have died in continuing ethnic violence. Gunmen yesterday killed a leading opposition senator in Karachi.

The Sudan has issued an appeal for food and medical aid for 300-thousand people left homeless by a series of earthquakes last week in the south of the country. One quake was bigger than the one that hit San Francisco last fall.

Officials at the Department of Environmental Conservation say as many as 100-thousand gallons of fuel may have spilled from Alaska Railroad tank cars that jumped tracks south of Fairbanks yesterday. NO was injured in the wreck.

The Miami Fire Department says a downtown Woolworth's was NOT required to have a sprinkler system until the end of the year. Fire raced through the upper floor of the 69-year-old building today, injuring more than two dozen firefighters before being brought under control this afternoon.

An India news agency reports that security forces killed four Moslem separatists after they crossed into the Indian state of Jammu. Kashmir militants have waged a snow-balling campaign for secession since 1988.

Armenians today are in mourning for 27 people killed in weekend clashes with Soviet troops. There is NO new violence reported in the Armenian capital of Yerevan, but K-G-B sources predict the nationalist crisis will escalate.

OPEC is asking for help from Western nations in developing a plan for coping with a projected oil shortage later this decade. The cartel warns in its monthly bulletin that a major energy crisis is just ''a few years down the road''.

A Philippine general is predicting more trouble for President Aquino. The nation's acting armed forces chief says right-wing troops are planning to mount another coup attempt against Aquino, who has already survived numorous take-over tries.

Astronomers say they've discovered what may be the largest visible structure in the solar system. The team from Boston University says its telescope found a 20-million-mile long cloud of sodium streaming from Jupiter.

Massachusetts Senator Edward Kennedy says the nation must draw on the memory of his brother and- in the senator's words- ''halt the arms race once and for all.'' The 73rd anniversairy of John F. Kennedy's birth was marked in Boston today with the UNveiling of a bronze statue of the slain president.

-30- 2625
#90149u3387 05/29/1990 ~United Press International
(MAY 29) UPI - Officials in Heidelburg, Mississippi, say an oil and gas well exploded just outside of the town today, spewing toxic fumes and prompting an evacuation of the rural area. A sheriff's dispatcher says there was an explosion and fire and poisonous gas in the area. She said there are UNconfirmed reports of deaths and serious injuries.

There is new evidence the Salvadoran military tried to cover up its involvement in the November killings of six Jesuit priests, their housekeeper and her teen-age daughter. Roman Catholic Church and Jesuit officials say a court has revealed that a lieutenant colonel previously NOT implicated in the case was involved in destroying records pertaining to it.

Democratic senators have proposed a plan that they say will revolutionize U-S foreign aid practices. Their bill follows the approach of countries like Japan, which requires recipients of foreign aid to use the money to buy Japanese products and services. The plan cuts cash flow to foreign governments and instead supports capital projects that provide opportunities for U-S businesses.

A new survey says management, NOT labor, is to blame for the poor quality of some U-S goods and services. A New Jersey-based management consulting firm, Brooks International, asked more than 11-thousand employees nation-wide about management practices. One-third of those surveyed said that management provides little motivation for employees to make quality-control suggestions.

People in Los Angeles are already breathing what's been described as the nation's worst air. Now a city councilman's wants to free diners from having to worry about second-hand cigarette smoke. He has proposed that Los Angeles become the first major American city to ban smoking in all restaurants.

The Alaskan fishing port of Kodiak shook today from a moderate earthquake registering five-point-eight on the Richter scale. Police, school officials and the harbormaster all reported distinct swaying during the tremor... but NO damage.

-30- 2202
#90149u3718 05/29/1990 ~United Press International
(MAY 29) UPI - Authorities say an oil well exploded in flames today outside Heidelburg, Mississippi... killing one person and critically injuring four others. Officials evacuated 18 people living within

half-a-mile of the well as a precaution against dangerous pockets of hydrogen sulfide gas. Volunteer firefighters were called to the scene, but were told NOT to use water on the blaze.

President Bush is studying the economic and politicial crisises facing Mikhail Gorbachev one day before the Soviet leader arrives in Washington. While Bush studies, U-S and Soviet military advisers are trying to round up summit agreements on arms control as well as a bi-lateral trade pact. But the Soviet handling of the crisis in Lithuania may delay any economic agreements.

Trade and foreign-relations ministers from the European Community and Japan met today in Brussels, Belgium, to discuss the Japanese trade surplus. Japan agreed to work to cut its European trade surplus-registered at almost 20-BILLION dollars last year. The ministerial meeting was the highest-ranking exchange between the E-C and Japan in four years.

Former Senator Lawton Chiles today demanded more cooperation between the departments of Education and Health and Human Services. The Florida gubernatorial candidate is co-host of the National Health-Education Consortium being held this week in Washington, D-C. Chiles says since the health and education departments were separated, the government has lost sight of the idea that good health is essential to good learning.

#90149u3743 05/29/1990 ~United Press International

(MAY 29) UPI - The White House says President Bush has told Iran that evidence supports the conclusion that four Iranians kidnapped in Lebanon have died. Spokesman Marlin Fitzwater says the information on the four Iranians... two diplomats, a journalist and a driver... is based on evidence from international groups. Tehran has been trying to determine the fate of the four kidnapped years ago.

A routine traffic violation in Louisiana yesterday led to the discovery of a pair of bomb factories in Spearsville, Louisiana, and Duncanville, Texas. Two Texas men were pulled over on Interstate 20 yesterday near Haughton, Louisiana, for an improper lane change. A search of the trunk turned up a number of bombs, shotguns and an automatic pistol. A search of the houses where the men had been living turned up pipe sections and a substance that appeared to be gun powder.

Beavers probably doN'T have humans in mind when building their dams. But beaver dams are helping contain as much as 60-thousand gallons of fuel that spilled from Alaska Railroad tank cars that have derailed south of Fairbanks. 19 cars of a 70-car train went off the tracks yesterday in an isolated, roadless area. There were NO human injuries, although it's NOT known how the spill affected the beavers that inadvertently created the

containment barriers.

Officials at the U-S Naval Academy in Annapolis, Maryland, are trying to prevent any more incidents of hazing or harassment of females studying at the academy. They've issued a general order prohibiting- quote- ''horseplay'' between classmates. One woman resigned from the academy following an incident in which she was handcuffed to a urinal.

-30- 1856

#90149u4005 05/29/1990 ~United Press International

(MAY 29) UPI - Fueling problems have forced a delay in the launch of the shuttle Columbia, originally set for just after midnight eastern time. NASA engineers detected UNacceptable levels of hydrogen seeping into the aft fuselage. They did NOT immediately know how long that would delay the mission, but word is at least 24 hours. Columbia is scheduled for a 10-day mission, equipped with a bank of ultra-sharp telescopes to study a number of the more turbulent- and elusive- stars and galaxies.

Officials say 11th-hour pre-summit talks have sealed an agreement to expand commercial air service, and have all but wrapped up a U-S-Soviet trade pact. But whether the pact considered vital to Soviet President Gorbachev's economic reforms is actually signed is up in the air. In the words of one Bush administration official- ''It's unlikely, given the political realities of Lithuania.''

Soviet President Gorbachev says his nation may be in ''for difficult times'' if maverick communist Boris Yeltsin is- quoting Gorbachev here- ''playing political games.'' Yeltsin was elected president of the Russian republic earlier today. Gorbachev spoke about his main political rival after arriving in Canada in advance of his summit with President Bush.

An oil-well explosion outside Heidelburg, Mississippi, has left one person dead and four others critically injured with severe burns. The explosion took place early this afternoon at a well belonging to R-and-H Oil and Gas. 18 residents were evacuated from the rural area within half-a-mile of the well, as a precaution against the possible presence of hydrogen sulfide gas. Plans were made for a general evacuation for everyone living within three miles of the blast.

-30- 1896

#90149u4019 05/29/1990 ~United Press International

(MAY 29) UPI - Soviet officials are worried that a day of mourning may be followed by a day of violence in the Armenian republic. 10-thousand Armenians gathered today for the funeral of one of 27 people killed during weekend clashes with Soviet troops. There were NO new clashes to report in the capital, where 200-thousand mourners are expected at a mass funeral

tomorrow. In the words of a K-G-B spokesman- ''The situation in Yerevan has NOT yet reached its climax.''

The U-S Supreme Court has agreed to hear a new abortion case. The high court will rule on the constitutionality of a federal ban on family-planning grants to clinics that discuss abortion as an option. The ban was imposed by the Reagan administration in 1988 and was upheld by a U-S appeals court. The Supreme Court's decision is NOT likely before next year.

Colombia's President-elect Cesar Gaviria has produced new get-tough measures for the war on drugs. Gaviria is planning a series of special courts modeled on Italy's anti-Mafia tribunals to streamline and assure the prosecution of drug suspects. Gaviria is also planning to improve security for judges dealing with drug cases.

A Los Angeles City councilman describes it as ''a modest step to help put an end to the reign of terror'' on the city's streets. The council unanimously approved a ban today on the sale of ammunition for one week before New Year's Eve and before Independence Day in an effort to end random gunfire by holiday revelers. Mayor Tom Bradley was one of three politicians to propose the ban.

-30- 1723

#90149u4251 05/29/1990 ~United Press International

(MAY 29) UPI - Soviet President Gorbachev is in Canada tonight, but is continuing to deal- at least verbally- with issues back home.

Gorbachev says the Soviet Union may be in for some ''difficult times'' if Boris Yelstin is- quoting here- ''playing political games.'' But the Kremlin leader adds that the maverick politician has adjusted his policy during the past few days, and in Gorbachev's opinion, adjusted it for ''the better.''

Yelstin narrowly won the presidency of the giant Russian republic earlier in the day... something Gorbachev campaigned actively against before his departure.

Gorbachev left behind several other crises... including the conflict over Baltic independence and panic buying prompted by upcoming price hikes.

But the Soviet leader says he is looking for ''dialogue and trust'' from other nations in the face of his most severe leadership test yet. Canadian officials were agreeable, saying they want to help bolster Gorbachev's economic and political reforms.

In Moscow, it was a day of celebration for hundreds of supporters of

Yeltsin, who gathered at the Kremlin chanting ''Victory, Victory.''

Yeltsin... whose victory marks an incredible comeback from political disgrace... promised to spare nothing in leading Russia to better times.

Soviet President Gorbachev arrives tomorrow in Washington, D-C, for a summit that may or may NOT end with the signing of an economic agreement.

U-S and Soviet negotiators are putting the final touches on a trade pact considered vital to Gorbachev's reforms. While the agreement may be wrapped up on paper... it is up in the air whether it will be inked during the meetings between Gorbachev and President Bush.

Prospects for the accord are clouded by the tension over Gorbachev's efforts to put down an independence drive in the Baltic republics. And, it is NOT clear whether Bush will go ahead with the agreements without some concession from Gorbachev on Lithuania.

One administration official says it is ''unlikely'' the accord will be signed. But he adds- ''That's NOT to rule out a political push from the top would clear the way.''

On a brighter note, negotiators at the State Department are trying to wrap up the final details on the first strategic arms agreement in a decade. The pact would involve a roughly one-third cut in strategic nuclear arsenals.

#90149u4267 05/29/1990 ~United Press International

(MAY 29) UPI - A Heidelberg, Mississippi, oil-well explosion has left one person dead and four injured... hospitalized in critical condition.

And fear of hydrogen-sulfide gas pockets has prompted authorities to evacuate all residents from the rural area within a three-mile radius of the explosion.

The blast occurred early this afternoon at an R-and-H Oil and Gas well, which then burst into flames. The cause of the blast has NOT yet been determined.

Volunteer firefighters were called to the blaze, but were told NOT to attempt to put it out. In fact, a so-called ''flame-flower'' was used to keep the fire going... to burn up excess hydrogen sulfide. The gas is highly inflammable and can be fatal if inhaled or absorbed through the skin in sufficient amounts.

Salvadoran church leaders say there is further evidence of a military

cover-up in the slayings of six priests, their housekeeper and her daughter.

Roman Catholic Church and Jesuit officials say a Salvadoran court revealed late yesterday that an army lieutenant colonel destroyed evidence in the case. The evidence involves log books that could show who came and left a military academy on November 16th, the night of the killings.

A court news release says the log books disappeared on orders of the man who was sub-director of the academy at the time. The man has since been promoted to lieutentant colonel and had NOT previously been implicated in the case.

Four lieutenants and four lower-ranking soldiers have been arrested and charged with murder in the case. A ninth soldier also has been charged but deserted his unit and remains at large.

-30- 1811

#90149u4287 05/29/1990 ~United Press International

(MAY 29) UPI - C-B-S News is fighting to keep its former reporter, Diane Sawyer, off the witness stand in the racketeering trial of former Philippine first lady Imelda Marcos.

Prosecutors have subpoenaed Sawyer... who now works for A-B-C... asking that she testify about a 1986 interview with Marcos. The highlight of that interview was Marcos denying she signed checks on a secret Swiss bank account using the name ''Jane Ryan.''

C-B-S News today offered to let another employee testify in Sawyer's place.

The judge in the New York City trial did NOT say when he would rule on Sawyer's testimony.

When testimony in the trial resumed today, an F-B-I handwriting expert told the court that ''in all probablility'' Marcos signed a series of checks on a Bankers Trust account in 1983 and '84, using the name ''Regina Marquez.'' The 15 checks totaled two-pointMillion dollars.

Marcos is being tried on charges she and her late husband, former Philippine President Ferdinand Marcos, conspired to buy New York real estate, art and jewelry with 222-Million dollars stolen from their homeland.

''Wildman'' Steve Brill was true to his name today- but NOT in the usual ways.

The New York City environmentalist called a news conference in rainy

Central Park, where he resigned his job with the Parks Department.

Brill has led more than 15-thousand people on tours through the city's parks, where he typically instructs them on which weeds are edible.

The 41-year-old Brill was under pressure from higher-ups in the bureaucracy, who wanted him to tame his ''wildman'' act and warn people NOT to eat park weeds... rather than instruct them in which weeds to eat.

The Parks Department supposedly wanted Brill to warn people about the ill effects of dog urine and pollution on weeds.

Brill says he has always told his tours that the weeds must be washed before eaten. He also says experts have told him that a New Yorker is more likely to be mugged than suffer an illness from eating wild plants.

He said of the Parks Department- ''I can't work with them anymore.''

But Brill says his free tours through the parks will continue- even if he woN'T be paid 10-25 an hour for the service.

#90149u4391 05/29/1990 ~United Press International

(MAY 29) UPI - The shuttle Columbia's astronomy mission is already two weeks behind schedule, and now there's another delay. Hydrogen rocket fuel leaked into the shuttle's engine room today, forcing NASA to postpone the launch indefinitely.

U-S lawmakers have some definite ideas about what should be on the superpower summit agenda. 139 House members and 51 senators sent President Bush joint letters today, urging him to discuss Soviet anti-Semitism during his meeting with Mikhail Gorbachev.

Primary elections were held today in Kentucky and Arkansas to determine the tickets for congressional and other races. In Kentucky, Harvey Sloane won the Democratic Senate primary and will face Republican Senator Mitch McConnell.

Harvard University President Derek Bok says the nation's oldest college needs ''fresh energy'' as it plans for the challenges of the 1990's. Bok said today he'll step down as president in July 1991 after serving 20 years in the post.

In Malaysia, where it's now Wednesday, eight Hong Kong citizens were hanged at dawn for drug offenses. Seven men and one woman were led to the gallows in the largest mass execution for drug crimes in Malaysia's history.

Canada is getting a new abortion law. Parliament voted 140-31 today to approve the law that would prohibit abortions unless a woman's health or life is in danger. The new measure drew criticism from advocates on both sides of the issue.

-30- 1604

#90149u4447 05/29/1990 ~United Press International

(MAY 29) UPI - John Poindexter's request for a new trial was denied today by a federal judge in Washington. Judge Harold Greene said the evidence against the retired rear admiral ''more than adequately'' supports the jury's guilty verdict.

Poindexter was convicted April 7th of five felony counts stemming from his involvement in the Iran-Contra scandal.

Nicaraguan Contra rebels resumed talks with the government today in an effort to resolve difficulties delaying the rebels' disarmament. The Contras agreed earlier to disarm by June 10th, but the plans have been on hold since May 18th.

In Manhattan Beach, California, the Virginia McMartin Pre-School was torn down today to make way for an office building. The school was closed in 1984 following child abuse allegations that led to the most notorious sex abuse case in U-S history.

Thunderstorms drenched parts of the Midwest today, driving hundreds of Ohio residents from their homes. Heavy rain also swelled rivers and flooded roads in the mid-Atlantic states... and tornadoes struck in the Denver area and in west Texas.

Mark Ray is an honest man, but that DIDN'T keep him out of trouble. Police in Charlotte, North Carolina, say Ray was driving through a neighborhood known for drug dealing Sunday when he was pulled over and asked what he was doing.

He told the officer he ''was looking for some dope.'' Police then searched his car and found two small bags of heroin under the driver's seat. Ray was charged with possession of heroin and freed on three-thousand-dollars bond.

#90149u4621 05/29/1990 ~United Press International

(MAY 29) UPI - U-S and Soviet negotiators are trying to work out summit agreements in advance of Mikhail Gorbachev's arrival in Washington tomorrow. But a bi-lateral trade pact might wind up a moot issue. The

tension over the drive for independence in the Baltic republics may derail the accord that- in the words of the State Department- ''legally and technically'' could be signed. The final decision will have to be worked out between Gorbachev and President Bush.

The shuttle Columbia will NOT be lifting off early tomorrow as planned. NASA has postponed the 10-day astronomy mission indefinitely because of leaking hydrogen rocket fuel in the ship's engine room. The space agency says there ''was NEVER any danger of explosion'' today when sensors detected high levels of hydrogen in the engine room, and the fueling process was halted.

The State Department is shifting its policy toward Israel, saying it would support a U-N fact-finding mission on the human-rights situation in the West Bank and Gaza Strip. Secretary of State Baker said last week only that he was ''prepared to discuss'' such a mission. Israel opposes any U-N presence in the occupied territories as an infringement of its sovereignty.

Alaska's Department of Environmental Conservation says ill effects from a 100-thousand-gallon fuel spill are minimal because the fuel has been contained in a pair of ponds created by beaver dams. The spill occurred yesterday when an Alaska Railroad train derailment sent more than a dozen tank cars tumbling from the tracks in a remote area south of Fairbanks.

-30- 1753

#90149u4638 05/29/1990 ~United Press International

(MAY 29) UPI - Miami firefighters battled a blaze in a downtown department store for more than four hours today before declaring the fire under control. The fire burned through the upper, storage floor of the three-story Woolworth's building. More than two dozen firefighters were injured, with most suffering from heat exhaustion. They fought the fire under tough weather conditions, with high temperatures and heavy humidity.

A proposal to make Los Angeles the first major city to ban smoking in restaurants is NOT going over with the city's restaurateurs. A member of the city council proposed the ban today, but the executive vice president of the California Restaurant Association responds by calling the measure ''inappropriate'' and ''extreme.''

OPEC is asking Western nations to help devise a plan to offset another energy crisis that the cartel says is looming just ''a few years away.'' The Vienna-based cartel predicts in its monthly bulletin that demand for oil will outstrip production capacity by the mid-1990's. OPEC ties the increased demand to the economies of Eastern Europe and the Third World.

The arraignment of two anti-logging activists on explosives charges was postponed today in Oakland, California. Prosecutors say they want to

review all the evidence in the case before taking further action. Judi Bari and Darryl Cherny were arrested last week after a pipe bomb exploded in their car while they were driving to Oakland. Both are members of the group Earth First!

FOUNTAIN VALLEY, CA (MAY 30) BUSINESS WIRE - Lasorda Foods Inc., located in Fountain Valley, a privately held corporation, in the development stage, announced the signing of a definitive share exchange agreement with Discovery Capital Corp., a publicly held Colorado company which was organized to seek potential business opportunities.

The definitive share exchange agreement provides for the exchange of 4,687,800 shares of the common stock of Discovery Capital Corp. for 100 percent of the currently issued and outstanding common stock of Lasorda Foods. The closing for this transaction is scheduled to take place on or before June 15, 1990.

Lasorda Foods was incorporated on June 30, 1988, for the purpose of marketing to the retail grocery trade, a complete line of Italian food products endorsed by Tommy Lasorda, the manager of the Los Angeles Dodgers and his wife, Jo Lasorda.

In August 1989, Lasorda Foods introduced into the Southern California market a line of homemade pasta sauces that are currently being sold in most of the major food chains in the Southern California area. Presently orders for over 40,000 cases have been received and are in the process of being filled.

Tommy and Jo Lasorda, the major shareholders of Lasorda Foods, and the management of both companies believe this acquisition will provide an exciting business opportunity for the shareholders of Discovery Capital and provide the resources necessary for the production and marketing of Lasorda Foods' products nationally.

OCEANSIDE, CA (MAY 30) BUSINESS WIRE - Cubic Communications has been awarded an $8.4 million contract with the San Francisco Bay Area SAFE Council to manufacture, install and maintain 2,214 emergency freeway call boxes, said Chairman E. Keith Burnett.

Burnett said installation of the call boxes will begin in August and completion will be in nine months.

Cubic Communications, a wholly owned subsidiary of San Diego-based Cubic Corp., will install call boxes along freeways in five counties of the San Francisco Bay Area.

The installation of call boxes will be monitored by the Bay Area SAFE Council.

The Bay Area is the fifth area in California to benefit from a state provision that takes one dollar from each vehicle registration and applies it to providing emergency freeway call boxes.

Since the late 1980s, the company has designed and developed cellular technology that is in use today throughout the United States, including Hawaii, Colorado, Maine and California.

Two Cubic Communications-made demonstration units are on the job in Sepulveda Pass, one of the busiest freeway routes in Southern California, and one that links the enormous Los Angeles basin with the San Fernando Valley via Interstate 405.

Most recently, the company completed the installation of a 384-unit emergency freeway call box system in Ventura.

#90150b0053 05/30/1990 ~Business Wire

NEW YORK (MAY 30) BUSINESS WIRE - AT&T and Retix, the Santa Monica, Calif.-based OSI internetworking company, Wednesday signed an agreement which paves the way for the integration of the current Open Systems technologies of Retix and AT&T's UNIX Software Operation and the co-development of future products based upon those technologies.

The alliance focuses on enhancing the development of Open Systems Interconnect (OSI) technology within the UNIX operating system environment.

The UNIX Software Operation sees the agreement as a way to supply OEM customers with comprehensive OSI capabilities. ''OSI is poised to become the communications architecture of choice for UNIX System V STREAMS-based, open-systems environments.

The UNIX operating system represents the de facto standard in the Open Systems environment, just as the OSI model represents the worldwide standard for interoperability and communications architectures.

AT&T's UNIX System V offering leads the UNIX marketplace; Retix, with over 150 OEMs (Original Equipment Manufacturers) worldwide, leads the Open Systems Interconnect software technology marketplace. Both companies have agreed to market and fully support the joint product offerings.

Recognizing the large investment with their client-bases, they have agreed that customers must be guaranteed the ability to transparently migrate to the integrated product.

To date, TCP/IP has been widely used by communications professionals, particularly within the U.S. government marketplace. Recognizing the

existence of this investment, Retix and the UNIX Software Operation are committed to offering users a migration path for an efficient co-existence between OSI and TCP/IP.

The integrated product line will provide users with a full suite of OSI functionality, designed to be fully integrated with the UNIX System V STREAMS operating environment via AT&T's OSI Communications Platform (CP-1). CP-1 is a UNIX System V kernel-optimized OSI core stack which efficiently utilizes all UNIX System V STREAMS services.

The outcome is that resulting OSI applications provide high levels of performance and throughput. The integration is expected to be completed and an initial product available in the first quarter of 1991. The newly integrated OSI product family will be marketed as an unbundled family of products. It will provide complete compatibility with AT&T's UNIX System V Release 3 and UNIX System V Release 4 offerings.

OSI functionality offered in the initial product will include: X.400 messaging services and X.500 directory services, File Transfer, Access and Management (FTAM), Network Management Services and Virtual Terminal (VT). The agreement also calls for the provision of TCP/IP-to-OSI migration products, including gateways to TCP/IP-based electronic mail and file transfer applications.

In addition to the initial product offering, the UNIX Software Operation and Retix have committed to the ongoing development and marketing of a broader spectrum of OSI-oriented applications for UNIX System V.

By capitalizing on each other's expertise in their particular technologies they will bring new implementations of UNIX System/OSI products to the market in a more timely and industry responsive manner.

Retix designs, manufactures and markets OSI and internetworking products. Founded in 1985, Retix has over 150 original equipment manufacturer (OEM) licensees worldwide and has installed thousands of internetworking products. Retix sells to OEMs, distributors, systems integrators, value-added resellers and large end-users in the United States, Canada, Europe, South America, the Middle East and Asia.

The UNIX Software Operation, a separate business unit of AT&T, develops, markets and licenses the UNIX System V operating system and related systems software in source code form to the worldwide open systems computer industry.

SAN DIEGO (MAY 30) BUSINESS WIRE - PSICOR Inc. (NASDAQ:PCOR) and Diatek Inc., both of San Diego, Wednesday announced agreements covering the development and distribution of a perfusion management database system.

Under terms of the agreements, Diatek will develop for PSICOR a database system which will provide perfusionists with a continuous reading of a patient's vital statistics throughout open-heart surgery and other cardiovascular applications.

The system will provide the perfusionist with pertinent patient information as it transpires and produce a printed record of the data following the procedure. Currently information is noted and recorded manually.

Michael W. Dunaway, PSICOR's chairman and chief executive officer, said, ''The use of the new database system will provide our perfusionists with a thorough and accurate documentation of the key events during an operation. This information will allow us to better understand the processes that take place and enhance our quality assurance and safety in the field.''

PSICOR, founded in 1968, is the nation's leading provider of cardiovascular technology and services. The company supplies nearly 400 hospitals with advanced life-sustaining equipment, skilled technicians, disposable supplies and expert resource management on a cost-effective contract basis.

#90150b0072 05/30/1990 ~Business Wire
VANCOUVER, BRITISH COLUMBIA (MAY 30) BUSINESS WIRE - Braner Resources Inc. (VSE:BRJ) announced that Karl Werth has been appointed general manager of its wholly owned subsidiary, Cemco Products Inc. effective May 29, 1990.

Werth has 30 years experience in the manufacturing industry. Mark Wallbom, who resigned as director of Braner Resources Inc. on May 18, is no longer employed at Cemco Products Inc. effective May 25, 1990.

Under an agreement dated Dec. 15, 1989 between Cemco Products Inc. and I.S.I.T. Ltd. and SubRain International Inc., Cemco was granted exclusive manufacturing rights of the SubRain porous pipe proprietary product to manufacture a total of 30 million linear feet of pipe for the U.S. market.

SubRain International alleges certain defaults in the underlying agreement between SubRain and I.S.I.T. Charles Cordewener, the holder of the patents alleges six defaults and has given until June 18, 1990 for I.S.I.T. to correct these defaults.

Two of the defaults were already waived by Cordewener when he signed the Dec. 15 agreement. The company is confident that three additional defaults can be rectified forthwith and believes the last default can be rectified by June 18.

The company will be filing final documents to approve the recently announced private placement and expects to have final approval next week.

SAN JOSE, CA (MAY 30) BUSINESS WIRE - Businessland Inc. (NYSE:BLI), an international leader in the distribution, integration and support of microcomputer and workstation systems for business, Wednesday debuted Solution Line Plus, the computer industry's most comprehensive telephone help desk.

With Solution Line Plus, businesses for the first time can use a single 800-number to access immediate technical support for more than 160 hardware, software and local area networking products, in any configuration.

A major expansion of the Businessland help desk services, Solution Line Plus is designed to meet the growing reliance among U.S. corporations on outside sources for computer service support. In fact, Businessland expects that single-source, multivendor technical support will become one of the fastest growing segments of the $50 billion computer service and support market in the coming decade.

Founded in 1982, Businessland is an international leader in the distribution, integration and support of microcomputer and workstations systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides high-level service and support to maximize their productivity.

Businessland operates centers and branch offices is 50 major U.S. metropolitan areas, five metropolitan areas in Great Britain, two in West Germany and five in Canada. Businessland reported sales of $1.2 billion in fiscal 1989.

LOS ANGELES (MAY 30) BUSINESS WIRE - Maxicare Health Plans Inc. Wednesday confirmed that the United States Bankruptcy Court approved an amendment to the reorganization plan whereby the court-approved creditors' committees have joined the company as proponents of the plan, and the court authorized Maxicare to mail the reorganization plan and disclosure statement to creditors and shareholders for their approval.

''We believe that the creditors' decision to join us in proposing the reorganization plan virtually assures a speedy and satisfactory conclusion to our reorganization efforts,'' said Peter J. Ratican, chairman and chief executive officer. ''We are more confident than ever that Maxicare will emerge as a vigorous and financially sound competitor.''

Maxicare will promptly mail approximately 400 pages of documents to more than 55,000 creditors and shareholders. The mailing will include the reorganization plan, disclosure statement and ballots -- and letters recommending approval of the plan from the creditors' committees, which represent a cross-section of the company's largest creditors.

The creditors and shareholders must vote on the plan by June 29. The court is scheduled to begin hearings on July 9 to confirm the reorganization plan. At the current pace, this will become one of the most quickly resolved bankruptcies of this size and complexity.

As previously announced, the reorganization plan provides protection to Maxicare's enrollees. The plan also calls for creditors and shareholders to receive cash of approximately $123.8 million; 10-year, 13.5 percent notes for a face amount of $67 million; and common stock and warrants. The securities are expected to be publicly traded.

In addition, the creditors will share in the cash proceeds from a distribution trust that will be established to liquidate all Maxicare assets not used in the ongoing businesses and operations, and from distributions out of excess consolidated net worth as of Dec. 31, 1991 and 1992.

Maxicare Health Plans Inc. operates health maintenance organizations in California, Illinois, Indiana, Louisiana, North Carolina, South Carolina and Wisconsin. Maxicare's common stock is traded over the counter.

SAN FRANCISCO (MAY 30) BUSINESS WIRE - Williams-Sonoma Inc. Wednesday at its annual meeting of shareholders announced that the company's board of directors had approved a stock split of three shares for each two shares of common stock.

The stock split is to be distributed on or about June 29, 1990, to shareholders of record on June 15, 1990. This stock split will increase the company's outstanding shares to approximately 9,544,786.

On May 16, 1990, the company released its net earnings and net earnings per share results for the first quarter ended April 29, 1990. This information was based on pre-split shares outstanding.

After the 3-for-2 stock split becomes effective, the net earnings per share results for the recent 13 week period will be 7 cents per share, or $622,000, compared to 3 cents per share, or $288,000, reported for the 13 weeks ended April 30, 1989.

Williams-Sonoma Inc. is a nationwide specialty retailer of high quality kitchenware and other products for the home and garden. These products are marketed through 125 retail stores and five mail order catalogs.

#90150b0111 05/30/1990 ~Business Wire

LIVERMORE, CA (MAY 30) BUSINESS WIRE - Researchers at Lawrence Livermore National Laboratory have for the first time produced three-dimensional X-ray microscope images showing how materials react under stress, without damaging the sample, using a conventional X-ray source.

Research on the process has been conducted in collaboration with Georgia Institute of Technology and Sandia National Laboratories Livermore. The process uses an advanced X-ray imaging technique known as X-ray Tomographic Microscopy (XTM) and a newly developed tensile load

cell. The XTM earned an R&D-100 award in 1988 for John Kinney, Quintin Johnson, Allyn Saroyan, Monte Nichols and Ulrich Bonse.

According to Kinney, a physicist in the Chemistry and Materials Sciences department, the significance of the latest development is that until now it has been impossible to three-dimensionally image the development of cracks in materials while they are in the process of breaking down.

In addition, while XTM operates most effectively with costly synchrotron radiation sources, recent LLNL developments with the technology allow the use of conventional laboratory X-ray sources with only slight reductions in performance.

The need for testing materials is particularly important at this time, Kinney said, as composites are being developed for future aerospace projects such as the proposed National Aerospace Plane and the High Speed Civil Transport, which will require advanced composite materials for the airframe and hypersonic engines.

These materials are not yet being manufactured, but several candidate materials are being investigated.

The development of an in-place stage for XTM was motivated by the need to understand how flaws develop and propogate in composites, and how the growth of these flaws ultimately leads to failure.

For materials which fail internally, such as high-strength composites, this newly developed technique will enable us to develop a basis for making accurate life-time predictions.''

Lawrence Livermore National Laboratory is managed by the University of California for the U.S. Department of Energy.

SANTA CLARA, CA (MAY 30) BUSINESS WIRE - National Semiconductor Corp. Wednesday announced that Clements Edward Pausa will retire as vice president, international manufacturing. Pausa's retirement is effective with the end of the company's first fiscal quarter (August 1990).

Pausa will be succeeded by James B. Owens, Jr., who will assume management responsibility for international manufacturing, along with his current responsibility for wafer fabrication and technology. Owens will serve as vice president of the newly formed advanced technology and manufacturing operation.

In order to assist with transition activity, Pausa will remain with the company through August. Pausa has agreed to serve National Semiconductor in a consulting relationship therafter.

Charles E. Sporck, National Semiconductor president and chief executive officer, said: "Ed Pausa has been a longtime contributor to National Semiconductor's strength and leadership in manufacturing. We are grateful for his twenty-one years of dedication, and wish him well on his retirement."

Pausa joined National Semiconductor in 1969, and has held a variety of management positions in the area of international manufacturing. His current position includes responsibility for manufacturing operations in Singapore, the Philippines, Malaysia, Thailand and Hong Kong, along with the Dyna-Craft packaging materials and service.

Prior to joining National Semiconductor, he served in a variety of management positions with the semiconductor division of Fairchild Camera and Instrument Corporation.

Owens joined National Semiconductor in 1976. He has held a variety of manufacturing, technical and management positions with the company. Most recently, he was named vice president, worldwide wafer fabrication and technology, with responsibility for the company's wafer fabrication operations worldwide, and with oversight responsibility for its research and development efforts.

#90150b0143 05/30/1990 ~Business Wire

MOUNTAIN VIEW, CA (MAY 30) BUSINESS WIRE - SynOptics Communications Inc. (NASDAQ/NMS:SNPX) Wednesday announced that the company expects revenue and earnings per share for the second quarter (ending June 29, 1990) to be substantially greater than those of the first quarter.

''Revenue is expected to be on the order of 35 percent higher than the $30.1 million reported for the first quarter,'' according to William J. Ruehle, vice president and chief financial officer for SynOptics Communications.

''With such a rapid short-term increase in revenue it is likely that earnings per share, which were 43 cents in the first quarter, will increase by at least as large a percentage as revenue.''

''Although product demand continues to be strong, it is not expected that this extraordinary rate of increase will be repeated in future periods,'' cautioned Ruehle.

SynOptics Communications Inc. designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivity, internetworking and network management solutions into an integrated networking system.

SynOptic's common stock is traded on the NASDAQ National Market System. Revenue of $77.3 million was reported for the fiscal year ended Dec. 31, 1989. Earnings for the same period were $9.4 million, or $1.22 per share. The company is headquartered at 501 E. Middlefield Road, Mountain View, Calif. 94043. Telephone is 415/960-1100.

SANTA CLARA, CA (MAY 30) BUSINESS WIRE - Intel Corp. will eliminate chlorofluorocarbon (CFC) usage from its worldwide manufacturing processes by 1992, the company said Wednesday. This is one of the most aggressive programs in industry.

''Significant scientific evidence exists supporting the adverse impact of chlorofluorocarbons on the stratospheric ozone layer. Intel has undertaken an aggressive worldwide program to immediately reduce CFC emissions by implementing good control and conservation practices,'' said Intel chairman Gordon Moore.

Intel instituted a comprehensive CFC Tracking Program in 1987 to assemble data of its worldwide usage. Since that time, using control, conservation and alternative manufacturing methods, the company has reduced its CFC use by approximately 30 percent.

''We will continue to evaluate and implement new manufacturing methods that eliminate CFCs from our manufacturing processes,'' Dr. Moore added.

For example, Intel has begun replacing CFC-based circuit board cleaning equipment with machinery that uses an aqueous-based cleaner. Intel studies have shown the equipment change to have no adverse impact upon product quality. The change affects facilities in Oregon, Ireland, Puerto Rico and Singapore.

This new equipment will be ''on line'' in all of Intel's Systems manufacturing facilities by the end of this year.

The company's goal is to eliminate dependence on CFCs and other ozone depleting compounds in manufacturing processes by 1992. The specific ozone-depleting compounds are CFC-11, CFC-12, CFC-113, CFC-114, CFC-115, TCA and carbon tetrachloride.

Intel has manufacturing facilities in the United States (California, Oregon, Arizona and New Mexico), Ireland, Israel, Singapore, Penang, Puerto Rico and the Philippines.

Intel manufactures microcomputer components, modules and systems.

LOS ANGELES (MAY 30) BUSINESS WIRE - The University of Southern California has acquired from The May Department Stores Co. a 4.4-acre site on the east side of the Harbor Freeway, two blocks east of the University Park campus, the university's president announced.

The tract, containing three interconnected warehouses, will be converted to the USC Parking Center, a state-of-the-art facility that will provide 2,000 parking spaces for faculty, students and staff. A shuttle service will connect the center to campus and to off-campus student housing.

Under the terms of the agreement, May combined a sale and a charitable donation of the property to USC. The property is valued in excess of $29 million, for which May will receive $15.5 million. The donation, which is the difference between the property value and the sale price, represents the largest corporate gift to The Campaign for the University of Southern California, USC's six-year fund raising campaign set to end June 30.

''We are very pleased and appreciative of this extraordinary sale and donation on the part of The May Co.,'' said USC President James H. Zumberge. ''Not only is the property ideally located for a central parking structure, but the existing buildings can be adapted to this purpose.''

The acquisition concludes a four-year search for a centralized parking site that would address the university's parking needs with minimal disruption to the surrounding community, according to Cornelius Pings, USC provost and senior vice president for academic affairs. Pings also is chairman of the board of the USC Real Estate Development Corp., which negotiated the deal for USC.

''The university will spend approximately $5 million to retrofit the structures,'' Pings said, ''resulting in a total cost to the university of $20.5 million. Even if we had been able to find a vacant site adjacent to campus, acquiring it and building a comparable facility could have cost more than $30 million.''

Pings said that the university has enjoyed the support of Councilmen Gilbert Lindsay and Robert Farrell in its efforts to relieve parking pressures in the area.

This project will provide parking for faculty, students and staff on a 24-hour basis, according to Lyn Hutton, USC senior vice president for administration.

''It will be ideal long-term parking for students who use their cars infrequently,'' Hutton said. ''That will open up parking spaces on campus for commuter students and others who come and go more frequently.''

Hutton noted that the project is also in keeping with the university's commitment to helping the city achieve its air-quality goals. ''By encouraging people to store their cars and use trams and public transportation, we will be helping reduce air pollution and cut down on traffic congestion,'' she said.

SAN FRANCISCO (MAY 31) BUSINESS WIRE - First Republic Bancorp Inc. (ASE:FRC)(PSE:FRC) Wednesday announced that the company has raised an additional $4,275,000 of ''primary capital'' through the private placement of perpetual convertible preferred stock with two institutional investors, Furman Selz Merchant Partners L.P. and General Atlantic Partners II, both of New York.

The addition of this new capital raises First Republic's consolidated capital and reserves to over $56.6 million. This represents a strong 10.2 percent ratio of capital to total assets for the company as of April 30, 1990.

James Herbert, president of First Republic, commented: ''We are extremely pleased to be able to raise new primary capital at a time when the equity market conditions are most unfavorable for the banking industry.

''This placement reaffirms our commitment to maintaining a strong capital base. Furman Selz Mager Dietz & Birney Inc., the placement agent, is a subsidiary of Xerox Corp. and is a leading New York investment firm. We appreciate Furman Selz's confidence in First Republic.''

The new series B non-voting perpetual convertible preferred stock carries a 9 percent non-cumulative dividend. The new issue is convertible into 610,715 shares of common stock at a price of $7 per share.

First Republic Bancorp. Inc. functions as a mortgage banker and direct lender through its California-chartered industrial banking subsidiaries First Republic Thrift & Loan (California's largest) and First Republic Thrift & Loan of San Diego.

The investment certificates of both of the company's California industrial banking subsidiaries are insured by the FDIC. The company also operates a mortgage lending subsidiary in Las Vegas, Nev. Total assets of First Republic as of April 30, 1990 were $548,712,000.

HOUSTON (MAY 30) BUSINESS WIRE - Continental Airlines Wednesday announced that a $200 million bond issue to finance a new airport passenger facility at LaGuardia airport was oversubscribed in the public marketplace.

The offering represents the largest facility bond issue in Continental's history.

The new East End Terminal will contain approximately 260,000 square feet, together with related aircraft ramps, aprons and taxiways, new airport roadways and a new vehicle maintenance building. It will be completed in early 1992.

Continental will be the terminal's primary tenant. The terminal will have 10 aircraft gates, eight of them widebody gates. The new facilities will allow the tenants of the terminal to increase their total daily local passenger capacity by over 70 percent.

The underwriting group, led by Smith Barney, advised that the issues were immediately oversubscribed. The yields on the issues ranged from 9-3/8 percent to 9-5/8 percent for bonds maturing from 2005 through 2015.

''Continental is pleased that the financial community recognizes and is willing to participate in our future,'' said Continental President Mickey Foret. ''We are particularly gratified that investors signaled their confidence in Continental by oversubscribing in an issue of this size.''

In the last year-and-a-half Smith Barney has successfully led the placement of nearly $350 million for Continental facilities in Los Angeles Newark, Cleveland and LaGuardia.

MOUNTAIN VIEW, CA (MAY 31) BUSINESS WIRE - Adobe Systems filed suit

Wednesday against Electronics For Imaging (EFI) seeking a declaration that patent 4,500,919, which EFI licensed from the Massachusetts Institute of Technology, is invalid, unenforceable and not infringed by Adobe.

This action by Adobe is in response to correspondence received from EFI's counsel alleging that Adobe infringed this patent. Adobe believes that EFI's claim is totally without merit and seeks a court resolution of the matter.

The patent covers a color printing system requiring a scanner, a color display and a color printer. Adobe sells none of these items. Adobe does not expect this action to have a significant impact on the company's business.

ATLANTA (MAY 30) BUSINESS WIRE - Gerber Alley, a provider of healthcare and manufacturing information systems and one of the fastest-growing privately held corporations according to Inc. magazine, announced Wednesday the addition of Jay Toole as its healthcare business executive vice president and chief operations officer.

Toole has over 20 years experience in the healthcare industry and formerly served as worldwide director of healthcare consulting and partner for Andersen Consulting. During his tenure at Andersen, Toole helped build the organization into its recognized position as the industry's leading healthcare consulting practice.

Gerber Alley develops, sells and supports integrated information management systems to healthcare institutions including acute care, pediatric and teaching facilities, as well as to the made-to-order manufacturing industry throughout the United States and Europe. The company, founded in 1983, has had an average growth rate of 103 percent and closed out 1989 with over $41 million in revenue.

''I have watched Gerber Alley since the company's inception and have always been impressed with its growth, its products and services, as well as the quality people associated with the organization. Gerber Alley represents the classic success story, where hard work, dedication and innovative spirit can take you to the top,'' said Toole.

The company's healthcare business has grown over the past seven years to be one of the top 10 vendors among such competitors as American Express, IBM/Baxter and GTE.

Managing information within the healthcare industry has become more critical and complex over the past decade. With the advent of the government's 1982 policy regarding prospective reimbursement, the shift in population location and age, and continued advances in medical technology, hospitals today must manage information in ways never before practiced in order to survive.

In response to these trends, information systems such as Gerber Ally's have become more sophisticated in software application and hardware technology.

Michael H. Brown, president and chief executive officer for Gerber Alley, will continue to manage the company's business, focusing on strategic planning and direction, including its international healthcare division and manufacturing information system subsidiary.

Privately held Gerber Alley has divisional offices in Atlanta, Boston, and Dublin, Ireland.

NEW YORK (MAY 30) BIZWIRE - Masstor Systems Corp. (NASDAQ:MSCO) Wednesday announced that The Standard Life Assurance Co., Europe's largest mutual assurance organization, has ordered additional M960 Mass Storage Systems for its data centers.

The order, valued in excess of 1.3 million pounds ($2.2 million), will provide Standard Life with additional throughput and approximately one terabyte (one thousand gigabytes) of logical on-line storage, to meet the demands of their growing business in the early 1990s.

Standard Life was the first UK company to order an M960 system in 1988 and was also the first user of the system in an MVS/ESA environment, also in 1988. The new systems will be used in their Systems Managed Storage environment together with IBM's DFSMS and DFHSM products, which improve the management of data and storage.

In addition, use of the M960 systems in conjunction with DFHSM has allowed us to save approximately 25 percent of our DASD (disk storage) and reduce our annual DASD growth rate by 30 percent. M960 systems also occupy a strategic position in our plans for multi-center contingency planning,'' he said.

The M960 system, including the M1000 Storage Module, provides terabytes of on-line storage accessible from an MVS mainframe environment. By use of helical scan recording techniques, tremendous storage density is achieved, providing fast reliable access to stored data with low floorspace requirements.

These systems can be used for traditional applications such as storage management and all forms of backup, including remote and reciprocal backup for contingency planning purposes. In addition, the vast on-line storage capacity is ideal for new application areas such as on-line archiving (including microfiche replacement) and data imaging.

Founded in 1976, Masstor Systems Corp. manufactures and services mass storage systems for IBM, Cray, DEC and Bull HN mainframe customers with very high volume applications. It has over 100 large company and institutional customers in 10 countries in North America and Europe.

Its focused business strategy helps MIS managers quickly leverage their huge installed mainframe investments by automating their storage processes

and expanding their on-line applications.

WESTLAKE VILLAGE, CA (MAY 30) BUSINESS WIRE - Cambrian Systems Inc., the leading broad line supplier of high-performance test and manufacturing equipment for the rotating memory industry, announced the acquisition, effective May 21, of Adelphi Associates Inc., a supplier of test equipment for the magnetic disk-drive industry.

Adelphi's product line includes systems for manufacturers and users of rigid-disk media, read/write heads and drives. The company is a full-service supplier to the rotating memory industry with a customer base that includes the majority of all disk drives, head and media manufacturers and users, worldwide.

''This industry has traditionally been served by several small companies focused on niche opportunities. Cambrian has made a commitment to establish and grow a financially viable and stable company, having a dependable and lasting worldwide presence. It offers the broadest line of test solutions available from a single supplier.''

''This purchase rounds out our family of test systems for the rotating memory/disk drive industry, with the addition of test equipment for magnetic heads,'' said Phil Halamandaris, president of Cambrian. ''The addition of Adelphi will expand Cambrian's worldwide distribution channels and will further our leadership in the Global Market.''

Cambrian recognizes the need for integrated test solutions. Its products include complete turn-key test systems and a wide range of ''building block'' modules, easily modified to customer specifications. A similar philosophy has been pursued by Adelphi in the development of its products. This common strategy will facilitate the merger of these two organizations and strengthen their customer partnerships.

As a result of this acquisition, Cambrian will combine its two Northern California operations to a central facility in the heart of the disk-drive industry. This Fremont, Calif., facility will house 50 sales, service, research and development, and manufacturing personnel. The manufacturing operations will be focused solely on drive and head testers. Mike Schlafter, director of operations, will oversee the activity of this

facility.

Terms of the purchase were not disclosed.

Adelphi, established in 1983, employs 40 people and is based in Fremont. Adelphi maintains a select group of trained sales and marketing distributors to serve world markets. Sales for 1989 approached $5 million.

Founded in 1978, Cambrian Systems pioneered the disk-drive test industry and was the first to introduce a high throughput servo track writer. In addition to this flagship product, Cambrian designs, manufactures and markets high-performance head and media certification equipment, intelligent disk-drive testers and portable multipurpose disk-drive test equipment.

In 1989, the company's revenues approached $10 million. The company has headquarters in Westlake Village, with sales and support offices in Singapore, Tokyo and Los Gatos, Calif.

HACKENSACK, NJ (MAY 30) BUSINESS WIRE - Alfa International Corp. (NASDAQ Symbol: ALFE) Wednesday announced that it has signed an agreement with Saatchi & Saatchi whereby ALFA is marketing its TY- BREAKERSTM world map jacket as part of the agency's new ad campaign for Burger King.

The promotion commenced this week for about four weeks and will be supported by trade, print and broadcast advertising.

Burger King is offering customers the opportunity to purchase approximately 9 products, including ALFA's jacket, through full color inserts which will be distributed with each purchase. Burger King estimates that 50 million inserts will be distributed.

Charles Kuczynski, President of ALFA's TY-BREAKERSTM Division, stated, ''We are extremely pleased to be a part of Burger King's national ad campaign. We are confident that this agreement, along with our recent pact with Rand McNally, will translate into increased revenues and high market visibility for our products. We intend to capitalize on the national exposure we receive during this promotion to aggressively market our entire line of TYVEKR products.''

In another development, Rand McNally will be including ALFA's world map jacket and hat in its September 1990 direct mail catalog which is distributed to about 9 million upscale households. These products will also be sold through Rand McNally's retail stores.

Alfa International Corp., is primarily engaged in the production and marketing of apparel made of TYVEKR, a synthetic material produced by DuPont, which is exceptionally strong, water resistant, wind proof and printable.

JOPPA, MD (MAY 30) BUSINESS WIRE - Merry-Go-Round Enterprises Inc. (NYSE:MGR) announced Wednesday record sales for the first quarter.

For the quarter ended May 5, sales increased approximately 64 percent to $120,967,000 from $73,919,000, for the same quarter a year ago. Net earnings rose 297 percent to $6,615,000 compared to $1,666,000 in the

first quarter last year. Earnings per share increased 275 percent to 30 cents per share compared to 8 cents per share in the first quarter a year ago.

Same store sales increased 42 percent for the quarter. All three divisions contributed to this growth.

Michael D. Sullivan, president and chief executive officer, commented, ''The record sales and earnings were the highest ever achieved in the first quarter in the company's history. Same store sales increases are particularly impressive since they were achieved on top of strong same store sales in the first quarter a year ago.''

Sullivan said that the strong sales momentum has continued into the second quarter. Sullivan also added that the new store expansion and remodeling program is on schedule. The company plans to open between 55 to 60 stores and remodel about 50 stores in the current fiscal year.

Merry-Go-Round Enterprises Inc. is a leading specialty clothing chain selling contemporary fashions for young men and women in over 600 retail locations in 37 states.

HOUSTON (MAY 30) BUSINESS WIRE - Western Geophysical, a division of Western Atlas International Inc., and Landmark Graphics Corp. Wednesday announced an agreement which will enable the petroleum industry customers of both companies to obtain seismic data in a format that can be easily loaded onto Landmark workstations.

This is the first agreement between a geophysical contractor and a computer-aided exploration vendor to address the issue of improving access to seismic data on interpretation workstations.

Many petroleum companies utilizing CAEX technology encounter significant delays and costs associated with reformatting and loading seismic data for use on interpretation systems. The agreement will enable Western to develop the necessary computer programs to deliver Western processed seismic data to customers, on either magnetic tape or optical disks, that can be easily loaded and used on Landmark workstations. Western intends to distribute these programs to its worldwide processing centers as demand dictates, thus enabling these centers to offer Landmark formatted seismic data to Western aand Landmark customers. Data to be available in this format include 3D and 2D speculative surveys as well as proprietary seismic processing projects. Landmark will provide Western the software and technical support necessary to generate fully compatible seismic files.

Damir Skerl, senior vice president of Western Geophysical, stated, ''By providing our Western-owned seismic data in a format directly usable by our petroleum customers who use interactive workstations, we continue to expand our products and services to aid our customers' search for hydrocarbons.''

''Quick and easy data loading has been a major barrier to the widespread use of computer-aided exploration systems,'' said C.E. Ennis, Landmark's president and chief executive officer. ''The availablity of seismic data in a format that will enable petroleum companies to start interpretation immediately, will result in both time and cost savings. With Landmark and Western being the leading vendors in adjacent market segments, we believe this cooperative effort will enable us to address a signficant market need for a large portion of the worldwide petroleum industry.''

Western Geophysical is the world's largest geophysical contractor and leader in seismic data acquisition, processing, interpretation and reservoir geophysics.

Landmark is an established leader in CAEX technology, with more than 500 systems installed worldwide. Landmark's user base encompasses 18 of the 20 largest multinational oil companies, large independents and young exploration and production companies.

CHATSWORTH, CA (MAY 30) BUSINESS WIRE - NMB Technologies Inc. and Control Resources Inc., Harvard, Mass., Wednesday announced an agreement to develop and market a unique family of temperature-regulating DC cooling fans, called SmartFan.

''NMB Technologies is committed to providing its customers with leading-edge cooling solutions. By integrating Control Resources' proprietary closed loop temperature-regulating technology, NMB Technologies can now solve problems often encountered with fixed-speed cooling fans,'' commented Gary Yomantas, president of NMB Technologies Inc. ''The SmartFan family will further expand our broad-base fan product line.''

Control Resources' closed loop cooling technology will be integrated into NMB Technologies' DC cooling fans. The resulting product, SmartFan, is a self-contained, closed loop cooling system. SmartFan automatically adapts cooling air flow to hold the temperature within an electronic equipment enclosure consistent against changes in room temperature, system power dissipation, flow resistance and/or altitude.

In addition, significant noise reduction, up to 15 dB(A), results when the fan operates in normal office conditions. Initially, SmartFan will be available in the 4.7 inch square by 1.5 inch thick fan size.

''This agreement will speed the adoption of Control Resources' closed loop temperature-regulating technology throughout the market,'' commented Warren Kundert, president of Control Resources. ''It will also provide an additional source of revenue enabling further development of this technology.''

NMB Technologies is the world's leading supplier of broad-based products for the EDP market. NMB Technologies is the electronics marketing division of NMB (USA) Inc., the North American headquarters of the Minebea Group of companies. Minebea is the world's largest fan manufacturer.

With headquarterts in Harvard, Mass., Control Resources is a major supplier of temperature and noise control products to the electronics, business equipment and computer industries. The company offers OEMs and industrial end-users a complete range of controllers for all sizes and types of DC and AC fans.

WINSTON-SALEM, NC (MAY 30) BUSINESS WIRE - Grupo Aeromot of Porto Alegre, Brazil and The Jepson Burns Corp. (NYSE: JEP) of Winston-Salem have signed an ''agreement for cooperation and license'' under which Jepson Burns' aircraft seats will be manufactured in Brazil and marketed throughout Latin America.

Announcement of the agreement was made Wednesday by Claudio Viana, president of Aeromot, and John DeBenedictis, executive vice president of Jepson Burns. Jepson Burns is a subsidiary of Great American Management and Investment Inc. (GAMI) of Chicago whose stock is traded over the counter.

Viana said that Aeromot will begin with the assembly and partial manufacturing of the Jepson Burns Airest 2000 NGS-K and Airest Commuter seats. First delivery is expected to be in the fourth quarter of this year.

The two companies began negotiations after Varig Airlines of Brazil selected the Airest 2000 NGS-K as its choice for future 16g seating requirements. DeBenedictis said the agreement with Aeromot makes it possible for Jepson Burns to be more competitive in the Brazilian market and other Latin American countries.

Approval of the agreement marks the second major international expansion for Jepson Burns in the last two months. In April, the company established a joint venture company, Russo Burns Aero Products, that will manufacture aircraft seats and seat components in Russia.

''Our objective in establishing global manufacturing bases is to put us closer to our markets in different parts of the world. It will enable us to minimize our costs and improve our ability to deliver seats that are made for specific customer needs,'' DeBenedictis said.

Brazil offers potential sales of many new passenger seats over the next several years, DeBenedictis added. He said that Jepson Burns also expects to see significant opportunities in retrofitting existing aircraft with seating and other interior products.

Jepson Burns' corporate offices are in Winston-Salem, and its West Coast division is located in Inglewood, Calif. Other subsidiaries of Great American Management and Investment Inc. are involved in manufacturing, distribution, production of agricultural chemicals and fertilizers and financial services.

#90150b0642 05/30/1990 ~Business Wire

RIVERSIDE, CA (MAY 30) BUSINESS WIRE - Fleetwood Enterprises Inc. (NYSE:FLE) Wednesday announced preliminary sales and earnings for the fourth quarter and fiscal year ended April 29, 1990.

The nation's leading producer of recreational vehicles and manufactured housing said preliminary sales for the quarter reached $431,586,000, the highest quarterly sales total ever achieved by the company. Sales for the comparable period last year totalled $425,490,000.

Preliminary earnings were $17,129,000, or 76 cents per share, down slightly from last year's net income of $17,697,000, or 77 cents per share.

Preliminary sales for the fiscal year ended April 29, 1990, which included 52 weeks, were $1.55 billion, off 4 percent from the record $1.62 billion achieved in fiscal 1989, which included 53 weeks. Preliminary net income for the year was $55,039,000, or $2.42 per share, down 22 percent from the record $70,468,000, or $3.06 per share, attained in the prior year.

Final audited results will be released in about five weeks.

''We are pleased with the company's performance, particularly during the fourth quarter, in view of the significant weakness that has been evident in both the recreational-vehicle and manufactured- housing industries,'' said Fleetwood President Glenn Kummer.

He continued: ''During this very challenging year, we have been successful in outperforming our competition and, as a result, have improved our market shares. For calendar 1989, they were 16.9 percent for manufactured housing, 28.6 percent for motor homes and 29.5 percent for travel trailers, up from 15.8 percent, 27.9 percent and 28.7 percent, respectively, last year.''

The company indicated that the decline in earnings for the year resulted mainly from the decrease in revenues and narrower profit margins, the latter caused by competitive market conditions and a shift in product mix to lower-priced models.

Manufactured-housing sales for the quarter were higher than any previous fourth period, up 9 percent to $137.2 million, compared with $125.9 million last year. Unit shipments were 8,749 compared with last year's 8,566. For the year, sales were $532.9 million compared with last year's sales of $535.3 million. Unit shipments for fiscal 1990 were 34,758 compared with 36,703 last year.

Recreational-vehicle sales for the fourth quarter were $285 million, a decline of 2 percent from the record $290.4 million reported last year. For the year, RV sales were $978.2 million, or 7 percent below the all-time high of $1.05 billion recorded last year.

Within the RV group, motor-home sales for the quarter were $189.1 million, off 5 percent from last year's sales of $200 million. Motor-home-unit shipments were 4,820 compared with 5,207 units shipped last year. For the year, motor-home sales were $654.3 million, down 9 percent from last year's record sales of $719.3 million.

Unit shipments for fiscal 1990 were 16,459 compared with 18,731 last year.

Travel-trailer sales for the quarter were $87.6 million, off 3 percent from the $90.4 million recorded in the similar period last year. Unit shipments were 8,107 compared with last year's 8,586. For the year, travel-trailer sales of $313.1 million were 6 percent below last year's record $334.5 million. Unit shipments for the year were 28,461 compared with 31,046 last year.

Sales for the company's folding-trailer division, acquired from The Coleman Co. effective Jan. 1, 1990, were $8.3 million for the quarter and $10.8 million for the year. Unit shipments were 2,229 for the quarter and 2,975 for the year.

Fleetwood's supply and finance subsidiaries together contributed revenues of $9.4 million for the quarter and $38.3 million for the year, up from $9.2 million and $29.4 million, respectively, last year.

NATICK, MA (MAY 30) BUSINESS WIRE - Prime Computer Inc. Wednesday announced that Donald J. McInnis, formerly vice president of Digital Equipment Corp.'s Engineering Systems Group has been named vice president and general manager of the CADDS Business Unit.

''Prime is delighted that Don is joining the company to head up our CADDS efforts,'' said president and chief operating officer John J. Shields.

''Don's engineering, marketing and entrepreneurial skills will asssure the continued success and market leadership of our CADDS product offerings,'' commented Robert A Fischer, president and general manager of the Computervision Business Unit.

McInnis was employed by Digital for 12 years in a variety of roles including engineering manager of Unix development and marketing, and product manager for the VAX 11/750.

Prior to Digital, he served in various software support and sales management functions at Varian Data Machines. He was also a founder and member of the board of directors of the Open Software Foundation.

McInnis has a Bachelor of Science in Electrical Engineering from Catholic University and studied for a masters degree in computer science at George Washington University.

NASHVILLE, TN (MAY 30) BUSINESS WIRE - Tbe board of directors of First American Corp. (NASDAQ/NMS:FATN) Tuesday elected Vice Chairman James F. Smith Jr., as interim chairman, president and chief executive officer to succeed Kenneth L. Roberts.

David K. Wilson, chairman of the board's executive committee, said a search committee has been named to find a permanent chief executive officer. William O. McCoy, president of BellSouth Enterprises and a member of First American's board, is chairman of the search committee. The committee expects to proceed promptly to consider appropriate candidates both within and outside the corporation.

Commenting on Tuesday's action, Smith said, ''I appreciate the confidence the board of directors has placed in me, and we will continue to move

forward until a permanent chief executive officer is elected.''

Wilson stated that ''Despite recent problems, First American remains a strong company with ample capital and liquidity, a strong market position and a reputation for quality customer service.

''Our board is intent on ensuring that First American Corporation is returned to its position as one of our region's outstanding banking organizations. We are confident that, as the board and management work to do so, our more than 4,000 loyal First American employees across the state will continue to provide a superior level of service to our hundreds of thousands of customers.

James F. Smith began his banking career in 1953 when he joined Fidelity Bankers Trust Co. (later Valley Fidelity Bank and Trust) in Knoxville. He joined Park National Bank in Knoxville in 1975 as senior vice president. He was named president of the bank in 1977 and chairman of the board in 1979. When Park National Bank became a part of First American Corp. in 1983, Smith was named to the First American board of directors.

He was elected vice chairman of the corporation in 1989, while retaining his positions as chairman of First American's East Tennessee Region and chairman and chief executive officer of First American's banks in Knxoville and Chattanooga.

An outstanding civic and community leader, Kenneth L. Roberts joined First American Corp. in 1976, serving as president and chief executive officer of First American National Bank of Nashville and vice chairman of the corporation.

In 1977, he was named president and chief executive officer of the corporation, and in 1979, he was elected chairman and chief executive officer. He is a member of the board of trust of Vanderbilt University and also serves on the boards of Leadership Nashville, INROADS/Nashville and the Middle Tennessee Council of Boy Scouts of America.

#90150b0651 05/30/1990 ~Business Wire
SEEKONK, MA (MAY 30) BUSINESS WIRE - In response to growing business volumes in the Attleboro area, CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., has opened a new eight-door terminal with increased capacity for serving the freight transportation needs of Attleboro and surrounding communities.

The new terminal, located at 25 Tower Rd., Seekonk, serves businesses in northern Attleboro, Barrowsville, Chartley, Norton, Seekonk and Plainville Mass. The three-acre facility also processes freight for businesses in Ashton, Berkeley, Cumberland Hill, Diamond Hill, Limerock, Saylesville, Valley Falls and Woonsocket, R.I.

The Attleboro terminal is the area's link to CF Motor Freight's nationwide freight-flow system, a 680-terminal network serving virtually every business address in the United States and Canada, including Alaska and Puerto Rico.

The Attleboro facility is a spin-off of the company's Providence, R.I., terminal, which has been serving businesses in northern Rhode Island and southern Massachusetts for more than 30 years. Local CF Motor Freight customers include Carol Cable, Tech Industries, Texas Instruments, Sears Roebuck, J.C. Penney and C.D. Burnes. Among the commodities transported are electronic and computer equipment, textiles and consumer goods.

The new terminal has 12 employees -- eight drivers and four office workers -- and uses six tractors and 20 trailers to carry freight for its local customers.

Like all CF Motor Freight terminals, Attleboro is tied into the company's freight-flow system through a sophisticated nationwide computer freight-tracking and data-management network. The sompany's system enables Attleboro's customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps customers manage their businesses.

The company also provides related computer programs and services utilizing a customer's own computer resources. These include OMNIRATE, a personal computer-based software program that simplifies the pricing of freight shipments; LOGISTICS MANAGER, a PC-based program that streamlines shipping functions by automatically preparing bills of lading and shipping labels; and CF DIRECT, a telecommunications link that allows customers to directly access CF's computer network for shipment information and specialized reports.

CF Motor Freight provides intermediate and long-haul transportation of less-than-truckload freight, which are commercial and industrial shipments generally weighing less than 10,000 pounds. It is the largest subsidiary of Consolidated Freightways, which in addition to long-haul trucking, has businesses in regional next-day trucking, domestic and international air freight, intermodal truckload, customs brokerage and ocean freight services.

VAN NUYS, CA (MAY 30) BUSINESS WIRE - Superior Industries International Inc. (NYSE:SUP) announced Wednesday Philip Wm. Colburn has been elected to serve as a member of the company's board of directors.

Colburn will replace Marvin P. Fredgant who retired from Superior's board after 30 years of distinguished service.

Colburn is the chairman and chief executive officer of the Allen Group Inc. (NYSE:ALN) a manufacturer of automotive products, including automotive test equipment, automated manufacturing equipment, truck components and mobile communication antennas and equipment with 1989 annual revenues in excess of $350 million. He has been on the board of directors of Allen since 1975 and the company's chairman and chief executive officer since March of 1988.

Louis L. Borick, chairman and president stated: ''Superior is honored to have Philip join the board of directors. He has been involved in the automotive industry for over 30 years and will provide additional insight to our existing board. We look forward to working with him in the future.''

A recognized leader in its field, Superior Industries International Inc. supplies cast aluminum wheels for Ford and General Motors, along with other products, and also serves the national automotive aftermarket with a broad range of accessory and RV products.

#90150b0655 05/30/1990 ~Business Wire

LOS ANGELES (MAY 30) BUSINESS WIRE - The board of trustees of Real Estate Investment Trust of California (''REIT'') (NYSE:RTC) Wednesday adopted a shareholder rights agreeement and declared a dividend distribution pursuant thereto of one share purchase right on each of the trust's outstanding shares of beneficial interest (''shares'').

A.A. Milligan, chairman of the trust, stated: ''The trustees believe that a distribution of the rights at this time constitutes the most effective means currently available to protect the interests of the trust's shareholders in the event the trust is confronted with coercive, unfair or inadequate takeover bids or proposals.

''The rights are not intended to and will not deter non-coercive takeover proposals that are in the best interests of the trust's shareholders.''

Under the rights agreement, the rights will not be exercisable until a person or group (an ''acquiring person'') acquires 20 percent or more of the outstanding shares of the trust or announces a tender offer or exchange offer, the consummation of which would result in ownership by a person or group of 20 percent or more of the shares of the trust, or if a person or group has acquired at least 10 percent of the shares and the board of trustees have determined that that person or group is an ''adverse person.''

Thereafter, each right will entitle shareholders to purchase one share of the trust at an exercise price of $60.

The rights agreement also provides that, upon the occurrence of certain specified events, all holders of the rights (other than the acquiring person) will be entitled to acquire additional equity interests in the trust or a person acquiring the trust, having a market value of two times the $60 exercise price of the rights.

At any time prior to the date upon which the rights become exercisable, the board of trustees may redeem all outstanding rights at a price of 1 cent per right.

The dividend distribution of the rights, which will initially be part of, and not traded separately from the share certificates, will be made on June 14, 1990, to shareholders of record on that date.

REIT California is a equity-oriented real estate investment trust with a portfolio of 31 properties all located within California.

CLEVELAND (MAY 30) BUSINESS WIRE - Security Federal Savings and Loan Association of Cleveland said today that it would increase its quarterly dividend by 14 percent, the third increase since the company began paying dividends two years ago.

The announcement came after Security Federal's board of directors, at its May 24 meeting, declared a dividend of 8 cents a share, compared to 7 cents per share last quarter. The move indicated an annualized dividend of 32 cents per share. The dividend is payable on June 29, 1990, to shareholders of record on June 15.

Security Federal Chairman Charles F. Valentine said: ''The dividend increase is attributed to our favorable fourth quarter net income of $510,000, or 60 cents per share, and our record net income for the year ended March 31, 1990, of $3,238,000 or $3.83 per share.''

Security Federal operates nine offices in a five-county area in Northeast Ohio. As of March 31, 1990, the company had assets of $336 million, compared to $282 million a year ago. Security Federal is traded in the national over the counter market and is quoted under the symbol ''SFSL'' on the NASDAQ National Market System.

EAST HARTFORD, CT (MAY 30) BUSINESS WIRE - Thirty Airbus A320s for Mexicana Airlines will be powered by international V2500 engines valued at

$330 million, including spares.

It is the V2500's fifth order in five months. The total value of more than 1,400 engines now delivered, on firm order or on option is nearly $7 billion. They will power 585 aircraft for 15 customers.

Mexicana announced it is placing firm orders for 16 A320s and taking option on 14 more. The aircraft will fly on routes to North and Central America and within Mexico.

The V2500 is the quietest and cleanest engine for the A320, the larger A321 and the McDonnell Douglas MD-90. Its exhaust contains less than a quarter of the amount of pollutants permitted by international rules and development is under way to still further reduce the level of nitrous oxides (NOx).

NASHUA, NH (MAY 30) BUSINESS WIRE - Nashua Corp. (NYSE:NSH) Wednesday announced that, based on a preliminary count by the depositary for its Dutch Auction cash self-tender offer, it expects to purchase approximately 2.79 million shares of its common stock at $40.50 per share.

The tender offer, which the preliminary count of physical shares and guarantees indicated was oversubscribed, expired at midnight EDT on Tuesday, May 29, 1990.

Odd lots tendered at or below the purchase price will be acquired in their entirety. A proration factor for the remaining shares, if any, will be announced after final count of tendered shares. Payment for shares tendered and purchased will be made promptly thereafter. Shares tendered, but not purchased by the company, will be returned to stockholders.

Nashua commenced the Dutch Auction self-tender offer on May 1, 1990 for up to 2.75 million shares, representing approximately 30 percent of its outstanding shares. Under provisions of the offer, Nashua is permitted to purchase up to an additional two percent of its outstanding shares which were properly tendered prior to expiration of the offer and not withdrawn.

Nashua Corp. provides a diverse mix of products and services which includes coated paper products, computer products, office supplies and photofinishing services.

CHICAGO (MAY 30) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) announced that it is commencing Wednesday an offer to exchange shares of its common stock for any and all of its 13-5/8 percent subordinated debentures due Jan. 2, 2001.

Each holder of Debentures accepting the offer will receive 57 shares of Bally common stock for each $1,000 principal amount of Debentures. In addition, each holder whose debentures are exchanged before the close of business on June 15 will receive a cash payment equal to the interest that would accrue on the Debentures for the period from Jan. 2 through July 2.

With respect to any debentures exchanged after the close of business on June 15, no cash payment will be made on the exchange but the record holder of the debentures at the close of business on June 15 will receive the July 2 cash interest payment as of June 15.

Approximately $135 million principal amount of the debentures is currently outstanding. If all of the debentures are tendered in exchange for common stock, Bally will issue 7,692,150 shares of common stock. Prior to the commencement of the exchange offer, 27,964,571 shares of Bally common stock were outstanding.

The exchange offer will expire at 5 p.m., Eastern time, on June 27, unless extended by Bally. Tenders of debentures will be irrevocable.

Bally is a world leader in the gaming and fitness industries with four casino hotels, a nationwide network of fitness centers, and a complete line of gaming equipment and systems, fitness products and lottery products and services.

CAMBRIDGE, MA (MAY 30) BUSINESS WIRE - Lotus Development Corp. and Alpha Software Corp. Wednesday announced that Lotus has acquired AlphaWorks, an integrated software program for entry-level personal computer users.

Terms of the transaction were not disclosed.

AlphaWorks, which has received awards from Infoworld, PC Magazine, PC World, and Software Digest, provides users with spreadsheet, database management, word processing with spell checker, thesaurus and mail merge, graphics and communications capabilities. AlphaWorks supports industry standard file formats, including the .WK1 file format for spreadsheets and the .DBF file format for databases.

Effective immediately, existing and future versions of AlphaWorks will be marketed, supported and developed entirely by Lotus as LotusWorks, and will become part of the company's Personal Computer Spreadsheet Division. This division also markets Symphony 2.2, Lotus' advanced, high-end integrated personal computer software program, as well as versions of 1-2-3 for DOS and OS/2.

With the sale of AlphaWorks, Alpha Software will focus on its database product line and will strengthen the firm's position as the leading

supplier of relational database technology for non-programming PC users. Alpha Four was recently cited in PC Week as the top-rated product in its category, was the sole recipient in its category of PC World's Best Buy award, and was rated an Excellent Value by Infoworld.

In addition, Alpha Software is the leading manufacturer of keyboard macro programs with Keyworks 3.0 and Keyworks Advanced.

Packard Bell, with an installed base of more than one million personal computer users, is the largest supplier of computers for the home office. According to Dennis Cox, director of marketing at Packard Bell, ''Our strategy is to provide first-time and experienced PC users with a complete solution including a capable, integrated software product for use in home and small businesses.

Lotus and Alpha Software will provide joint telephone support for LotusWorks customers until July 18, 1990. After July 18, 1990, Lotus will make available its toll-free PROMPT telephone support for users who purchase or upgrade to LotusWorks.

Alpha Software, founded in 1982, is a developer and publisher of database software for the IBM PC and PC-compatible microcomputers.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of applications software for workstations, minicomputers and mainframes.

MARKHAM, Ontario (MAY 30) BUSINESS WIRE - SSMC Inc. (NASDAQ: SSMCP) Wednesday announced that its board of directors has declared a dividend of US$1.09 per share on its 15 percent Series B Cumulative Preferred Stock (the ''Series B Preferred), payable on June 15th, to stockholders of record on June 9.

The dividend represents the pro-rated portion of the semi-annual dividend of US$2.85 per share, payable on the Series B Preferred, for the period from its issuance on April 6 through June 14.

SSMC Inc. stated that declaration and payment of any future dividend on

the Series B Preferred, would be subject to the cash position of the company at such time. In order to generate sufficient funds to pay future dividends on the Series B Preferred, as such dividends become due, SSMC Inc. will have to continue to improve its financial results, sell assets or borrow funds.

There can be no assurance that such dividends will be paid on a timely basis. SSMC Inc. is the leading manufacturer of consumer sewing machines worldwide and also distributes industrial sewing machines and consumer durable goods. Its principle executive offices are located in Hong-Kong.

The common stock of SSMC Inc. is owned by Semi-Tech Microelectronics (Far East) Ltd. (''STM-FE''), a Hong- Kong-based company listed on the Hong Kong Stock Exchange, symbol 448.

STM-FE is a subsidiary of International Semi-Tech Microelectronics Inc. whose shares are listed on the Toronto Stock Exchange, trading under symbol ISE.

CAMBRIDGE, MA (MAY 30) BUSINESS WIRE - Lotus Development Corp. and Alpha Software Corp. Wednesday announced that Lotus has acquired AlphaWorks, an integrated software program for entry-level personal computer users.

Terms of the transaction were not disclosed.

AlphaWorks, which has received awards from Infoworld, PC Magazine, PC World, and Software Digest, provides users with spreadsheet, database management, word processing with spell checker, thesaurus and mail merge, graphics and communications capabilities. AlphaWorks supports industry standard file formats, including the .WK1 file format for spreadsheets and the .DBF file format for databases.

Effective immediately, existing and future versions of AlphaWorks will be marketed, supported and developed entirely by Lotus as LotusWorks, and will become part of the company's Personal Computer Spreadsheet Division. This division also markets Symphony 2.2, Lotus' advanced, high-end integrated personal computer software program, as well as versions of 1-2-3 for DOS and OS/2.

''It is clear that first-time PC and software buyers are one of the fastest growing segments in the market today,'' said Tim McManus, director of marketing for integrated software products at Lotus. ''LotusWorks

enables us to serve those users in small businesses, home offices and education with an extremely capable, cost-efficient, all-in-one solution.''

Selwyn Rabins, executive vice president of Alpha Software, said, ''We are very proud that Lotus has selected AlphaWorks as a key product to reach entry-level users. Since its introduction in 1983, we have shipped more than 300,000 copies of the product. Lotus' recognition of AlphaWorks' quality is supported by its plans to distribute current AlphaWorks inventory under the LotusWorks label. This same quality and superior design can be found in our database product, Alpha Four.''

With the sale of AlphaWorks, Alpha Software will focus on its database product line and will strengthen the firm's position as the leading supplier of relational database technology for non-programming PC users. Alpha Four was recently cited in PC Week as the top-rated product in its category, was the sole recipient in its category of PC World's Best Buy award, and was rated an Excellent Value by Infoworld.

In addition, Alpha Software is the leading manufacturer of keyboard macro programs with Keyworks 3.0 and Keyworks Advanced.

In addition to LotusWorks, Lotus markets Symphony, the leading high-end integrated software package for PC users. Lotus will continue to serve the needs of its more than one million Symphony users in large, corporate accounts and medium-sized businesses who use the product to develop sophisticated applications and generate presentation-quality output. With the addition of LotusWorks, Lotus becomes the only company to offer two integrated software products targeted at specific user needs and market segments.

AlphaWorks 2.0 will be available from Lotus under the name LotusWorks for a suggested retail price of $149. Users of AlphaWorks 1.0 or Electric Desk 1.0 may upgrade to LotusWorks directly from Lotus for $49. For additional upgrade information, customers should call 1-800-343-5414.

OEM Agreements with Packard Bell, Olivetti Office USA and Poqet Computer Corp.

Lotus recently formed the Original Equipment Manufacturer (OEM) Sales and Marketing group, which is designed to expand Lotus' distribution channels. As a result, Lotus has been working with select OEM partners to offer value-added hardware and software bundles of LotusWorks with PC- and PS/2-compatibles.

Agreements have been signed recently with Packard Bell, Olivetti Office USA and Poqet Computer Corp.

Packard Bell, with an installed base of more than one million personal

computer users, is the largest supplier of computers for the home office. According to Dennis Cox, director of marketing at Packard Bell, ''Our strategy is to provide first-time and experienced PC users with a complete solution including a capable, integrated software product for use in home and small businesses.

''We have selected LotusWorks as our exclusive all-in-one software application for entry-level users, primarily because of the overall product strength of LotusWorks and Lotus' commitment to product development and customer service.''

In conjunction with their launch this spring of a new line of Olivetti personal computers in North America, Olivetti Office USA announced it will include LotusWorks with every new 80286 and 80386sx system it sells in 1990. Olivetti Office USA is a subsidiary of Olivetti Office in Italy, the third-largest supplier of personal computers in the world.

Leon Harris, president of Olivetti Office USA, said, ''We had selected AlphaWorks as the superior product in entry-level integrated software. We are delighted to be working with Lotus as a software and OEM partner to launch an important new line of high-quality, innovative personal computer systems in the North American market.''

LotusWorks will also be available on a PC ROM Card for The Poqet PC . Stav Prodromou, president and CEO of Poqet Computer Corp., said, ''Last fall, when we selected AlphaWorks as the first application software product for The Poqet PC, we said that it was well designed for a new generation of portable PCs. Now, with the acquisition of AlphaWorks by Lotus, Poqet users will have a full line of Lotus products to select from, including, 1-2-3 2.2, Agenda 1.0 and LotusWorks.'' LotusWorks Support

Lotus and Alpha Software will provide joint telephone support for LotusWorks customers until July 18, 1990. After July 18, 1990, Lotus will make available its toll-free PROMPT telephone support for users who purchase or upgrade to LotusWorks.

Alpha Software, founded in 1982, is a developer and publisher of database software for the IBM PC and PC-compatible microcomputers.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of applications software for workstations, minicomputers and mainframes.

All prices and terms are for the U.S.A. only.

The Poqet PC is a trademark of Poqet Computer Corp.

SAUSALITO, CA (MAY 30) BUSINESS WIRE - SBT Corp., the Sausalito based software manufacturer, has announced the release of SBT Communications Server, the second release in the new SBT Database Executive Library.

SBT Communications Server (CS) is a multi-user communications system incorporating a CAS standard fax board that transmits facsimiles from within an application, eliminating the need to exit the application and load a separate communications program.

SBT is the first manufacturer to provide an open communications system of this type, which will be available exclusively through SBT's network of 3,500 Value Added Resellers (VARs).

When installed on a dedicated standard PC workstation, CS continually scans a network drive looking for script files, which contain information to be transmitted at specified times. CS then reads or creates the script files, transmits the documents or files, and creates a record of the sender, date and time of transmittal.

SBT Communications Server works optimally with SBT Corporate Contact Manager (CCM), a recently released contact management system that displays customer contact and financial information on a real-time basis for sales, marketing and other customer services.

CCM stores sales literature, documents, and graphic images in a database in CS script file format and enables the user to transmit files transparently.

Kristen Flynn, SBT national sales manager, has noted a marked increase in productivity and efficiency since CS was installed in the SBT Sales

Department.

SBT Communications Server has a suggested list price of $1,095.00, which includes a CAS standard fax board and technical documentation.

SBT Corp. manufactures the SBT Database Accounting Library and the SBT Database Executive Library. The SBT Database Accounting Library, a complete modular accounting system, is the most widely used accounting software, with 100,000 business users worldwide and distribution in more than 70 countries.

The new SBT Database Executive Library features modules which facilitate business communications and other operational activities in the company. SBT markets products for MS-DOS, Macintosh, UNIX/XENIX, VMS and other popular operating environments.

SBT has set an industry standard for modifiable accounting software with modules available in both source code and compiled versions.

In November of 1989, SBT was awarded the Data Based Advisor Reader's Choice Award for Best Accounting System as well as the DBMS Reader's Choice Award for Favorite Source Code Package.

#90150b0691 05/30/1990 ~Business Wire

NEW YORK (MAY 30) BUSINESS WIRE - Richard Ravitch is joining The Blackstone Group as a general partner effective June 1.

Ravitch will play a lead role in certain emerging areas including the financial and business restructuring of overly leveraged ''turnaround,'' ''workout'' and ''bailout'' situations. Ravitch will pursue similar opportunities that arise out of the recent turmoil in the real estate industry.

And, he will play a role in the recapitalization of financial institutions

working with Blackstone Financial Management, in an era of troubled S&L's and the more stringent capital and lending environment for commercial banks.

It is expected that Ravitch will also be working on capital investments and acquisitions for the Blackstone Capital Partners Funds.

Ravitch has had a highly successful business experience in each of these areas. As chairmn of HRH Construction, he built several New York office buildings, including Citicorp Center and developed major residential projects such as Waterside and Manhattan Plaza.

Ravitch's entrepreneurial experience has included the highly successful turnaround and subsequent sale of the Bowery Savings Bank of which he was chairman and chief executive officer. His workout and restructuring experience also includes the successful turnaround of the New York State Urban Development Corp. and restructuring of the New York state Metropolitan Transit Authority.

Following his appointment by Gov. Carey in 1975 to act as UDC's chairman and troubleshooter, he developed a ''bailout'' plan involving the creation by the legislature for the first time of a special purpose finance agency which became the model for the Municipal Assistance Corp. which was used later in 1975 to help New York City cure its defaults.

He was generally given credit for saving UDC from bankruptcy and insuring the completion of 30,000 units of low-income housing around the state.

As chairman of the MTA, he developed a plan to rebuild the transportation system in this region, secured changes in laws at the federal and state levels that permitted the use of a variety of financing techniques that enabled the MTA under his leadership to borrow over $8 billion.

The Blackstone Group has a growing professional staff -- from five in 1985 to more than 60 now and has completed over $23 billion in transactions. In addition to its financial advisory business, Blackstone Capital Partners has the capacity to commit over $800 million of equity for friendly investments and has access to a much larger pool of debt capital from such limited partners as Nikko, Prudential, GECC and Metropolitan Life.

HOUSTON (MAY 30) BUSINESS WIRE - Partners Oil Co. (OTC:PAROA) Wednesday

announced the acquisition of a 75 percent working interest in gas producing properties located in Blocks 956 and 967, North Padre Island, offshore Texas from ARCO for a cash consideration of $5,200,000.

Additionally, the full working interest in Block 947, North Padre Island, which is undeveloped, was acquired from ARCO for an undisclosed additional consideration.

The daily production from the acquired Blocks is approximately 14.0 MMCF of gas. The properties are located approximately 35 miles east-southeast of Corpus Christi, Texas, in water depths of 125 feet. Partners will operate the properties.

Financing for the acquisition was furnished by Endowment Energy Partners, L.P. with the assistance of Associated Energy Managers, 1414 Main Street, Springfield, Mass.

E. Ralph Daniel, president, commenting on the acquisition, stated: ''Not only will the company's reserve base be significantly increased by this acquisition, but this will allow Partners to establish its operational expertise in the offshore area.'' The company's offshore activities are managed by Harold C. Champagne, vice-president, an engineer with over 30 years experience, who has been with the company since 1987.

Recently, the company added the services of Thomas E. Bailey, an engineer with more than 30 years experience, as offshore production manager to assist with the new properties as well as the producing interests of the company located in Vermillion Blocks 107, 116 and 117, offshore Louisiana.

Partners Oil Co. is a publicly traded oil and gas exploration and production company based in Houston, with production interests located in Arkansas, Ohio, Oklahoma and the coastal onshore areas of Texas and Louisiana, as well as the offshore Gulf of Mexico.

SOMERVILLE, NJ (MAY 30) BUSINESS WIRE - Olivetti Office USA announced that LotusWorks, an integrated software package, will be bundled with its PCS 286, M290S and M300 Personal Computers.

LotusWorks (formerly known as AlphaWorks) is an integrated software package for entry-level personal computer users. The package provides spreadsheet, database management, word processing with spell checker, thesaurus and mail merge, graphics and communications capabilities.

Olivetti Office USA was pleased to hear of the recent acquisition of the AlphaWorks software product by Lotus Development Corp. According to Leon Harris, president of Olivetti Office USA, ''We originally selected AlphaWorks as the superior product in entry level integrate software.

''We see this new relationship with Lotus Development as very important toward providing our valued customers and resellers with a rich pallet of creative software products. Lotus Development's reputation as a highly respected software and OEM partner will certainly augment our new PC product introduction.

''The complimentary nature of the Olivetti/Lotus Development Corporation effort will be a very rewarding one for both our companies. We also see the possibility of providing additional Lotus packages with Olivetti products in the future.''

''We view the inclusion of the LotusWorks software package as an exceptional effort. LotusWorks will certainly enhance the performance aspects of our PCs and provide to the end user a flexible and truly uncomplicated all-in-one software solution,'' remarks Bill Lubrano, vice president of marketing for Olivetti Office USA. ''This offer further realizes the attention to detail we've put forth in all of our personal computers.''

Olivetti Office USA is the United States subsidiary of Italy based Olivetti Office. The parent organization is part of the Olivetti group, a $7.1 billion information technology company which is the world's third largest supplier of business personal computers.

Headquartered at 765 U.S. Highway 202, Somerville, N.J., Olivetti Office USA markets personal computers, printers, word processors, typewriters, calculators, copiers, facsimile equipment and computer accessories and supplies through various reseller channels. For further information contact Ron Olfers, director of marketing, personal computers and printers at 201/526-8200.

#90150b0708 05/30/1990 ~Business Wire

ROTTERDAM, THE NETHERLANDS (MAY 30) BUSINESS WIRE - The following statement regarding the 1990 prospects for Royal Nedlloyd Group was made in today's annual General Meeting of Shareholders:

Confirming statements made earlier in the year, for 1990 as a whole a

result on the order of Dfl 146 million is expected to be realized. This equals the result of 1989 after deducting extraordinary items after taxation as well as the surplus on disposal of investments.

In maintaining this forecast, we take into account that the results of the container logistic activities have lagged behind our expectations since the anticipated recovery is proceeding at a slower pace; in this respect the low rate of exchange of the US dollar plays an important role. Moreover, interest expenses will be higher than originally anticipated. On the other hand, developments in various other sectors are in line with expectations. It is expected that the negative effects can be compensated, particularly by continued rationalization efforts and profit on the sale of assets.

When making its forecast for the year, Nedlloyd assumes that the dollar has reached its lowest point. However, the low rate of exchange of the dollar which prevailed in the first five months, as compared with the same period in 1989, will certainly have an effect on the half year results.

As the European land-based activities continue to be developed and contribute more to the Group's result, the influence on the Group's result from fluctuations in the exchange rate of the dollar is decreasing.

Royal Nedlloyd Group is an international leader in integrated land, sea and air transport and logistic services. Nedlloyd's shares are listed on the Amsterdam and Frankfurt Stock Exchanges and trade in ADR form in the United States. Nedlloyd may be accessed on the Quotron system under the symbol NEDLN.EU and the Reuters Equity 2000 system under the symbol NYLN.AS.

STAMFORD, CT (MAY 30) BUSINESS WIRE - CUC International Inc. (NYSE:CU) Wednesday announced first quarter results for the quarter ended April 30, 1990.

Once again, revenues for the quarter were at a record high, increasing 24 percent to $104.7 million, up from $84.5 million for the same period a year ago.

Net income was $3 million, or 13 cents per share, compared to $3 million, or 15 cents per share, for the prior year's first quarter, based on 23.1 million and 20.5 million weighted average shares outstanding, respectively.

First quarter operating results for FY '91 include $5.3 million of expenses relating to the company's recapitalization completed June 6, 1989. These expenses reduced earnings by 14 cents per share. There were no recapitalization charges for the prior year's first quarter.

Earnings before income taxes, interest and other recapitalization expenses were $10.2 million compared to $5.4 million for the quarter ended April 30 1990 and 1989, respectively.

Walter A. Forbes, chairman and CEO of CUC International, said, ''Our strong performance is the result of our focus on increasing the value of existing services while also continuing to introduce creative new consumer services.

''Our newest offering, Premier Dining, is a prime example -- it grew from 5,000 members a year ago to approximately 300,000 at the end of this year's first quarter. Total memberships in the nine services we offer now total 14.2 million.

''Our ability to generate cash continues because of a greater proportion of renewing members vs. new members, thus allowing us to make loan prepayments for last year's recapitalization.

''The balance of the $100 million loan extended under the facility borrowed from GE Capital on June 6, 1989 was reduced to $52.2 million at April 30, 1990.''

CUC International is a leading membership services company, presently providing more than 14 million consumers with access to a variety of services including home shopping, travel, insurance, auto, dining, checking account enhancements and extended warranties.

STOCKHOLM, SWEDEN (MAY 30) BUSINESS WIRE - MD110, Ericsson's digital PBX system for large and medium-sized organizations, has registered its first sales in the USSR.

Systems totalling over 4,000 lines have been ordered in the USSR, including networks for two metallurgical factories in the cities of Makeyevka and Yenakiyevo in the Ukranian SSR.

In Czechoslovakia, two orders have been placed in the cities of Kosice and Vitkovice, also by metallurgical factories. The orders are for 8,400 and

10,200 lines respectively.

The orders were placed with Nikola Tesla Telekomminikacije, in Zagreb, Yugoslavia. Tesla undertakes MD110 hardware manufacture and software development under license from Ericsson Business Communications, and is responsible for sales in several eastern European markets.

In its home market, Tesla has sold over 42,000 lines of MD110 since its licensing agreement began in 1987. The installed base includes the Vatroslav Lisinski concert hall in Zagreb, which recently played host to the Eurovision song contest.

A third new MD110 order for Czechoslovakia has been received from Kemopetrol in Litvinov. This 4,300 line order has been handled by Schrack Telecom AG in Austria. Schrack also manufactures the MD110 system and does hardware and software development under license to Ericsson.

MD110 is one of the world's most succesful digital business communication systems. There are currently over 3 million lines of MD110 installed in more than 40 countries.

Business Communications is a Business Area within Ericsson. Its customers are private and public-sector organizations in more than 40 countries. The Business Area provides systems and network solutions for advanced corporate communications systems, based on such products as digital subscriber exchanges and data networks.

Ericsson is an international leader in telecommunications. Ericsson's wholly owned North American subsidiary is based in Richardson, Texas.

NORWOOD, MA (MAY 30) BUSINESS WIRE - Phoenix Technologies Ltd. (NASDAQ:PTEC) Wednesday announced that 14 of the world's major personal computer manufacturers -- including Epson America, Intel, NEC, Tandy/Grid, and Wyse -- have signed contracts to license Phoenix's EISA system compatibility software.

EISA (Extended Industry Standard Architecture) is the standard 32-bit system-bus architecture developed by major PC manufacturers as an alternative to IBM's Micro Channel (MCA). Unlike IBM's design, EISA extends current 16-bit PC architectures to 32-bit implementations, providing users with more powerful systems that remain compatible with their existing PCs.

Phoenix is now shipping its EISA compatibility suite of products. The suite consists of its ROM BIOS, Video BIOS, Keyboard BIOS, and EISA Configuration Utility (ECU). Phoenix is shipping its EISA compatibility products for both i80386 and i80486 systems.

Phoenix was the first company to ship a commercial EISA ROM BIOS for the Intel i386 and i486 platforms, and has been involved with EISA from its beginning as a 32-bit bus specification. Phoenix's early design and development relationships with leading EISA design partners have allowed Phoenix to help OEMs through system design choices, including those not fully detailed by the EISA specification.

Phoenix EISA contracts have been signed with: Advanced Logic Research (ALR) Mylex Corp. Altos Computer Systems NEC Corp. Asus Computer Incorporation Tandy Corp./Grid Systems Corp. Copam Electronics Tatung Co. Epson America Tulip Computer B.V. Intel Corp. Wyse Technology Micronics Computers Inc. Ztech Electronic Corp.

Additional contracts are currently under non-disclosure agreements.

Phoenix Technologies Ltd. designs, develops and markets systems software products for personal computers, laser printers and workstations. Its products allow OEMs to offer their customers computers and printers that are compatible with industry standards.

More than 300 of the major personal computer and peripherals manufacturers rely on Phoenix for its system-level software and hardware compatibility

expertise.

CHICAGO (MAY 30) BUSINESS WIRE - Kemper Corp. (NYSE:KEM) announced Wednesday its plan to restructure the company's brokerage operations. At the same time, Kemper established a restructuring charge related to this plan and its board increased the number of shares that can be bought back under its stock repurchase program to 2.5 million from 2 million.

Kemper Corp. President and Chief Operating Officer David B. Mathis said, ''This restructuring involved careful consideration and planning. We believe it will result in several significant benefits for our brokerage operations.'' He cited the following:

- meaningful expense reduction; - control and management of risk;
- more efficient utilization of capital;
- maximized value of the brokerage firms' regional identities.

The after-tax charge to second-quarter earnings is $126.5 million, or $2.59 per share. Included in this charge is a write off of $114.4 million pre-tax, or $108.5 million after-tax, of goodwill and other intangible assets in Kemper's securities brokerage operations. In addition, the company also set an $18 million after-tax charge for the cost of the restructuring.

The company also announced that it anticipates a net reduction of the brokerage firms' workforce, primarily non-sales personnel, by more than 600 positions, or about 12 percent of total staff, through the remainder of the year.

Kemper Securities Group Holdings Inc. (KSGH) was formed in January of this year to operate Kemper's securities businesses and to coordinate activities of the Kemper Securities Group: Bateman Eichler, Hill Richards, Inc., based in Los Angeles; Blunt Ellis & Loewi Inc., based in Milwaukee; Boettcher & Co. Inc., headquartered n Denver; Lovett Underwood Neuhaus & Webb Inc., headquartered in Houston; Prescott, Ball & Turben Inc. based in Cleveland; Kemper Clearing Corp., headquartered in New York; and Kemper Capital Markets Inc., headquartered in Chicago.

KSGH is one of three components of Kemper Financial Companies Inc., which is a holding company for the financial services units of Kemper Corp. The other two components of KFC are Kemper Financial Services Inc., a major investment management and financial products company, and Kemper Investors Life Insurance Co., which specializes in tax-deferred, interest-sensitive, fixed and variable annuity and life insurance products.

Kemper Corp., a non-operating holding company, is investor-owned, and its common stock is traded on the New York Stock Exchange (symbol:KEM). Major subsidiaries operate in life insurance, investment services, reinsurance and property-casualty insurance.

CONCORD, NH (MAY 30) BUSINESS WIRE - New Hampshire Savings Bank Corp. (NASDAQ:NHSB) Wednesday announced that New Hampshire Savings Bank, its major affiliate bank, has entered a definitive agreement for the cash sale of New England Capital Corp. of Avon, Conn., the bank's lease financing subsidiary, to an international financial services company.

New England Capital Corp., with assets of $65 million, serves companies throughout the region and across the country. The transaction is planned to close in June. Consummation of the transaction is subject to satisfaction of customary closing conditions and receipt of regulatory approvals.

The transaction represents an important step toward fulfilling plans announced earlier to restructure the company by selling non-strategic assets.

New Hampshire Savings Bank Corp., headquartered in Concord, the capital of New Hampshire, is the fourth largest bank holding company in the state with assets of $1.4 billion divided among four banking affiliates, all insured by the FDIC to the maximum extent permitted by law, and four nonbanking subsidiaries which together serve individuals, corporations and municipalities throughout central and southern New Hampshire.

ST. LOUIS (MAY 30) BUSINESS WIRE - McDonnell Douglas Corp. (NYSE:MD) isrelocating the Advanced Concept Ejection Seat (ACES-II) program to its McDonnell Douglas Missile Systems Co. facility in Titusville, Fla., it was announced Wednesday.

Program responsibility is being transferred to McDonnell Douglas Missile Systems from Douglas Aircraft Co. in Long Beach, Calif., in an effort to relieve Douglas of programs not directly related to its transport aircraft business. Prior to this move, McDonnell Douglas Missile Systems was already producing portions of the ACES II seat for Douglas Aircraft at the Titusville plant.

The ACES II program is expected to have a staff of about 60 people consisting of manufacturing, quality assurance, contracts, product definition and other support staff, all from within present employee ranks. To insure program continuity several people with the program in California will transfer to Florida.

The transfer is expected to be completed by the first of July. The entire ACES II program will be housed in two buildings in the Titusville area with a total of approximately 14,000 square feet.

As of April 20, Douglas Aircraft produced 5,005 ejection seats. The McDonnell Douglas Missile Systems facility will start deliveries in May. The current contract calls for 335 seats.

Besides the U.S. Air Force, customers are McDonnell Aircraft Co. for the F-15, Northrop for the B-2, and General Dynamics for the F-16.

McDonnell Douglas entered the ejection seat business almost four decades ago with the ESCAPAC line built for the A-4 and other aircraft. ACES II began production in 1977.

The use of ACES II has been credited with saving almost 200 pilots' lives in high risk situations at altitudes as high as 27,000 feet and speeds in excess of 690 miles per hour.

In addition to ACES II, the Florida Missile Production facility produces the Tomahawk cruise missile for the U.S. Navy and combat weapon systems such as the Dragon. McDonnell Douglas Missile Systems has headquarters in St. Louis and has built over 100,000 missiles for the Department of Defense.

SAN JUAN CAPISTRANO, CA (MAY 30) BUSINESS WIRE - Nichols Institute (ASE: LAB), Baylor Health Care System, Harris Methodist Health System, and Presbyterian Healthcare System announced they have formed a joint venture to operate a medical diagnostic laboratory in the Dallas-Forth Worth area.

The new entity, to be named Nichols Institute Laboratories North Texas Ltd., will operate a shared laboratory for the benefit of the hospital participants and their clients and will offer its services to communities throughout North Texas and Oklahoma. Revenues of the venture are expected to exceed $15 million on an annualized basis within a year.

The hospital participants selected a subsidiary of Nichols Institute as the general partner responsible for the operation of the laboratory because of Nichols' reputation for quality laboratory services, innovation and its leadership role in the development of leading-edge technology in laboratory medicine. Stephen Russell, M.D., vice president and senior medical director of Nichols Institute Reference Laboratories, has been named to head the new partnership.

Dr. Albert L. Nichols, president of Nichols Institute, said that this joint venture is a major commitment of all the participating parties to maintain the high quality of their services while reducing the cost of testing. "The venture will bring a level and quality of laboratory services to the North Texas and Oklahoma region not previously available from independent laboratories," Dr. Nichols continued.

The three hospital participants operate 18 hospitals and numerous ambulatory care and wellness centers throughout the region. Nichols Institute provides esoteric diagnostic testing to clients nationwide in the fields of endocrinology, genetics, immunology, microbiology, molecular biology, oncology, serology, special chemistries, toxicology, and virology.

It has regional laboratories in California, the Pacific Northwest, and in the Midwest, which provide clinical testing to those markets. Substance-abuse testing is also provided to clients nationwide. Nichols Institute Diagnostics manufactures kits for the performance of medical diagnostic tests which are distributed worldwide.

NEW YORK (MAY 30) BUSINESS WIRE - Barclays Bank PLC and Marine Midland Bank, N.A. jointly announced Wednesday that they have entered into definitive agreement providing for Barclays to acquire Marine's international private banking business.

The announcement was made by John A. Kerslake, chief executive officer -- North America of Barclays Bank, and Geoffrey A. Thompson, president and chief executive officer of Marine Midland.

The acquisition is expected to be completed by the end of August, subject to certain regulatory approvals and customary closing conditions.

Financial terms were not disclosed.

In making the announcement, Kerslake said, ''The addition of Marine Midland's international private banking business further expands our already strong international private banking activities in the U.S.''

He added, ''Providing a broad range of personalized and sophisticated products and services to affluent clients is a key strategic objective for Barclays Bank and reflects the long-term strategy and commitment of the Barclays Group worldwide. ''Moreover, this acquisition underscores our commitment to serving the unique financial needs of wealthy individuals and to increasing our investment in private banking professionals.''

Thompson said, ''Marine's decision to sell its international private banking business is consistent with the bank's previously articulated regional banking strategy.

''That strategy centers around domestic consumer and commercial banking activities provided through 317 branches in New York State as well as selected national businesses.''

Thompson noted in particular that Marine continues to serve high net worth individuals in the U.S. through the bank's well-respected Private Clients Group with offices throughout New York State.

Founded in the 1690s, Barclays Bank PLC, with $205 billion in assets and capital in excess of $15 billion (year-end 1989), today ranks a one of the world's largest banking and financial services groups.

Headquartered in London, it is one of the few banking groups in the world to receive Triple-A ratings from both Standard and Poor's Corp. and Moody's Investor Services. It maintains a network of offices in over 70 countries covering all major capital markets and financial centers.

Nearly 13 percent of Barclay's assets are in North America making it the bank's largest commitment outside the United Kingdom. Reflecting the

Barclays Group's mission, the bank's U.S. business activities integrate corporate banking and finance as well as capital markets, treasury and trading and distribution services on behalf of major corporations and institutions. Barclays also engages in U.S. domestic private banking for high net worth individuals. The bank's North American operations are headquartered in New York City.

Marine Midland is a New York-based regional banking organization and the principal entity in the United States of the HongkongBank group which, with assets of $133 billion, is one of the world's 30 largest banking groups.

SANTA ANA, CA (MAY 30) BUSINESS WIRE - California Commercial Bankshares, the holding company of National Bank of Southern California, announced Wednesday that it has declared a 3-for-2 split of its outstanding common stock in which one additional share shall be issued for each two shares outstanding on the record date.

William Jacoby, president and chief executive officer of the company, said that the additional shares would be issued on July 16 to shareholders of record on the close of business on June 29.

The split would result in increasing the total number of outstanding shares by approximately 50 percent, from 1,235,307 to 1,852,960 shares.

The split was authorized in recognition of the company's continued growth and profitability and in order to enhance the company's objective of achieving a broader market base. The company recently released the results of its earnings for the first quarter of 1990 which reflected a 51 percent increase in net income from the prior year's first quarter.

INDIANAPOLIS (MAY 30) BUSINESS WIRE - INB Financial Corp. (NASDAQ:INBF) announced that its merger with CSB Inc. has been finalized.

Closing documents were signed today in Indianapolis.

CSB Inc. is the parent company of Chesterton State Bank. Headquartered in Chesterton, Ind., CSB reported 1989 year-end assets of $147,211,000.

Under terms of the agreement, 663,024 common shares of INB Financial Corp. stock has been exchanged for all 5,250 outstanding shares of Series A and Series B preferred and common shares of CSB Inc. Based on INB's closing stock price as of May 29, 1990, the exchange is valued at approximately $16,410,900.

James M. Read, CSB chairman, noted, ''In today's rapidly changing financial services industry, our organization is fortunate to affiliate with one of Indiana's oldest and most respected financial institutions. Through our affiliation with INB, we will be able to provide a number of new products, increase our lending limits, achieve greater economies of scale and serve our customers and community more effectively in the years ahead.''

INB Chairman Thomas M. Miller is equally enthusiastic about the company's most recent acquisition. ''We're very pleased to add an outstanding banking organization in northwestern Indiana to the INB family. Chesterton State Bank is one of the leading banking institutions in one of the Hoosier state's fastest growing metropolitan areas, and we look forward to the many opportunities this partnership makes possible.''

Chesterton State Bank was founded in 1890 and CSB Inc. was established in

1984. Chesterton State Bank operates eight banking offices in Porter County.

INB Financial Corp., a multi-bank holding company with headquarters in Indianapolis, is the parent of INB National Bank, Indianapolis; INB National Bank, Northwest, Lafayette and INB Banking Co., Jeffersonville. The corporation reported 1989 year-end assets of $6.01 billion.

BIRMINGHAM, AL (MAY 30) BUSINESS WIRE - Vulcan Materials Co. (NYSE:VMC) announced Wednesday, at a meeting with security analysts, that second quarter net earnings from continuing operations are expected to be down 10 to 15 percent from net earnings in the like period last year.

Earnings per share (''EPS'') will be down by a lesser rate because of fewer shares outstanding.

Second quarter earnings declines are projected for both of the company's business segments. However, chemicals earnings will be down by a greater percentage than Construction Materials earnings, reflecting soft market conditions for solvents and the impact of production outages at the Geismar plant.

As compared with last year, the company's current outlook is for slightly lower EPS from continuing operations in the third quarter and sharply higher EPS in the fourth quarter. This outlook assumes, in contrast with last year, reasonably normal weather conditions and the absence of material special charges in this year's fourth quarter.

For the full year, Vulcan continues to expect net earnings from continuing operations to approximate last year's total. Because of fewer shares outstanding, EPS should modestly exceed last year's level of $3.30.

Vulcan is a producer of industrial materials and commodities with significant positions in two industries. It is the nation's foremost producer of construction aggregates and a leading chemicals manufacturer, producing a diversified line of chlorinated solvents and other industrial chemicals.

LITTLE ROCK, AR (MAY 30) BUSINESS WIRE - TCBY Enterprises Inc. (NYSE:TBY) said it expects to report record earnings for the second quarter ending May 31, 1990 in the range of 35 cents to 40 cents per share.

This estimate compares to earnings of 33 cents per share in the second quarter ended May 31, 1989. However, the company believes, primarily due to adverse weather conditions experienced nationwide in April and May that the same store sales comparison for the quarter will not be positive.

TCBY is the largest franchiser and operator of retail stores specializing in soft-serve frozen yogurt products in the United States and produces the distinctive yogurt served by TCBY stores, and expects to add over 400 new stores in fiscal 1990.

TCBY stores are located in 50 states, Canada, The Bahamas, Taiwan, Singapore, Malaysia and Japan. TCBY Enterprises Inc. has evolved into a holding company to pursue more effectively growth opportunities for the franchise system and corporate stores.

DALLAS (MAY 30) BUSINESS WIRE - The board of directors of Uranium Resources Inc. (''URI'') announced its decision to seek approvals for a four for one reverse stock split of its common stock to become effective as soon as practical upon completion of the approriate regulatory filings and shareholders vote.

The common stock is traded on NASDAQ under the symbol ''URIX'' and on the Toronto Stock Exchange under the symbol ''URI.''

Commenting on this decision, Raymond G. Larson, president, said, ''We are taking this step as a part of our effort to make URI's common stock eligible for trading on the NASDAQ National Market System (''NMS'') to enhance the liquidity of the market for our common stock. URI has made significant progress as a company and as a potential investment opportunity over the past few years as evidenced by our record financial results in 1989, completion of our recent equity offering and our announcement last week of a new $23,000,000 credit facility with Citibank N.A.

''We feel that this action to increase our share price above $5.00 will contribute to making our stock accessible to a broader range of investors, and we plan to take every step possible to assure that URI is eligible for inclusion on the NMS. The National Market System is recognized and accepted by the entire investment community, and obtaining an NMS listing will better reflect the progress we have made.''

Uranium Resources Inc. is a Dallas based uranium mining company, whose shares trade on The Toronto Stock Exchange under the symbol URI and on NASDAQ under the symbol URIX. The company's warrants and units trade on NASDAQ under the symbols URIXW and URIXU, respectively. The company produces uranium in South Texas using low cost in situ solution mining techniques.

TULSA, OK (MAY 30) BUSINESS WIRE - Geodyne Resources Inc. Wednesday confirmed that, as previously estimated in a major wire service interview, its revenue and pretax income rose in the fiscal year ended Feb. 28, 1990 in comparison to fiscal 1989.

The company's higher federal income taxes in the year just ended -- an effective rate of 34 percent vs. 5 percent last year -- resulted in lower net income for fiscal 1990 as compared to fiscal 1989.

Revenues rose 28 percent to $25,756,000 from $20,190,000 in the prior year. Income before taxes increased 14 percent to $8,865,000 from $7,767,000. Net income was $5,886,000, or 33 cents per share, this year after the higher income taxes, compared to $7,389,000, or 43 cents per share, for fiscal 1989. Last year's net income benefited from the utilization of the tax loss carryforwards which have been fully utilized.

For the fourth quarter, revenues declined four percent to $6,007,000 from $6,268,000 in the same quarter last year. Income before taxes decreased 20 percent to $1,451,000 from $1,819,000.

Net income for the fourth quarter totalled $1,042,000, or 6 cents per share, compared to $1,586,000, or 9 cents per share, for the fourth quarter last year. The 1989 fourth quarter benefited from tax loss carryforwards which were not available in the 1990 fourth quarter. ''We achieved a strong performance last year. Even though the fourth quarter was negatively affected by a decrease in property acquisitions due to the timing of the acquisitions, it does not necessarily indicate a trend,'' Michael Tomasso, president, related.

Headquartered in Tulsa, Geodyne Resources Inc. manages the PaineWebber/Geodyne Energy Income Program I, II, and III and PaineWebber/Geodyne Institutional/Pension Energy Income Partners. The company evaluates, acquires, manages and develops oil and gas reserves for its limited partnerships. The company also has offices in Houston and San Antonio, Texas.

BETHESDA, MD (MAY 30) BUSINESS WIRE - The board of directors of Survival Technology Inc. (NASDAQ:SURV) unanimously elected James H. Miller, president, to the additional post of chief executive officer.

Miller succeeds Stanley J. Sarnoff, who passed away May 23, 1990. Prior to joining Survival Technology, on June 1, 1989. Miller was executive vice president of Beecham Laboratories.

A board spokesman expressed the board's view that Miller has brought strong managerial and marketing leadership to Survival Technology Inc. During the last year the company has successfully expanded its commercial business while maintaining military contracts and its traditional R&D base. Miller stated, ''It is our goal to remain a quality-driven provider of pharmaceutical delivery systems to the healthcare industry.''

The company also announced Wednesday that it has been advised that, under the terms of his will and a related trust, Dr. Stanley J. Sarnoff, the company's late founder, chairman and chief executive officer, left approximately two-thirds of the company's outstanding common stock to the Stanley J. Sarnoff Endowment for Cardiovascular Science Inc.

The Endowment is a charitable organization established by Dr. Sarnoff in 1980. The Sarnoff Endowment provides fellowships for medical students, enabling them to take a year away from their medical school after the second year and perform research in the laboratory of a leading cardiology scientist. Since its organization, the Endowment has provided scholarships totaling in excess of $1 million to over ninety Fellows.

James H. Miller, the company's president and chief executive officer said, ''Survival Technology provided Dr. Sarnoff the means through which he could start the Endowment, and he felt strongly that the company should be an enduring source of support for the Endowment's activities. The shares will be transferred to the Endowment as soon as the process of administering Dr. Sarnoff's estate permits.''

Survival Technology Inc. provides medical devices pharmaceutical delivery systems and monitoring services for the treatment of emergency medical problems.

#90150b0831 05/30/1990 ~Business Wire

WELLESLEY, MA (MAY 30) BUSINESS WIRE - BE Avionics Inc. (NASDAQ:BEAV) Wednesday announced record results for its fiscal third quarter and nine months ended April 29.

For the three months, BEA, which acquired the Avionics Division of EECO, Inc. in August 1989, posted its highest quarterly revenues ever - reaching $6,671,000, a gain of 29 percent vs. the 1989 third quarter pro forma combined level of $5,174,000 (as if the EECO Avionics acquisition had occurred on August 1, 1988).

Third quarter operating earnings of $1,663,000 nearly tripled to a new record compared with $586,000 on a pro forma basis for the like 1989 quarter.

Net income and earnings per share in the April 1990 quarter were $778,000 and 16 cents vs. losses of $18,000 and one cent in 1989.

The strong gain reflected a gross margin during the quarter of 53 percent marking a return to historic levels and an increase from the prior year's 41 percent margin.

Nine month revenues for 1990 reached $17,488,000, ahead by 41 percent vs. the 1989 pro forma combined level of $12,436,000. Year-to-date operating earnings rose to $3,895,000 vs. $5,000 in 1989 due primarily to strong revenue gains and a substantial increase in gross margin to 50 percent from 39 percent in the prior year and to a decline in operating expenses as a percentage of sales to 22 percent in 1990 vs. 30 percent in 1989.

Nine month net income of $1,536,000 in 1990 was up from a loss of $1,770,000 in 1989, while earnings per share for the nine months of 31 cents compared with a 1989 loss for the period of 36 cents.

As of April 29, shareholders' equity for the company reached $15,983,000 compared with the year-earlier level of $2,331,000.

Total assets jumped to $32,250,000 compared to $5,869,000 in the prior year.

The BE Avionics initial public offering was completed on April 30, with the proceeds used early in the fourth quarter to retire all of BEA's bank debt.

While fourth quarter earnings will be positively affected by the elimination of interest expenses, there will be a one-time, extraordinary charge related to the pre-payment of all the company's bank debt at face value. The debt had been booked with an original issue discount.

''We are most gratified with the success of the company's initial stock offering and with the strong financial position we have now attatined as a result of the repayment of essentially all of our debt with the resulting funds,'' said BEA chairman and chief executive officer Amin J. Khoury.

''And, more importantly, our backlog position remains strong reflecting the strength of our underlying product line and broad customer base representing 90 percent of the world's airlines.

''Consequently, we expect the company's operating earnings and cash flow to continue their trend and meet our growth objectives.''

With a 70 percent market share, BEA is the world's leading supplier to commercial airlines of passenger control units for in-plane audio and video entertainment and service systems.

#90150b0841 05/30/1990 ~Business Wire

NEW YORK (MAY 30) BUSINESS WIRE - Otis Elevator Wednesday unveiled an elevator control system that has the ''thinking'' ability to automatically match its dispatching of elevators to a building's changing passenger traffic.

The microcomputer-based Elevonic 411 controller uses artificial intelligence to ''learn'' new elevator response times and traffic patterns based on fluctuating traffic conditions. It also has a special feature for handling morning rush-hour traffic in high-rise office buildings and hotels.

In addition to sophisticated elevator dispatching and traffic handling,

advances in the new system's gearless elevators, software, and hardware include:

-- A distributed intelligence that gives each car control of its own operation, motion, drive and door. The cars in a group constantly communicate with each other so that if one car is shut down, those remaining will compensate for it to provide full elevator service.

-- Ride quality is improved by new hoistway rail alignment methods and cab components that reduce vibration and noise.

-- Modular hardware and software can be replaced with new designs without affecting the entire system, reducing downtime and raising cost efficiency.

-- Enhanced diagnostic software continually tracks an elevator's health. With a laptop computer, Otis mechanics use the data to identify potential problems and can correct them quickly on site before a breakdown occrs.

The Elevonic 411's distributed design allows each car connected to the standard dispatcher to calculate the time it will take to respond to a passenger call. However, the cars, taking into account all present and near-future traffic conditions, decide as a group which among them has the best response time to answer the call most efficiently.

The dispatcher's basic aritificial intelligence automatically adjusts elevator response times when traffic intensity monitored over the previous five mintues changes.

Two options enhance the Elevonic 411's dispatching performance. The Channeling system, an Otis patented innovation, was developed specifically for heavy rush-hour, or ''up-peak'' traffic which today's elevator systems handle by serving all floors with all cars in the building.

The Channeling system assigns cars to handle sectors of contiguous floors, grouping passengers going to the same floor in the same car. It considerably speeds up passenger traffic-handling and lowers car round-trip time.

Otis' Advanced Dispatching System (ADS), the second option, uses expanded artificial intelligence. It records a building's traffic patterns based on 10-day predictions of traffic intensity, origin and destination.

ADS then anticipates the start and intensity of passenger traffic and dispatches the car or cars with enough capacity to answer each call. In off-peak periods, the dispatcher sends cars to part at the floors where traffic is expected to be generated next.

Like the Channeling system, artificial intelligence gives the advanced

dispatcher dynamic characteristics. ADS continually records traffic pattern information throughout the day. When a building's patterns change the system ''learns'' the new patterns and automatically modifies elevator service to accommodate them.

Otis' new Elevonic 311, developed for mid-rise buildings with up to 20 stories, has geared elevators with the same operating control, dispatching and optional features as the Elevonic 411.

Otis Elevator Co. is a wholly owned subsidiary of United Technologies Corp. (UTC).

United Technologies provides a broad range of high technology products and support services to the aerospace, building systems and automotive industries. Besides Otis elevators and escalators, the Hartford, Conn.-based corporation's best known products include Pratt & Whitney aircraft engines, Carrier heating and air conditioning systems, Sikorsky helicopters, Hamilton Standard aerospace systems, Norden defense systems, and UT Automotive components and systems.

Several UTC units supply equipment and services for the U.S. space program.

NEW YORK (MAY 30) BUSINESS WIRE - American International Group Inc., (AIG) announced that it and APL Corp. (APL) have modified the terms of AIG's previously announced option to purchase APL's approximately 54 percent interest in Fischbach Corp. to fix a revised exercise price of $11.00 cash per share.

AIG also said that it is proposing through a subsidiary to acquire Fischbach in a merger pursuant to which all Fischbach shareholders would receive the same $11.00 cash per share.

The proposed merger would be subject to the approval of Fischbach's board of directors and other customary conditions, including expiration of the waiting period under the Hart-Scott-Rodino Act. APL has agreed to recommend approval of the merger to Fischbach's board of directors.

AIG also announced that it is negotiating a potential involvement in the business of Fischbach by Peter Kiewit Sons' Inc. (PKS), a major construction firm. In connection with the modification of the option, APL

has agreed to recommend that Fischbach enter into an agreement under which PKS would provide management consulting services to Fischbach. It is expected that PKS will begin to provide these services to Fischbach immediately after Fischbach board approval is obtained.

AIG stated that it had been informed by Fischbach that a meeting of the Fischbach board of directors to consider these matters has been scheduled for next week.

BROOKLYN, NY (MAY 30) BUSINESS WIRE - Standard & Poor's announced Tuesday that it changed the ratings on Brooklyn Union's tax-exempt debt, First Mortgage Bonds and preferred stock from A+ to A and on its commercial paper from A-1+ to A-1.

Standard & Poor's indicated that ''further rating downgrades are not anticipated in view of the company's low risk markets where residential and commercial customers account for the vast bulk of sendout.'' Standard & Poor's further stated that the company's weather normalization clause ''lends stability to earnings and a relatively low embedded debt cost due to various tax-exempt financings also help support the revised ratings.''

According to Standard & Poor's, the lower ratings were given primarily as a result of the ''less than supportive regulatory decisions by the New York State Public Service Commission.'' Specifically, S&P cited the low returns on equity being authorized by New York utility regulators.

Craig G. Matthews, group senior vice president and chief financial officer, said that ''Brooklyn Union remains solid financially and we are confident that our strategies in maintaining effective cost controls and promoting sales growth will provide for a strong financial profile for the long-term.''

Brooklyn Union Gas distributes natural gas in the boroughs of Brooklyn, Staten Island, and two-thirds of Queens, a territory of 187 square miles with a population of 4 million. Through subsidiary and affiliate companies it is involved in oil and gas exploration and marketing, propane distribution and cogeneration projects.

NORWALK, CT (MAY 30) BUSINESS WIRE - Alcide Corp. (NASDAQ:ALCD) announced Wednesday that Elliott J. Siff, its chairman and chief executive officer, has decided to step down after 10 years with the company.

His resignation will take place effective immediately; however, Siff will continue on as a consultant to the company and will remain a member of its board of directors.

In accepting Siff's resignation, Thomas L. Kempner, chairman of the executive committee and speaking for the full board, noted Siff's substantial contributions and accomplishments for the company and, particularly, that through his recent efforts, the company had completed a reorganization and redirection of its goals.

These efforts have resulted in a significant decrease in the loss for the third quarter ended Feb. 28. The company's improved performance resulted from increased sales volume and the initiation of a substantial expense reduction program.

The favorable impact on operating results has continued into the fourth quarter. Kempner will act as chairman of the board which has commenced a search for a new chief executive officer.

Alcide Corp. develops and manufactures pharmaceuticals and unique disinfecting systems based upon its patented technology. Current markets include dairy line and animal health, pharmaceuticals, health care, automotive and food processing industries.

ROCKY HILL, CT (MAY 30) BUSINESS WIRE - Ames Department Stores Inc. Wednesday announced that Judge Howard C. Buschman III, of the U.S. Bankruptcy Court in Manhattan, approved the company's request to pay severance and vacation pay up to $2,000 to employees who left Ames prior to its Chapter 11 filing.

In signing the order, the Judge indicated that payments should be mailed to the 6,500 Ames former employees on June 7, 1990.

The Judge also approved the retention of various specialists by Ames, including the Sawyer/Miller Group as communications counsel; Alvarez & Marsal as financial management consultants; Coopers & Lybrand as

accountants; and Hale and Dorr as special counsel; and confimred the prior retention of Skadden, Arps, Slate, Meagher & Flom as counsel.

Ames, which filed for protection under Chapter 11 of the U.S. Bankruptcy Code on April 25, operates more than 600 stores in 20 states and has 55,000 employees. The company, which reported net sales of $4.8 billion for the year ended January 27, 1990, sought court protection to restructure its business and finances.

NEW YORK (MAY 30) BUSINESS WIRE - Management Company Entertainment Group Inc. (NASDAQ:MCEG) announced Wednesday that General Electric Capital Corp. (''GE Capital'') has assumed all of the rights and obligations of Kidder, Peabody Group Inc. (''Kidder''), an affiliate of GE Capital, in connection with MCEG's outstanding $72,500,000 bridge and credit loans from Kidder, as well as the recently announced multi-year financing arrangement to restructure the bridge and credit loans.

The company also announced that the maturity dates of the bridge and credit loans have been extended to June 29 to allow for the negotiation of a definitive agreement with GE Capital and for the preparation and execution of related documents.

In a related announcement, the company said PaineWebber Inc. will act as the company's financial advisor in connection with the negotiation of the arrangement and related transactions including assisting the company in obtaining financing for its working capital and long-term financing requirements.

As previously announced, under the restructured financing, which will be made effective as of May 1, the company's outstanding bridge and credit notes will be replaced with two series of notes. The Series A Notes will carry significantly reduced interest rates, while the Series B Notes will contain an interest payment feature that will reduce the cash needed by the company to make interest payments until May 1, 1992.

The Series A Notes, maturing on April 30, 1992, in the amount of $55 million will bear interest par annum at the rate of 1-1/2 percent over the Citibank NA base rate, with a mandatory prepayment of $13,750,000 on April 30, 1991. The Series B Notes, in the initial principal amount of $17,500,000 will mature on May 1, 1995.

The $17,500,000 principal amount may be increased to $23,050,000 because GE Capital has agreed to make available an additional $5,550,000 of Series B Notes in connection with the restructuring as may be mutually agreed upon. The Series B Notes will bear interest at 15 percent annum, which may be paid in kind rather than cash for the first two years.

Commencing May 1, 1992 interest will be payable in cash semi-annually. It is expected that the proceeds of the restructured financing, if complete, will be used to refinance long-term debt of the company, including the $72,500,000 bridge and credit loans.

Completion of the restructured financing arrangement is subject to a number of significant conditions, including: the negotiation and execution of definitive documents which, among other things, contain covenants mutually acceptable to the company and GE Capital and mutually satisfactory terms and conditions that will enable the company to finance its working capital requirements; MCEG Board approval; entering into suitable arrangements with Virgin Group and Standard Chartered Bank concerning conversion of a substantial portion of the company's senior and subordinated debt to Virgin Group and Standard Chartered Bank into equity; and the entering into by GE Capital of certain voting arrangements with shareholders regarding the terms under which GE Capital would have the right to elect a majority of the board of directors if the Series A Notes are not prepaid.

INWOOD, NY (MAY 30) BUSINESS WIRE - Choice Drug Systems Inc., (NASDAQ:DOSE (common stock), DOSEU (warrants), DOSEU (units); Boston Stock Exchange:CD) Wednesday announced audited results for the year ended Feb. 28.

Sales increased 23 percent in fiscal 1990 to $20,132,748 from $16,331,455 in the prior fiscal year. The increase in revenues in fiscal 1990 is largely the result of an increase in the company's customer base, sales of additional product lines to existing customers and certain price increases as well as sales attributable to the October 1989 acquisition of Sterling Health Systems Inc.

As a result of costs associated with an incompleted and terminated acquisition, expenses of hiring a new president (who is no longer with the company), and research and development expenses, the net loss increased from $149,238, or $.035 per share in fiscal 1989 to a net loss of $287,436 or $.066 per share in fiscal 1990.

It should be noted that most of these enumerated expenses are non-recurring.

In a separate development, Choice Drug also announced that it has agreed to retain the services of M.H. Meyerson & Co. Inc., of Jersey City, N.J. to act as its investment banker with regard to acquisitions, mergers and financing alternatives.

Choice Drug Systems Inc., and its wholly-owned subsidiaries provide pharmaceuticals, durable medical equipment and disposables to health care facilities, home health care providers, and physician groups in the greater New York/New Jersey metropolitan area and in Massachusetts and Connecticut.

ANNOUNCEMENT:

On Apr. 24, 1990, American Steel & Wire Corp (TICKER: RODS) announced a $95 million external financing agreement which will be used for, among other things, a special cash dividend of up to $4.25 per common share.

Chicago West Pullman believes that the dividend is in the best interest of shareholders and has ceased to explore options regarding the proposal, the increased proposal or another proposal.

On Jan. 30, 1990, CWPT and the bank increased the second facility to $12.6 million, and on Apr. 5, 1990, increased it again to $16.2 million, the number of shares pledged to secure the facility was increased to 1,775,000 and the interest rate was modified.

On July 8, 1988, Vortec Corp. and Huntington National Bank executed a loan agreement.

On Jan. 29, 1990, Vortec, CWP and Huntington entered into an amended loan agreement pursuant to which CWP pledged 325,000 shares to Huntington to secure a guaranty previously issued to Huntington by CWP.

PURPOSE:

Proposed dividend.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

ROYAL BANK OF CANADA OWNS 11,159,773 SHARES (29.70%) OF SHL SYSTEMHOUSE INC (TICKER: SHKIF) OF OTTAWA, ONTARIO.

ANNOUNCEMENT:

On May 18, 1990, the Bank, as agent for a group of lenders, gave notice to Kinburn Corp., that after the expiration of a 15-day period, the Bank would begin to sell or otherwise dispose of shares pledged to secure a $345,000,000 loan.

Kinburn defaulted on payment of the interest on March 30 and subsequently notified the Bank that it did not have the financial resources to repay the loan.

PURPOSE:

To protect the rights of certain lenders in pledged securities of SHL.

SEC - AMENDMENT NUMBER: 15

GROUP LED BY CENTAUR PARTNERS IV OWNS 3,595,500 SHARES (16.50%) OF NATIONAL INTERGROUP INC (TICKER: NII) OF PITTSBURGH, PA.

ANNOUNCEMENT:

Centaur Partners accused National Intergroup of issuing a ''materially misleading'' press release to announce fourth-quarter and fiscal-year earnings, and rebuked National Intergroup for reducing the size of its board against shareholder wishes.

In a May 30 letter to National Intergroup's board, the group noted National Intergroup's $7 million loss on continuing operations in the fourth quarter and $14 million in such losses for the year.

The group also said National Intergroup restated its 1989 results downward by more than $70 million so the 1990 figures would seem like an improvement.

In addressing National Intergroup's board reduction -- to 10 from 12 members-- Centaur said in a press release that management apparently wants to ''insulate'' itself from criticism by independent directors.

Centaur noted that the reduction will not play out if Centaur establishes on appeal that the consents of a majority of National Intergroup stockholders were adequate to adopt its proposal to expand the board.

In their letter, the members questioned several proposed transactions recently announced by National Intergroup -- one involving stock in National Steel Corp. of Pittsburgh and another involving units of Permian Partners L.P., the Houston partnership.

The group requested more detailed information about those plans.

GROUP LED BY CARLTON COMMUNICATIONS PLC OWNS 595,925 SHARES (28.20%) OF UNITEL VIDEO INC (TICKER: UNV) OF NEW YORK, NY.

ANNOUNCEMENT:

On Feb. 26, 1990, Cosworth Holdings Ltd. sold to Carlton the remaining 10 percent of the capital stock of UEI, and on Feb. 27, 1990, Carlton sold UEI

shares to New CCI.

On Apr. 27, 1990, Carlton sold its 100 percent stake in Cosworth to Vickers Plc.

Due to the transactions above, Cosworth has ceased to be a reporting party and New CCI has been added.

On Apr. 18, 1990, Cosworth and UEI executed a termination of shareholder stock option and proxy agreement dated as of Apr. 23, 1990.

The agreement terminates the proxy agreement granting options by Herbert Bass, Alex Geisler and Jean Geisler to purchase common shares.

CANBERRA (MAY 30) - Australia's economy grew 1.8 percent in the March quarter, officials statistics showed Wednesday, despite government attempts to cool down activity.

Analysts said the gross domestic product (GDP) figures released Wednesday by the Bureau of Statistics foreshadowed tough times ahead and ruled out any chance for lower interest rates.

The bureau said that seasonally adjusted real GDP jumped 1.8 percent in the March quarter, following a 0.1 percent fall in the three months to December 31.

Seasonally adjusted GDP grew 4.4 percent in the year to March 31, compared with an annual increase of 4.2 percent for the year ended December 31.

The figures, fueled by a sharp rise in government spending, stunned

financial markets. A key barometer of short term interest rates, 90-day bank bills, rose from 14.9 percent to 15 percent.

The Australian dollar soared to 77.10 U.S. cents after the GDP release, compared to its Tuesday close of 76.70 U.S. cents.

"It roared because of the rises in interest rates," one dealer said.

Economists had predicted the government's high-interest rate policy would produce a second straight quarter of negative growth, putting Australia into a technical recession.

But analysts said that the good growth figures were paradoxically bad news for the government's long-term strategy.

Canberra tightened monetary policy last year in order to slow growth and tackle Australia's massive current account deficit, high inflation and huge foreign debt.

Matthew Butlin, from the Business Council of Australia, said: "It's an Indian Summer. There is a lot of bad news in the pipeline."

The bureau said a surge in public spending was a major contributor to growth, swelling 1.5 percent in the quarter.

"Government expenditure has absolutely exploded," said Wayne Fitzgibbon, economist at Macquarie Bank Ltd.

Private spending grew 0.9 percent during the March quarter, the bureau said.

Gross national expenditure rose 1.5 percent in the March quarter after a 0.8 percent fall in the December quarter, it said.

Exports of goods and services rose 5.7 percent in the March quarter while imports were up 3.5 percent.

KUALA LUMPUR (MAY 30) - Officials huddled at a hilltop mansion here Wednesday for preparatory talks ahead of the Group of 15 inaugural summit later this week expected to focus on Third World debt.

The preparatory talks kicked off at a British colonial-style government guest house overlooking this capital of palm tree-lined avenues and gleaming office buildings.

Press were barred from entering the grounds by heavily armed troopers.

As the talks began, it was announced that yet another of the original 15 heads of government invited to participate in the June 1-3 summit could not attend.

Algerian President Chadli Bendjedid's no-show brings to six the number of presidents or premiers who will not be attending.

The heads of government of Argentina, India, Indonesia, Malaysia, Nigeria,

Senegal, Venezuala, Yugoslavia and Zimbabwe are expected, while the leaders of Algeria, Jamaica, Egypt, Brazil, Mexico and Peru will send representatives.

The formation of the G-15, first announced by South Commission chairman Julius Nyerere at the Belgrade summit in September of the Non-aligned Movement (NAM), is aimed at boosting Third World co-operation and increasing the South's leverage with the industrialised nations.

Malaysian officials and several foreign diplomats here in the run-up to the summit said the G-15 meeting would concentrate on finalising some eight to 10 modest co-operative proposals, some of a technical nature.

But a local press report Tuesday quoted a Malaysian Foreign Ministry official as saying that special attention would be given to the 1.3 trillion dollar Third World debt.

Press reports also said Mr. Nyerere, who is attending the summit, would present a paper highlighting the drop in gross domestic product (GDP) growth to 1.2 per cent in 1988-1989 for Latin America, with plunges into the negative column in the last decade for African and West Asian countries.

But analysts here noted that of the five leaders from Latin America invited, only two had confirmed their attendance - Carlos Andres Perez of Venezuela and Carlos Saul Menem of Argentina.

#90150d3170 05/30/1990 ~French/German News Agency

Paris (MAY 30) - The standoff between Europe and the United States over farm subsidies and prospects for Eastern European economic recovery dominated talks here Wednesday at the start of a two-day economic conference.

Cabinet-rank officials from 24 member nations of the Organisation of Economic Cooperation and Development (Oecd) tackled the row over U.S.

demands for the European Community to move toward phasing out agricultural subsidies which Washington terms restrictive to trade. European farmers have balked at any mention of reducing subsidies.

As the conference opened, Oecd economists issued an optimistic report indicating Bonn will be able to keep the lid on inflation in West Germany despite potentially enormous costs entailed with German unification in coming months.

The Oecd survey, projecting economic factors for Europe, the United States and Japan the rest of this year and next, said West German inflation will run at 3.4 percent in 1990 and 1991, up markedly but not dramatically from 1989's rate of 2.5 percent. But even with that boost, according to the projections, West Germany would still have Europe's lowest inflation rate.

Overall, the 24 Oecd member countries are projected to experience an average inflation rate of 4.4 percent, up marginally from 4.3 percent in 1989 due to the generally sluggish economic climate.

In line with that sluggishness, economic growth in the 24 countries will slip to 2.9 percent this year and next, compared with 3.6 percent last year and 4.4 percent in 1988.

Unemployment in Oecd countries is expected to rise from an average 6.4 percent last year to 6.4 this year and 6.5 percent in 1991.

#90150d3230 05/30/1990 ~French/German News Agency

HONG KONG (MAY 30) - Share prices on the local stock market rose on strong buying interest on Wednesday, with the Hang Seng Index gaining 3 points to 3,083.35.

Turnover also rose sharply to 1.549 billion dollars (199 million U.S.), against Tuesday's 1.2 billion dollars (154 million U.S.).

The record surge on Wall Street overnight put the main barometer on an upward track at the day's opening to score a 22.27-point gain to 3,070.82 before the market closed for lunch, despite Tuesday's drop of 10.95 points on profit-taking.

Strong buying sentiment continued to prevail in the afternoon session mainly on selective buying.

Dealers said a World Bank decision to resume loans to China after the bloody crackdown of on democracy protests in China a year ago in June had also helped push the Hang Seng Index up.

The local bourse is sensitive to political developments in China, which will regain sovereignty over this British colony in 1997.

#90150d3330 05/30/1990 ~French/German News Agency

PARIS (MAY 30) - Bangkok Airways, Thailand's biggest private airline handling domestic and regional flights, has opened a European office in Paris.

At the inauguration ceremony here Tuesday, the company's president, Prasert Prasart Tong-Osoth, said the office would serve as a reservation clearing house and public information center, as well as a link with travel agents.

But he said ticket sales would still be handled only by travel agencies and tour operators.

He also announced that a commercial agreement would be signed shortly with the national airline, Thai International, notably for reciprocal distribution of tickets.

The company, whose domestic routes concentrate on Thai tourist destinations, said it was opening the Paris office since 90 percent of its clients were European.

The Bangkok Airways fleet currently has only two Boeing-de Havilland DASH 8 37-seaters, but in November will add three DASH 8-300 craft with 56 places in a bid to increase service from 250 to 400 clients daily.

The company built its own airport last year on the island of Ko Samui in the Gulf of Thailand, and plans to invest 70 U.S. million dollars in five years. Other than Bangkok Airways, the group includes the Thai Petroleum oil services company and the Bangkok United Mechanical company.

#90150d3430 05/30/1990 ~French/German News Agency

AUCKLAND, New Zealand (MAY 30) - New Zealand's state-owned Telecoms

Corporation, currently up for sale, on Wednesday reported a net profit of 257 million New Zealand dollars (147 million U.S.) for the year to March.

The comparable figure for the previous year was 235 million dollars (134 million U.S..

State Owned Enterprise Minister Richard Prebble said the company's profitability had levelled off.

The government, as sole shareholder, earned only 10.4 percent on its 2.4 billion dollars (1.3 billion dollars) equity and would have done better if the money had simply been invested in a savings account, he said.

Telecom chairman Ron Trotter said any owner of Telecom was entitled to a decent return.

"It's a modest enough return at ten and a half percent. I would expect long term that the company should earn a better proft than that."

Telecom will pay the government a dividend of 198 million dollars (113 million U.S.) and retain earnings of 113 million dollars (64 million U.S.).

Bids on Telecom, expected from major communications companies from around the world, are due to be lodged in Wellington by June 6. Although expected to raise three billion dollars (1.7 billion U.S.) the sale is strongly opposed by opposition parties.

The National Party questions the timing of the sale while the small New Labour Party (NLP) is opposed to any sale at any time.

"It doesn't make any common sense to sell one of our most valuable assets," NLP leader Jim Anderton said.

#90150d3730 05/30/1990 ~French/German News Agency

PARIS (MAY 30) - French Economy Minister Pierre Beregovoy on Wednesday unveiled a new law which tighten rules on the awarding of public contracts so as to ensure free competition.

"The current methods of awarding contracts are not satisfactory, as has unhappily been proved by recent events. It was therefore necessary to make the system more open," government spokesman Louis Le Pensec said after Mr. Beregovoy presented the draft new law to a regular cabinet meeting.

"It is important that government, municipal and public sector orders be drawn up, awarded and carried out in an irreproachable manner," Mr. Le Pensec said.

"It is therefore indispensable to improve openness in the system, ensure tighter control of procedure to guarantee equal rights to people bidding for public contracts, and guarantee the proper use of public funds."

The draft law followed a European Economic Community directive on public works contracts, and would set out procedures for free competition and public tendering on orders of more than 35 million francs (6.25 million dollars).

It also calls for the setting up of a special enquiry commission which would check up on alleged infringements of the law.

MELBOURNE, AUSTRALIA (MAY 30) - The spread of the AIDS virus in Australia has peaked and could be on the verge of a decline, a health official said Wednesday.

Commonwealth Chief Medical Advisor Dr. Tony Adams said figures showed that fears that the fatal virus could spread rapidly among drug users and the rest of the population had proved misplaced.

Dr. Adams told the National Health and Medical Research Council (NHMRC) here that 487 new AIDS cases had been recorded in 1989, compared to 497 the previous year.

He said the number of new cases "has reached a fairly stable situation and one would hope that we'd see a downturn within a couple of years."

Dr. Adams said a 3.5 million Australian dollar (2.67 million U.S.) government AIDS prevention campaign to warn drug users of the disease would be launched Monday.

#90150d4070 05/30/1990 ~French/German News Agency

TOKYO (MAY 30) - Japan's Onoda Cement Co., one of the country's biggest cement producers, said Wednesday its net profit fell 10.7 percent in the year to March to 6.51 billion yen (41 million dollars).

Sales rose 6.2 percent to 205 billion yen (1.3 billion dollars) in the same period. Domestic shipments of cement rose 2.7 percent to 12.7 million tonnes while exports jumped 10.2 percent to 2.2 million tonnes, it said.

The profit decline reflected higher costs, the company said, adding that the increase in sales was mainly due to a diversification of activities

and a recovery in the domestic cement market in the second half.

NEW DELHI (MAY 30) - India, spurred by a 37 percent growth in exports of cashew nuts, has edged out Brazil as the world's number one supplier, exporting almost 44,000 tons of kernels in calendar 1989.

The Cashew Export Promotion Council said 43,880 tons were shipped in 1989 meeting almost 50 percent of the world demand of 90,000 tons.

Low prices and an easier supply situation had led to a seven percent growth in world consumption in the year, it said, adding that Indian exports in 1988 when Brazil was the foremost world supplier, had been 32,400 tons.

#90150d4130 05/30/1990 ~French/German News Agency

LONDON (MAY 30) - The British Broadcasting Corporation on Wednesday announced plans to end radio broadcasts in Japanese and Malay as part of a package of steps aimed at saving money and boosting other services.

Cancellation of the two services would go into effect no later than the end of March, 1991, a BBC spokesman said.

The Foreign Office, which funds the BBC World Service through the Treasury, confirmed the cancellations saying they would allow reallocation of resources to services with "important audiences and to areas of high foreign policy priority".

The changes were "welcome" and did not reflect any decline of British interest in Japan or Malaysia, a Foreign Office spokesman said, noting that both countries would continue to received the BBC World Service in English.

"Of course closure of a service, especially any one which has served its area well over a long period of time, is regrettable," said John Tusa, managing director of the World Service.

In a statement, the BBC said it would boost both its Russian and Mandarin Chinese services by three and a half hours per week and would also increase its Vietnamese service by one hour and 45 minutes per week.

English-language services to east Asia would also be increased by one hour per week and the BBC announced plans to launch a new English service to be broadcast in southeast Asia for five hours per week aimed at encouraging learning of English.

The changes, expected to include the loss of 15 jobs, would save the BBC around 359,000 pounds (612,000 dollars) per year and were part of the organization's triennial funding plan which begins in 1991.

"I believe the changes to our pattern of broadcasting will allow us to keep our competitive lead as the world's most listened-to international broadcasting station," Mr. Tusa said.

ATHENS (MAY 30) - Greece and the United States reached agreement Wednesday on the future of U.S. military bases in Greece, a spokesman for the new Greek conservative government announced.

The agreement valid for eight years concerns only military matters and served "the best interests" of Greece, he said.

Greek Prime Minister Constantin Mitsotakis said on Monday that the agreement would be for eight years and would call for the transfer of "some installations" from the air base at Hellenikon near Athens to one of the two U.S. bases on the island of Crete.

In January the United States decided to close its bases at Hellenikon and at Nea Makri north of Athens. Their two bases on Crete are near Heraklion and at Souda near Canee, both of which are on the north coast.

Mr. Polydoras said that the agreement, which was signed by the two negotiators -- Christos Zacharakis for Greece and Alan Flanigan for the United States -- would not be made public for two weeks because the U.S. team had to sort out some legal problems.

Negotiations to renew the 1983-1988 defence and economic co-operation agreement began in November 1987 when the Socialist government of Andreas Papandreou was in power but were unsuccessful. The agreement expired on December 21 1988.

The United States was given 17 months, later extended for six months, to dismantle its installations.

But the negotiations were frozen in May 1989 as Greece was caught in a political crisis which led to three general elections within 18 months. The talks resumed on May 7 after the conservatives won power.

Mr. Mitsotakis is due to visit the United States from June 3 to 12.

LUSAKA (MAY 30) - Economic experts and the business community here on Wednesday welcomed a government decision to sell nearly 50 percent of shares in parastatal companies to the public and set up a stock exchange.

The decision announced by President Kenneth Kaunda Tuesday to sell between 40 and 4 percent of parastatal companies in sectors including mines and railways would help tackle extreme economic imbalances in the country, analysts said.

Shares would also be sold in public utilities and services such as major hospitals and the Zambia national broadcasting corporation.

Mr. Kaunda said that a stock exchange would be established to facilitate buying and selling of shares.

The chairman of the Economic Association of Zambia (EAZ), Akashambatwa Lewanika, said that the measure was a move in the right direction but cautioned against undervaluing the parastatals' assets.

"It is important that the nation should receive the optimum for its assets, and the private investment should be encouraged, facilitated and assisted into new production and service ventures," he said.

The chairman of the Confederation of Industries and Chamber of Commerce in Zambia, Alexander Chikwanda, said the move would enable more Zambians to acquire wealth.

"Our country has extreme imbalances in terms of ownership of wealth and anything that leads to more people owning a little stock is a move towards more practical egalitarianism," he said.

Mr. Kaunda said that public shareholding in state enterprises would tend to improve the quality of management, "since shareholders will insist on good financial performance as the criterion for determining the employment, retention and renumeration of management staff."

Many state-owned parastatals have in the past been dogged by financial mismanagement, tribalism and nepotism, leading to falling performance standards.

BERLIN (MAY 30) - The East German government said on Wednesday that fixed pricing and state subsidies on consumer goods and services would be abolished on July 1, when the treaty on German monetary and economic union

takes effect.

There will however be some exceptions to the abolition during a transitional period, government spokesman Matthias Gehler said.

A draft law on the issue adopted by the cabinet would keep price regulation for rents, transport and energy, he said.

State subsidies on consumer goods totalled 55 billion Ost marks (32 billion dollars) last year, according to official figures.

HONG KONG (MAY 30) - Hong Kong is to import 14,700 workers including labour needed for a 16.3 billion U.S. dollar port and airport project despite strong opposition from labour unions.

The scheme to import labour, announced by the government on Wednesday, was approved in view of a persistently tight labour market and expected slow growth in domestic supply, Secretary for Education and Manpower K.Y. Yeung said.

The program, which is to start in two months, has sparked strong criticism from labour unions, which fear that the new policy will hurt local workers and have threatened to hold mass demonstrations over the issue.

The colony's acute labour shortage is largely due to anxiety over China's impending takeover of the British colony in 1997, with an estimated 1,000 people emigrating each week.

The government reduced an original import quota for foreign labour from 3,000 to 2,700 technicians, craftsmen and supervisors, plus 10,000 experienced operatives, or workers defined as having one year's relevant experience and able to start work without training.

The government also set an initial quota of 2,000 construction workers to be imported for the mammoth port and airport project.

Hong Kong relaxed its labour import restrictions last May by allowing the importation of 3,000 foreign workers after a vigourous campaign by employers who claimed that Hong Kong was short 250,000 workers.

So far only 1,718 of the new quota have been approved, of which 90 per cent are from China.

Mr. Yeung, blaming the slow processing rate on the government's inexperience in importing labour, added that the intake would "rapidly

build up."

Several construction worker unions opposed the plan to import 2,000 construction workers for the new airport, saying the imported labour would force down wages for local workers.

PARIS (MAY 30) - French consumer prices rose 0.4 percent in April over the March level, according to official figures published here Wednesday.

On a year on year basis, prices were up 3.2 percent.

Prices rose 0.3 percent on a month on month basis in March.

Food prices rose 0.3 percent in April, manufactured products were up 0.1 percent and services 0.8 percent.

#90150d4860 05/30/1990 ~French/German News Agency

LONDON (MAY 29) - British merchant bank S.G. Warburg said Wednesday its taxable profit rose 68 percent in the year to March to 187.5 million pounds (317.7 million dollars) from 111.5 million (188.9 million dollars) the previous year.

Final dividend was 10.5 pence, giving a total for the year of 15 pence, up from 12.5 the previous year. Earnings per share were up from 33.8 pence to 57.3.

But the figures were below market expectations of profit of around 192 million pounds, and Warburg shares were down seven pence at 423 in mid-morning trading on the London stock exchange.

Group chairman Sir David Scholey said the results were satisfactory during a period which saw a tightening of credit, rising interest rates and falling stock prices.

But he warned that shareholders should not expect further profit improvement, or even a maintenance of last year's level, for 1990 given the state of the British economy.

#90150d4890 05/30/1990 ~French/German News Agency

JAKARTA (MAY 30) - PT Indah Kiat Pulp and Paper Corp., an Indonesia-Taiwan joint venture, will float 60 million shares in the biggest

listing ever on the Jakarta Stock Exchange (JSE), the company said Wednesday.

Some 95 percent of the 636 billion rupiah (347 million U.S. dollars) proceeds will be spent on expanding capacity, company president director Teguh Ganda Wijaya said.

The listing, if succesful, will be the biggest flotation on the JSE, beating the 335 million dollar cash call in december by PT Indocement.

Officials from lead underwriters, PT First Indonesia Finance and Investment Corp. and PT Nomura Indonesia, said they anticipated strong orders from both overseas and domestic investors

The current Indonesian partners also planned to list an additional 63 million of their existing shares on the JSE to give foreign investors a better chance of aquiring some of the stock, the officials said.

Current rules limit foreign investors to 49 percent of any one company's total listed stock.

Indah Kiat's shares will be sold at 10,600 rupiahs (5.80 dollars) with the offering period beginning Friday to June 7 for foreign buyers and to June 15 for local applicants. The official listing is planned for July 15.

The plant expansion plans will raise Indah Kiat's capacity from 300,000 tons of pulp and 344,000 tonnes of paper this year to 800,000 and 744,000 tons by 1993, Mr. Wijaya said.

The company is a member of the diversified Sinar Mas business group.

Ater the listing, Sinar Mas will hold 58.23 percent of the company's equity, CHP International Corp of Taiwan 19.99 percent, YFY Global Investment Corp. of Taiwan 8.69 percent and the public 13.09 percent.

AMSTERDAM (MAY 30) - Dutch electronics group Philips and Italian group Olivetti have broken off cooperation talks, the Dutch economic daily Het Financieele Dagblad said Wednesday, citing a senior Olivetti official.

But a Philips spokesman denied the report.

"The statement we published on May 22 indicating that we were holding talks with several concerns, including Olivetti, on a possible cooperation in particular, defined sectors of the market, is still valid," Cor Vreven said.

The Dutch daily had cited Olivetti director for strategy and development, Bruno Lamborghini, as saying in an interview that the talks had been suspended and that Olivetti would seek another potential partner if they were not resumed rapidly.

The newspaper said that the breakdown of the talks followed uncertainty over the future policy of Philips, which is to see a change in president at the beginning of July.

BAGHDAD (MAY 30) - Libyan leader Moamer Kadhafi Wednesday vowed that the Arabs would liquidate Israel and turn Palestine into a "graveyard for the Jews."

Colonel Kadhafi, addressing a plenary session of Arab leaders marking the formal close of their three-day summit here, warned that in receiving large numbers of Soviet Jewish emigres "the Zionist entity is in the process settling them in a cemetery."

"To gather the Jews in Palestine is to gather them in their tombs," he said.

"The force with which they (the Israelis) threaten the Arabs is artificial. We will hit them with all means and liquidate them."

He declared that "the Arabs can defeat Israel with a human bomb," expressing the hope that the Arab population would one day amount to one billion.

Iraqi President Saddam Hussein, who on Monday threatened to respond to an Israeli attack with "weapons of total destruction," warned in reply to Col.

Kadhafi that "you would have to incur the cost" for an expanded population.

Arab leaders at the end of debate here condemned the United States for its financial, military and political support to Israel and appealed to the United Nations to help prevent Jewish emigres settling in Israeli-occupied Arab territories.

The final summit statement called on other states to "refrain from any form of aid or loans" to Israel that would be used to facilitate the settling of new immigrants in the West Bank, Gaza Strip or Jerusalem.

The United States in a memorandum last week had called on the summit participants to respect the right of Jews to emigrate, while adding that it was opposed to new Jewish settlements in the occupied territories.

#90150d5380 05/30/1990 ~French/German News Agency

PARIS (MAY 30) - France on Wednesday decided to ban British beef imports until further notice because of the danger of a fatal bovine brain disorder known as mad cow disease.

Agriculture Minister Henri Nallet said the ban would take effect Thursday and would continue "until we obtain satisfactory guarantees from the British authorities" on the safety of British beef.

The decision to suspend all imports of live animals and carcasses of both beef and veal was aimed at "reassuring French consumers that the meat they buy is free of all infection."

He stressed that no mad cow disease had been discovered in France and that the "conservative" measures taken by France were aimed at ensuring that it did not occur here.

Mr. Nallet said that it had been an "extremely difficult and rare decision " and that France had informed both the British and European Economic Community authorities of the move.

France imported some 65,000 tons of beef and 158,000 cows' and calves' heads from Britain last year. In the first three months of this year, imports totalled 15,000 tons of beef and 34,000 heads, according to official figures.

There are fears that bovine spongiform encephalopathy (BSE) can be transmitted to humans eating contaminated meat.

The disease has been traced to a centuries-old malady in sheep and scientists believe cows became infected with BSE as a result of eating feed made from contaminated sheep, which has since been banned.

#90150d5550 05/30/1990 ~French/German News Agency

WASHINGTON (MAY 30) - South African President Frederik de Klerk has notified the United States that he is postponing a Washington visit originally planned for June 18, apparently to avoid a controversy.

State Department officials said ''it was de Klerk's decision,'' and that the U.S. administration had in no way tried to influence him in scheduling the visit, the first of a South African leader in more than 30 years.

The U.S. government has said it made no difference which South African leader came first, but anti-apartheid groups here have said they would protest de Klerk's visit, which could embarass the Bush administration.

''Due to a controversy that has arisen in the United States as regards the possible timing of my visit in June, and also because certain important matters would require my personal attention during the next few weeks, I have decided to postpone my visit to the United States,'' de Klerk said in a statement released in Cape Town.

De Klerk had been scheduled to visit the White House ahead of black nationalist leader Nelson Mandela, who is slated for a seven-city U.S. tour June 20 to 30.

The timing was interpreted in some circles as a snub to Mandela, who was freed last February after 27 years in a South African prison.

#90150d5560 05/30/1990 ~French/German News Agency

DUSSELDORF, West Germany (MAY 30) - West German group Feldmuehle-Nobel, which Swedish paper maker Stora recently acquired, said Wednesday it was expecting profit this year of around the 1989 level of 181 million Deutsche marks (109 million dollars).

An expected fall in profit in paper-making should be compensated by an improved showing by the chemicals and explosives and foundry divisions, group president Heribert Blaschke told a press conference.

Group sales rose four per cent in the first quarter of this year to 2.3 billion Deutsche marks (1.38 billion dollars), and quarterly profit was "slightly above" that of the first quarter last year, although Mr. Blaschke did not give an exact figure.

Stora is rumoured to want to keep only the group's paper-making activities which would complement its own operation, but Mr. Blaschke said Nobel's management wanted to see the company keep its three current areas of operation.

"We have for the moment no indication that Stora intends to split the group up," he added.

Paper and cardboard currently represent some 56 percent of the group's annual sales of 9.51 billion Deutsche marks, although when Feldmuehle Nobel was introduced on the stock market in 1986 its three core activities each represented about a third of turnover.

But in profit terms the Dynamit-Nobel chemicals and explosives division and foundries concern Buderus account for 41 percent of the total, against 44 per cent for paper.

Kathmandu (MAY 30) - King Birendra of Nepal named a new nine-member constitution-writing panel Wednesday to draft a new constitution for the Himalayan kingdom on the basis of multi-party democracy under a

constitutional monarchy.

The panel is to be headed by Biswanath Upadhyay, a judge of the Nepalese supreme court. The king said in the announcement that the panel was set up at the recommendation of Prime Minister Krishna Prasad Bhattarai and had three months to draft a constitution.

The panel has also been charged with soliciting opinions on the new constitution from different political parties and other sections of Nepalese life. Its thorniest choice will be whether to make Nepal a secular state or retain its present status as a Hindu kingdom.

The announcement ends 20 days of speculation about the fate of a first constitutional panel that the king announced May 11, also to be headed by Biswanath Upadhyay. Political parties complained the king formed the first panel without consulting them.

The chairman resigned, saying it would be difficult to work in the face of the controversy, but the prime minister is believed to have requested him to come back and head the new panel.

LONDON (MAY 30) - British national news agency the Press Association and Paris-based international agency Agence France-Presse on Wednesday signed an agreement here for PA to use AFP's satellite distribution network in Britain.

Under the agreement signed by PA telecommunications chief Don Braedner and AFP deputy director general Lionel Fleury, PA will be able to use AFP's satellite system to distribute written copy and photographs to the British media.

The agreement was part of a wider cooperation between the two agencies which took concrete form in January when PA ordered from AFP its IMPACT on-screen photo editing system.

The British agency will now be able to distribute its text and photo service directly by satellite to more than 100 clients in Britain and Ireland.

The PA covers Britain and Ireland for the domestic media and for an increasing number of non-media clients. It employs 550 people, including 270 journalists and photographers.

#90150d5830 05/30/1990 ~French/German News Agency

PARIS (MAY 30) - The Paris public prosecutor on Wednesday called for five people, including a former close aide to the French economy minister, to be charged with insider trading in connection with a failed raid on bank Societe Generale.

The five also include the wife of the former president of cosmetics giant L'Oreal and 76-year-old billionaire Jean-Pierre Peyraud, reliable sources said.

The French stock exchange authorities had opened an enquiry in February last year into the circumstances surrounding the stakebuilding in the bank the previous year by Georges Pebereau, president of Marceau Investments.

Mr. Pebereau built up a stake of between 10 and 11 per cent in the bank, apparently with the support of the French socialist government, in a bid to acquire a controlling stake and break up the "core" shareholding in the bank held by interests close to the conservative opposition.

This core shareholding had been established when the bank was privatised by the previous conservative government in 1987.

Mr. Pebereau's bid failed, but in the meanwhile the price of Societe Generale stock was pushed up.

The five people named Tuesday were allegedly aware of Mr. Pebereau's plans in advance.

In addition to Mr. Peyraud, insider trading charges may be filed against Jean-Charles Naouri, the former head of the office of current Economy and Finance Minister Pierre Beregovoy and Genevieve Dalle, the wife of the former president of L'Oreal.

The other two are brothers Jean and Jean-Claude Foureau, both active in the financial and stock markets.

Mr. Peyraud is alleged to have made some 35 million francs (6.1 million dollars) on shares he bought for 300 million francs (52.6 million dollars).

Mr. Naouri had told the stock exchange enquiry into the affair that his company EURIS had bought 10 million francs (1.75 million dollars) worth of Societe Generale shares, and that he had bought 1.5 million francs' (260,000 dollars) worth on his own account.

EURIS made a profit of 1.5 million francs when it resold the shares.

#90150d5940 05/30/1990 ~French/German News Agency

JAMMU, INDIA (MAY 30) - Suspected Moslem militants shot and wounded a former state minister in Kashmir as the death toll this year in a secessionist campaign in the northern state crossed the 600 mark, officials said Wednesday.

Secessionists killed three Tuesday and Wednesday in the troubled state where Moslem militants are waging a campaign against Indian rule, the officials said in Jammu, Kashmir's winter capital.

Two gunmen stormed the home of the former Kashmiri minister, Hakim Mohammad Yaseen,Mr. Yaseen's home in Khansahib town late Tuesday and shot him, they said, adding that he had been hospitalised with bullet wounds in the stomach. Doctors said the politician was out of danger.

The Moslem politician was a minister in the cabinet of former Kashmir chief minister Gul Mohammad Shah in 1984, the government officials said.

Suspected Moslem militants also shot and killed two civilians Wednesday in Srinagar, Kashmir's summer capital and the hub of the secessionist campaign, officials said.

In a separate attack late Tuesday, Moslem gunmen killed a third civilian in Badgam district, they added.

The death toll from violence linked to the secessionist campaign this year in Kashmir has crossed the 600 mark.

TOKYO (MAY 30) - Seven companies formed by the break-up of Japan's national rail network said Wednesday their combined net profits soared 80 per cent to 160 billion yen (one billion dollars) in the year to March.

The combined operating revenue of the seven companies, put under private management in 1987 but yet to be privatised, grew four percent from a year earlier to 4,053 billion yen (25 billion dollars).

East Japan Railway Co. Ltd., which serves the Tokyo region and surrounding areas, said its net profit climbed 38 percent to 57 billion yen (361 million dollars). Operating revenue rose 43 percent to 1.736 trillion yen (11 billion dollars).

Tokai Japan Railway Co., which serves major cities in central and western Japan such as Osaka and Nagoya, said its net profit rose 89 percent to 67 billion yen (424 million dollars) on revenues totaling 1.003 trillion yen (six billion dollars), up 36 percent.

West Japan Railway Co., serving the western region, said its net profit jumped 5.6 times to 26 billion yen (165 million dollars), while its revenue rose 34 percent to 834 billion yen (five billion dollars).

Government officials are still discussing a timetable for offering to the public of shares in the seven companies, which together formed the former Japan National Railways network.

A separate government-run company known as Japan Railway Liquidation Corp. is currently selling off assets such as huge land holdings previously held by the former government corporation.

#90150d6020 05/30/1990 ~French/German News Agency

TOKYO (MAY 30) - An official advisory panel proposed in a report Wednesday that the number of foreign trainees accepted by Japan be increased sharply to some 50,000 in a year or two, officials said.

The report by the Industrial Labor Council to the International Trade and Industry Ministry said that Japan should ease restrictions on trainees from abroad, but that it needs a careful approach to the acceptance of unskilled foreign laborers.

The number of foreign trainees accepted by Japan last year rose 25.8 percent from 1988 to 29,489, according to the Justice Ministry.

The law bans unskilled foreigners from working in Japan, but illegal foreign workers in the country now total some 100,000, government sources said.

#90150d6030 05/30/1990 ~French/German News Agency

PARIS (MAY 30) - The Compagnie Financiere de Paribas and Compagnie de la Navigation Mixte agreed to bury the hatchet Wednesday, ending a battle which began when Paribas launched an abortive takeover bid for Mixte last year.

Under the agreement, Paribas is to reduce its stake from the current 40.5 percent built up during the takeover effort to 30 percent, Paribas said.

At the same time Mixte, which had built up a 12.7 percent stake in Paribas as part of its effort to fend off the bid, is to cut this back to 9.5 percent.

Each party could further reduce its stake in the other at a later stage,

but Paribas' holding in Mixte will not fall below 20 percent, while Mixte's holding in Paribas will remain at a minimum of seven percent.

Paribas said the agreement was evidence of the two groups' desire to establish a lasting relationship based on significant cross-participation.

DJIBOUTI (MAY 30) - Gendarmes in Djibouti were Wednesday holding a Somali pilot and flight engineer who diverted their military aircraft in a bid for political asylum, but it was not clear what would happen to them.

An official source said Somali Defence Minister Hussein Sheik Abdirahman was due here later Wednesday to discuss the return of the Antonov 26, its 47 passengers and the remaining four crew members.

The pilot, Colonel Mohamed Sheikh Ibrahim Yussuf, and the flight engineer, Mussa Hersi Warsama, diverted the plane off its internal Somali flight path on Tuesday. Among the passengers were a colonel in charge of north Somalia's Burao sector and 13 other soldiers.

Col. Ibrahim explained that he would not fly "kamikaze" missions over combat zones in northern Somalia, where rebels of the Somali National Movement are pitted against government troops loyal to President Mohamed Siad Barre.

Defence Minister Hussein is expected to bring another Somali pilot and flight engineer with him.

A diplomatic source had said Tuesday that Djibouti would not meet the request for asylum since it did not want to get involved in the civil war in the neighbouring country.

The Somali government on Wednesday thanked Djibouti Prime Minister Barkat Gourad Hamadou for taking a conciliatory stance on the affair.

#90150d6080 05/30/1990 ~French/German News Agency

KABUL (MAY 30) - The Afghan government charged Wednesday that it had uncovered a plan by Pakistan's military intelligence to shoot down Soviet transport planes ferrying military and food supplies to the Kabul regime.

Presidential spokesman Sarwar Yourish said the Inter-Services Intelligence (ISI) of Pakistan had ordered the Afghan resistance to attack the planes in line with an operation codenamed "Star Two."

"The ISI had directly ordered field commanders inside Afghanistan to bring down the transport planes of the Soviet Union bringing supplies to Kabul," Mr. Yourish told reporters here.

He said the government had received "reliable information from several field commanders" with whom the authorities were in contact.

Mr. Yourish could not immediately say if there had been any attempt to fire rockets at the giant Ilyushin-76 (IL-76) aircraft which fire flares when landing or taking off from Kabul to distract heat-seeking missiles.

The spokesman's remarks came as Moscow has more than doubled the daily IL-76 flights to Kabul. Since the middle of the month, 40 to 45 flights, each carrying 40 tonnes of supplies, have been arriving here compared to 15 to 20 flights earlier, diplomats here said.

An IL-76 crashed just five kilometres (three miles) from Kabul airport on March 27 killing all nine crew. It has not yet been established if the crash was due to a guerrilla Stinger rocket attack or a technical fault in the highly sophisticated transport plane, Mr. Yourish said.

A United Nations aircraft narrowly escaped a rocket attack at the Kabul airport on May 22. The airport was shut down for the entire day due to heavy rocketing in the area.

"The plan (by the ISI) is of course not only to bring down the aircraft, but to destroy them while they are on the ground. That is why there have been a lot of rockets fired around the airport area," Mr. Yourish said.

He expressed concern that U.N. aircraft, Red Cross planes and commercial airliners could be affected by the attacks.

The spokesman said the mujahedeen had also kept up a barrage of rockets on Kabul and the strategic city of Khost near the border with Pakistan in a bid to put military pressure on President Najibullah's administration.

#90150d6110 05/30/1990 ~French/German News Agency

BRUSSELS (MAY 30) - The European Economic Community (EEC) protested to Zaire Wednesday over bloodshed at the southeastern campus of Lubumbashi and asked for an inquiry into the incident, diplomats said.

Meanwhile, a coalition of nine Zairean opposition parties in Brussels said that more than 63 people were killed during the May 11 and 12 clashes between university students and government forces.

A spokesman for the exiles, Lambert Mende, said "at least" 300 members of

President Mobutu Sese Seko's personal guard attacked the students.

In addition to the death count of 63, "many more" bodies were taken away by the troops and buried in a mass grave at Gbadolite, President Mobutu's home town, he said.

President Mobutu's government, for its part, insists that one person was killed and 14 wounded in the violence. Belgian press reports give a toll ranging from 50 to 150.

A Belgian Foreign Ministry spokesman said that the Italian ambassador in Kinshasa, the Zairean capital, on Wednesday told Zaire of the Community's "deep concern" at the clashes and asked the authorities to "shed full light" on the incident.

Italy was acting on behalf of the Community as Ireland, the EEC's president until the end of June, does not have an embassy in Zaire.

The Belgian government last Saturday immediately froze state lending to its former colony and postponed a meeting of a joint commission that should have implemented a cooperation agreement signed only two months earlier.

These measures will remain in force, Belgium said, until there has been a full inquiry, by independent experts from the Red Cross, Amnesty International or the United Nations' Human Rights Commission.

An EEC diplomat described the Italian ambassador's move as a "protest" in the name of the Community, but declined to say whether the Community backed the Belgian demand for a full international probe.

BEIJING (MAY 30) - Fresh political unrest in China would send shock waves throughout the world, the Chinese Communist Party's top law-and-order official said Wednesday.

"Turmoil in China would affect the stability of Asia and the world," Qiao Shi told B.K. Pugo, the chairman of the Soviet Communist Party's control commission, now visiting Beijing.

Mr. Qiao, the Communist Party politburo member in charge of security issues, was quoted by the official New China News Agency four days before the first anniversary of the crushing of student-led democracy protests in Beijing.

"For the sake of smooth development of reform and opening to the outside world, Chinese does not favor turmoil," he told his Soviet guest at the

Great Hall of the People.

"Nothing can be achieved with turmoil," he added.

Chinese authorities are expected to step up security in Beijing this weekend to deter any acts of dissent marking the June 4 crackdown on what the Communist Party regards as a "counter-revolutionary rebellion."

ANKARA (MAY 30) - Turkey has invited senior Syrian and Iraqi officials here next month to discuss plans to share the waters of the Euphrates River, which flows through all three countries, the Foreign Ministry said Wednesday.

A ministry statement said the invitations for the June 26-27 meeting had been sent by Land Management Minister Cengiz Altinkaya to his counterparts in Syria and Iraq, who were not identified.

It said the talks would be part of efforts begun in 1983 to arrive at a formula for water-sharing.

Turkey, Syria and Iraq have been trying for three decades to reach agreement on the issue. Damascus and Baghdad, ordinarily bitter antagonists, last January criticized a month-long diversion of the river by Ankara to begin filling the huge Ataturk Dam in southeastern Turkey.

PARIS (MAY 30) - The new European Bank for Reconstruction and Development should be involved in all major private and public projects in central and eastern Europe, its future president said here Wednesday.

Jacques Attali told a press conference the day after the 42 founding members of the bank signed the statutes bringing it into being that the new institution should be both "a very major bank headed by the best professionals to be found" and a concern "with a strong political dimension" working for the service of peace in Europe.

The bank, set up to help reforming Eastern European countries, had the "historic task of accompanying more than 400 million people towards democracy and a market economy," he said.

It should be "a catalyst and an active element in all private and public projects" in Eastern Europe.

Mr. Attali said that the planned division of loans with 40 per cent for the public sector and 60 per cent for private enterprise was a "reasonable balance" given the need for massive privatisation in the former communist bloc.

He also said that once the bank officially became functional, after its statutes had been ratified by two thirds of founder members, he would set up subsidiaries, not simply representative offices, in each of the seven countries it is designed to help.

But he stressed that the bank's success would depend above all on the quality of the people working for it, who should be chosen principally on professional grounds although he acknowledged that there would have to be "a certain balance" of representation between the founding members.

Mr. Attali said he wanted to avoid a big bureaucracy and would be aiming to set up "the smallest team possible" which would be able to take "very rapid decisions."

A first team of a dozen people would be formed in Paris and in London, where the bank is to be headquartered, in the coming weeks, to choose offices, draw up the bank's organisation and administrative system and recruit staff.

This work should be complete by the autumn, when the bank's leadership would begin considering the first projects that it could assist.

NEW YORK, UNITED NATIONS (MAY 30) - U.N. Secretary General Javier Perez de Cuellar ordered the immediate evacuation Wednesday of U.N. personnel from Liberia and expressed deep concern over an attack by uniformed soldiers on the U.N. office in Monrovia.

The secretary general's spokesman, Francois Giuliani, said Mr. Perez de Cuellar sent a telegram to Liberian President Samuel Doe demanding that he guarantee the safety of civilians who had sought refuge in the U.N. office.

He was reacting to an attack overnight on the office by several men wearing army uniforms who killed a guard and took away about 30 of the civilian refugees.

The attack was aimed at several hundred members of the Gio and Mano tribes who have taken refuge at the U.N. mission here in face of numerous killings and abductions in recent days.

The Gio and Mano tribes are said to make up the bulk of the rebel National

Patriotic Front of Liberia, which is trying to overthrow Gen. Doe.

The U.N. representative in Liberia, Michael Heyn, said he had reported the "unbelievable" attack to U.N. headquarters in New York and was also complaining to Gen. Doe.

Mr. Giuliani said Mr. Heyn and the 10 other U.N. employees still in Monrovia were being evacuated to Dakar, Senegal. Fifty-seven other U.N. employees had already been withdrawn due to escalating fighting between Gen. Doe's forces and the rebels led by former civil servant Charles Taylor.

BRUSSELS (MAY 30) - President Denis Sassou N'Guesso of Congo has sent men of his personal guard to Gabon to help his embattled father-in-law, President Omar Bongo, a Brussels-based African human rights group said Wednesday.

An unknown number of the Congolese presidential guard were dispatched Tuesday from the town of Oyo to Port-Gentil, where Gabonese forces are battling anti-government protestors, a spokesman for the African Charter for the Respect of Human Rights and Peoples (CIRAC) said.

"The Congolese troops are taking part in the repression," the spokesman added.

Sources in Gabon said late Wednesday two civilians and a soldier had been killed in the clashes, and six injured.

JAKARTA (MAY 30) - Indonesian Foreign Minister Ali Alatas said Wednesday he will be visiting China from July 1-3 to discuss with his counterpart Qian Qichen when and how the two countries' diplomatic ties can be normalised.

He said the announcement of the normalisation would not take place before the two foreign ministers had reported the results of their Beijing talks to their respective heads of government.

''Hopefully, the announcement can be made before the end of this year,'' Ali noted.

He and Qian would sign a document on the agreement concerning Indonesia's debt payments to China amounting to some 84 million U.S. dollars.

The two countries established diplomatic relation in 1950, but these were suspended by Jakarta in 1967 following an aboritve communist coup two years earlier.

Ali said Indonesia had also set up trade relations with Taiwan in 1950 and that these still existed.

He said Indonesia maintained its one China policy, and therefore there was no change whatsover regarding its relations with Beijing or Taipeh.

The loans from China were allocated during the administration of President Sukarno prior to the 1965 communist coup attempt.

DAMASCUS (MAY 30) - Egyptian President Hosni Mubarak arrived here late Wednesday on a surprise visit at the end of an emergency Arab summit in Baghdad boycotted by Syria, officials said.

Mr. Mubarak, accompanied by Foreign Minister Esmat Abdel Meguid and his political advisor Osama el-Baz, immediately held talks with President Hafez al-Assad and other senior officials, the officials said.

The two presidents then met alone. Informed sources said Mr. Mubarak wanted to inform Mr. Assad of the results of the summit, which closed hours earlier with a final statement condemning the United States for its support of Israel.

Syria, which has longstanding ideological differences with Iraq, stayed away from the summit, saying it was a propaganda exercise for Baghdad and charging that the meeting had been inadequately prepared.

King Hussein of Jordan meanwhile returned to Amman, saying he was satisfied with a summit that he described as "one of the most successful."

Arab leaders in their statement expressed solidarity for Jordan and responded positively to an impassioned appeal by the king for financial assistance, though without specifying the nature or amount of the aid.

"I am confident my Arab brothers will respond positively to our needs, but I can't give you any figures," King Hussein told the press on arrival.

The summit statement described the settling of Jewish immigrants in the Israeli-occupied territories as a "direct threat to Jordan and therefore to the Arab world" and urged the United Nations to guarantee this does not occur.

HARARE (MAY 30) - Zimbabwe's beef industry, once the backbone of the economy, is facing a "bleak" future as a result of drought, outbreaks of foot-and-mouth disease and government land resettlement plans, experts here say.

A serious outbreak of foot-and-mouth in April last year lost Zimbabwe the European Economic Community export market and cost the country some 100 million Zimbabwe dollars (40 million U.S.) in desperately-needed foreign exchange.

John Brown, president of the Commercial Farmers Union, also sees the land ownership issue as a contributing factor to the dwindling beef industry.

One of the burning issues which led tens of thousands of black nationalist guerrillas to take up arms against the country's white ruling minority, it began smouldering again last year.

Interest in the issue was rekindled by the fact that entrenched clauses in a British-brokered constitution effectively limiting the ability of Robert Mugabe's government to acquire privately-owned land, expired on Zimbabwe's 10th independence anniversary in April this year.

The former guerrilla leaders who now rule the country are bringing pressure to bear on some 4,500 mainly white commercial farmers who own nearly 30 per cent of the land in a country of 10 million people.

"Although the resettlement programme has had no consequences on the commercial farmers ability not only to maintain but increase production in most of the agricultural commodities, the reverse has been the case of beef production where the more hectares of grass you have the more beef cattle you produce," said Mr. Brown.

He said the resettlement scheme had led to a drastic reduction of potential beef for marketing.

NEW DELHI (MAY 30) - U.S. Congressional leader Stephen J. Solarz and Prime Minister Vishwanath Pratap Singh held talks here Wednesday on easing military tensions between India and Pakistan over Kashmir.

Mr. Solarz, who flew in from Pakistan, went straight into talks with the Indian premier and later with other leaders, a U.S. embassy spokesman and

Indian officials said.

The two politicians discussed steps to reduce tension between the two neighbours on Kashmir and "shared concern over the deteriorating situation in the subcontinent," an Indian official said.

A government spokesman said Mr. Solarz also met with External Affairs Minister Inder Kumar Gujral but did not elaborate on any of the talks.

Mr. Solarz also met Home Minister Mufti Mohammad Sayeed, a Kashmiri Moslem, the officials said but did not specify whether Kashmir figured in their talks.

The U.S Congressman is scheduled to meet Minister of State for Defence Raja Ramanna on Thursday, the spokesman said.

While in Pakistan, Mr. Solarz, who heads the house subcommittee on Asian and Pacific Affairs, was quoted as saying he was seeking ways to reduce tension between New Delhi and Islamabad over the Kashmir dispute.

Mr. Solarz was also scheduled to continue his talks "with a wide cross-section of people" Thursday before leaving for a one-day visit to Nepal on Friday, the U.S. embassy spokesman said.

India earlier this month told special U.S. presidential envoy Robert Gates that New Delhi considered the Kashmir dispute an internal affair and ruled out the possibility of mediation by any country or party.

Military tension between India and Pakistan has soared with reports that both sides were amassing troops and armour on their common border, as Kashmiri Moslem militants are stepping up a violent campaign for secession.

The two neighbours have fought two of their three wars since 1947 over Kashmir, the northern third of which is controlled by Pakistan.

#90150d6790 05/30/1990 ~French/German News Agency

NAIROBI (MAY 30) - Kenyan President Daniel arap Moi reacted angrily Wednesday to a clergyman's claim that seven people including a baby were killed when city authorities bulldozed a Nairobi shanty town last week.

In a clear attack on Reverend Peter Njenga, who reported the killings, Mr. Moi accused some church leaders of "betraying their own country" by giving false information to foreign journalists, the official Kenya News Agency said. The president was addressing a rally in Kisumu, western Kenya.

Mr. Moi has criticised the "inhuman approach" of guards backed by riot

police who brutally evicted some 2,000 shanty dwellers from the Muoroto slum here Friday, but has denied the reported killings.

Squatters were moving back to the area Wednesday, rebuilding their makeshift homes.

#90150d6870 05/30/1990 ~French/German News Agency

JOHANNESBURG (MAY 30) - African National Congress deputy president Nelson Mandela, recuperating in a clinic here after minor surgery, Wednesday denied rumours he was suffering from cancer.

A statement signed by Mr. Mandela and Park Lane Clinic general manager Dr. Gordon Cohen said the ANC leader "was admitted ... May 27 for a routine checkup and during his stay underwent minor surgery on May 28 for a condition neither of long-term consequence nor in any way related to malignancy in any form whatsoever."

The 71-year-old Mr. Mandela's surgery would not delay his seven-week tour of North America, Europe, and Africa, due to begin Monday, the statement said.

He "is enjoying a much deserved rest" prior to the trip, it said, adding that Dr. Cohen was "entirely satisfied with the condition of (Mr. Mandela's) health."

Mr. Mandela, freed from a life sentence after more than 27 years on February 11, has a history of urological problems and in November 1985 had his prostate gland removed.

Since being released, he has followed a punishing schedule of visits abroad, local rallies and a string of meetings with political and business leaders.

MOSCOW (MAY 30) - French President Francois Mitterrand has called for negotiations between Latvia and the Soviet Union to resolve the secession dispute, Interfax, a Radio Moscow news digest reported here Wednesday.

Quoting the Baltia news agency in Riga, Interfax said Mr. Mitterrand had stressed in a letter to Latvian President Anatolijs Gorbunov that France had not recognized the Soviet annexation of the three Baltic republics -- Lithuania, Latvia and Estonia -- in 1940.

"Lithuania's rights to independence are beyond doubt," Mr. Mitterrand said

in his letter, which constituted an answer to one earlier sent to him by Mr. Gorbunov.

"However, there is a historically complicated situation. Many ties have been established and they cannot be crudely severed without a risk to all. Therefore negotiations seem to be the sole acceptable way of handling crucial juridical, economic and political problems," Interfax quoted him as saying.

Mr. Mitterrand suggested that Latvia also seek a negotiated settlement with the Soviet Union.

Mr. Mitterrand and West German Chancellor Helmut Kohl had earlier written to Lithuanian President Vytautas Landsbergis, suggesting he suspend "the effects of the declaration of independence" in a bid to get negotiations going with Moscow.

The French Embassy in Moscow could not immediately confirm the contents of the letter.

RANGOON (MAY 30) - Burma's military will continue to rule the country until power can be handed over to a constitutional government "according to law," General Saw Maung, leader of the ruling junta, said here Wednesday.

In his first speech since Sunday's elections, in which the opposition National League for Democracy (NLD) won a landslide victory, Gen. Saw Maung told high-ranking officials gathered at the defense ministry he had kept his promise to hold free and fair elections.

In the speech, which was read by a newscaster on national television, Gen. Saw Maung said "until a new government is formed and we have handed over power according to law, our task of preserving law and order will continue."

The junta -- officially named the State Law and Order Restoration Council (SLORC) -- seized power after crushing a nationwide democracy movement in September 1988, but pledged to hold multi-party elections after restoring order in the country.

Gen. Saw Maung stressed that even after the SLORC had been disbanded, the military would continue to safeguard Burma's national unity and sovereignty.

In a warning analysts described as ominous, Gen. Saw Maung said the

military would allow the country to "go through the experience of 1988 again" and "crush any organization or group which attempts to endanger the nation."

He also warned service personnel and state employees to stay away from politics. "Now that you have been given the chance to vote freely without intimidation or coercion you should remain strictly apolitical," he said.

Those who voted for the winning party should refrain from gloating to avoid friction, he said, adding "win or lose, keep your feelings to yourself and attend to your own duties."

#90150d7480 05/30/1990 ~French/German News Agency

KARACHI (MAY 30) - Prime Minister Benazir Bhutto Wednesday appealed for public cooperation as snipers killed 24 more people in continuing ethnic-political violence in Karachi, Pakistan's largest city.

More than 100 people have died in Karachi since passions flared over the police shooting of nearly 60 ethnic Mohajirs in Hyderabad city to the north on Sunday.

Sindh has been experiencing a ''mini insurgency'' for some months because of deepening hostility between the Mohajir settlers and Sindhi nationalists over shrinking job opportunities and intensifying polarisation in the country's politics.

Prime Minister Benazir Bhutto, under attack from all sides for the lawlessness in her home province, visited Hyderabad Wednesday and called for an all-party action committee to control the situation.

She appealed to the press and politicians to work for brotherhood and block the cycle of violence, saying: ''If you want, please join us.''

Troops and paramilitary forces called to restore order in the two cities of the long-troubled Sindh province have enforced a strict curfew in riot-torn districts, and streets normally full of life and bustle were eerily deserted.

Continuous tension has turned Karachi, a city of seven million inhabitants, into a ghost town, with all businesses and educational institutions closed for fear of terrorist attacks.

#90150d7550 05/30/1990 ~French/German News Agency

MOSCOW (MAY 30) - Boris Yeltsin, the radical communist reformer elected

to the powerful presidency of the Russian parliament, said Wednesday that the Russian federation should declare its sovereignty within the next 100 days.

Speaking at a televised press conference here, Mr. Yeltsin, whose election Tuesday was seen as a major challenge to Soviet President Mikhail Gorbachev,
also said the Soviet government should resign.

The republics "had to defend themselves from the diktats of the centre," he said, accusing the "centre" of confusion in its economic policy.

"Five months ago, they put forward one programme ... Now they're putting forward another with very unpopular measures which will raise prices.

"I think the government should resign," he said.

Mr. Yeltsin, the 59-year-old populist leader of enormous tracts of Soviet territory, also envisaged "direct treaties" with the other 14 republics of the Soviet Union, "in the widest range of domains: economic, trade, scientific,
cultural, national and so on."

He argued that the role of the centre should be restricted to defence, security and "coordinating the achievement of federal programmes approved by the republics."

"Russia will pay for a job precisely what the job costs Russia," Mr. Yeltsin said.

He did not imply a break with Soviet central authority -- Mr. Gorbachev last week charged him with seeking to "separate Russia from socialism" and break up the Soviet Union -- only a "considerable reduction" of its powers
which would still "be great."

"In the constitution, there is a right to sovereignty. I don't say that we must leave the union, but the union must know that we can do it," he said. "One must first find compromises."

"Russia will be independent in all questions. The laws of the Russian federation will take precedence over those of the union and the constitution of the Russian federation will take precedence over that of the union," he said.

Asked about the risks of a constitutional crisis between Russia and the union, Mr. Yeltsin said: "If the centre breaks its relations with Russia what would it be able to rule?"

"One has to abandon the dogma of a strong centre. The stronger the republics,
 the stronger the centre," he said.

He added that he had written to both Mr. Gorbachev and Lithuanian President Vytautas Landsbergis calling for an opening of negotiations between Moscow and the breakaway Baltic republic.

Mr. Yeltsin acknowledged there had been personal disagreements with Mr. Gorbachev, notably since 1987 over "the tactic for perestroika."

He said that the only people to have congratulated him on his election Tuesday were the heads of the Supreme Soviet and the two houses of the Soviet parliament.

"I heard congratulations of a different kind from Canada," he said in a further jibe at Mr. Gorbachev, who was in Ottawa on his way to a summit in the United States.

Mr. Yeltsin had also disagreed with the Soviet leader over the role of the communist party and the introduction of a multi-party system.

"But most of these questions are now resolved," he said, adding that he wished to have a "working relationship" with Mr. Gorbachev.

The communist party recently renounced its monopoly on power and the Soviet parliament was to discuss this week a bill allowing the setting up of other political parties.

COLOMBUS, OH (MAY 30) - Honda is to build a new facility at a cost of 27 million dollars in the state of Ohio to expand its research and development operation, the company announced Wednesday.

The expansion is to increase Honda's ability to assist U.S. suppliers in developing parts of Honda products made in Canada and the United States, the company said.

The new facility "continues Honda's strategy to become a self-reliant motor vehicle company in the United States," said Masaru Otabe, president of Honda R and D North America.

The first Honda product to be designed, developed and engineered in the United States -- the 1991 Accord Wagon -- is to be made exclusively in the United States and will be exported to world markets.

The expansion could boost employment at R and D North America from 300 nationwide to 500, the company said.

CAIRO (MAY 31) - Six people died and 54 were injured on Wednesday when a train smashed into a military lorry which had got stuck on a level crossing on the main line between Cairo and the coastal city of Alexandria the Egyptian news agency MENA said.

The agency said the train had destroyed the army vehicle, whose driver had ignored warnings from railway officials and police not to try and cross the track.

It was feared that the final death toll could be greater than six, as many of the injured were in a critical condition.

The accident happened at the town of Touk, 45 kilometres (28 miles) north-west of Cairo. The locomotive and two wagons came off the tracks as a result of the impact, and traffic was later delayed as a result.

MENA said normal services were expected to resume on the line early on Thursday.

#90150d8490 05/30/1990 ~French/German News Agency

CHARTRES, FRANCE (MAY 31) - A 21-year-old Canadian woman was found dying near a road south of Paris on Wednesday, after having apparently been raped and beaten about the head, gendarmerie officials said here.

The woman, who died shortly after having been found by gendarmes, was named as Marie-France Desmeules. Her home address was not given.

She was found near the main road between Chartres and the western town of Le Mans after a passing lorry driver told gendarmes that he had seen two people involved in a struggle.

Miss Desmeules had reportedly recently been living in Paris.

#90150e0006 05/30/1990 ~Latin America New Agency

BOGOTA (MAY 30) - Colombian president-elect Cesar Gaviria has vowed to continue peace talks opened last week by the incumbent government with the country's third-largest guerrilla group, the Maoist "People's Liberation Army" (EPL).

Following a meeting Tuesday with outgoing President Virgilio Barco, Gaviria said he hoped the EPL would follow the path taken by the former M-19 rebel group, which emerged as the country's third most-voted political party three months after disbanding.

On May 23, the EPL signed an agreement with Barco's special envoy Rafael Pardo to begin negotiations on ending its 13-year-old insurgency under similar terms as those offered to the M-19.

The preliminary accord was reached after the Army inflicted heavy losses on the EPL during a sweep through northwestern Colombia in which 49 rebels were killed and five of their main bases were destroyed.

Only one of the five guerrilla groups still active in Colombia, the pro-Cuban "National Liberation Army" (EPL) has ruled out the possibility of entering into talks with the government.

#90150e0010 05/30/1990 ~Latin America New Agency

MADRID (MAY 30) EFE - The Spanish government Wednesday announced that it

was to close down an ageing nuclear plant located on the country's Mediterranean coast which caught fire last year causing Spain's worst nuclear accident.

Industry and Energy Minister Claudio Aranzadi told Congress' Industry Commission that the government had decided against reopening the Vandellos I plant given the high costs of repairing and modernizing the installations.

He denied that the ministry's decision not to reopen Vandellos I, the oldest nuclear plant in Spain, was because the station posed a safety threat.

Aranzadi said reopening Vandellos I would require an investment of at least pts 33 billion (dlrs 330 million) in order to meet requirements laid down by the Nuclear Safety Council (CSN), the industry's watchdog organization.

Last October a hydrogen leak triggered a fire and a potentially catastrophic breakdown of the cooling system inside the station, located 100 km south of the northeastern port city of Barcelona.

Clouds of smoke were seen coming from the nuclear plant, panicking local residents.

The CSN report carried out after the accident said safety standards at the plant had been inadequate and suggested that there could also be +signficant design faults+ at the station.

It described the accident as the worst in Spain's nuclear history.

Last October's scare sparked numerous protests by local residents and enviromental groups, who have been pushing the government of Socialist Prime Minister Felipe Gonzalez to shut the plant.

The enviromental group Greenpeace and other ecology organizations Wednesday described the closure of the plant as +very positive+ and said they hoped the move would mark a change in the government's energy policies.

Local residents also celebrated the news.

Vandellos I, considered the most important nuclear power station in Europe when it opened in 1972, has been the scene of a string of minor accidents over the last eight years.

Shortly after the Chernobyl nuclear accident in the Soviet Union in 1986, the CSN ordered the Spanish-French HIFRENSA consortium which owns

Vandellos to adopt new safety regulations.

However, three of the five modifications were not made.

HIFRENSA has claimed that reopening Vandellos I would cost half of the government's predicted figure.

Spain has 10 nuclear centers.

#90150e0020 05/30/1990 ~Latin America New Agency

MADRID (MAY 30) - Guatemalan leftist rebels Wednesday urged constitutional reforms as part of a deal to join the country's political process and end their 30-year insurgency which has cost 100,000 lives.

The creation of an assembly to discuss possible reforms was one of several conditions for a pact being negotiated in El Escorial, 50kms west of Madrid, by leaders of the Guatamelan National Revolutionary Union (URNG) with Guatemala's nine political parties and the country's Commission for Reconciliation.

With all parties honoring a news balackout on the talks, the full extent of the URNG's conditions have not been made public but a member of the guerrilla delegation told EFE they included constitutional reforms, guarantees of security, and a promise from the political parties to maintain democracy in the country.

The proposed assembly would look at constitutional reforms that would ease the assimilation of the guerrillas into the political system.

"After 30 years of armed struggle that is what is now on the table," said the URNG representative. He added that there could be "some positive surprises" on Thursday in the fourth day of talks.

During the negotiations, which began Monday, there has been no decision as to whether the guerrillas should demobolize or that there should be a cease-fire.

But the parties have ratified earlier agreements recognizing the democracy of Central American governments.

Although the talks have the support of the Army, reactionary groups within the military and the extreme right -- which is expected to receive strong support in the next elections, -- are the "most notable enemies" to the talks, according to Pablo Mosanto, an URNG leader.

With the talks due to finish Thursday, a further meeting between the URNG

and business and community leaders is planned before the guerrillas open direct negotiations with the government and the Army.

HONG KONG (MAY 30) XINHUA -- THE HONG KONG GOVERNMENT DECIDED TO FURTHER IMPORT 14,700 SKILLED AND SEMI-SKILLED WORKERS TO EASE AN EXPECTED LABOR SHORTAGE.

THE DECISION WAS ANNOUNCED BY K.Y. YEUNG, SECRETARY FOR EDUCATION AND MANPOWER, AT A PRESS CONFERENCE HERE TODAY.

YEUNG SAID THAT THE SCHEME ON THE IMPORTATION OF LABOR WOULD BE EXTENDED IN VIEW OF THE PERSISTENCE OF A TIGHT LABOR MARKET AND AN EXPECTED SLOW GROWTH IN THE DOMESTIC SUPPLY OF LABOR.

IN 1988, THE GOVERNMENT ALLOWED THE IMPORT OF 3,000 WORKERS. THE CURRENT SCHEME FOR IMPORTING TECHNICIANS, CRAFTSMEN AND SUPERVISORS WOULD CONSTINUE WITH A NEW QUOTA OF 2,700 WORKERS.

IN ADDITION, A SCHEME FOR IMPORTING EXPERIENCED OPERATIVES WOULD BE ESTABLISHED, SUBJECT TO A QUOTA OF 10,000 WORKERS.

A SEPARATE SCHEME FOR THE IMPORTATION INITIALLY OF 2,000 CONSTRUCTION WORKERS WOULD ALSO BE ESTABLISHED TO FACILITATE THE NEW AIRPORT AND AIRPORT-RELATED PROJECTS.

YEUNG SAID THIS LIMITED IMPORTATION OF SKILLED WORKERS AND EXPERIENCED OPERATIVES WOULD BENEFIT THE LOCAL ECONOMY AND THE COMMUNITY AS A WHOLE BY RELIEVING LABOR SHORTFALLS IN CRITICAL AREAS AND ALSO BY COMPLEMENTING CAPITAL INVESTMENT.

"THERE WILL BE NO LARGE SCALE IMPORTATION OF UNSKILLED LABOR," HE ADDED.

MANILA (MAY 30) XINHUA -- THE PHILIPPINE CABINET TODAY AGREED IN PRINCIPLE TO ADOPT A SWEEPING ECONOMIC REFORM PROGRAM AIMED AT RESOLVING THE COUNTRY'S SOCIO-ECONOMIC PROBLEMS.

IN A SPECIAL CABINET MEETING CALLED BY PRESIDENT CORAZON AQUINO IN THE PRESIDENTIAL PALACE, THE CABINET WAS BRIEFED ON THE TEN-POINT MACRO-ECONOMIC POLICY PACKAGE PROPOSED BY FINANCE SECRETARY JESUS ESTANISLAO.

FINANCE SECRETARY ESTANISLAO REVEALED IN AN INTERVIEW THAT AT LEAST EIGHT AREAS OF CONCERN NEED A "LOT OF DECISIONS SOON." THESE ARE THE FISCAL SECTOR, MONETARY MANAGEMENT, FOREIGN EXCHANGE MARKET LIBERALISM, TRADE IMPROVEMENT, FOREIGN INVESTMENTS, POVERTY ALLEVIATION, COUNTRYSIDE AGRO-INDUSTRIAL DEVELOPMENT, DECENTRALIZATION AND BUREAUCRATIC REFORMS.

"THE PRESIDENT HAS DECIDED TO GO FOR A MAXIMUM EFFORT THIS TIME...AND COME OUT WITH A DEFINITE AGENDA UNTIL THE END OF HER TERM," ESTANISLAO SAID.

PRESS SECRETARY TOMAS GOMEZ TOLD REPORTERS IN A NEWS BRIEFING THAT DUE TO THE URGENCY OF ECONOMIC REFORM, MRS. AQUINO WILL CALL ANOTHER SPECIAL CABINET MEETING ON SATURDAY TO THRESH OUT THE DETAILS OF THE ESTANISLAO'S PROPOSALS.

MEANWHILE, EXECUTIVE SECRETARY CATALINO MACARAEG ASKED VARIOUS DEPARTMENT HEADS TO DRAFT THEIR RESPECTIVE RECOMMENDATIONS WHICH CAN BE TRANSLATED INTO NATIONAL MEMORANDUM ORDERS TO FURTHER SPEED THE DELIVERY OF BASIC SERVICES.

MEXICO CITY (MAY 30) XINHUA - LEADERS OF SALVADORAN GUERRILLAS AND SOCIAL MOVEMENTS MET HERE TUESDAY TO CONTINUE PEACE NEGOTIATIONS AIMED AT PUTTING AN END TO THE NATION'S CIVIL WAR.

MEMBERS OF THE REBEL FORCE'S GENERAL COMMAND, HEADED BY COMMANDER SHAFIK JORGE HANDAL, ATTENDED THE TALKS ALONG WITH DELEGATES FROM THE PERMANENT

COMMISSION FOR THE NATIONAL DEBATE FOR PEACE (CPDN), AN ORGANIZATION THAT COMPRISES 73 DIFFERENT SOCIAL MOVEMENTS IN EL SALVADOR.

DURING THE CLOSED-DOOR MEETING, REPRESENTATIVES OF THE REBEL FARABUNDO MARTI NATIONAL LIBERATION FRONT (FMLN) UPDATED CPDN MEMBERS ON PROGRESS MADE IN NEGOTIATIONS IN CARACAS.

LAST WEEKEND TOP FMLN MEMBERS MET IN CARACAS WITH REPRESENTATIVES OF NINE OF EL SALVADOR'S MAJOR POLITICAL PARTIES TO DISCUSS POSSIBLE SOLUTIONS TO THE DECADE-LONG CONFLICT.

PEACE TALKS HAVE BEEN TAKING PLACE ON THREE DIFFERENT FRONTS, BETWEEN THE REBELS AND THE GOVERNMENT, BETWEEN THE REBELS AND THE POLITICAL PARTIES AND MOST RECENTLY BETWEEN THE REBELS AND THE SOCIAL MOVEMENTS.

ARRIVING IN MEXICO CITY FROM CARACAS, HANDAL SAID THAT THE FMLN PLANS TO PROPOSE TO THE ADMINISTRATION OF PRESIDENT ALFREDO CRISTIANI THAT THE POLITICAL PARTIES AND SOCIAL MOVEMENTS PARTICIPATE DIRECTLY IN FUTURE NEGOTIATIONS.

#90150h0144 05/30/1990 ~Chinese News Agency

UNITED NATIONS (MAY 30) XINHUA - THE U.N. DISARMAMENT COMMISSION HAS DECIDED TO ASK THE U.N. GENERAL ASSEMBLY TO DECLARE THE 1990S AS THE THIRD DISARMAMENT DECADE SO AS TO CONTINUE THE INTERNATIONAL EFFORTS IN SEEKING LASTING PEACE AND SECURITY OF THE WORLD.

IN ADOPTING A DRAFT DECLARATION AT THE END OF THE COMMISSION'S 1990 SESSION LATE LAST NIGHT, THE COMMISSION DECIDED TO SUBMIT THE DRAFT DECLARATION OF THE 1990S AS THE THIRD DISARMANENT DECADE TO THE U.N. GENERAL ASSEMBLY'S ANNUAL SESSION IN SEPTEMBER FOR APPROVAL.

THE DRAFT DECLARATION, A RESULT OF INTENSIVE DELIBERATIONS AT THE COMMISSION'S THREE-WEEK SESSION, SAYS THAT IN A WORLD OF GROWING INTERDEPENDENCE, IT IS "ESSENTIAL" FOR THE INTERNATIONAL COMMUNITY TO STIMULATE AND DEEPEN AWARENESS OF THE COMMON INTERESTS OF THE WORLD IN ACHIEVING DISARMAMENT AND STRENGTHENING INTERNATIONAL PEACE AND SECUITY.

IT SAYS THAT ALTHOUGH THE LATTER PART OF THE LAST DECADE SAW A NOTICEABLE IMPROVEMENT IN INTERNATIONAL RELATIONS, THE SPECIFIC GOALS OF THE SECOND DISARMAMENT IN THE 1980S WERE NOT FULLY REALIZED.

CITING THE CHALLENGES FACING THE INTERNATIONAL COMMUNITY IN THIS DECADE AS "ENORMOUS," THE DRAFT SAYS THAT THE SOLUTION OF THESE DIFFICULT AND COMPLEX ISSUES WILL REQUIRE THE POLITICAL WILL OF STATES IN CONDUCTING DIALOGUE AND NEGOTIATIONS, AND PROMOTING INTERNATIONAL COOPERATION.

IT SETS A NUMBER OF GOALS FOR THE THIRD DISARMAMENT DECADE, INCLUDING EARLY REDUCTION IN AND EVENTUAL ELIMINATION OF NUCLEAR WEAPONS WITH A COMPREHENSIVE NUCLEAR-TEST BAN, CLOSER COOPERATION IN THE PEACEFUL USE OF NUCLEAR ENERGY AND PREVENTION OF AN ARMS RACE IN OUTER SPACE.

THE DRAFT ALSO CALLS FOR THE STRENGTHENING OF NAVAL CONFIDENCE -BUILDING MEASURES, REDUCTIONS IN ARMS AND ARMED FORCES IN ALL AREAS OF THE WORLD AND THE EARLIEST CONCLUSION OF A CONVENTION ON THE PROHIBITION OF THE DEVELOPMENT, PRODUCTION, STOCKPILING AND USE OF ALL CHEMICAL WEAPONS AND ON THEIR DESTRUCTION.

THE DRAFT ESPECIALLY POINTS OUT THAT IN THE PURSUIT OF THE FOREGOING GOALS IN THIS DISARMAMENT DECADE, THOSE COUNTRIES WITH THE LARGEST MILITARY ARSENALS, NAMELY THE UNITED STATES AND THE SOVIET UNION, SHOULD BEAR "THE PARTICULAR RESPONSIBLITY."

IT ALSO RECOMMENDS THAT THE RESOURCES FREED THROUGH DISARMAMENT BE USED FOR THE BENEFIT OF A BALANCED WORLD DEVELOPMENT IN ORDER TO NARROW DOWN THE ECONOMIC IMPARITIES BETWEEN THE DEVELOPED AND DEVELOPING COUNTRIES.

SINCE THE DRAFT DECLARATION HAS BEEN ADOPTED BY THE DISARMAMENT COMMISSION U.N. DIPLOMATS SAID THAT THE APPROVAL OF THE DECLARATION BY THE GENERAL ASSEMBLY IS "ONLY A MATTER OF PROCEDURE."

#90150k0062 05/30/1990 ~Japanese News Agency

TOKYO (MAY 30) KYODO - JAPAN'S TRADE WITH THE SOVIET UNION DWINDLED DRASTICALLY IN APRIL, HIT BY THE DETERIORATION OF THE COUNTRY'S FOREIGN-CURRENCY RESERVES AND ITS DOMESTIC DEMAND-ORIENTED ECONOMIC POLICY.

THE JAPAN TRADE COUNCIL SAID EXPORT CONTRACTS BY JAPAN'S 18 MAJOR TRADING HOUSES WITH THE EASTERN BLOC, EXCLUDING CHINA, MOST OF WHICH ARE WITH THE SOVIET UNION, PLUNGED 26.3 PERCENT FROM A YEAR EARLIER.

THIS CONTRASTED WITH A 4.4 PERCENT YEAR-ON-YEAR DROP IN MARCH AND A 14.2 PERCENT RISE IN FEBRUARY.

IMPORT CONTRACTS WITH THE AREA ALSO SLOWED, POSTING A 27.0 PERCENT DECLINE THE COUNCIL SAID.

TRADE WITH CHINA ALSO REMAINED IN A SLUMP DUE TO THE LINGERING IMPACT OF THE TIANANMEN SQUARE INCIDENT LAST JUNE, WHICH HAS COOLED THE ECONOMIC RELATIONS BETWEEN THE TWO COUNTRIES. EXPORT CONTRACTS FELL 33.9 PERCENT AND IMPORTS WERE OFF 27.4 PERCENT.

BY CONTRAST, OVERALL TRADE CONTRACTS WERE BRISK, SHOWING A DOUBLE-DIGIT GROWTH FOR THE SECOND CONSECUTIVE MONTH. IMPORT CONTRACTS SURGED 20.4

PERCENT TO 849.7 BILLION YEN, WHILE EXPORTS CAME TO 1,359.6 BILLION YEN, A 64.5 PERCENT JUMP.

SOUTHEAST ASIAN AND MIDDLE EAST COUNTRIES WERE MAJOR BUYERS OF JAPANESE PRODUCTS. A BULKY IMPORT CONTRACT WITH A U.S. AIRPLANE COMPANY LARGELY CONTRIBUTED TO THE UPSURGE IN OVERALL IMPORTS, THE COUNCIL SAID.

-30- 1490

#90150k0065 05/30/1990 ~Japanese News Agency

TOKYO (MAY 30) KYODO - JAPAN'S BROKERAGE HOUSES PLAN TO RESUME UNDERWRITING CONVERTIBLE BONDS AND BONDS WITH EQUITY-PURCHASE WARRANTS POSSIBLY IN JULY, BUT TO PUT OFF UNDERWRITING OF STOCKS AT LEAST UNTIL SEPTEMBER, INDUSTRY OFFICIALS SAID WEDNESDAY.

THEY SAID THE BROKERAGE INDUSTRY IS NOW HAMMERING OUT STANDARDS FOR UNDERWRITING SUCH EQUITY-LINKED FINANCING THAT INVOLVES ISSUING CONVERTIBLE BONDS, BONDS WITH WARRANTS, AND COMMON STOCKS. THEY SAID THE INDUSTRY TENDS TO CONTINUE STOPPING UNDERWRITING OF COMMON STOCKS FOR PUBLIC PLACEMENT AT LEAST UNTIL SEPTEMBER IN LIGHT OF ITS GREATER IMPACT ON THE STOCK MARKET.

#90150k0068 05/30/1990 ~Japanese News Agency

TOKYO (MAY 30) KYODO - JAPAN'S PLANT EXPORTS TOPPED 10 BILLION YEN FOR THE FIRST TIME IN SEVEN YEARS IN FISCAL 1989 ENDED MARCH 31, REFLECTING STRONG DEMAND FROM THE SOUTHEAST ASIAN AND MIDDLE EAST REGIONS, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SAID WEDNESDAY.

THE NATION'S PLANT SHIPMENTS AMOUNTED TO 12.67 BILLION DOLLARS, UP 60.4 PERCENT FROM THE 7.9 BILLION YEN POSTED THE PREVIOUS YEAR, MITI SAID IN A REPORT. THE GROWTH RATE WAS THE HIGHEST EVER.

THE MINISTRY SAID THE ROBUST SHOWING WAS ATTRIBUTABLE TO A CONTINUING ECONOMIC BOOM IN ASIA, ESPECIALLY IN THE ASEAN (ASSOCIATION OF SOUTHEAST ASIAN NATIONS) COUNTRIES, AND EFFORTS TO RESTORE THE ECONOMIES OF IRAN AND IRAQ FOLLOWING THE END OF THEIR EIGHT-YEAR WAR.

EXPORTS TO ASIAN NATIONS TOTALED 6.47 BILLION DOLLARS, UP 46.8 PERCENT, WHILE THOSE TO THE MIDDLE EAST SKYROCKETTED 636.0 PERCENT TO 3.61 BILLION DOLLARS.

ASIAN COUNTRIES ABSORBED 51.1 PERCENT OF THE TOTAL EXPORTS, DOWN 4.7 PERCENT FROM THE PREVIOUS YEAR, WHILE THE MIDDLE EAST TOOK A 28.5 PERCENT SHARE, UP 22.3 PERCENT.

DEALS WORTH MORE THAN 100 MILLION DOLLARS NUMBERED 25, NEARLY DOUBLE THE

13 IN FISCAL 1988.

THE NUMBER OF PLANT EXPORT CONTRACTS, MEANWHILE, DROPPED 4 PERCENT FROM A YEAR BEFORE TO 835, MAINLY DUE TO A DECLINE IN CONTRACTS WITH THE EASTERN BLOC NATIONS AND NORTH AMERICA.

THE MINISTRY ALSO SAID THAT JAPAN'S PLANT SHIPMENTS WILL REMAIN BRISK IN THE CURRENT BUSINESS YEAR TO MARCH 31, 1991, AS INCREASING DEMAND FOR OIL AND PETROCHEMICAL PRODUCTS AND ECONOMIC RESTRUCTURING EFFORTS IN AFRICA AND CENTRAL AND SOUTH AMERICA ARE EXPECTED TO BOOST DEMAND FOR OIL AND OTHER PLANTS.

-30- 1858

#90150k0073 05/30/1990 ~Japanese News Agency

TOKYO (MAY 30) - THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) ON WEDNESDAY OFFICIALLY NOTIFIED JAPANESE MAKERS OF DIGITAL AUDIO TAPES THAT THEIR PRODUCT MUST NOW CONFORM TO A NEW INTERNATIONAL TECHNOLOGICAL STANDARD AGREED ON LAST JUNE, MITI OFFICIALS SAID.

THE NEW RECORD-RESTRICTING SYSTEM FOR DAT WAS AGREED TO BY 12 JAPANESE PRODUCERS, THREE EUROPEAN COMPANIES, AND TWO RECORDING TRADE GROUPS. IT ALLOWS MAKERS TO PRODUCE DAT PLAYERS THAT CAN MAKE ONE COPY FROM A CD, A PRERECORDED DAT CASSETTE, OR DIGITAL BROADCAST.

THE SYSTEM, CALLED ''SERIAL COPY MANAGEMENT SYSTEM,'' HOWEVER, PREVENTS SUBSEQUENT RECORDINGS BEING DUBBED FROM THOSE RECORDINGS.

IT ALLOWS UP TO TWO GENERATIONS OF DAT COPIES FROM TRADITIONAL, OR ANALOGUE, SOURCES -- SUCH AS RECORDS OR CASSETTES -- BUT PREVENTS OWNERS FROM MAKING A THIRD COPY.

UNDER THE CURRENT RECORD-RESTRICTING SYSTEM, DAT MACHINES CANNOT POSSESS THE CAPABILITY TO MAKE ANY COPIES FROM CD PLAYERS.

DAT, LIKE ITS THRIVING TECHNOLOGICAL COUSIN THE DIGITAL COMPACT DISC OR CD CAN REPRODUCE MUSIC VIRTUALLY WITHOUT DISTORTION OR BACKGROUND NOISE.

BUT UNLIKE CDS, DAT CAN ALSO RECORD SOUNDS WITH VIRTUAL PERFECTION, A TECHNOLOGICAL FEATURE THAT RECORDING INDUSTRIES FEAR WILL LEAD TO A PROLIFERATION OF FLAWLESS COPIES OF CD MATERIAL, THREATENING THEIR BUSINESS.

THE MITI NOTIFICATION ON WEDNESDAY, ISSUED TO 37 JAPANESE PRODUCERS IN RESPONSE TO THEIR REQUEST, IS EXPECTED TO PAVE THE WAY FOR WIDESPREAD MARKETING OF DAT MACHINES.

ABOUT 80,000 DATS HAVE BEEN SOLD WORLDWIDE SINCE THE ADVENT OF THE

MACHINES AROUND 1987, ACCORDING TO MITI.

IT IS A WIDELY ACCEPTED FACT THAT DAT SALES HAVE BEEN SLOW SO FAR PRIMARILY BECAUSE OF THE RECORDING RESTRICTIONS.

-30- 1930

#90150k0075 05/30/1990 ~Japanese News Agency

FIRST QUARTER INDUSTRY OUTPUT RISES 1.8 PERCENT; LOWEST CHANGE IN 2 YEARS

TOKYO (MAY 30) KYODO - PRODUCTION AT JAPANESE FACTORIES AND MINES IN THE FIRST QUARTER OF 1990 ROSE 1.8 PERCENT FROM THE SAME PERIOD A YEAR BEFORE, POSTING THE LOWEST YEAR-ON-YEAR UPSWING SINCE THE SECOND QUARTER OF 1987, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) REPORTED WEDNESDAY.

TAKESHI INOUE, STATISTICS ANALYSIS DIRECTOR OF MITI'S RESEARCH AND STATISTICS DEPARTMENT, HOWEVER, DENIED THAT THE FIGURE INDICATES ANY DOWNTURN OF INDUSTRIAL ACTIVITIES.

THE RELATIVELY MODERATE RISE IN INDUSTRIAL PRODUCTION IN THE FIRST QUARTER WAS ''MERELY A NATURAL REACTION TO THE SHARP CLIMB IN THE FIRST THREE MONTHS OF 1989,'' WHEN THE OUTPUT SURGED 8.3 PERCENT, INOUE SAID.

COMPARED WITH THE PREVIOUS QUARTER, THE INDUSTRIAL OUTPUT IN THE JANUARY-MARCH PERIOD GREW 0.8 PERCENTAGE POINT.

SHIPMENTS DURING THE PERIOD PICKED UP 3.0 PERCENT FROM A YEAR EARLIER, AND GAINED A SHARP 2.0 PERCENT FROM THE PRECEDING THREE MONTHS, RECORDING THE HIGHEST QUARTER-TO-QUARTER RISE SINCE THE JANUARY-MARCH PERIOD IN 1989.

BUT INVENTORIES DROPPED 1.9 PERCENT FROM THE PREVIOUS QUARTER, MARKING THE FIRST QUARTERLY DECLINE SINCE THE JULY-SEPTEMBER PERIOD IN 1987.

THE STEEP RISE IN SHIPMENTS IN THE QUARTER WAS PROPELLED BY A POWERFUL 7.1 PERCENT HIKE IN SHIPMENTS FOR EXPORTS, WHICH ACCOUNTED FOR ABOUT HALF OF THE INCREASE IN OVERALL SHIPMENTS.

BUT THE SHARP EXPANSION OF EXPORTS DOES NOT SPELL THE START OF ANOTHER EXPORT SPREE, BUT ONLY SHOWS A REACTION TO THE DECLINE IN THE PREVIOUS QUARTER.

EXPORTS WILL REMAIN STABLE FOR THE TIME BEING IF THE QUARTERLY UPS AND DOWNS ARE SMOOTHED OUT, INOUE SAID.

THE OVERALL PICTURE OF THE INDUSTRIAL PRODUCTION CLEARLY SIGNALS THE CONTINUED, BUT MODERATED STRENGTH IN THE MANUFACTURING SECTORS, HE SAID.

#90150k0081 05/30/1990 ~Japanese News Agency
HONG KONG (MAY 30) KYODO - BEIJING LEADERS ARE OPPOSED TO PLANS FOR AN INTERNATIONAL AIRPORT IN THE PORTUGUESE ENCLAVE OF MACAO, SAYS A CHINESE POLITBURO MEMBER REPORTED IN THE MING PAO WEDNESDAY.

LI RUIHUAN, SPEAKING DURING A FOUR-DAY VISIT TO ZHUHAI, TOLD CITY LEADERS THAT THE NEW AIRPORT SHOULD BE BUILT IN ZHUHAI AND NOT IN MACAO, THE CHINESE-LANGUAGE DAILY REPORTED.

ZHUHAI, IN CHINA'S SOUTHERN GUANGDONG PROVINCE, IS A SPECIAL ECONOMIC ZONE. IT LIES JUST NORTH OF MACAO WHICH WILL RETURN TO CHINESE ADMINISTRATION IN 1999.

LI ALSO PROPOSED THAT ZHUHAI AUTHORITIES BEGIN WORK IMMEDIATELY ON AN INTERNATIONAL DRY-DOCK PORT, THE NEWSPAPER REPORTS.

THE PROSPECTS FOR DEVELOPMENT IN ZHUHAI ARE FAR GREATER THAN IN MACAO, LI SAID, BUT HE CONCEDED THAT CHINA'S MOST SUCCESSFUL SPECIAL ECONOMIC ZONE, SHENZHEN, WAS LIKELY TO BE ''SWALLOWED UP'' BY ITS LARGER NEIGHBOUR HONG KONG.

HONG KONG REVERTS TO CHINESE SOVEREIGNTY IN 1997. HONG KONG AND SHENZHEN ALSO BOTH HAVE PLANS FOR MAJOR NEW AIRPORTS, AND FEARS OF FUTURE OVERCAPACITY IN THE REGION MAY HAVE INFLUENCED BEIJING'S OBJECTION TO THE MACAO PROJECT, SAY ANALYSTS.

LI'S REMARKS INDICATE THE CONTINUED IMPORTANCE THAT CHINESE LEADERS PLACE ON THE SPECIAL ECONOMIC ZONE DEVELOPMENT AREAS, AS WELL AS REVEALING PART OF THEIR LONG-TERM THINKING ON THE WHOLE PEARL DELTA REGION, THE ANALYSTS SAY.

#90150k0086 05/30/1990 ~Japanese News Agency
SINGAPORE (MAY 30) KYODO - A MAJOR JAPANESE RETAILER, YAOHAN DEPARTMENT STORE CO., AND OTHER PARTNERS ON WEDNESDAY OPENED ASIA'S FIRST MEGA WHOLESALE CENTER.

CALLED INTERNATIONAL MERCHANDISE MART, THE CENTER, WHICH WILL HAVE A TOTAL AREA OF 172,000 SQUARE METERS WHEN FULLY COMPLETED NEXT YEAR, AIMS TO SERVE AS A ''ONE-STOP SHOP'' WHERE RETAILERS CAN BUY A WIDE VARIETY OF MERCHANDISE FROM ALL OVER THE WORLD.

TUESDAY'S OPENING CEREMONY, HOWEVER, MARKED THE COMPLETION OF THE FIRST PHASE OF DEVELOPMENT. OFFICIALS SAY THE SECOND PHASE, TO BE COMPLETED BY 1991, WILL ADD ANOTHER 200 SHOPS TO THE CENTER.

KAZUO WADA, CHAIRMAN OF YAOHAN AND THE INTERNATIONAL MERCHANDISE MART, SAID THE FIVE-STORY CENTER PRESENTLY HAS A TOTAL OF 225 BOOTHS FOR TENANT WHOLESALERS AND MANUFACTURERS.

OFFICIALS SAY 30 PERCENT OF THE 500 TENANTS IN THE CENTER ARE EXPECTED TO BE JAPANESE. ANOTHER 30 PERCENT ARE EXPECTED TO BE SINGAPOREAN COMPANIES AND THE REST FROM OTHER PARTS OF THE WORLD.

MERCHANDISE FROM 45 COUNTRIES WILL BE DISPLAYED AT THE WHOLESALE CENTER, OFFICIALS SAY.

YAOHAN AND ITS JOINT-VENTURE PARTNERS HAVE ALREADY INVESTED ABOUT 180 MILLION SINGAPORE DOLLARS (97.3 MILLION U.S. DOLLARS) IN THE WHOLESALE CENTER, OFFICIALS SAY.

YAOHAN HAS A 60 PERCENT STAKE IN THE MERCHANDISE MART. OTHER SHAREHOLDERS INCLUDE JAPANESE RETAILER IZUMI CO., JAPANESE HOUSEWARE MANUFACTURER LEC INC., AND YAOHAN'S SINGAPORE SUBSIDIARY, YAOHAN SINGAPORE, EACH OF WHICH HAS A 10 PERCENT STAKE.

IN ADDITION, TDB HOLDINGS, A COMPANY OWNED BY SINGAPORE'S TRADE DEVELOPMENT BOARD, HAS A 10 PERCENT STAKE.

YAOHAN OFFICIALS SAY THE MART SHOULD PULL IN 250 MILLION SINGAPORE DOLLARS IN BUSINESS IN THE FIRST YEAR. ABOUT HALF OF THAT IS EXPECTED TO BE MADE BY THE YAOHAN GROUP ITSELF.

#90150k0091 05/30/1990 ~Japanese News Agency

PARIS (MAY 30) KYODO - WEST GERMAN FINANCE MINISTER HELMUT HAUSSMANN CALLED FOR JAPANESE INVESTMENT IN THE WEST GERMAN AUTOMOBILE INDUSTRY WEDNESDAY, SAYING THERE IS NO JAPANESE DIRECT INVESTMENT IN THE FIELD, JAPANESE OFFICIALS SAID.

IN TALKS WITH KABUN MUTO, JAPANESE MINISTER OF INTERNATIONAL TRADE AND INDUSTRY, HAUSSMANN SAID JAPANESE AUTOMAKERS HAVE CONCENTRATED THEIR INVESTMENT IN BRITAIN AND SPAIN AND THAT HE WOULD LIKE TO SEE JAPANESE INVESTMENT AFTER GERMAN UNIFICATION, THEY SAID.

MUTO WAS QUOTED AS RESPONDING THAT HE WILL ENCOURAGE THE JAPANESE TO START LOCAL PRODUCTION IN WEST GERMANY.

HAUSSMANN ASSURED MUTO THAT THE PLANNED MONETARY UNION BETWEEN THE TWO GERMANYS WILL NOT CAUSE ANY PROBLEMS AS THE BUNDESBANK, THE WEST GERMAN CENTRAL BANK, WILL MANAGE MONETARY POLICY TO HEAD OFF POSSIBLE INFLATIONARY PRESSURES, THEY SAID.

THE WEST GERMAN MINISTER SAID ECONOMIC AND MONETARY UNION BETWEEN EAST AND WEST GERMANY WILL CREATE IN A BALANCED MANNER A NATION WITH MASSIVE IMPORTS, AND EXPRESSED THE HOPE THAT JAPAN WILL ALSO BECOME A BIG IMPORTING NATION, THEY ADDED.

MUTO AND HAUSSMANN ARE VISITING PARIS TO ATTEND AN ANNUAL MINISTERIAL MEETING OF THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT.

#90150k0093 05/30/1990 ~Japanese News Agency

TOKYO (MAY 30) KYODO - JGC CORP., MITSUBISHI PETROCHEMICAL CO., AND MITSUBISHI CORP. HAVE RECEIVED A JOINT 8 BILLION YEN ORDER FOR A NEW PLANT IN A STATE-OWNED CHEMICAL WORKS IN CZECHOSLOVAKIA, OFFICIALS OF THE COMPANIES SAID WEDNESDAY.

THE ORDER, PLACED BY C.Z. SOKOLOV, A CZECHOSLOVAKIAN CHEMICAL ENTERPRISE, THROUGH A FOREIGN TRADE CORPORATION TECHNOEXPORT, CALLS FOR THE BUILDING OF AN ACRYLIC ACID AND ACRYLIC ESTER PLANT IN SOKOLOV IN WESTERN CZECHOSLOVAKIA. THE PROJECT IS TO BE COMPLETED BY FEBRUARY 1995.

JGC WILL BE RESPONSIBLE FOR DETAILED DESIGN AND EQUIPMENT SUPPLY WHILE MITSUBISHI PETROCHEMICAL WILL BE IN CHARGE OF SUPPLYING BASIC DESIGNS AND PRODUCTION LICENSES.

THE NEW PLANT WILL BE BUILT NEXT TO A 20,000 TON-A-YEAR PLANT THE CZECHOSLOVAKIAN CORPORATION ORDERED FROM JGC AND MITSUBISHI PETROCHEMICAL IN 1977.

THE CHEMICALS PRODUCED AT THE NEW PLANT WILL BE SOLD IN CZECHOSLOVAKIA AND OTHER EAST EUROPEAN COUNTRIES.

#90150k0095 05/30/1990 ~Japanese News Agency

OSAKA (MAY 30) KYODO - JAPAN'S 11 MAJOR TRADING HOUSES, IN A LETTER SENT TO A SOVIET COMMITTEE ON WEDNESDAY, REJECTED A SOVIET REQUEST THAT PAYMENTS FOR TEXTILE IMPORTS BE POSTPONED FOR A YEAR, COMPANY OFFICIALS SAID.

A SOVIET COMMITTEE IN CHARGE OF IMPORTS OF TEXTILE GOODS HAS REQUESTED A CHANGE IN THE TERMS OF PAYMENT THAT WOULD ALLOW IT TO PAY FOR GOODS ONE YEAR AFTER RECEIVING THE SHIPPING ADVICE INSTEAD OF 21 DAYS AT PRESENT.

JAPAN EXPORTS SOME 230 MILLION DOLLARS WORTH OF TEXITLE GOODS TO THE SOVIET UNION A YEAR, OF WHICH ABOUT 34 MILLION DOLLARS ARE IMPORTED BY THE SOVIET COMMITTEE.

A DELAY IN SOVIET PAYMENTS FOR PART OF THE TEXTILE IMPORTS FROM JAPAN HAS BEEN SEEN SINCE THE BEGINNING OF THIS YEAR, BUT THE SOVIET UNION IS CONTINUING WITH THE PAYMENTS.

-30- 959

#90150k0101 05/30/1990 ~Japanese News Agency

ISLAMABAD (MAY 30) KYODO - THE WORLD TOURISM ORGANIZATION (WTO) WILL SEEK JAPANESE ASSISTANCE IN A STUDY ABOUT THE POTENTIAL FOR JAPANESE TOURISM IN SOUTH ASIA, THE SECRETARY GENERAL OF THE ORGANIZATION, ANTONIO ENRIQUES SAVIGNAC, SAID WEDNESDAY.

HE WAS ADDRESSING A PRESS CONFERENCE AT THE CONCLUSION OF A TWO-DAY SEMINAR ORGANIZED BY THE WTO ATTENDED BY DELEGATES FROM SEVEN MEMBER COUNTRIES OF THE SOUTH ASIAN ASSOCIATION FOR REGIONAL DEVELOPMENT (SAARC), AS WELL AS IRAN.

SAVIGNAC SAID LAST YEAR SOUTH ASIAN COUNTRIES EARNED 2 BILLION DOLLARS FROM THEIR TOURISM INDUSTRIES BUT FOR VARIOUS REASONS THE REGION HAS NOT BEEN ABLE TO DEVELOP ITS FULL TOURISM TRADE POTENTIAL.

ACCORDINGLY, HIS ORGANIZATION IS CONTACTING THE JAPANESE GOVERNMENT FOR A STUDY ABOUT THE DEVELOPMENT OF JAPANESE TOURIST TRADE WITH SOUTH ASIA, WHILE A SIMILAR STUDY FOR THE EUROPEAN TOURIST WOULD BE COMPLETED WITH ASSISTANCE FROM THE EUROPEAN COMMUNITY.

-30- 1109

#90150k0106 05/30/1990 ~Japanese News Agency

PARIS (MAY 30) KYODO - ECONOMIC MINISTERS FROM THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT KICKED OFF A TWO-DAY MEETING HERE WEDNESDAY IN A BID TO RESOLVE A DISPUTE OVER CREATING RULES ON WORLD FARM TRADE.

THE OECD GATHERING IS EXPECTED TO FOCUS ON THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS BEING HELD UNDER THE GENERAL AGREEMENT ON TARIFFS AND TRADE, IN WHICH HOW TO SCRAP FARM SUBSIDIES HAS BEEN AT THE CENTER OF SQUABBLES AMONG THE UNITED STATES AND OTHER INDUSTRIAL NATIONS.

THE UNITED STATES HAS PROPOSED ELIMINATING ALL FARM SUBSIDY PROGRAMS OVER A 10-YEAR PERIOD WHILE ALLOWING CUSTOMS TO REPLACE SUCH PROTECTIVE MEASURES, BUT THE EUROPEAN COMMUNITY HAS SAID THE U.S. PLAN IS TOO RADICAL.

JAPAN, FOR ITS PART, HAS AGREED TO LIFT PROTECTIVE MEASURES FOR FARMERS GRADUALLY, BUT HAS INSISTED ITS BAN ON RICE IMPORTS SHOULD BE MAINTAINED ON GROUNDS OF FOOD SECURITY.

THE URUGUAY ROUND, DUE FOR COMPLETION AT THE END OF THIS YEAR, IS DESIGNED TO HAMMER OUT INTERNATIONAL RULES ON TRADE IN 15 AREAS, INCLUDING AGRICULTURE, TEXTILES, AND INTELLECTUAL PROPERTY SUCH AS COPYRIGHTS AND PATENTS.

THE OECD IS A GROUP OF 24 INDUSTRIAL NATIONS, INCLUDING JAPAN, THE UNITED STATES AND KEY EUROPEAN NATIONS.

#90150m0002 05/30/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (MAY 30) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"In the very long-term, the changes we're seeing in Europe point to a long-term uptrend in European currencies relative to the dollar," says ANNE MILLS of SHEARSON LEHMAN HUTTON. However, Mills adds every trend has its aberrations. For the yen and dollar, she sees more volatility in a very narrow range, but believes the dollar will be a net gainer. (CNN "Business Morning", 5/30)

JOHN HAZELTON of MANUFACTURERS HANOVER anticipates a "Gorbi rally" for the dollar as harmonious relations between GORBACHEV and BUSH translate into a firming dollar. "We have seen some good corporate demand for dollars at these lower levels. Any time you have harmony you see a good chance of the dollar firming up. I don't see it reaching any new lows this summer." (FNN "World Business Report", 5/30)

The currency market yesterday "was generally a quiet day with the dollar climbing back from its overnight sell-off," says MARC CHANDLER, currency analyst at MMS INTERNATIONAL in Chicago. "U.S. dealers took advantage of the dip in the dollar to re-establish long positions." ("Investor's Daily", 5/30)

MARIA FIOINI RAMIREZ, president of RAMIREZ CAPITAL CONSULTANTS, thinks that interest rates have been artificially low for several years. "We have lower interest rates, going back to 1986, on expectations that we will see a balanced deficit. We never really got to see the results that the decline in interest rates was predicated on." (FNN "Marketwrap", 5/29)

Bond prices began to rise in early trading as the value of the dollar rose against the yen in the foreign exchange markets. MICHAEL MOORE, manager of government trading at CONTINENTAL BANK says the dollar "set a favorable tone for the bond market" that lasted all day yesterday. (WSJ, 5/30)

"Most [bond] market sectors are in good technical shape because institutional and individual investor demand has been strong," says JAMES KOCHAN, chief fixed income strategist at MERRILL LYNCH CAPITAL MARKETS. "But yields now are in the lower regions of the ranges consistent with the 8 1/3% federal funds. Evidence of a weak economy and concerns over credit rationing by banks eventually should prompt even a very cautious Federal Reserve to reduce the funds rate." ("Investor's Daily", 5/30)

JOE LIRO, a vice president and money market economist at S.G. WARBURG SECURITIES INC., believes that the bond market is trading in a narrow range "and there is not much that is likely to shake it out of that range until Friday" when the employment report will be released. (NYT, 5/30)

The slow growth in the nation's money supply "portends continued sluggish economic activity and lower inflation" for several months, says MICKEY LEVY, chief economist at FIRST FIDELITY BANK CORP. If the money supply continues to grow at the current slow pace, Mr. Levy believes the Fed may be forced to eventually cut interest rates in an effort to stimulate the economy. (WSJ, 5/30)

KENNETH GUENTHER, executive vice president of the INDEPENDENT BANKERS ASSOCIATION OF AMERICA, says that much of the fault for the current credit crunch lies with the government. "When regulators are being tough, bankers have to be very cautious in terms of the credit they extend," says Guenther. ("Time", 6/4)

THE ECONOMY:

"I think the leading indicators are not the leading indicators that one sort of expects them to be," says MARIA FIOINI RAMIREZ, president of RAMIREZ CAPITAL CONSULTANTS. "They're sort of lagging because they're sort of a summary of all the news for April that has been coming out already." She says that Friday's unemployment figures will be a better indicator, predicting that between 200,000 and 250,000 new jobs will have been created. (FNN "Marketwrap", 5/29)

The ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT forecasts a rise in U.S. inflation to 4.2% this year and 4.5% in 1991 from 4.1% in 1989. The organization doesn't foresee a recession in the U.S. anytime soon and predicts the U.S. economy will grow 2.3% this year and 2.5% next year after inflation. (WSJ, 5/30)

"The market is fairly comfortable with the outlook as far as the economy is concerned," says MONTE GORDON, director of research at DREYFUS CORP. "What's coming into focus, " he continues, "is that the economy is not recovering strongly, therefore, you're not developing any significant inflationary risk." Without pressure in either direction, Gordon predicts that current Fed policy will remain unchanged. (CNBC "Market Wrap-Up",

5/29)

IN WASHINGTON:

Economic officials from 24 major industrial countries will try to boost faltering multilateral trade talks when they gather in Paris today for the ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT. THE U.S. is especially eager to galvanize the talks. "Our window of opportunity is now," says U.S. TRADE REPRESENTATIVE CARLA HILLS. "It's just going to take the political will to do it." TREASURY SECRETARY NICHOLAS BRADY says, "We are determined to see these negotiations completed on time and with concrete results." (WSJ, 5/30)

"Let's wake up. Let's do something to save America's competitive position economically, and rebuild our strength and influence in the world," says SEN. DAVID BOREN (D - OK). Boren's solution, as presented in a bill he is co-sponsoring with SEN. LLOYD BENTSEN (D - TX), is to create more "tied" or "linked" aid within the U.S.'s foreign aid packages. which must be spent on U.S. goods. Under the provisions of the bill, the percentage of linked aid would rise from its present 6% to 15% in 1992, and to 40% by 1996. (FNN "Business Tonight", 5/29)

TREASURY UNDERSECRETARY DAVID MULFORD says forgiveness of debt owed by East European governments is "hard to contemplate." He says such action would pose "very delicate legal and precendential problems," but the U.S. government is still "looking at it at this time." ("The Washington Post", 5/30)

#90150p3051 05/30/1990 ~PR Newswire

ARCADIA, CA (MAY 30) PR NEWSWIRE - The Vons Companies Inc. (NYSE: VON) is asking customers to return Jerseymaid and Westwood brands of homogenized, nonfat and skim milk, code dated only June 9, in quarts, half-gallons and gallons. The milk should be returned to a Vons, Pavilions or Tianguis store for a full refund.

Vons is making the request because this product is not up to Vons quality standards. The milk could have an odor and/or off-flavor. The product was delivered to stores on Tuesday, May 29, and remained on sale for only a few hours before being removed from the dairy shelves.

Customers are advised not to drink the milk, but to return it to their local store for a full refund.

The company is investigating the source of the problem.

CONTACT: Vickie Sanders of Vons, 818-821-7290.

#90150p3077 05/30/1990 ~PR Newswire

EL SEGUNDO, CA (MAY 30) PR NEWSWIRE - Infonet, the leading interntional value-added network services company, today announced that it will interconnect its worldwide Notice 400 messaging service with MCI Mail.

Notice 400 is based on the X.400 data format, envelope and routing standard for messaging recommended by the international standards committee, CCITT. The service is accessible in more than 100 countries for worldwide electronic mail, facsimile and telex transmissions. Users may also transmit binary files via Notice 400 without first converting them to ASCII text.

"The X.400 alliance between Infonet and MCI will allow users of both electronic messaging services to realize greater enterprise-to- enterprise connectivity," said Infonet President Jose A. Collazo. "In essence, Notice 400 users will be able to swap electronic messages with an ever-widening network of their sales agents, suppliers, contractors, distributors and customers who subscribe to MCI Mail."

Local Infonet professionals in countries throughout the world connect users to the Notice 400 service, hold on-site education and training classes and provide ongoing support. In the process, these Infonet representatives help Notice 400 customers understand the regulatory guidelines governing transnational communications in their respective countries.

"Infonet will enhance our ability to meet the transnational messaging needs of MCI's existing U.S. customer base," said Seth D, Blumenfeld, president of MCI International. "MCI will also be well- positioned to strengthen its global customer service capabilties by capitalizing on Infonet's exceptionally strong worldwide support strucuture.

"Both of our firms recognize that the promise of seamless X.400 interconnections on a global scale cannot be realized without quality, worldwide customer support to handle implementation at the user level. So far, no one organization has been able to deliver on this promise. For this reason, we think the newly forged relationship between Infonet and MCI is just what the market needs to finally make the X.400 strategy a global reality," explained Blumenfeld.

Established in 1970, Infonet is the leading standards-based, international value-added network services company. It provides communication and computer services and directly supports those services worldwide. The company is jointly owned by MCI and 10 major telecommunication administrations in Europe and the Asia-Pacific.

#90150p3078 05/30/1990 ~PR Newswire

LAFAYETTE, LA (MAY 30) PR NEWSWIRE - The Exploration Company of Louisiana Inc. (NASDAQ: XCOL) (XCL) today announced that net income for the three months ended March 31 1990 amounted to U.S. $248,000 compared with $554,000 for the same period in 1989. Total revenues for the three months ended March 31 1990 were $2,451,00 compared with $2,208,000 in 1989. Oil and gas revenues for the three months ended March 31 1990 were $1,937,000 compared with $1,107,000 in 1989.

Marsden W. Miller, Jr., chairman, stated, "We expect that 1990 will be another year of growth of our reserve base through acquisitions and development drilling and one of continuing development. The recently announced XCL Sunrise transactions will accomplish one of the company's stated objectives by expanding the company's activities into the gas marketing and transportation business through the company's approximately 42 percent ownership of XCL Sunrise, Inc. XCL Sunrise will be a stand alone company publicly traded on the official list of the International Stock Exchange, London. These transactions are expected to have a favorable impact on second quarter results."

XCL is an oil and gas exploration and production company with offices in Lafayette. The company's shares are traded on NASDAQ and the International Stock Exchange, London.

CONTACT: Marsden W. Miller, Jr. of The Exploration Company of Louisiana, 318-237-0325; or Nicholas Miles of Lowe Bell Financial in London: 71-353-9203, for The Exploration Company of Louisiana.

JACKSON, MI (MAY 30) PR NEWSWIRE - Consumers Power Company today announced it has reduced its electric rates by 1.6 percent, beginning with June bills, through the end of the year.

The decrease amounts to a reduction of 55 cents on the average residential customer's monthly electric bill. The reduction, through the company's power supply cost recovery mechanism, is the result of lower fuel and purchased & net interchange power costs expected for the remainder of the current year.

"This electric rate reduction strengthens our competitive position as Michigan's lowest cost major electricity supplier and furthers our growth strategy of being the utility of choice," said Michael G. Morris, executive vice president of Consumers Power.

Morris attributed the reduction to "our success in negotiating a lower coal transportation contract for our power plants and re- negotiating lower prices on our existing coal purchase contracts. The price cut is also a result of expected lower net purchased power costs due to higher than anticipated electricity sales to other utilities," Morris added.

Consumers Power's residential electric rates have consistently ranked in the lowest one-fifth in national surveys. The company's electric rates are about the same as they were five years ago -- a real (inflation adjusted) decrease of 17 percent.

Consumers Power serves electricity to more than 3.3 million people in a 27,800-square-mile service area encompassing 61 counties in Michigan.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

CHARLEVOIX, MI (MAY 30) PR NEWSWIRE - Consumers Power Company's Big Rock Point nuclear plant produced a record amount of electricity during the past six months. The plant, which has been generating at or near full power continuously since last Nov. 4, produced 293,445.7 megawatt-hours of

electricity during the six-month period, the best six-month production output in the unit's 27-year history.

"This record is significant because it demonstrates that Big Rock Point remains a very reliable electric power producer after almost three decades of service," said William L. Beckman, plant manager. "It confirms my belief that, as we search for alternate energy sources, nuclear power remains one of the best alternatives."

The six-month output record is only one of many accomplishments earned by the plant. Earlier this year, Big Rock Point employees were recognized for achieving the best safety record of any electric generating plant in the Consumers Power system. Consumers Power is the nation's safest utility, earning the National Safety Council's first- place award in five of the last eight years. In 1988, the State of Michigan recognized the plant's long industrial safety record as the best in the state. In 1977, Big Rock Point set a world record by remaining on-line for 343 consecutive days.

Big Rock Point was refueled last summer and has been generating power almost continuously since then. It is scheduled to remain in service until the next refueling in September.

Owned and operated by Consumers Power Company, Big Rock Point is capable of producing 67 megawatts of electricity, enough to serve a community of 50,000 people.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

IRVINE, CA (MAY 30) PR NEWSWIRE - Western Digital Corporation (AMEX: WDC) today announced that the company has reached a settlement with Quantum Corporation (NASDAQ: QNTM) regarding the patent suit which Quantum filed in early 1988.

The settlement concerns certain older disk drives that used designs the company acquired in 1988. Western Digital no longer manufactures any of these drives. None of Western Digital's current or planned products utilize the design of the older drives covered by the settlement. The settlement also covers Western Digital's line of disk drive on-a-card products which are marketed under the name FileCard. In January 1991,

Western Digital will discontinue marketing these products, other than on a limited basis.

As a result of the settlement, Western Digital will pay Quantum a total of $4 million. The payment is consistent with the company's expectations and it will not have any impact on current or future earnings.

Since 1988, Western Digital has achieved one of the leading positions in the fast-growing 3.5 inch intelligent drive market with a family of intelligent drives based on its own disk drive technology and its broad base of proprietary semiconductor technology.

Western Digital Corporation, headquartered in Irvine, is a multinational company that designs, develops, manufactures and markets semiconductor devices, subsystems, and intelligent disk drives for original equipment manufacturers and resellers which serve the microcomputer industry. The Storage Products unit provides a broad range of intelligent disk drives and storage controllers. The Microcomputer Products unit provides communications, imaging, systems logic, and integrated systems products.

WAYNE, NJ (MAY 30) PR NEWSWIRE - Laderle Laboratories has announced that it will market Verelan (R), a patented, improved formulation of verapamil HC1, the most widely prescribed calcium channel blocker for hypertension. Verelan is now approved for marketing in the United States.

Verelan is the first controlled absorption verapamil product that utilizes pellet-filled capsule technology to provide reliable blood pressure control.

Lederle has licensed exclusive U.S. marketing rights to Verelan from Elan Corporation PLC. Elan developed Verelan using its sophisticated pellet-filled capsule SODAS (R) (Spheroidal Oral Drug Absorption System) technology, a patented formulation technique which facilitates the development of safe and effective controlled absorption drugs.

David R. Bethune, president of Lederle Laboratories, said "We are pleased to add Verelan to our cardiovascular product line. This is a unique new medication with important patient benefits."

Donald E. Panoz, chairman and chief executive officer of Elan Corporation, said "We are pleased that Lederle, which has had excellent success with its other cardiovascular products, will be marketing Verelan in the U.S. We are confident that the combination of our technology and Lederle's

marketing will make Verelan a major entry into the U.S. cardiovascular market."

Elan Corporation specializes in the health care field of advanced reformulation and drug delivery, with emphasis on improved drug absorption and utilization. Elan's headquarters and main research and development facilities are in Athlone, Ireland.

Lederle Laboratories, a division of American Cyanamid Co. (NYSE: ACY), is a research-intensive organization that manufactures and markets a broad range of products including ethical pharmaceuticals, vaccines, generics and vitamins/nutritionals.

CLEVELAND, NC (MAY 30) PR NEWSWIRE - Cansorb Industries Inc., (NASDAQ: CJBFE) announced today the signing of a supply agreement with This End Up Furniture, a Melville Group company, of Richmond, Va., to provide kiln-dried pinewood material to Cansorb to be used in their absorbent products.

Under the agreement, Cansorb will buy up to 112 tons of kiln- dried pinewood material each week provided by This End Up's furniture manufacturing operations in Raleigh and Sanford, N.C. Cansorb utilizes a proprietary process of converting residual pinewood material into highly compressed pellets which provide superior absorbency and odor control for cat litter.

"We are particularly proud of our association with This End Up because of their long-standing commitment to the environment through reforestation efforts," said William B. Kraigsley, Cansorb's managing director. "This is in keeping with Cancorb's corporate goals of using recyclable pinewood to manufacture bio-degradable products which contribute to the health of the environment."

Cansorb's Pinefresh (tm) cat litter was re-introduced to the market with shipments beginning lat April. Pinefresh, a bio- degradable litter, absorbs up to three times as much liquid as clay- based litter and controls odor with a natural pine aroma.

Cansorb Industries Inc., with manufacturing facilities in Cleveland, N.C., is the leading manufacturer of pinewood based absorbent products.

WAYNE, NJ (MAY 30) PR NEWSWIRE - An approximate 25 percent increase in the production capacity of its solution acrylamide will result from a global facilities and capacity expansion program announced today by American Cyanamid Co. (NYSE: ACY).

The planned expansions will take place first at the company's acrylamide manufacturing facility at Botlek, The Netherlands, and then at the Fortier plant near New Orleans. The program is targeted for completion by the first quarter of 1991.

"The increasing global demand for acrylamide-based products and acrylamide derivatives was the basis for the decision to expand these facilities," according to a joint statement issued by John E. Lynch, president, Cyanamid International Chemicals Division, and Emil C. Bosacki, president, Chemical Products Division (United States).

Acrylamide products are used in polymers for a wide range of applications including paper manufacturing, water and waste treatment and mineral ore and coal processing. In addition, they are employed in the production of specialty monomer and co-polymer products.

Cyanamid manufactures both dry acrylamide and acrylamide solution. American Cyanamid Co. is a research-based biotechnology and chemical company that develops agricultural, chemical, medical and consumer products and manufactures and markets them around the world.

DOMINGUEZ, CA (MAY 30) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) reported today that its net earnings for the first quarter increased 9.6 percent, and its sales increased 26.4 percent from its first quarter last year.

Net earnings for the period, which ended April 29, 1990, were $5,936,000 or $.17 per share, compared with net earnings of $5,415,000 or $.15 per share in the first quarter ended April 2, 1989.

Sales during the first quarter increased to $118,966,000, from last year's first quarter sales of $94,106,000. Sales in comparable stores for the

first 13 weeks of the company's fiscal year were 5.8 percent higher than in the same period last year. Excluding the company's Job Lot Pushcart stores in New York and New Jersey, comparable store sales were 7.0 percent higher in the first quarter of this year.

Pic 'N' Save said that during its first quarter of 1990, the company purchased 621,000 shares of its common stock through open market transactions as part of its 5,000,000 share repurchase program authorized in February 1990.

The company said that it opened two new stores during the quarter, one each in San Diego and Houston, and closed two stores, one in Encino, Calif., and San Diego, bringing the total number of stores in operation at the end of the quarter to 190.

Pic 'N' Save Corp. operates a chain of 190 retail stores in the western and southern United States and the New York metropolitan area. These stores specialize in new, close-out, variety general merchandise, which is sold at substantial reductions from original retail prices.

NEW YORK (MAY 30) PR NEWSWIRE - Anthony S. D'Amato has been elected president and chief operating officer of Borden, Inc. (NYSE: BN) effective July 1. The appointment was announced today by R.J. Ventres, who continues as chairman and chief executive officer of the $7.6 billion producer of food, non-food consumer and industrial products. D'Amato was also elected to the board of directors.

The board also elected Joseph M. Saggese an executive vice president of the company and president of the worldwide packaging and industrial products division, succeeding D'Amato. Saggese, who was a senior group vice president of the division, was also named a member of the office of the chairman, where he joins Ventres, D'Amato and three other executive vice presidents: Richard Fowlkes, president of the dairy division, Jon G. Hettinger, president of the grocery and specialty products division, and George J. Waydo, president of the snacks and international consumer products division.

D'Amato, 59, played a key role in the initial development of Borden's packaging film businesses, now worldwide, and in the acquisition of wallcovering businesses in Canada, the United Kingdom and West Germany,

which combine with the company's U.S. unit to make Borden the world's largest wallcovering manufacturing company.

Under D'Amato's leadership, the company completed the divestment of its commodity chemical operations to the Borden Chemicals and Plastics Limited Partnership, and the chemical division became Borden's present- day packaging and industrial products division.

Saggese, 58, brings extensive international experience to his new position. He received a B.S. in Finance from Fordham University in 1953, and an M.B.A. in Business from Ateneo de Manila University in 1970. He joined Borden in 1960 in its international operations in New York and rose to manager of the import-export group. He became general manager in the Philippines in 1965, area director for Europe in 1971 and a group vice president in 1983.

Borden is the world's number one producer of pasta, wallcoverings, forest products adhesives and vinyl foodwrap films; number one in U.S. dairy; number two in salty snacks in North America; and number one or two, nationally or regionally, in 26 U.S. niche grocery product categories.

BRIDGEPORT, CT (MAY 30) PR NEWSWIRE - The board of directors of First Connecticut Small Business Investment Company, a federally licensed SBIC, voted late yesterday to omit the company's regular quarterly cash dividend of 25 cents a share.

The company recently reported a loss for the fourth quarter and lower earnings for the fiscal year ended March 31, 1990 due, it said, to a decline in the economy and real estate values in its New England market. First Connecticut primarily lends or invests to qualified small businesses usually collateralized by real estate.

The company said it remains in strong financial condition but the board decided to take a conservative posture concerning dividends. It said the board has indicated it will continue to review its dividend policy with a view to re-establishing a dividend as soon as prudently possible.

FAIRFIELD, CT (MAY 30) PR NEWSWIRE - The board of directors of Acme United Corporation (AMEX: ACU) has elected Henry C. Wheeler to the new position of chairman of the board. He remains chief executive officer.

Dwight C. Wheeler II was elected to succeed Henry C. Wheeler as president. Dwight Wheeler remains chief operating officer.

James F. Farrington was elected executive vice president, succeeding Dwight Wheeler. Farrington had been senior vice president-marketing.

All three executives are members of the board of directors. Henry Wheeler joined Acme United in 1939 and has been president since 1941. He is a graduate of Yale University.

Dwight Wheeler joined the company in 1966 and has held the positions of industrial engineer, assistant to the president and corporate vice president-administration. He graduated from the University of Bridgeport with a B.S. in manufacturing engineering.

Farrington joined the company in 1967 as marketing manager. He has held the posts of vice president-general sales manager and vice president-marketing. He is a graduate of Catholic University, Washington, D.C.

Acme United is a leading producer of metal disposable surgical instruments sterile procedure trays, germicidal products and wound-care packs for hospitals and the after-care market as well as the country's largest producer of household shears, scissors, wooden rulers and yardsticks for the consumer.

BRENTWOOD, TN (MAY 30) PR NEWSWIRE - United Cities Gas Co., (NASDAQ-NMS: UCIT), the Nashville area-based natural and propane gas distributor, announced today it has signed a letter of intent to acquire Tri-City Gas Company in Chetopa, Kansas for approximately $800,000. The proposed acquisition comes just six months after United Cities' acquisition of another Kansas utility, 65,000-customer Union Gas System, Inc.

The Tri-City Gas Company serves approximately 1,000 customers and is located adjacent to United Cities' present service area. Terms outlined in the letter of intent provide for the continued operation of a branch office in Chetopa.

Koonce added that the Tri-City operation would be added to United Cities' present operations in Coffeyville, Kansas. Pending final approval by each company's board of directors and the appropriate regulatory authorities, a definitive agreement presently being drawn should provide for the closing of the transaction during the third quarter of 1990.

United Cities Gas Company has had a multi-state service area since its inception in the late 1920s and presently serves approximately 290,000 customers in parts of eleven states. The company is also engaged in other energy-related businesses.

MONTPELIER, VT (MAY 30) PR NEWSWIRE - National Life of Vermont has filed a multimillion-dollar suit against Phillips Publishing Company, investment advisor Richard E. Band and The Wall Street Digest Inc. for what the company charges are false and defamatory comments made about the financial soundness of the 140-year-old life insurance company.

The suit, filed in U.S. District Court in Baltimore, Md., charges that Phillips Publishing and Band made inaccurate and damaging allegations about National Life, and failed to investigate the true nature of the company's financial condition. The Wall Street Digest is charged by the company with failing to make any investigation before publication of the damaging material since, according to the complaint, it merely copied and paraphrased the statements and impressions originally written by Band and published by Phillips.

In an article titled "How Safe is Your Insurance?" printed by Phillips Publishing Company, Band names two standards -- solvency and safety of investment portfolio -- by which he says all life insurance companies should be judged.

Agreeing that the standards are valid ones, National Life's complaint points out that the company passes both tests.

The complaint also alleges that Phillips and Band created the false impression that National Life was so financially unsound and unsafe that its policyowners should cancel their insurance policies.

As a result of their failure to investigate and fairly report on National Life, Phillips and Band omitted important and favorable facts from their periodicals, the complaint alleges. These include the fact that National Life is a well regarded, conservative company with financial data that

shows it maintains a very solid surplus position, has one of the lowest junk bond holdings in the entire industry and enjoys one of the lowest lapse ratios among its policyowners in the industry.

Band and Phillips had an improper motive for republishing false and defamatory comments about the insurance company, according to the complaint. It alleges that in order to get reader attention and generate new subscriptions, the contents of promotional material had to contain allegations of an expose. "In addition, the form and content of the publications show bias, prejudice, negligence and actual malice in that the primary motive for publishing the defamatory comments about National Life was to increase profits," the complaint states.

National Life charges that Phillips Publishing and Band were negligent when they failed to investigate the facts about the company's financial condition, and they made seriously damaging inferences by suggesting the company "did not make the grade" as a life insurer.

DANBURY, CT (MAY 30) PR NEWSWIRE - STC Petrochemical Corporation (Seoul) today announced it has chosen the UNIPOL PP process for its planned new world-scale polypropylene plant at Yocheonity, South Korea. Slated for completion early in 1993, the 100,000 tons-per-year facility will be capable of producing the full range of polypropylene products -- homopolymers, random copolymers and impact copolymers.

STC Petrochemical -- a subsidiary of STC Corporation, Korea's largest polypropylene film producer and among the top five polypropylene film producers worldwide -- said that the Union Carbide/Shell Oil (USA) process was selected over competing polypropylene processes because of UNIPOL PP's "superior economics and process and product versatility." UNIPOL PP is a unique, totally gas-phase process offered for licensing worldwide through Union Carbide Chemicals and Plastics Company's Unipol Systems Department.

"Backward integration will further strengthen STC Corporation's leadership position in the polypropylene film market," T. D. Kim, managing director explained. "The UNIPOL PP process has demonstrated that it will give us the cost advantage and product range to serve this and other end use markets."

STC Petrochemical becomes the 17th licensee for the UNIPOL PP process. Currently there are more than 50 UNIPOL process reactors in operation around the world having accrued over 450 reactor-years of operating experience.

NEW YORK (MAY 30) PR NEWSWIRE - Avery International Corporation (NYSE, PSE: AVY) announced today at a meeting with security analysts that it expects to report lower earnings in the second quarter 1990, compared to the same quarter a year ago. Earnings for the second quarter could be in excess of 10 percent below the prior year's earnings of $24.1 million, or $.55 per share, on projected sales growth of about 5 percent over the $446 million reported last year.

Charles D. Miller, chairman and chief executive officer, said the quarter's results reflect a significantly slower automotive market in the United States for Avery's decorative films and label businesses, along with the recent confusion and the resulting slowdown in the U.S. retail department store market. In addition, several important Avery accounts in the French diaper-tape market have filed for bankruptcy.

Miller went on to state, "Despite slow growth in the U.S. economy during the first half of this year, I am pleased that our core office products and roll materials businesses in the U.S. are both establishing new records in sales and profits. In addition, some key turnaround businesses continue to make progress against plan.

"Our sales bookings turned up again in May," Miller added, "encouraging us to believe the last half of the year could be better than the first half. Overall, we continue to believe that for the full year we can exceed last year's results. In fact, to meet anticipated market growth, we plan to continue our capital spending program at current levels, which is directed at building additional capacity and improving our manufacturing processes to lower costs. In addition, we plan to continue our emphasis on new technologies and product development."

The latest example of Avery's growth program is its definitive agreement to merge with Dennison Manufacturing Company announced on May 25, 1990. Subject to stockholder approval, the two companies have agreed to combine to form Avery Dennison Corporation, a company with aggregate annual revenues of approximately $2.5 billion.

Avery, headquartered in Pasadena, Calif., is a leading worldwide manufacturer of self-adhesive base materials, labels, tapes, office products and specialty chemicals. The company has approximately 11,700 employees and more than 150 manufacturing facilities and sales offices located in 25 countries.

#90150p3114 05/30/1990 ~PR Newswire

WARREN, MI (MAY 30) PR NEWSWIRE - Two new executive appointments at General Motors Military Vehicles Operation (MVO) were announced today by Dr. F. Blake Wallace, General Motors vice president responsible for Allison Gas Turbine Division and Military Vehicles Operation.

Michael E. Naylor is appointed general director, Military Vehicles Operation, replacing C. Reid Rundell. Rundell is appointed president of the Tactical Truck Company (TTC). The appointments are effective June 1, 1990. Gerald A. Frederikson, who has been the program manager for TTC, will be placed on special assignment reporting to Naylor until his retirement Sept. 1, 1990. Both Naylor and Rundell will report to Wallace.

The Military Vehicles Operation, headquartered in Warren, is GM's organization charged with the design, development and manufacture of

wheeled and combat vehicles. MVO has operations in Indiana, Michigan, California and Ontario, Canada.

TTC is a 50/50 joint venture between MVO and the BMY-Wheeled Vehicle Division of Harsco Corporation. TTC was formed in June, 1988, to compete for the Family of Medium Tactical Vehicles (FMTV) contract, which is expected to dominate U.S. Army wheeled-vehicle production during the 1990s with 20,000 vehicles scheduled for production.

"These changes will strengthen GM's military operation ventures," said Wallace. "Mike Naylor brings a wealth of strategic planning experience to MVO that will help guide it into the 1990s.

"Through Reid Rundell's efforts over the past four years, MVO is now very well-positioned to become a major participant in the U.S. military vehicle business. In Reid's new assignment, he will guide TTC as it competes for the FMTV program. Reid's appointment emphasizes the commitment both GM and Harsco have made to winning this important program."

Naylor began his career with General Motors in 1967 at Detroit Diesel Allison Division in Indianapolis as a development engineer. He has served in several strategic planning assignments with GM since 1977. Most recently he was executive in charge of Corporate Strategic Planning.

Rundell joined the Chevrolet Motor Division of General Motors in 1960 where he held several manufacturing positions including plant manager. In 1977, he was named director of personnel development for the GM Personnel Administration and Development Staff. In the early 1980s, he joined the Saturn project and later was in charge of strategic business planning for the Saturn Corporation. In 1986 he was named general director of MVO.

#90150p3120 05/30/1990 ~PR Newswire

NORTH WHITE PLAINS, NY (MAY 30) PR NEWSWIRE - Fingermatrix, Inc., (NASDAQ: FINX) announced today that NEC Technologies, Inc., a subsidiary of Nippon Electric Corporation (NEC) (NASDAQ: NIPNY), has ordered three Z1050R live scan finger terminals as part of a $1.9 million contract award to NEC from the Marion County, Indiana Justice Agency for an Automated Fingerprint Identification System (AFIS) and one Z1050R system for another NEC customer. The total purchase price of Fingermatrix equipment is estimated at over $200,000.

These terminals will be used by NEC customers to book suspects in conjunction with the NEC AFIS as well as to fingerprint persons requiring

fingerprinting for employment and licensing applications.

The Z1050R uses electronics and advanced imaging technology to scan live fingers and to digitally produce clear, undistorted and repeatable fingerprints which improve the quality of computerized files. High resolution optical scanning equipment can directly transmit live fingerprint data and/or can be used to create laser-printed 10-print fingerprint cards locally or at a remote site. The use of direct, live scan fingerprints produced by the Fingermatrix Z1050R will enhance the effectiveness of the NEC AFIS over that possible by use of inked fingerprint cards. In addition, the direct electronic interface of the live scan to AFIS preserves the image quality and speeds up the response time to answer inquiries.

To date, NEC has ordered nine Z1050Rs with a total purchase price estimated at over $450,000. Current and future requirements of both the law enforcement and commercial markets indicate the demand for thousands of these systems.

Fingermatrix, Inc. is a world leader in state-of-the-art automated fingerprint technologies, with system applications ranging from access control to law enforcement.

CONTACT: Scott G. Schiller of Fingermatrix, 914-428-5441, or Mary Beth Kissane of Georgeson, 212-440-9876, for Fingermatrix.

WEBSTER, NY (MAY 30) PR NEWSWIRE - Photographic Sciences Corporation (NASDAQ: PSCX) announced today that its competitor, Symbol Technologies, Inc. (NYSE: SBL), has alleged a claim of infringement against the company in the Southern District Court of New York. The action involves U.S. Patents relating to the design of hand-held laser bar code scanners.

L. Michael Hone, PSC's president and CEO stated, "We feel strongly that Symbol Technologies has erred in commencing this action. We own several patents dealing with this technology and believe they should be honored. We have referred the matter to our patent litigation counsel, Kenyon & Kenyon of New York City, for consideration and appropriate action."

PSC further stated that its patents are vital and cover several significant features of the company's hand-held bar code scanners. "The matter of enforcement of our proprietary rights under these patents is of grave concern to this company and its management," said Hone. "Kenyon & Kenyon will be considering what measures should be taken to protect those rights."

Photographic Sciences Corporation, based in Webster, New York, is a

manufacturer of equipment serving the bar code industry. Its other products include bar code verifiers, interface systems and film masters for use in reproducing bar codes.

CONTACT: L. Michael Hone, president and chief executive officer, of David A. Kostizak, vice president, secretary and treasurer, (716) 265-1600, both of Photographic Sciences Corporation.

STERLING, AK (MAY 30) PR NEWSWIRE - LightSeas, Inc., a subsidiary of Seafoods from Alaska, Inc., today said it will introduce Nova Lite, the first nova smoked salmon product featuring lower levels of both salt and sodium, beginning June 10, 1990.

The initial introduction of LightSeas Brand Nova Lite will be made through an exclusive arrangement with the chain of 102 Waldbaum's Supermarkets located in the greater New York City metropolitan area.

LightSeas Brand Nova Lite has 50 percent less salt and 33-1/3 percent less sodium than traditional brands, with all of the goodness and flavor of the finest nova smoked salmon. The product will be offered in all Waldbaum's Deli departments in two forms: Nova Lite Salmon Slices and Nova Lite Salmon Spread.

LightSeas Brand Nova Lite was developed after nearly one year of research, including the technical assistance of Dr. Alden Booren, who holds an appointment with the Department of Food Science, Michigan State University.

When scrutinized by New York nova consumers in blind taste tests, LightSeas Brand Nova Light was ranked better than traditional nova in all categories, including taste, salt level, texture, smell, smoke level, and color.

LightSeas, Inc. holds a patent-pending status on the formula developed to make its new nova smoked salmon. The company said that its pending patent covers both a process and a line of products which encompass all cured seafoods.

The company said that work is now under way to expand the line of reduced salt and sodium seafood with the planned addition of smoked sable, kippered salmon, smoked halibut, and others.

All LightSeas Brand Nova Lite salmon products are processed by Seafoods from Alaska, Inc., a public company located in the heart of Alaska's wild salmon fishery, with processing plants at Mile Post 82 on Alaska's Kenai Peninsula. The new LightSeas Brand line will be represented by ABD Sales, Inc., a large food sales organization based in Roslyn Heights, N.Y.

Erwin Hartman, vice president of Appetizing/Deli Departments of Waldbaum's, expects the new smoked salmon products to have strong customer appeal. "Our customers, like those throughout the U.S., are increasingly seeking more healthful products," said Hartman.

"Medical experts from the Surgeon General to family physicians are advising people to choose foods with less fat, such as fish, as well as products with less salt and sodium. LightSeas Brand Nova Lite meets those requirements with a more healthful product which also has the traditional goodness of the finest nova smoked salmon which our customers expect."

HOUSTON (MAY 30) PR NEWSWIRE - Pride Petroleum Services, Inc. (NASDAQ: PRDE) has signed letters of intent for the fixed asset purchases of three well servicing companies.

Upon completion of the transactions, on or about June 1, 1990, the asset purchases will enhance Pride's existing operations in west and south Texas and expand the company's operations in the Austin Chalk area in central Texas.

The combined revenues of the three companies in 1989 were approximately $7 million. Twenty-seven well servicing rigs will be acquired in the transactions bringing Pride's total rig count to 376. Terms of the pending transactions were not announced.

The letters of intent include fixed asset purchases from Snyder Well Servicing, Inc., Snyder, Texas; C.R.C. Source Services, Inc., Snyder; and Redding & Moore Well Service Co., Inc., Corpus Christi, Texas. Snyder Well Servicing is a subsidiary of Patterson Energy, Inc. of Snyder. In each case, the personnel of the companies have agreed to join the Pride organization.

The Snyder Well Service asset purchase includes three rigs working in Snyder and four rigs in LaGrange, Texas. The LaGrange rigs and crews will expand Pride's operations in the Austin Chalk area which has been the site of significantly increased activity over the last year as the result of horizontal drilling of new wells and horizontal redrilling and recompletion of existing wells.

The Source Services asset purchase includes 13 rigs and related support equipment. Pride's existing facility in Snyder currently operates 13 rigs and the 13 rigs from Source Services and three rigs from Snyder Well

Service will expand the Company's operations in Snyder to 29 rigs.

Additionally, Pride is purchasing Source's inventory of fishing and rental tools which will be incorporated into Pride's completion rental services division at Snyder serving customers in west Texas.

The Redding & Moore asset purchase will include seven well servicing rigs and support equipment. These rigs will be combined with the 13 Pride rigs operating out of Alice, Texas, expanding the Alice district to 20 rigs. Upon completion of the purchases, Thad Moore, owner of Redding & Moore, will join the Pride organization and manage the company's Alice district.

Pride Petroleum Services, Inc., headquartered in Houston, is one of the largest well servicing contractors in the United States. The company currently operates a fleet of 349 rigs from locations in east and west Texas, along the Texas/Louisiana Gulf Coast, in California and New Mexico.

TULSA, OK (MAY 30) PR NEWSWIRE - Harry D. Jones, president of Kinark Corporation (AMEX: KIN), today announced the creation of a new executive position, group vice president, and the promotion of two senior managers in its Boyles Galvanizing division.

Brett R. Goff, general manager of the Boyles Louisville, Ky. plant, has been promoted to group vice president with responsibility for the Louisville plant. Reporting to him will be the general managers for Boyles' Nashville, Tenn. and St. Louis, Mo. plants.

Goff joined Boyles Galvanizing Company in 1982 as manager of operations at Louisville. In his eight years with the company he has served in several management positions, including general manager at the Hurst, Texas facility as well as Louisville. His previous experience includes management positions with General Electric Co. and Tube Turns Inc.

Jerry R. Martin, general manager of Boyles Denver plant, has been promoted to group vice president with responsibility for the Denver plant. Reporting to him will be the general managers for Boyles' Hurst, Texas and Houston, Texas plants.

Martin joined Boyles Galvanizing Company as plant manager of the Nashville, Tenn. plant in 1974. During his 15 years with the company he has held various positions with the company that have included corporate operations

manager, and for the past ten years general manager at Denver.

He is recognized throughout the company as an expert on the technical aspects of galvanizing and serves as a consulting resource to the other Boyles plants. Prior to joining Boyles he served in management positions with John Oster Manufacturing Co. and Roper Corporation.

Jones commented that, "with the creation of these new positions, Boyles is positioning itself to meet the business challenges that we see upcoming in the 1990's. By adding this management level to the organization we bring experience, direction and leadership where it will make the greatest contribution to the plant teams currently in place.

"Competition in our industry is strong, we will meet it with professional marketing and management and our success will be demonstrated in Boyles' continuing growth and success." These new positions will report to Jones.

Kinark Corporation, with corporate headquarters in Tulsa, operates chemical facilities in Chicago and Montgomery, Ala., and supports industrial/commercial construction and metal corrosion protection with galvanizing plants in Denver, Louisville, Nashville, St. Louis, Houston and Hurst, Texas.

MINNEAPOLIS (MAY 30) PR NEWSWIRE - Rob Hawthorne has been named president and chief executive officer of ALPO Petfoods, effective immediately. The announcement was made by Ian A. Martin, chairman, Grand Metropolitan Food Sector, the parent company of ALPO.

Hawthorne, most recently president and chief executive officer of Pillsbury Canada, joined Pillsbury in 1986 as vice president-marketing. Previously, he held several senior marketing positions with General Mills. Hawthorne is a graduate of Ryerson Polytechnical Institute, Canada.

Hawthorne replaces Frank Krum who will relinquish his responsibilities as president and CEO of ALPO. Krum will serve as a special advisor to the chairman, advising Ian Martin on trade and industry relations issues for Grand Metropolitan Food Sector companies in the U.S.

ALPO, based in Allentown, Pa., and acquired by Grand Metropolitan in 1980, has sales of more than $400 million and holds the number one position in premium canned dog food.

Grand Metropolitan is one of the largest international companies in the United Kingdom and a world leader in drinks, retailing and food, with sales in excess of $15 billion.

NEW YORK (MAY 30) PR NEWSWIRE - Mizlou Communications Company, Inc. (NASDAQ: MZLU) Sports News Network (SNN) has added five clients to its growing roster of major advertisers, it was announced today by Paul Green, senior vice president of advertising sales for SNN.

HBO, Paramount, General Mills, Nestle and Thompson Medical (for its Sportscreme product) have joined the SNN lineup, bringing the 24-hour sports cable news network's total of major sponsors to 15.

Since its Feb. 1 launch, Sports News Network has signed major advertising agreements with the Jeep/Eagle division of Chrysler Motors, BMW, Yugo America, Chesebrough-Pond, Hilton Hotels, Cotler, Ocean Spray, First Brands, the U.S. Navy, and Stanley Tools, in addition to the five new

deals announced today.

"Sports News Network is very excited and encouraged by the outstanding group of sponsors who have joined the network," said Green. "During our first four months, we have had tremendous support from many fine advertisers. Thanks to the network's superior production quality and the success we've had signing MSO's, our advertisers have long-term agreements. During the months to come, we anticipate many more advertisers joining our growing list," he added.

Sports News Network is the nation's first and only 24-hour, seven-day-a-week sports cable news network. SNN provides viewers with late-breaking news, in-depth analysis and live reports from coast to coast on all the major happenings in sports.

NORTHVILLE, MI (MAY 30) PR NEWSWIRE - Guardian Industries Corp. Automotive Products Group has announced plans to build an automotive glass fabrication plant in Ligonier, Ind. The new facility will fabricate both laminated and tempered glass for cars and trucks. Construction of the 375,000-square-foot plant, which is contingent upon all necessary approvals and commitments, is scheduled to begin this summer with start-up anticipated in the fall of 1991. When fully operational, the plant is expected to employ 400 people and will contribute significantly to the local economy.

"Ligonier quickly established itself as an ideal location," said Jack W. Sights, Automotive Group vice president. "The physical site satisfied all our search criteria, and we received excellent cooperation from the governor, other state and local governmental authorities, the Ligonier Industrial Development Corporation and Indiana Michigan Power Company."

Guardian Automotive Products has served the automotive industry since 1932 and today is one of the major suppliers of automotive glass to both the original equipment and aftermarket components of the industry worldwide. Guardian currently operates automotive glass fabrication facilities in several U.S. states as well as Europe. The company has introduced a variety of glass innovations to the auto industry in recent years and the Ligonier plant is expected to continue this trend. "The automotive sector remains one of Guardian's major growth areas and the Ligonier plant is another indication of Guardian's long-term commitment to the U.S. auto industry," said Sights.

Guardian Industries, headquartered in Northville, is a worldwide

manufacturer of flat glass and fabricated glass products. The privately held company ranks among the world's top five flat glass producers and is a leader in the fabrication of glass used in the architectural and automotive industries. Guardian's fabricated glass products include heat-treated and tempered safety glass, insulating and reflective glass for the residential and commercial construction industry, and windshields and tempered side and rear windows for the automotive industry. Guardian is a recognized leader in encapsulated and modular automotive glass products. Guardian also manufactures fiberglass insulation used in residential and commercial building applications, oil-field pumping units, and thermoplastics used in the automotive, electronic, business machine, and appliance industries.

DENVER (MAY 30) PR NEWSWIRE - Ahmed D. Kafadar, chairman and chief executive officer of OEA Inc. (AMEX: OEA), the Denver-based, high-technology manufacturer of aerospace and automotive products, announced record sales and earnings for the third quarter and nine months ended April 30, 1990.

Sales and net earnings for the third quarter were $20,859,500 and $2,548,900, respectively, compared to $15,083,400 and $2,017,400 for the prior-year third quarter.

Net earnings for the nine months were $6,874,600 on sales of $53,183,600, compared to net earnings of $5,398,100 on sales of $39,634,800 for the prior-year comparable period.

Earnings per share for the quarter were 76 cents compared to 60 cents for the fiscal year 1989 third quarter, with nine-month results of $2.05 per share compared to $1.61 for the fiscal year 1989 first nine months.

Kafadar noted that the parent company and OEA's major subsidiary, ET Inc., were the primary contributors to both the sales and net earnings increases during the quarter.

Net earnings and earnings per share for the prior fiscal year nine months include a $266,000 (eight cents per share) effect of an accounting change adopted during the fourth quarter of fiscal year 1989.

Bookings of new engineering work and follow-on production in both the aerospace/defense and commercial segments exceeded $20 million during the third quarter. Backlog of unfilled orders at April 30, 1990, was $90

million, up from $85 million a year earlier.

OEA is a leader in the field of propellant and explosive-actuated devices used in (1) the personnel escape systems of military aircraft, missiles, and for space application and (2) the automotive air bag.

All new aircraft, such as the F-4, F-111, F-14, F-15, F-16, F-18, B-1B, B-2, S-3A, and AH-64A, the Space Shuttle, and missiles/launchers, such as the Harpoon, Trident, ALCM, Peacekeeper, ACM, Ariane, and SICBM, have OEA-developed and manufactured devices. Most domestic automobiles equipped with an air bag use an initiator manufactured by OEA's Automotive Products Division.

BOSTON (MAY 30) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced the computer industry's most comprehensive set of products, programs, and services to simplify managing the flow of business information within and between organizations.

The new capabilities can streamline and optimize the management of critical information as it moves from suppliers to the enterprise, throughout the enterprise, and on to customers. Announced were:

- DEC/EDITM, electronic data interchange (EDI) software that enables organizations to easily exchange business documents - such as purchase orders, invoices, and acknowledgments - with suppliers and customers in industries worldwide;

- the strategy and initial products of Digital's Document Management program, to speed the flow of business-critical documents - that can contain text, graphics, images, and data - as they are created, updated, stored, and used throughout an organization's network;

- consulting services for complete planning, design, implementation, and management of customer's EDI and Document Management capabilities; and

- business relationships with two leading management consulting firms for EDI consulting; nine leading software vendors and four telecommunications service vendors supporting DEC/EDI; and four leading software vendors supporting Digital's Document Management program.

"Our customers tell us that to succeed in the new decade, computer systems vendors must help them streamline the flow of information, both within their business, and with their suppliers and customers," said Kenneth H. Olsen, Digital Equipment Corporation president.

"Digital has solved these tough problems, enabling businesses to improve quality, cut time to market, increase customer satisfaction, and reduce costs by managing information flow much easier and more simply."

Based on Digital's Network Application Support (NAS), Digital's open system for application integration, the software conforms to international standards and can operate in a multivendor computing environment.

Digital's approach to EDI is unique in the industry. It offers businesses all the capabilities needed for a complete EDI solution: DEC/EDI software, a new component of NAS; agreements with software developers to provide business applications that integrate with DEC/EDI for manufacturing, logistics, accounting, purchasing, order processing, and retail administration; a wide range of EDI communications options; and complete consulting and integration services.

BETHESDA, MD (MAY 30) PR NEWSWIRE - Martin Marietta Corp. (NYSE: ML) and the International Telecommunications Satellite Organization (INTELSAT) have set June 21 as the date for launch of the 10,193-pound INTELSAT VI (F-4) communications satellite on a Commercial Titan rocket.

Liftoff is scheduled for 7:18 a.m. EDT from Launch Complex 40 at Cape Canaveral Air Force Station, Fla.

Designed and built by Hughes Space and Communications Group, the satellite is being launched by Martin Marietta Commercial Titan Inc., for INTELSAT, an international not-for-profit commercial cooperative of 119 member nations. INTELSAT owns and operates the global communications satellite system used by more than 170 countries for a variety of telecommunications services.

The INTELSAT VI (F-4) satellite belongs to a series of spacecraft that are the largest commercial communications satellites built to date. It will provide capacity for voice, video, and data through the use of advanced digital modulation techniques.

Martin Marietta has built and successfully launched more than 140 Titans for the U.S. Air Force, the National Aeronautics and Space Administration, and commercial customers since 1964.

ROCHESTER, NY (MAY 30) PR NEWSWIRE - A portable personal copier designed for small businesses and home offices and backed by a three- year warranty was introduced today by Xerox Corporation (NYSE: XRX).

The Xerox 5220 Personal Copier is compact, lightweight and completely portable. Weighing only 24 pounds and measuring 18 by 18 by 5 inches, it is the smallest Xerox copier currently available.

"We're introducing the 5220 as part of our growing line of personal and desktop copiers and facsimile units," said Alvaro L. Martins, vice president and general manager, Xerox Indirect Channel Operations. "The 5220, with its three-year warranty, guaranteed copy quality and compact

size, delivers the reliability and convenience our small business and home-office customers demand.

"Our studies have shown that these customers want personal copiers that are easy to use and maintain," Martins added. "They also want worry-free operation and a company that stands behind its products."

Under the terms of the warranty, Xerox will either repair or replace the 5220 at no cost to the customer during the three-year period if the unit fails to work properly or produce high-quality copies due to a defect in materials or workmanship.

The 5220 produces five copies per minute. It features automatic exposure control that adjusts for light, dark or colored originals. The 5220 accepts originals up to 8-1/2 by 11 inches and holds up to 40 sheets of paper in the paper tray.

The 5220 uses an easy to install dry-ink cartridge that yields up to 2,000 copies. Users can also make copies in color by using optional red, blue, green or brown dry-ink cartridges. The machine is also equipped with an energy-saving device that conserves power when the unit is not in use.

The 5220 carries a single unit list price of $995. The personal copier will be available in the third quarter and will be distributed nationwide through authorized Xerox retailers, including department stores, mass merchandisers, consumer electronic stores and office supply superstores. It will also be sold through authorized Xerox sales agents and selected dealers.

#90150p3161 05/30/1990 ~PR Newswire

LONDON (MAY 30) PR NEWSWIRE - S.G. Warburg Group plc today announced the following results for the year ended March 31:

S.G. WARBURG GROUP PLC

Financial Highlights (Millions of pounds sterling)

Year ended March 31:	1990	1989
Profit bef. taxation but after transfers to banking inner reserves	187.5	111.5
Earns attributable to ord. shareholders	108.0	62.5
Earnings per ordinary share - actual	57.3p	33.8p
- diluted	49.9p	30.4p
Dividends per ordinary share		
Interim	4.5p	3.7p
Final (proposed)	10.5p	8.8p
Total	15.0p	12.5p
Disclosed net asset value per ord. share	327p	293p
Total disclosed capital resources	875.2	805.6

The profits of the group for the year ended March 31, 1990, before tax but after transfer to inner reserves by the banking companies within the group were 187.5 million pounds sterling, compared with 111.5 million pounds for the previous year. Disclosed actual earnings per share of 57.3 pence and diluted earnings per share of 49.9p compare with 33.8p and 30.4p, respectively, for the previous year.

During the year, the group's disclosed capital resources increased from 805.6 million pounds to 875.2 million pounds, with disclosed share capital and reserves of 689.2 million pounds, or 327p per ordinary share (including the group's interest in Mercury Asset Management at net asset rather than market value).

The board is recommending a final dividend of 10.5p per ordinary share, which would result in total ordinary dividends for the year of 15.0p per share, 20 percent higher than last year's total dividend of 12.5p per share. This year's total dividend of 15.0p would be covered 3.8 times by earnings per share. It is the company's declared aim to provide shareholders with a rising return on their investment, even if the level of dividend cover varies from year to year; in aggregate over the four years since the group was formed, ordinary dividends will have been

covered 3.4 times by earnings.

HOUSTON (MAY 30) PR NEWSWIRE - Partners Oil Company (NASDAQ: PAROA) today announced the acquisition of a 75 percent working interest in gas producing properties located in Blocks 956 and 967, North Padre Island, offshore Texas from ARCO for a cash consideration of $5,200,000. Additionally, the full working interest in Block 947, North Padre Island, which is undeveloped, was acquired from ARCO for an undisclosed additional consideration.

The daily production from the acquired Blocks is approximately 14.0 MMCF of gas. The properties are located approximately 35 miles east-southeast of Corpus Christi, Texas, in water depths of 125 feet. Partners will operate the properties.

Financing for the acquisition was furnished by Endowment Energy Partners, L.P. with the assistance of Associated Energy Managers, 1414 Main Street, Springfield, Mass.

E. Ralph Daniel, president, commenting on the acquisition, stated: "Not only will the company's reserve base be significantly increased by this acquisition, but this will allow Partners to establish its operational expertise in the offshore area." The company's offshore activities are managed by Harold C. Champagne, vice-president, an engineer with over 30 years experience, who has been with the company since 1987. Recently, the company added the services of Thomas E. Bailey, an engineer with more than 30 years experience, as offshore production manager to assist with the new properties as well as the producing interests of the company located in Vermillion Blocks 107, 116 and 117, offshore Louisiana.

Partners Oil Company is a publicly traded oil and gas exploration and production company based in Houston with production interests located in Arkansas, Ohio, Oklahoma and the coastal onshore areas of Texas and Louisiana, as well as the offshore Gulf of Mexico.

WARREN, MI (MAY 30) PR NEWSWIRE - The first ground breaking for a Saturn

dealer facility in Michigan occurred in the Detroit suburb of Warren today as Frank H. Galeana and company officials turned the first shovels full of earth for the future home of "Saturn of Warren."

Joining Galeana in the ground-breaking ceremonies were Donald W. Hudler, Saturn vice president of Sales, Service and Marketing; and Gerald R. "Jerry" Lewis, Saturn UAW coordinator, the Sales, Service and Marketing team.

"Frank Galeana typifies our Saturn dealer partners," Hudler said. "They are highly successful retail automotive experts with organizations committed to providing superior customer satisfaction and an exceptional sales and service experience."

The stand-alone, uniform Saturn facilities "will feature new concepts in merchandising and servicing cars including side-by-side sales and service entrances to enhance customer convenience and satisfaction," Lewis said.

"We're focusing on providing a pleasant experience for each customer who walks through the front door of this dealership," Galeana said. "This key element of Saturn's philosophy will distinguish us in the marketplace."

Saturn currently has signed franchise agreements with 97 dealers for 105 marketing areas to build 121 dealer facilities across the United States. The automaker plans to introduce its cars first on the West Coast, Tennessee and the Southeast this fall, followed by a rollout across the country.

While construction of Saturn's dealer facilities is under way in several states, equipment installation and validation of the automaker's new manufacturing and assembly complex in Spring Hill (Tenn.) nears completion.

Saturn Corporation, an independent subsidiary of General Motors, is based in Spring Hill, and Troy, Mich. The company's mission is to develop, manufacture and market a family of high-quality, affordable cars to compete in the subcompact and compact segments of the market. Saturn products will be built at a 4-million-square-foot manufacturing and assembly complex in Spring Hill. The first cars, two-door and four- door models, will be introduced in the fall of 1990.

ROMULUS, MI (MAY 30) PR NEWSWIRE - Secom General Corporation (NASDAQ: SECM) announced today that the board of directors has come to terms with

MCG Partnership on the acquisition of the properties at 38200 Ecorse Road and 6901 Cogswell Road in Romulus, for a total consideration of $750,000. Currently, the company's two subsidiaries, L & H Die, Inc. and Form Flow, Inc., operate out of the addresses under a leasing arrangement, expiring in December 1991.

MCG consists of Roy and Larry McKnight and John and Larry Cocke, who are currently officers and/or directors of Secom and who were the former owners of L & H and Form Flow prior to those companies being sold to Secom General.

Due to the related party nature of the transaction, both parties agreed to have the purchase price determined by an MAI independent real estate appraisal. Secom is financing the $750,000 purchase price with a $600,000 mortgage at 3/4 over prime and a $150,000, 5-year, promissory note at 11 percent to MCG.

WASHINGTON (MAY, 30) PR NEWSWIRE - General Electric's (GE) AstroSpace Division and COMSAT Laboratories, in a letter to the National Aeronautics and Space Administration's (NASA) Advanced Communications Technology Satellite (ACTS) Program announced that they intend to purchase and operate two Low Burst Rate (LBR) ground terminals for use with the ACTS spacecraft.

The two companies, both contractors on the satellite program, said they would make each terminal available for use by educational institutions.

In the letter to ACTS Program Manager Dean Olmstead, the organizations state: "We recommend that NASA announce to potential educational institution participants the availability of the earth terminals at COMSAT and GE. ... We would make each terminal available for such use at no charge during the initial two year experiment period and at a nominal time plus materials costs thereafter."

ACTS is the centerpiece of NASA's satellite communications R&D efforts. Planned for launch in May of 1992, ACTS will demonstrate the feasibility of incorporating advanced technologies into future communications systems.

#90150p3186 05/30/1990 ~PR Newswire

SURREY, England (MAY 30) PR NEWSWIRE - Altered Image Software Limited today announced Altered Image-SQL(tm) and Altered Image- Graphics(tm), two leading-edge products that meet the need for UNIX(R) graphical user interface (GUI) based software. The company's products allow users to migrate to the X Window System(tm) environment without costly changes to existing software.

Announced at Xhibition '90 at the San Jose Convention Center, Altered Image-SQL is a software program that brings the functionality of the industry standard OSF/Motif graphical environment to current and future Informix users. Altered Image-SQL provides an OSF/Motif front end to INFORMIX-SQL the most widely installed Relational Database Management System (RDBMS) for the UNIX Operating System, and uses the industry standard X Window System.

By running Altered Image-SQL in conjunction with the INFORMIX-SQL database users can easily migrate character-based INFORMIX-SQL applications to a windowed graphical environment without modification to existing applications.

Altered Image-SQL is one of the first applications available to users that incorporate X.deskterm(tm), a newly announced technology from IXI Limited.

Also announced today is Altered Image-Graphics, a complementary product providing a powerful management information tool which allows data from an underlying INFORMIX-SQL database to be displayed in a variety of high quality graphic formats.

Altered Image-Graphics offers a wide variety of full-color chart types

from line graphs to complex three-dimensional data models. Using a mouse, blocks of data can be highlighted and instantly displayed graphically in the chart format of your choice. Additional features of Altered Image-Graphics include support for multiple fonts, zoom capabilities, and graph annotation.

Founded by the same team that formed the UK subsidiary of Informix Software, Altered Image Software Limited is a fast growing software company headquartered in the United Kingdom. The mission of the company is to provide high quality software applications for graphical UNIX environments. Altered Image products are available for OEM licensing. The company plans to introduce OPEN LOOK (tm) versions of their products following user demand.

ORLANDO, FL (MAY 30) PR NEWSWIRE - Hughes Supply, Inc. (NYSE: HUG) today announced net income of $1,693,000 for the first quarter ending April 30, 1990 compared to $1,971,000. Fully diluted earnings per share were $.34 for the current quarter compared to $.37 last year. Sales for the quarter totaled $138,039,000, a nine percent increase over last year.

Overall market conditions for the quarter were flat to sluggish and continued to be affected by both interest rates and declining credit availability caused by the thrift crisis and higher bank lending requirements. Approximately half of the sales increase was generated by newly acquired or opened branches with the remaining portion attributable to increased market share.

The company's board of directors also declared the regular quarterly cash dividend of $.09 per share to shareholders of record on Aug. 3, 1990 payable Aug. 17, 1990.

Additionally, since Feb. 1, 1990, the company has repurchased 323,000 shares of its common stock.

PITTSBURGH (MAY 30) PR NEWSWIRE - The board of directors of Westinghouse Electric Corp. (NYSE: WX) today elected Paul E. Lego as chairman and chief executive officer, effective July 1.

Lego, 60, currently president and chief operating officer, will succeed John C. Marous, who will retire at the end of June at age 65.

Lego was elected to his present position in 1987, at which time the board declared its intention to elect him as chief executive following Marous' tenure.

"Paul Lego has been one of the chief architects of the business strategies that have made Westinghouse one of the highest- performing blue-chip stocks over the past decade," Marous said. "His outstanding performance and depth of experience throughout his 34-year career with Westinghouse ideally position him to lead the corporation in the years ahead."

Lego, a native of Johnstown, Pa., will become the 13th chief executive since the founding of the corporation 104 years ago by George Westinghouse.

Lego earned bachelor and master of science degrees in electrical engineering from the University of Pittsburgh after service in the Army. He joined Westinghouse in 1956 and held positions in engineering at the former East Pittsburgh plant. He later held management positions with the computer systems division and the former Hagan controls operation.

From 1970 to 1979, Lego was general manager successively of the semiconductor division, the electronic tube division, the electronic components divisions and the lamp divisions.

He was elected vice president and general manager of the lamp divisions in 1979. He later served as executive vice president of the electronic and control group and of control equipment, and was senior executive vice president, corporate resources, from 1985 to 1987.

Marous, who was elected chief executive officer in 1987, earned bachelor and master of science degrees in electrical engineering from the University of Pittsburgh after Army service.

He joined Westinghouse in 1949 and held a series of key sales and marketing positions in the electronic and construction products divisions before becoming executive vice president of the construction group in 1973. He was named president-international in 1979, and in 1983 was appointed president, Industries and International.

In 1977, he was awarded the Westinghouse Order of Merit. Marous is a member of the boards of directors of Bell Atlantic, Mellon Bank and Connecticut Mutual Life Insurance Co. He is also chairman of the University of Pittsburgh board of trustees and chairman of the board of the River City Brass Band.

CORAL GABLES, FL (MAY 30) PR NEWSWIRE - Patricia O. Frost, principal of Henry S. West Laboratory School in Coral Gables, has been elected to the board of directors of BankUnited (NASDAQ-NMS: BKUN), a $200 million savings bank with seven offices serving both coasts of Florida.

Frost has been principal of West Lab, which is operated jointly by the Dade County Public Schools and the University of Miami, since 1971. She also is an adjunct professor in the school of education at the University of Miami.

Frost previously served as a director of Pan American Bank in Miami from 1984 to 1986 and Village Bank in Hialeah, Fla. from 1983 to 1984. She currently is a director of Wolf Financial Company in New York City.

A bachelor of science graduate of Colby College, Frost then earned a master of arts degree from Columbia University and continued her post graduate studies at the University of Miami.

Frost is chairperson and trustee of the Charles Deering Estate Foundation, and a trustee of Florida International University, Metro Zoo, Miami Heart Institute and United Way, all of Dade County, Fla.

In addition, she is a commissioner of the National Museum of American Art at the Smithsonian Institution in Washington, a director of the Coconut Grove Playhouse in Miami, and a member of the Florida Bar Grievance and Fee Arbitration Committee.

BankUnited is a publicly owned financial institution traded on the NASDAQ national market system under the symbol BKUN.

LUDWIGSHAFEN, West Germany (MAY 30) PR NEWSWIRE - Joh. A. Benckiser GmbH has agreed to acquire the Astor/Lancaster Group of Beecham Cosmetics Europe from SmithKline Beecham plc (NYSE: SBH) for 210 million pounds sterling (US $354.7 million).

Benckiser is an international consumer products company whose major brands in their household products division include Calgon/Calfort and Calgonit; Finish and Vanish in the United Kingdom; St. Marc, Abeille and Baranne in France; Ava, Lanza and Sole in Italy; Quanto, Colon and Flor in Spain; and Calgon, Cling Free, Electrasol and Jet-Dry in the United States.

Astor/Lancaster includes the well-known European cosmetics names of Lancaster (a wide range of prestige cosmetic treatment and fragrance products); Margaret Astor (cosmetic products); Monteil (skin treatment products); Parera (fragrances); and a number of designer brands under license agreements. The business had sales of 264 million pounds sterling (US $445.9 million) in 1989, 50 percent of which were in Germany and another 40 percent in Spain, France and Italy. Astor/Lancaster has production facilities in Michelstadt, West Germany; Monaco; Chartres, France; and Barcelona, Spain. It employs approximately 3,800 people.

"This acquisition is consistent with our strategy of fueling growth by buying and fully exploiting the potential of established consumer brands," said Dr. Peter Harf, 44, chairman and chief executive officer of Benckiser. "The acquisition of Astor/Lancaster represents another major step in Benckiser's restructuring of its business. Since 1985, the company has acquired eight consumer products businesses companies in 10 countries for an aggregate consideration of more than $1 billion while shedding non-core chemical operations for aggregate proceeds of nearly $200 million."

Benckiser is now almost exclusively focused in consumer products. Major acquisitions since 1987 include Mira Lanza and Panigal in Italy, S.A. Camp in Spain, as well as the household products businesses of both Ecolab and SmithKline Beecham in the U.S.

The transaction is subject to approval by the German Cartel Office, and the approval process is anticipated to take one month.

With the acquisition of Astor/Lancaster, Benckiser expects 1990 sales to top DM 3.4 billion (US $2 billion). 1989 sales were DM 2.2 billion (US $1.3 billion).

ENGLEWOOD, CO (May 30) PR Newswire - Enercorp Inc. (OTC) said that Williams Controls Inc. (NASDAQ: WMCO), an Enercorp investee company, made the following announcement on May 16, 1990:

Williams Controls announced today its unaudited financial results for the second quarter ended Mar. 31, 1990. Net sales for the quarter were $3,883,000 with net income of $325,000 and earnings per share of 3 cents. The company said these results were the highest since the acquisition from Dana Corp. in December 1988.

In commenting on these results Williams president, Joseph W. Hovorka, said "We are pleased to see these financial results. This indicates that our marketing and margin enhancement initiatives are bearing fruit. The demand for Williams' products is strong and we see these results as an indicator of a very prosperous fiscal year."

Williams Controls manufactures and sells a wide range of pneumatic, electronic and hydraulic controls for the truck, bus, mining, construction refuse collection and heavy equipment markets. The product lines include approximately 250 different pneumatic products as well as specialized electronic and hydraulic products which are sold nationwide and in foreign countries.

Enercorp is a business development company under the Investment Company Act of 1940, as amended.

EL SEGUNDO, CA (MAY 30) PR NEWSWIRE - Led by a strong performance in its Electronics Marketing Group, Wyle Laboratories' (NYSE: WYL) net income nearly tripled in the first quarter on record sales, Charles M. Clough, president and chief executive officer, announced today. "This performance continued the momentum of rising quarterly earnings which began last fiscal year," he said.

For the three months ended April 30, 1990, net income climbed to $2,977,000, or 30 cents per share, from $1,060,000 or ten cents per share, in the same quarter last year. Sales for the period increased six percent to $108.7 million from $102.6 million in the prior year's first quarter.

Discussing operations of Wyle's Electronics Marketing Group, Clough said: "As part of our core business strategy, Wyle specializes in semiconductors and computer systems along with related value-added services. The success of that strategic focus was dramatically demonstrated during the quarter. Sales increased ten percent to $85.3 million, while the group's income more than doubled to $5,575,000.

"As was the case last fiscal year, much of the group's growth came from our customer-specific semiconductor products. Activity at our Integrated Design Engineering and Logic (IDEAL) centers, for example, again set records in the quarter. These IDEAL centers enable Wyle to design, program and test semiconductor devices to meet customers specifications.

"During the quarter, the group achieved record bookings for application specific integrated circuits (ASICs), reflecting strong customer demand for this growing business. The trend toward high- complexity products, such as programmable semiconductors and ASICs, enabled us to realize higher gross margins in a difficult market environment.

"The group's kitting business also experienced a record level of orders. This value-added service provides complete production-ready components in kit form while supporting just-in-time inventory programs for customers.

"Our shipments of computer products were up 14 percent from last year's levels. We have experienced rising demand for microcomputer products, including Intel's PC platform and NCR's personal computers. In addition, we are enthusiastic about prospects for Digital Equipment's new line of workstation products.

"Results in the latest quarter reflected sales growth at our new Boston operation serving the important New England market. This division is now contributing to the group's profitability after being established last fiscal year.

Wyle Laboratories is one of the nation's leading marketers of high-technology electronic components and computer systems. The company is also a major supplier of research, engineering and testing services to the aerospace, defense and energy industries.

YANCEYVILLE, NC (MAY 30) PR NEWSWIRE - Lamplighter Industries Inc., a manufacturer of high-technology lighting equipment, based in Yanceyville, N.C., today announced the hiring of its new director of research, Professor Li-gao Chen. Professor Chen is a political refugee from the People's Republic of China. He is an internationally respected expert in the field of luminescence.

"Professor Chen brings with him a wealth of experience and skill," commented Mr. David Emmett, Lamplighter's chief operating officer. "We're most pleased to have him with the company and confident that, with him at the helm of our research efforts, we'll be making great strides in the brightness of our product," he said. Mr. Emmett is a co-founder of Lampligher Industries and was a key player in the development of its unique, patented production process of ceramic electroluminescent lighting panels.

Lamplighter Industries specializes in ceramic electroluminescence (EL), a solid-state technology used mainly as backlighting for instrument panels in industrial and military applications. The technology is known for its durability, slender profile, uniform lighting pattern and extremely low operating cost. A key strategy of the company is to capitalize upon these advantages as it expands into the consumer market with its own line of new products.

Professor Chen has more than 30 years' experience in research and teaching. He was educated at Nankal University and Beijing University, and has served in academic roles at Northwest University, Shanxi province, and the University of Science and Technology of China, Anhul province. Since leaving China in 1986, he has held visiting professorships at the University of Utah and at the University of Glessen, Federal Republic of Germany.

ST. LOUIS (MAY 30) PR NEWSWIRE - McDonnell Douglas Corp. (NYSE: MD) is relocating the Advanced Concept Ejection Seat (ACES-II) program to its McDonnell Douglas Missile Systems Co. facility in Titusville, Fla., it was announced today.

Program responsibility is being transferred to McDonnell Douglas Missile Systems from Douglas Aircraft Co. in Long Beach, Calif., in an effort to relieve Douglas of programs not directly related to its transport aircraft business. Prior to this move, McDonnell Douglas Missile Systems was already producing portions of the ACES II seat for Douglas Aircraft at the Titusville plant.

The ACES II program is expected to have a staff of about 60 people consisting of manufacturing, quality assurance, contracts, product definition and other support staff, all from within present employee ranks. To insure program continuity several people with the program in California will transfer to Florida. The transfer is expected to be completed by the first of July. The entire ACES II program will be housed in two buildings in the Titusville area with a total of approximately 14,000 square feet.

As of April 20, Douglas Aircraft produced 5,005 ejection seats. The McDonnell Douglas Missile Systems facility will start deliveries in May. The current contract calls for 335 seats.

Besides the U. S. Air Force, customers are McDonnell Aircraft Co. for the F-15, Northrop for the B-2, and General Dynamics for the F-16.

McDonnell Douglas entered the ejection seat business almost four decades ago with the ESCAPAC line built for the A-4 and other aircraft. ACES II began production in 1977.

The use of ACES II has been credited with saving almost 200 pilots' lives in high risk situations at altitudes as high as 27,000 feet and speeds in excess of 690 miles per hour.

In addition to ACES II, the Florida Missile Production facility produces the Tomahawk cruise missile for the U.S. Navy and combat weapon systems such as the Dragon. McDonnell Douglas Missile Systems has headquarters in St. Louis and has built over 100,000 missiles for the Department of Defense.

DETROIT (MAY 30) PR NEWSWIRE - Michigan Bell has changed the name of its Directory Assistance service to "Information" to more accurately describe the service Bell operators now provide and hope to provide in the future.

"We do furnish more than telephone numbers from the directory. For example, customers can call for area code information and emergency numbers," said Roger D'Hondt, Michigan Bell district manager of public market staff. "In the future, we hope our operators will be able to provide other kinds of information customers need."

The new name is one of a number of changes Michigan Bell has made to its directory assistance service. Michigan Bell recently discontinued reconnecting customers to Information operators after the automated system states their requested number. The reconnect was eliminated to speed handling of additional directory assistance calls.

"Eighty percent of the customers reconnected to operators were in the process of hanging up," D'Hondt said. "Each day our operators were answering thousands of calls which had no customer on the line. Ending the reconnect freed them up to answer additional incoming calls."

"Callers who need more than one number should tell the operator at the beginning of the call," D'Hondt said. "Our operators will be glad to provide multiple numbers to customers who need them."

Michigan Bell has made one more change to directory assistance. The automated system which states requested numbers now thanks customers "for calling Michigan Bell."

MOLINE, IL (MAY 30) PR NEWSWIRE - The Deere & Company (NYSE: DE) board of directors today elected Hans W. Becherer, currently the company's president and chief executive officer, to the position of chairman and chief executive officer. Becherer, age 55, succeeds Robert A. Hanson as Deere & Company's chairman. Hanson, age 65, had previously announced his intention to retire effective June 1.

In other action today, the company's board of directors also elected David H. Stowe Jr. to the position of president and chief operating officer. Stowe, age 53, formerly served as Deere & Company's executive vice president, worldwide agricultural equipment and consumer products.

Additionally, the board of directors elected Bill C. Harpole, age 56, to succeed Stowe as executive vice president, worldwide agricultural equipment and consumer products. Harpole had previously been senior vice president, worldwide parts and logistics division. Harpole was also elected to Deere & Company's board of directors.

The board of directors also elected Bernard L. Hardiek to the position of senior vice president, worldwide parts and logistics division, succeeding Harpole. Hardiek, age 50, previously served as Deere & Company's vice president for business development, planning and taxation.

The board of directors also elected Crandall C. Bowles to membership on the board of directors. Since 1982, Bowles has served as president of The Springs Company, a South Carolina-based business with a variety of manufacturing and insurance operations, including a railroad, machine tool operations, and insurance company and real estate developments.

Becherer joined Deere & Company in 1962 and served in a variety of marketing and management positions in Europe. He was elected vice president responsible for marketing operations in Latin America, Australia and the Far East in 1977. In 1983, he was elected senior vice president of the overseas farm and consumer products division, and in 1986 was elected executive vice president, worldwide farm equipment and consumer products.

Becherer joined the company's board of directors in February 1986, and was elected president and chief operating officer in April 1987. He was elected president and chief executive officer in August 1989.

Stowe joined Deere & Company in 1968 and served in several management positions in both the North American and overseas operations. He was appointed vice president in charge of overseas marketing for the industrial equipment division in 1981 and was elected senior vice president in charge of the division in 1982. In 1987, Stowe was elected executive vice president of the worldwide agricultural equipment and consumer products division. He joined the company's board of directors in 1982.

Harpole joined Deere & Company in 1955 and served in a variety of management positions in the company's financial services and overseas operations. In 1983, Harpole was elected vice president for Latin America, Australia, the Far East and export operations. He was appointed

vice president for business development and planning in 1987, and senior vice president for the worldwide parts and logistics operations in 1988.

Hardiek joined Deere & Company in 1979 as director of taxes, following 17 years of service with the Internal Revenue Service. In 1987, Hardiek was elected vice president, accounting and taxation, and in 1988 was appointed vice president, business development, planning and taxation.

TUALATIN, OR (MAY 30) PR NEWSWIRE - State Treasurer Tony Meeker and other government officials today joined the presidents of Oki Electric Industry Company Ltd., Japan, Oki Semiconductor Group and Oki America in dedicating Oki Semiconductor's $25 million U.S. manufacturing plant in Tualatin, Ore. The dedication was followed by a traditional sake ceremony and tour of the 60,000 square-foot facility.

Oki Semiconductor, a subsidiary of Oki Electric Industry Company Ltd., based in Japan, added the Oregon manufacturing plant as part of an effort to expand its manufacturing capability. Annual sales for Oki Electric Industry Company Ltd. are close to $3.9 billion.

"The addition of this plant will enable us to better serve our U.S. customers and build on our reputation as a frontrunner in the semiconductor industry," stated Masao Nogami, chairman of the board of Oki Semiconductor.

The opening ceremony concludes phase I of this three-phase development constructed on a 60-acre plot in the Tualatin Industrial Park, located in Oregon's Sunset Corridor, otherwise known as the "silicon forest."

Phase I of the new plant will house an I.C. (integrated circuit) assembly and test facility with production capacity of 1 million per month. Mass production of 1M DRAMs and module assemblies is expected to be underway in June. Plans exist to expand manufacturing of a full range of semiconductor-related products within the next three years.

The selection of Tualatin as the site of the new plant was made after extensive evaluation and review and provides Oki with the best mix of resources necessary to effectively service their North American customer base, according to Nogami.

Oki Semiconductor joins several other high-tech Japanese companies such as NEC, Fujitsu, Epson and Toshiba Ceramics in locating in the "silicon forest." Approximately 120 new jobs are expected as a result of I.C.

assembly and test facility, with many more resulting from planned expansion.

BERWYN, PA (MAY 30) PR NEWSWIRE - The MATRIX Organization Inc. has named both Richard A. Bryant and Samuel S. Porrecca to the newly-created position of vice president of operations. Each will assume assignments for distinct company areas and be considered at the company's "officer level."

Bryant will be responsible for all the company's branch office activities. MATRIX has offices in Boston; Bernardsville, N.J.; Philadelphia; and Wilmington, Del.

He brings significant experience to his new role. Bryant was appointed vice president in 1989, and previously held several branch management positions for MATRIX. He was elected to the company's management committee in 1988.

In his new position, Porrecca will have responsibility for the company's national accounts activities, including nationwide computer- aided systems engineering (CASE) consulting and local area network (LAN) consulting and education programs.

He was appointed vice president for MATRIX in 1989 and served as branch manager for the company's Boston and Philadelphia offices. Porrecca was elected to the organization's management committee in 1988.

Porrecca will be located at the company's corporate headquarters in Berwyn and Bryant will be located at its Philadelphia branch office in Wayne, Pa.

The MATRIX Organization provides professional services and network integration consulting expertise to a wide range of corporations throughout the United States.

Earlier this month, MATRIX announced its name will change to CGI Consulting, Inc. to become more closely aligned with its parent company CGI Informatique, a $250 million, international management consulting firm based in Paris. The name change will take effect September 1, 1990.

#90150p3242 05/30/1990 ~PR Newswire

PHILADELPHIA (MAY 30) PR NEWSWIRE - Strawbridge & Clothier (NASDAQ: STRWA) announced today that for the first quarter of the fiscal year 1990, ended May 5, sales were $209,249,000 compared to $190,530,000 for the same period last year, an increase of 9.8 percent.

Earnings for the first quarter were $3,090,000 compared to $1,559,000 in 1989, an increase of 98.2 percent. Earnings per share were $.34 in 1990's first quarter compared to $.17 a year ago.

Strong first quarter sales, combined with careful control of inventory levels, which reduced markdowns and thus improved gross margin, contributed to the significant increase in first quarter earnings. Continued emphasis on expense control also contributed to this positive result. In the retail industry, first quarter earnings are historically a small percentage of annual earnings and year to year comparisons can fluctuate widely.

On April 18, 1990, the company opened its 24th Clover store, the first in the state of Delaware, at the Kirkwood Plaza on Kirkwood Highway and Route 7, southwest of Wilmington, in New Castle County, Del. The store has exceeded its sales plan since opening.

Plans have recently been announced to open the company's 25th Clover store at Ralph's Corner Shopping Center located at the intersection of Welsh Road and Forty Foot Road in Hatfield Township, Montgomery County, Pa. The total remodeling of the company's largest Clover store, on Cottman Avenue in Northeast Philadelphia, is due for completion by the end of July.

At the Cherry Hill department store, the two-year total renovation and expansion project is scheduled to be finished by early fall. This will coincide with a major remodeling of the Cherry Hill Mall.

At its regular meeting on March 28, 1990, the board of directors declared a 7 percent stock dividend which was issued to Series A and Series B shareholders on May 17, 1990. The dividend was the 28th consecutive annual stock dividend paid by the company.

STRAWBRIDGE & CLOTHIER
Statement of Consolidated Earning
(Unaudited)

Thirteen weeks ended	May 5, 1990	April 29, 1989
Net sales	$209,249,000	$190,530,000
Earnings before income taxes	5,116,000	2,580,000
Provision for income taxes	2,026,000	1,021,000
Net earnings	3,090,000	1,559,000
Earnings per common share	$.34	$.17

Average common shares	9,130,309	9,088,109
Trailing year ended	May 5, 1990	April 29, 1989
Net sales	$969,025,000	$911,834,000
Earnings before income taxes	54,262,000	44,131,000
Provision for income taxes	21,572,000	17,401,000
Net earnings	32,690,000	26,730,000
Earnings per common share	$3.58	$2.95
Average common shares	9,125,252	9,031,355

NOTES:

(1) This in an interim statement subject to audit. (2) Earnings per share amounts are based on the weighted average number of shares of common stock and common stock equivalents (employee stock options) outstanding during each period after recognition of preferred stock dividends and the 7 percent stock dividend paid on May 17, 1990.

(3) New store preopening expenses had the effect of reducing earnings per common share by $.04 for the 13 weeks ended May 5, 1990.

WOODBRIDGE, NJ (MAY 30) PR NEWSWIRE - Bull HN Information Systems, Inc. today announced the signing of a contract with SmartCard International, Inc. to design and produce their Smart Card Authorization Terminal (SCAT). The contract calls for the delivery of a minimum of one thousand (1,000) terminals. Bull has the exclusive worldwide marketing rights for the SCAT terminal.

The SCAT terminal is designed to read both smart cards and magnetic stripe cards. This will allow the use of the current magnetic stripe card while providing for the development of the more secure, reliable, and lower transaction cost smart card.

Bull believes that this terminal provides protection for the current system while assuring growth as networks migrate to smart card technology.

"SmartCard International, Inc. not only has the capability of providing us with the terminals we require, but also has one of the most advanced card architectures and languages in the industry," according to a source in Bull HN Information Systems.

Bull H.N., headquartered in Billerica, Mass., is located outside Boston. It is a member of the Group Bull corporate family, which provides information solutions to customers in over 90 countries. Bull H.N. is a worldwide information systems company with both U.S. and international operations with sales in excess of $2.2 billion.

SmartCard International, Inc. (NASDAQ: SMRT), headquartered in New York City, is a publicly traded U.S. company. The company provides enhancements to marketing and operational systems through the design, manufacture, service and marketing of high quality smart cards, hardware and software. This is the largest contract ever procured by SmartCard International.

KANSAS CITY, MO (MAY 30) PR NEWSWIRE - SAZTEC International, Inc. (NASDAQ: SAZZ), a Kansas City-based leader in information technology, today announced a restructuring of top management. Gary N. Abernathy, current president and chief operating officer, will assume the role of vice chairman, and Richard C. Thompson, current executive vice president of operations, will become president and chief operating officer.

According to Thomas L. Reed, chairman and chief executive officer, the restructuring will allow SAZTEC to take better advantage of major opportunities in the areas of mergers and acquisitions, such as with the recent signing of a letter of intent with Advanced Automation Associates, Inc. (AAA), a New England information processing company.

"We are now positioned internally to take full advantage of the outstanding growth opportunities for our industry in the 1990s," Reed said.

As vice chairman, Abernathy will direct the major efforts of SAZTEC in merger and acquisition analysis and implementation coordination. In addition, he will direct the new products and services areas and will assist Reed in the coordination, development and expansion of European operations.

Thompson, as president and chief operating officer, will assume the day-to-day responsibilities for the management of SAZTEC, including sales, marketing, operations, technical services, finance and administration, and report directly to Reed. Thompson's previous experience includes top management positions in sales, marketing, programming and administration, and more than 30 years in the computer industry.

SAZTEC, an international leader in the use of computer technology, provides comprehensive services to convert information for use on new or existing computer systems.

#90150p3270 05/30/1990 ~PR Newswire
MINNEAPOLIS, (MAY 30) PR NEWSWIRE - Honeywell Inc. (NYSE: HON) and Northwest Airlines today announced an agreement with Soviet aviation officials that could lead to a global system of navigation free of ground-based equipment.

Under the agreement, Northwest is the first Western airline to test-fly GLONASS, the Soviet satellite positioning system, and Honeywell is the first U.S. company with rights to develop GLOSNASS for commercial aviation.

The agreement took the form of a Memorandum of Understanding (MOU) signed by participants from Honeywell, Northwest and the Soviet Union for the purpose of jointly studying and exchanging information regarding the integration of the U.S. Global Positioning System (GPS) and the U.S.S.R. Global Orbiting Navigation Satellite System (GLONASS).

Discussions leading to this agreement began last September and were concluded May 18 in Leningrad.

The general purpose of the MOU is to express the parties' interest in the

development of a joint, standardized global navigation system based on emerging technologies being developed in the United States by companies such as Honeywell in the form of GPS and in the U.S.S.R. in the form of GLONASS.

The first step under the agreement involves joint flight testing of GPS and GLONASS navigation equipment to collect data for the purpose of certification.

Flight testing is to take place on board a Northwest 747 during 1991. To accomplish this, the Soviet participants will loan two sets of GLONASS airborne navigation equipment to Honeywell and Northwest. The GLONASS equipment will be compatible with standard ARINC specifications (ARINC, Aeronautical Radio Inc., is a nonprofit, airline-owned corporation which defines form, fit and function of avionics equipment throughout a great part of the world).

According to the MOU, delivery of GLONASS equipment to Honeywell and Northwest is to take place in December 1990 with installation in a Boeing 747 freighter in February 1991. Flight testing would take place from March through September 1991 and a complete report would be due in December 1991.

The MOU will remain in effect for five years, subject to approval by governments of both countries.

The Soviet contingent was led by Dr. Gennadiy N. Gromov, chief designer-general of the All-Union Scientific Research Institute of Radio Equipment (AUSRIRE), the organization that developed the landing system for the Soviet space shuttle. In addition to AUSRIRE, the Soviet group included representatives from the Leningrad Scientific Research Radio Technical Institute, the Ministry of Radio Industry of the U.S.S.R., the Scientific-Industrial Association of Applied Mechanics and the Scientific Experimental Center of ATC Automation. The meeting was arranged with the cooperation and support of Dr. Tatiana Anodina representing the Soviet Ministry of Civil Aviation.

Alfred A. Checchi, chairman of Northwest's holding company, NWA Inc. (NYSE: NWA), hailed the agreement as crucial to the further development of international commercial aviation. "The benefits of opening this Soviet satellite technology to the West are immeasurable," said Checchi. "Combining GLONASS with the positioning system of the United States will give position data of such pinpoint accuracy that safety will be enhanced, capacity restraints will be lessened and a worldwide standard of navigation can be developed."

James J. Renier, chairman and chief executive officer of Honeywell, spoke to the long-term benefits of the agreement. "As a global corporation with

a long-standing relationship with the Soviet Union, we're well aware of the value of cross-cultural exchange. By removing barriers, this agreement is not only good business but positive global citizenship for the coming generations as well."

GPS and GLONASS are satellite-based systems that hold the promise of offering the ultimate in all-weather, worldwide navigation. Both systems are intended to perform as "sole means of navigation" for commercial aviation providing accurate position data in three dimensions, with similar accuracy. Both systems will use 24 satellites in orbit (21 active three spares); however, the orbital configurations (number of orbital planes, inclination to Equator, for example) differ, among other details.

The Honeywell system in particular, called "GPIRS," integrates global positioning data with continuously available inertial reference inputs to achieve extremely accurate positioning even during periods of reduced satellite coverage.

Northwest is America's fourth largest airline, serving 130 cities in 41 states, Canada, Mexico, the Caribbean, Asia and Europe.

Honeywell is a global controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.1 billion.

#90150p3272 05/30/1990 ~PR Newswire

LITTLETON, CO (MAY 30) PR NEWSWIRE - A W.R. Grace & Co. subsidiary opened a new manufacturing facility here today for its Grace Membrane Systems unit that will provide gas separation processes to the oil, gas and petrochemical industries. Grace Membrane Systems will operate as part of Grace Specialty Chemicals Co., the company's $3.3 billion operating unit. The new facility, built at a cost of more than $3 million, will also house a research and development laboratory.

Colorado Governor Roy Romer joined W.R. Grace & Co. Chairman and Chief Executive J. Peter Grace at the grand opening ceremonies. Also in attendance were J. Murfree Butler, a Grace vice chairman; Donald H. Kohnken, president of Grace Specialty Chemicals Co., and Dr. F. Peter Boer a Grace executive vice president. The facility is located at 8101 Midway Drive in Littleton.

Grace's membrane separation technology is primarily designed to remove unwanted gas contaminants from natural gas streams. It also recovers

hydrogen from a variety of petroleum and petrochemical processes. Grace Membrane Systems provides complete systems to customers, including installation and customer service. The sales and engineering services are headquartered in Houston. Other sales activities are handled through Grace's Worms, Germany, office and numerous agents located around the world.

In his address, Mr. Grace noted that the facility was built with environmental safety as a prime concern. "This manufacturing facility was designed with state-of-the-art production and emission control systems," he said. "In fact," he added, "25 percent of the cost of this facility is for equipment and controls related to safety and environmental safeguards."

In addition to Grace Membrane Systems, Grace has three other operating units in Colorado: The Western Division of Grace Drilling Company; Farr Better Feeds in Greeley, and Colowyo Coal Company in Meeker. Grace employs more than 1,000 people in Colorado.

According to Butler, "Grace Membrane Systems brings the kind of new products and high technology that are essential to keep the U.S. in the forefront of high technology. The manufacturing, marketing and technical development of these types of products require creativity, vision, capital good management and a highly trained work force -- all are extremely valuable assets in today's world."

Boer discussed the impact of Grace Membrane Systems on the Colorado economy. "We expect jobs here to increase in the future. In addition, it means economic growth for W.R. Grace & Co. This business will double and double again over the next five years and it will be a contributor to the U.S. trade balance." In addition, Boer noted, "We just received a major order from Japan, and as you know this is the hardest market in the world to sell a product."

While the membrane separations business will be important to the domestic energy business, Butler also noted its significance worldwide. "The technology developed at Grace Membrane Systems will eventually find its largest market outside the U.S. In fact, we expect that 40 percent of this year's sales will be overseas and that this figure will grow to 60 percent by 1995."

BOULDER, CO (MAY 30) PR NEWSWIRE - Hauser Chemical Research Inc. (NASDAQ: HAUS) announced today that it has completed an agreement with Bristol-Myers Squibb for supply of Taxol, a promising anti-tumor compound.

The contract is valued at over $500,000 during the next six months.

Taxol has been under study in clinical trials by the National Cancer Institute (NCI), a division of the National Institutes of Health (NIH), since 1984. It is currently entering Phase III trials on humans. Hauser has completed two contracts with NCI for the production of Taxol, and is currently working on a third contract under its Master Agreement with NCI for production of Taxol. This contract has a value of $117,000.

Taxol is a novel anti-microtubule agent that appears active against ovarian cancer. The mechanism of action is distinct from any currently used cytotoxic agents; it is the first of a new class of anti-tumor compounds. Taxol has shown a broad spectrum of activity against a variety of cancer types, including ovarian, leukemia, melanoma, and non-small-cell lung cancer.

Hauser Chemical Research is a chemical and engineering technology company encompassing chemical research and chemical analysis, engineering services petroleum testing, and isolation and purification of high-value products and chemicals from biomass (i.e. plant and animal tissues). It is one of only a few companies nation-wide applying chemical process technologies to the broader field of biotechnology with a special emphasis on natural products.

Hauser Chemical Research has developed proprietary chemical technologies that enable it to isolate and purify extracts and natural compounds at a high-quality level and lower cost than competing technologies. The company processes materials for clients producing pharmaceuticals, cosmetics, nutrients and other high-value products. Its service and research activities encompass the general field of organic and inorganic chemistry with special expertise in process and product development, synthesis, surface modification, chemical analysis, environmental analysis industrial problem solving, product formulation, material testing, engineering services and forensic investigations.

DETROIT (MAY 30) PR NEWSWIRE - GM International Export Sales (IES) Executive-in-Charge Dale R. Hermiller has announced the following appointments of Wesson D. Lambert as director IES Fleet, Government and Military Personnel Sales; M. Michael Milius as director Chevrolet-Pontiac-GM of Canada (CPC) Product Development; and Thomas W. Olmsted to the position of director Europe Marketing Operations. All appointments are effective immediately.

Lambert assumes responsibility for worldwide fleet and government sales plus the sale and delivery of GM vehicles to U.S. military service personnel located in overseas markets. He is a graduate of General Motors Institute and began his career with General Motors Overseas Operations (GMOO) in Detroit, as a service engineer in September 1959. Lambert has held numerous field assignments with GMOO in France, Belgium, England and Spain. In 1982, he returned to Detroit as director of Service/Consumer Relations. He was promoted to the position of assistant general sales/service manager in 1989.

Milius began his career with General Motors as a junior statistician in 1964 for GMOO in New York City. He is a Miami of Ohio University graduate. He has held several overseas positions including sales staff and merchandising manager in Brazil, 1970; director sales, parts and service in the Philippines, 1975; and export manager for GM do Brazil S.A. 1980. Milius' new responsibilities will include the coordination and interface with Chevrolet, Pontiac and GM of Canada for the export of GM vehicles into overseas markets.

Olmsted, as director of the Europe Marketing Operations, will focus on marketing strategies to promote the sale of North American-produced GM vehicles throughout Europe. Olmsted began his career as a clerk in 1962 at Chevrolet Motor Division, Detroit. He held various supervisory positions before being promoted to general supervisor of Production Control at Chevrolet in 1972 and administrator in 1973. In 1979, he joined the GM Materials Management Staff as manager-Export Scheduling and Order Processing. Olmsted joined the overseas staff as manager- Export Vehicle Distribution in 1984. Olmsted was born in Detroit and is a graduate of Wayne State University.

CHICAGO (MAY 30) PR NEWSWIRE - Centel Corp. (NYSE: CNT) announced today that it has reached an agreement in principle to sell its Centel Communications Systems operation in a stock transaction to a group headed

by Edward H. Lavin Jr. Details of the agreement were not revealed.

Centel announced in May 1988 its intention to sell its Business Systems group, which included Centel Communications Systems, Centel Federal Systems and Centel Information Systems. Centel sold its Federal Systems unit to a group of the operation's managers earlier this year. The company is still seeking bids for its Information Systems subsidiary.

Centel Communications Systems, which is based in Rolling Meadows, Ill., sells and services voice and data systems across the nation that range from 20-port installations to multi-thousand-port complex private networks for commercial, governmental and institutional customers.

Chicago-based Centel Corp., which had 1989 revenues of $1.19 billion, provides local exchange telephone service through more than 1.6 million access lines in nine states; operates cellular communications franchises in 44 markets, and supplies electric power to 136,000 customers in two states.

#90150p3288 05/30/1990 ~PR Newswire

CHERRY HILL, NJ (MAY 30) PR NEWSWIRE - The Rocking Horse Child Care Centers of America, Inc. (NASDAQ: RHCC), cited by INC. Magazine as the nation's fastest growing publicly traded child care company over the last five years, today reported sharply higher first quarter revenues and operating profits, but interest charges associated with recent acquisitions created a deficit for the period.

John W. Quaintance, president and CEO, noted that "the current management of Rocking Horse has successfully completed its first five-year program ahead of schedule, having achieved its goal of developing strong strategic locations and building an infrastructure capable of carrying as many as 500 units, five times the number we currently operate. The five-year program entailed acceptance of high, but manageable, debt levels and interest charges which moderated profits and occasionally produced modest deficits. It also called on management to assume the burden of upgrading the productivity and profitability of acquired centers, which has been accomplished. This ambitious program brought Rocking Horse from a six-unit operation to a level where it is acknowledged in each of its communities and within its own industry as one of the leading providers of quality child care."

Revenues for the first quarter ended March 31, 1990 rose 71 percent to a record $9,108,363 from $5,335,946. Operating profits before general and administrative expenses and interest charges amounted to $1,650,315,

compared with $1,135,373 in last year's first quarter. Current quarter interest expense rose to $901,899 from $455,767.

A first quarter deficit of $152,793 was recorded, equivalent to a loss of $.01 per share on a weighted average of 10,546,527 common shares and common equivalent shares outstanding. This compared with last year's first quarter income of $259,229 or $.02 per common share on a weighted average of 10,413,158 common shares and common equivalent shares then outstanding. Of that amount, 110,956 or $.01 per share represented an extraordinary credit arising from the utilization of net operating loss carryforward.

CHICAGO (MAY 30) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) announced that it filed today with the Securities and Exchange Commission a shelf registration statement for the issuance and sale from time to time of up to $1 billion of debt securities. The debt securities may be issued in one or more series.

Sears may sell debt securities to or through underwriters, and also may

sell debt securities directly to other purchasers or through agents. Such underwriters may include Dean Witter Reynolds Inc., Goldman, Sachs & Co. and Morgan Stanley & Co. Incorporated, or may be a group of underwriters represented by firms including any or all such firms.

A registration statement relating to the debt securities has been filed with the Securities and Exchange Commission but has not yet become effective. The debt securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sales of these securities in any states in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

A copy of the prospectus, when available, may be obtained from Dean Witter Reynolds Inc., 2 World Trade Center, New York, N.Y., 10048; Goldman, Sachs & Co., Prospectus Department, 85 Broad St., New York, N.Y., 10004 or Morgan Stanley & Co. Incorporated, Prospectus Department, 1251 Avenue of the Americas, New York, N.Y., 10020.

TROY, MI (MAY 30) PR NEWSWIRE - Rick Inatome, chairman, president and chief executive officer of Inacomp Computer Centers, Inc. (OTC: INAC), today announced a new franchise dealer program called "TeamWorks."

This new program, featuring a mark-up on product vs. the traditional royalty structure, is expected to expand Inacomp's computer dealer network nationwide.

TeamWorks is positioned as a program developed by dealers, for dealers. "This program acknowledges the dynamics of the maturing microcomputer industry and is the result of over a year's worth of research involving independent dealers and Inacomp franchisees," said Inatome. "To diminish the effects of margin pressures, Inacomp's TeamWorks program does away with the royalty structure and allows dealers more profit potential because they pay only for products and services they want," Inatome continued.

"We expect to attract new dealers to TeamWorks, which is very competitive and sensitive to the industry's problem of over- distribution. We are offering protected territories in targeted areas to control/address this

problem," stated Richard Stopa, vice president, national franchising.

The TeamWorks program has been designed to attract value-added dealers with expertise required to meet the more sophisticated technological needs of today's customers. Inatome added, "It is important to Inacomp that our value-added, customer-first philosophy is extended through our franchising network."

Inacomp Computer Centers, Inc. markets microcomputer systems and related products and services through over 200 company-owned, dealer and affiliate locations across the country. The company provides system consultation, installation, classroom training, system maintenance and repair to its customers. Inacomp also provides short-term rental and long-term leasing of microcomputer systems. Corporate offices are in Troy.

#90150p3292 05/30/1990 ~PR Newswire

OLYMPIA, WA (MAY 30) PR NEWSWIRE - The Weyerhaeuser Paper Co., Cosmopolis has been fined $50,000 by the Washington State Deparment of Ecology for violating sulfur dioxide air quality standards during November and December 1989, the department said today.

The company was penalized for 10 separate sulfur dioxide violations. "Exceeding ambient air pollution standards is considered a serious violation because of the potential threat to human health," said Dick Burkhalter, Ecology Industrial Section supervisor. "Because of the serious nature of the violations, the company was penalized the maximum allowable for each violation."

Burkhalter said the excessive air emissions resulted because a Weyerhaeuser air pollution monitor located in one of the mill's smokestacks was incorrectly calibrated. The monitor was giving plant operators lower sulfur dioxide stack emission readings than were actually occurring.

Sulfur dioxide is a colorless gas which can cause respiratory problems. "The mill has instituted measures to prevent this type of failure in the monitor from happening again," Burkhalter said.

Ecology's enforcement action noted the following violations: -- three violations of the one-hour average of greater than 0.4 parts per million (ppm) sulfur dioxide in a one-year period;

-- four violations of the one-hour average of greater than 0.25 ppm sulfur

dioxide in a seven-day period; and

-- three violations of the one-day average of greater than 0.1 ppm sulfur dioxide in a one-year period.

The penalty was issued May 15. The company may appeal it to Ecology and/or the state Pollution Control Hearings Board.

ATLANTA (MAY 30) PR NEWSWIRE - BellSouth Enterprises has added a trial planning and implementation function to their Wireless Strategy Group to study the market and technological viability of a number of wireless systems.

The new trial group is currently conducting a nationwide study of broad-based market opportunities for personal communications systems and is expected to begin trial implementation in late 1990.

"BellSouth Enterprises is firmly committed to the growth and development of wireless communications as part of our corporation's overall commitment to being the leader in communications," said Earle Mauldin, Group President of Mobile Systems, BellSouth Enterprises. "The Wireless Strategy Group is dedicated to exploring emerging wireless communications services in order to continue to provide the best total communications solutions to our customers."

"We are studying all of the new wireless technologies currently being discussed, including CT2 and PCN," said Eric Ensor, Director of Worldwide Wireless Strategy. "By first assessing the customer needs and market opportunities, we can then determine which technologies BellSouth Enterprises will pursue.

"BellSouth companies have been in the business of personal communications for over 100 years and we will continue to employ to the fullest emerging technology to offer our customers the most useful, efficient, and cost effective service available."

The Wireless Strategy Group, headquartered in Atlanta, is part of the BellSouth Enterprises Mobile Systems Group. The Mobile Systems Group consists of BellSouth's two domestic cellular telephone service companies, BellSouth Mobility and American Cellular Communications, and MobileComm, a national paging company. BellSouth's domestic cellular operations serve

over 480,000 customers and are the second largest in the United States. In addition to its domestic mobile operations, BellSouth operates paging and cellular services in the United Kingdom, Australia, Argentina and soon will begin service in Mexico and Uruguay.

BellSouth Enterprises manages a group of companies within BellSouth Corporation that provide telecommunications and data processing equipment, mobile telecommunications services and directory advertising/publishing services throughout the world.

ST. PAUL, MN (MAY 30) PR NEWSWIRE - Merrill Corp. (NASDAQ: MRLL) announced today that it has entered into a letter of intent to purchase selected assets of S. Printing Co. of Illinois (formerly Sorg Printing Co. of Illinois), a leading Chicago-based financial printer.

In commenting on the proposed purchase, John Castro, president and chief executive officer of Merrill Corp., said, "This represents a good fit for us in the Chicago market. Their people have a similar business philosophy and they are committed to providing excellent service."

Earlier today, Marrill announced record operating results for the first quarter ended April 30, 1990.

S. Printing Co. of Illinois is currently operating under Chapter 11 of the Federal Bankruptcy Code.

Merrill Corp. is a leading national financial printing company. It also provides computerized typesetting and document reproduction services. The company serves the financial, legal, corporate and commercial printing communities through its operating centers in New York, Boston, Newark, Washington D.C., Atlanta, Chicago, St. Louis, Minneapolis/St. Paul, Denver Seattle, Portland, San Francisco, San Diego, Newport Beach and Los Angeles.

ST. PAUL, MN (MAY 30) PR NEWSWIRE - Astrocom Corp. (NASDAQ: ACOM) today completed the sale of the business and assets of its wholly owned

subsidiary, Circuit Board One Inc., to Visi-Tour Vision Inc. of St. Paul. Circuit Board One, located in Chaska, Minn., manufactures and sells printed circuit boards, which are used by manufacturers of electronic products.

The purchase price consists of $900,000 cash, a promissory note in the amount of $329,000, and 500,000 shares of the common stock of Visi-Tour or 18 percent of its outstanding shares. Astrocom indicated that it will apply the proceeds to reducing bank debt and payables.

"The sale of this subsidiary will enable us to concentrate all of Astrocom's resources on the growth and success of our digital communications business," chief executive officer Stephen C. O'Hara commented.

Visi-Tour is a publicly held company formerly engaged in the operation of electronic advertising and information systems. The company has been inactive since it withdrew from the electronic advertising business in late 1987.

Astrocom Corp. designs, manufactures and markets advanced digital communications equipment for the data transmission needs of corporations and other large organizations. Astrocom multiplexers and data sets provide cost-effective long-distance communications via digital public data networks. In a local environment, Astrocom fiber optic and coaxial multiplexers support a broad range of different manufacturer's networks.

#90150p3307 05/30/1990 ~PR Newswire

HOUSTON (MAY 30) PR NEWSWIRE - Quanex Corp. (NYSE: NX), a leading manufacturer of specialty metals, today reported results for the second quarter and six months ended April 30, 1990.

Compared to last year, sales for the second quarter increased $33.8 million to $165.5 million. However, operating earnings were $13.7 million a $1.7 million decline from last year's second quarter which was the best second quarter in the company's history. Net income declined $1.4 million to $7.3 million; earnings per share decreased from 63 cents to 53 cents per primary common share.

Sluggish Economy, Business Seasonality And Strikes Impact First Half

Compared to the like period last year, sales for the six months ended April 30, 1990, increased $63.5 million to $310.6 million. A $4.6 million decline in operating earnings to $23.1 million and higher interest expense

related to the Nichols-Homeshield (NH) acquisition, were primary factors in a $4.7 net income decrease to $11.1 million. Earnings per primary common share decreased from $1.15 to 78 cents.

Six months results seasonally lower first and second quarter earnings at NH, strikes at the Michigan Seamless Tube Division and at LaSalle Steel, and a sluggish economy together with production cutbacks in auto and heavy truck markets.

Nichols-Homeshield Acquisition Enhances Second Quarter Results Sales increases were primarily attributable to NH, acquired in August 1989. Although affected by seasonal patterns, NH's second quarter operating income of $3.4 million and six month operating income of $5.4 million partially offset the impact of lower operating income from the steel bar and steel tube segments.

Quanex Board of Directors Declare Dividends In other business, the Quanex board of directors declared a regular quarterly dividend of 10 cents per share of Quanex common stock and a quarterly dividend of 57 cents per share of depository convertible exchangeable preferred stock. The common and preferred dividends are payable July 2, 1990 to shareholders of record on June 15, 1990.

Quanex is a technological leader in the manufacture of specialty metals including steel, aluminum and titanium products for transportation, capital equipment, home building and remodeling and energy processing markets.

#90150p3308 05/30/1990 ~PR Newswire

EUGENE, OR (MAY 30) PR NEWSWIRE - The board of directors of Bohemia Inc. (OTC: BOHM) today reported improved results for the fiscal year ended April 30, 1990, despite a decline in earnings for the fourth fiscal quarter.

Net income for the year rose to $17,019,000, equal to $3.24 a share. In fiscal 1989, the company had net income of $13,759,000, equal to $2.64 a share, including $.42 a share from tax carry-forward benefits. Revenues rose to $349,616,000 from $305,657,000 in the prior year.

For the fourth fiscal quarter, net income amounted to $2,386,000, equal to $.45 a share. Net income for the prior year's fourth quarter totaled $5,111,000, equal to $.98 a share, including $.04 a share from tax carry-forward benefits. Revenues were $78,691,000 compared to $81,503,000 in the fiscal 1989 period.

Per-share figures for the full year and fourth quarter of fiscal 1989 have been adjusted for a three percent stock dividend paid Jan. 3, 1990.

Richard D. Tinney, president and chief executive officer, said fiscal 1990's performance reflected increased export sales, and generally favorable forest products and chip prices which prevailed for the first three quarters of the year.

"The lower fourth quarter earnings were mainly due to a steep decline in chip prices," Tinney said, "and escalating costs of raw materials, which far exceeded increases in prices for manufactured products. Also, the prior year's fourth quarter benefited from a temporary surge in plywood prices."

In other actions taken today the board of directors declared a regular quarterly cash dividend of $.05 per share. The dividend is payable June 26, 1990, to shareholders of record June 11, 1990. The board also decided to discontinue the annual 3 percent stock dividend which has historically been issued during January of each year.

The board also authorized the company to repurchase approximately 100,000 common shares in the open market in accordance with applicable SEC requirements for such purchases. These shares will be utilized for issuance to the company's 401-K profit-sharing plan. The company has approximately 5.1 million common shares outstanding.

Bohemia, established in 1916, is a diversified forest products manufacturing company which operates 14 plants in Oregon and California.

ARLINGTON, VA (MAY 30) PR NEWSWIRE - Thomas F. Carroll has been named vice president and general manager of Gannett Outdoor of Chicago.

The announcement was made today by Don Davidson, president and CEO of Gannett Outdoor. Gannett Outdoor is the largest outdoor advertising company in North America.

Carroll, 35, a native of Grand Forks, N.D., joined Gannett Outdoor of Michigan in 1984 as market manager in Grand Rapids. In 1986 he moved to Detroit as vice president/sales manager. He was appointed executive vice president of Gannett Outdoor's Michigan operation in August 1989.

Carroll succeeds Louis P. Salini, who earlier this month was named president and general manager of Gannett Outdoor of St. Louis.

Gannett Co., Inc. (NYSE: GCI), is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. In addition to its publications and Gannett Outdoor, the company operates ten television stations, 16 radio stations and Gannett News Services.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

JACKSONVILLE, FL (MAY 30) PR NEWSWIRE - Harrell International, Inc. ("HI") (NASDAQ: HLTL) has entered into an agreement in principle with Clover, Inc., a newly formed Delaware corporation owned by Victoria Berensen, relating to a proposed transaction which would involve: (a) an increase in HI's authorized capital stock from 2,000,000 shares of common stock, par value $1.00 per share, to 10,000,000 shares of common stock, par value $.01 per share, and the division of such common stock into two classes, Class A and Class B, the rights, privileges and entitlements of holders of which would be indentical except that on all matters submitted to HI's shareholders for approval, the holders of Class B common stock would be entitled in the aggregate to a vote equal to that of the aggregate outstanding shares of Class A common stock plus one additional vote; (b) designation of the 435,380 shares of HI common stock issued and outstanding prior to such recapitalization as Class A common stock; (c)

issuance to Clover, Inc., for a purchase price of $500,000 (payable $250,000 at closing and $250,000 on the 180th day following closing), of the following securities:

(i) 217,690 shares of HI's Class A common stock;
(ii) 217,690 shares of HI's Class B common stock;
(iii) A 5-year warrant entitling Clover, Inc. to purchase an additional 435,380 shares of HI's Class A common stock at a purchase price of $1.50 per share; and
(iv) A 5-year warrant entitling Clover, Inc. to purchase an additional 435,380 shares of HI's Class A common stock at a purchase price of $2.00 per share; (d) prior to the closing of such sale, payment of a dividend to HI's existing shareholders in an amount equal to substantially all of HI's assets, net of a reserve for discharge of all of its liabilities; and (e) submission to the existing shareholders of HI a new slate of nominees for election as directors.

The foregoing transactions are subject to execution of definitive agreements on or before June 7, 1990, and approvals of HI's board of directors and shareholders at the annual meeting to be held Aug. 17, 1990. As part of the foregoing transactions, it is anticipated that the new board of directors of HI will elect Geoffrey G. Dart as president and chief executive officer of HI.

#90150p3329 05/30/1990 ~PR Newswire

MOUNTAIN VIEW, CA (MAY 30) PR NEWSWIRE - Pyramid Technology (NASDAQ: PYRD) today announced a new release of their standards-compliant UNIX(R) operating system, OSx(R) 5.1, for their MIServer(TM) line of high-performance, RISC-based open systems servers.

The release incorporates many new features including the National Computer Security Center (NCSC) C2 level of security, providing an equal or greater level of security than can be found on traditional mainframe operating systems.

OSx 5.1 is fully compliant with IEEE POSIX 1003.1 and the U.S. Government National Institute of Standards and Technology (NIST) FIPS 151 standard, and is an X/OPEN XPG-2 compliant operating system product.

In addition, Pyramid has substantially improved OS performance by enhancing the kernel routines that run the I/O utilities, providing as much as 25 percent I/O performance improvement over previous releases. Also available in OSx 5.1 is the powerful System V Korn Shell for advanced system administration.

Pyramid has led the industry in providing a commercially enhanced, standards-compliant version of the UNIX operating system and in 1984, was the first to offer a dual port of the UNIX operating system that complies with the AT&T System V and Berkeley BSD industry standards.

Pyramid's OSx provides enhancements to UNIX necessary to meet the

requirements of large MIS computing environments. These include Pyramid's Virtual Disk subsystem, which addresses many of the disk and I/O limitations of standard UNIX.

Virtual Disk allows users to create logical files that span physical disks and to keep files in main memory for disk-intensive operations standard in large database applications.

OSx includes non-blocking, asynchronous disk I/O capabilities for enhanced database performance, and Pyramid's mirrored disk facility provides high availability and protection from media and controller failure in any computing environment.

OSx 5.1 provides improved system throughput for symmetric multiprocessing configurations. A new virtual memory-management subsystem results in more efficient paging and requires less swap space.

To support network access in client-server architectures, OSx 5.1 reduces the overhead of network login and remote access functions six- fold over standard UNIX implementations.

TORONTO (MAY 30) PR NEWSWIRE - Agnico-Eagle Mines Limited of Toronto (NASDAQ: AEAGF) stated that it was served yesterday afternoon at its Val d'Or, Quebec, offices with a notice that Invesfor Societe d'Investissement (Invesfor) will apply on Friday, June 1, in the Quebec Superior Court, Courthouse, Montreal, for an interlocutory injunction.

Invesfor is seeking the injuction to restrain Agnico-Eagle from proceeding with a proposed offering of units of common shares and common share purchase warrants as contemplated in Agnico's preliminary prospectus dated April 18, filed with all securities regulatory authorities in Canada.

According to the papers served, Invesfor is also applying in the Quebec Superior Court for a permanent injunction on several grounds related, among other things, to Agnico-Eagle's management, operations, and policies.

Agnico-Eagle has instructed counsel to appear on the injunction application and to contest the application with all vigor. Agnico-Eagle said it believes the application to be specious, ill-founded and totally without merit. Agnico-Eagle will proceed as planned with its issue of units.

ATLANTA, (MAY 30) PR NEWSWIRE - The Home Depot Inc. (NYSE: HD) announced today that its board of directors had authorized a stock split of three shares of its outstanding $.05 par value Common Stock for each two shares outstanding.

To effect the stock split, the board of directors declared a stock dividend of one-half share of Common Stock for each share of Common Stock, payable July 6 to shareholders of record on June 14. The broker's cut-off date for notification of share requirements is June 22. The company's transfer agent and registrar is Wachovia Bank and Trust Co., N.A., 301 N. Church St., PO Box 3001, Winston-Salem, N.C. 27102.

In addition, the company said its board of directors had declared a quarterly cash dividend of $.03 per split Common Share, payable Aug. 3 to shareholders of record on July 20, which represents an increase of 50 percent over the cash dividend declared in the previous quarter, after adjustment for the stock split.

In lieu of issuing fractional shares in connection with the stock split, the company may elect to provide for a cash adjustment.

The Home Depot currently operates 125 warehouse stores which sell a wide variety of building materials and home improvement products for the do-it-yourself and home remodeling markets. The company's stock is traded on the New York Stock Exchange under the symbol, "HD."

DOMINGUEZ, CA (MAY 30) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) said that it has received notice from Girard Partners of its intention to conduct an additional consent solicitation to replace a majority of the board of directors of Pic 'N' Save with Girard nominees.

"We believe this new solicitation gives shareholders the opportunity to support the auction process at the Annual Meeting with a vote for the current board, while preserving their ability to decide whether to support Girard's slate after they see the results of the auction process and whether Girard will make a bid," Pic 'N' Save said.

Pic 'N' Save said that under Delaware law, shareholders should have at least until the end of July to decide on this new consent.

#90150p3342 05/30/1990 ~PR Newswire

HUNTINGDON VALLEY, PA (MAY 30) PR NEWSWIRE - Toll Brothers, Inc. (NYSE: TOL), a builder of luxury homes in the Boston-to-Washington, D.C. corridor today reported that revenues, net income and new sales contracts signed for the second quarter and first half of fiscal 1990, which ended April 30 were higher than those for the prior year's comparable periods.

Net income for this year's second quarter was $2,855,000, or 10 cents per share, compared to $2,083,000 or 7 cents per share, for last year's second quarter. Included in net income for the second quarter of fiscal 1990 is an extraordinary gain of $541,000 net of income taxes, or 2 cents per share, which resulted from the company's repurchase of a portion of its outstanding subordinated debt at prices below par. Revenues for the most recent quarter were $45,396,000 versus $39,819,000 for the second quarter of fiscal 1989.

Net income for the six months ended April 30, 1990, was $6,145,000, or 21 cents per share. For the same period of the prior year, net income was $5,127,000 or 17 cents per share. Revenues for the first half of 1990 totaled $92,577,000 compared to $79,414,000 for the first half of 1989.

In the first six months of this year, new contracts were signed for 372 homes with an aggregate sales value of $103,473,000, whereas contracts for 348 homes with a sales value of $88,964,000 were signed during the comparable 1989 period.

The contract backlog at April 30, 1990, had a sales value of $118,848,000 and consisted of 411 homes, which also represents an improvement over the prior year. At the end of last year's second quarter, the backlog had a sales value of $109,430,000 and consisted of 394 homes.

Robert I. Toll, chairman and chief executive officer, noted that housing demand in the company's markets has not yet shown signs of strengthening and that its results continue to be attributable to the increased number of communities in which it is offering homes for sale. He further commented that the combined effect of these factors continues to squeeze operating margins.

Toll Brothers, Inc. designs, builds, markets and finances luxury single-family homes, townhomes and condominiums in the Boston-to-Washington corridor.

CONTACT: John W. Moore, director of investor relations of Toll Brothers, 215-938-8000, or Jay Green, 212-661-8030, or Stephanie Rohlin, 312-266-7800, both of Financial Relations Board for Toll Brothers

CUPERTINO, CA (MAY 30) PR NEWSWIRE - Measurex Corp. (NYSE: MX) and Harnischfeger Industries, Inc., jointly announced today the execution of agreements designed to facilitate a constructive and mutually beneficial long-term relationship between the companies and to enhance the current joint marketing arrangements between Measurex and Beloit Corporation, an 80 percent-owned subsidiary of Harnischfeger.

In order to strengthen the existing relationship between Measurex and Beloit, Harnischfeger intends to acquire shares of Measurex's outstanding common stock. Such stock purchases may be made from time to time, subject to market conditions and other factors, although Harnischfeger is not obligated to purchase any shares.

Measurex and Harnischfeger have entered into a "standstill" agreement with a minimum term of seven years that provides, among other things, that

Harnischfeger will not purchase more than 20 percent of Measurex's outstanding common stock without the consent of the Measurex board of directors.

Such purchases are subject to compliance with the Hart-Scott-Rodino Act, for which information was filed today. The agreement also provides for representation of Harnischfeger on the Measurex board of directors. Harnischfeger's chairman and chief executive officer, William W. Goessel, has been elected to Measurex's board of directors, as part of the agreement.

Measurex and Beloit, the largest manufacturer of pulp- and paper-making equipment in the United States, have also entered into a joint marketing, sales and development agreement pursuant to which Beloit will introduce and promote the sale or lease of certain products and systems manufactured by Measurex. The joint marketing agreement expands the scope of the 1987 alliance between the companies.

"This strengthened alliance between Measurex and Beloit will result in the delivery of integrated control and machinery products with maximum results for the papermaker ensuring excellence in performance from raw-materials handling to product finishing," said David A. Bossen, president and chief executive officer of Measurex. "We look forward to a long and successful relationship with Harnischfeger and Beloit."

William W. Goessel, Harnischfeger's chairman and chief executive officer, said: "We have enjoyed an excellent relationship with Measurex in the past and now, more than ever, we look forward to a long and productive relationship in the future."

Measurex, which stands for measurement excellence, provides the world with computer-integrated manufacturing through design, production, marketing and servicing of sensor-based information and control systems.

#90150p3354 05/30/1990 ~PR Newswire

NEW YORK (MAY 30) PR NEWSWIRE - "We are extremely optimistic about what the future holds for Oneok," J. D. Scott told the New York Society of Security Analysts Wednesday.

Scott, chairman, president, and chief executive officer of Oneok Inc. (NYSE: OKE) a natural gas utility-based, diversified energy company headquartered in Tulsa, Okla., led a group of four top executives in the appearance in New York.

Scott said one reason for optimism is Oneok's "significant financial recovery" from conditions in effect a relatively short time ago. Another is the conviction that marketplace appreciation for gas will rise: "We strongly believe that prices for natural gas must, and will, escalate," Scott said.

Yet another reason is a strong utility operation - primarily identified with Oklahoma Natural Gas Co. - that "provides the stable base that permits us to increase exploration and production activities" carried out by the Energy Companies of Oneok division.

The increase means that the nonutility Energy Companies will concentrate on projects that offer the potential of materially increasing oil and gas reserves and shareholder value, he said, with an "ambitious but attainable goal" of contributing one-third of consolidated earnings by fiscal 1995.

In its first project of this kind, Oneok has a 20 percent working interest in a $25 million, three-year joint program operated by Arkla Exploration Company to explore and develop select onshore prospects along the Texas Gulf Coast.

Chairman Scott told analysts that the natural gas transportation business that has been important to Oneok in the past will be much more important. The company is one of four partners that will significantly expand and extend the eight-year-old Ozark Gas Transmission System in eastern Oklahoma and western Arkansas, an interstate pipeline that could be offering the lowest-cost transportation alternative available to the many gas producers active in the Arkoma Basin exploration play in eastern Oklahoma.

Additionally, Oklahoma Natural Gas is preparing a definitive agreement, then will seek regulatory approvals, for its $34 million purchase of Lone Star Gas Co.'s southern Oklahoma utility properties. The acquisition will add 36,000 utility customers, bringing Oklahoma Natural's total near 700,000, and add to its transportation capabilities.

Oneok's financial recovery was due in large part, Scott said, to its ability to reduce to manageable proportions what had been a major problem generated by disputes with producers over take-or-pay features in gas purchase contracts.

PHILADELPHIA (MAY 30) PR NEWSWIRE - Bell of Pennsylvania said it is extremely disappointed by today's Commonwealth Court decision prohibiting the company from offering Caller ID service in Pennsylvania. In fact, the court's decision went farther than even opponents of the service had asked by prohibiting Caller ID with or without blocking.

"We will carefully study this ruling before deciding our next action, but a clear option is to ask for judicial review by the Supreme Court of Pennsylvania," said Bill Harral, Bell of Pennsylvania's vice president-external affairs.

"This ruling is a blow to the people of the commonwealth," said Harral. "Because of this decision, Pennsylvanians are being denied a service they eagerly want and badly need - a weapon against unwanted, harassing, threatening or obscene calls," he added.

Under an earlier court order, police, fire and other emergency services had been using Caller ID to speed help to people in need. Today's court ruling may impact Bell's ability to provide Caller ID to these emergency agencies.

Bell of Pennsylvania has previously recognized the legitimate need of domestic violence and law enforcement agencies to prevent the identification of their numbers. The company has offered various alternatives to protect those numbers.

"We have worked diligently to identify and meet the needs of law enforcement and crisis intervention agencies while the court challenge has been in progress," said Harral.

The company had scheduled Caller ID service to begin in Philadelphia and the Harrisburg area Jan. 9, 1990. After a court challenge by the Pennsylvania Consumer Advocate and others, a Commonwealth Court judge blocked the service pending judicial review.

Caller ID allows subscribers to see the telephone number of people calling them before answering the phone. In other states where the service has been available, Caller ID is credited with saving lives and sharply reducing the number of harassing, annoying, threatening and obscene phone calls.

CONTACT: Eric Rabe of Bell of Pennsylvania, (215) 466-5611.

WINDSOR, Ontario (MAY 30) PR NEWSWIRE - Diffracto Limited, the leading machine vision company in Canada, has signed an agreement to sell certain assets of its "fit" business to Perceptron, Inc. of Farmington Hills, Mich. The value of the proposed sale was not disclosed.

Diffracto will continue to service and support its installed base of "fit" systems and will concentrate its future efforts on the "finish" business, which is the production and sale of surface-inspection systems for coatings, sheet metal and plastics, said Richard P. Eidswick, president. Diffracto's D Sight surface inspection systems are widely used in the automotive, plastics, and consumer products industries.

"There is no doubt that this transaction will prove important to the worldwide automotive industry since it strengthens the ability of Diffracto to concentrate on the 'finish' business and Perceptron to concentrate on the 'fit' business," said Eidswick.

Eidswick said that "Diffracto will sell certain assets -- primarily software and other intellectual properties, such as patents -- which Diffracto's 'fit' business employed to design, develop, manufacture, sell, and service electro-optical measuring products used to determine the location and dimensional characteristics of formed parts or assemblies." The assets complement Perceptron's established technology and patents, he added.

Founded in 1971, Diffracto has been Canada's leading machine vision company for the past several years. Its customers include General Motors, Ford, Chrysler, and their suppliers.

TROY, MI (MAY 30) PR NEWSWIRE - A new firm based in Troy provides its clients in the legal community with a complimentary "needs analysis" which assures that highly trained legal secretaries temporarily assigned to their offices have the proper skills and experience.

Dynamic Legal Services, a division of Dynamic Temporary Services in Troy, offers an extensive program for the selection, assessment, training and support of legal secretaries on a temporary basis.

The legal services program includes training on legal software, testing on legal terminology, instruction on billable hours systems and a complimentary pre-assignment needs analysis. The needs analysis is conducted by Dynamic Legal Services in the client's office before a secretary begins the assignment.

"A market survey which we conducted demonstrated that there were serious shortfalls in the temporary-service industry," said Mary Fayerweather, owner of Dynamic Temporary Services.

"Some chapters of the American Bar Association have even resorted to recruiting, testing and maintaining a list of available secretaries, because it is so difficult to find qualified people.

"Because of our needs analysis, we can assure the legal profession that our people will be able to handle the challenges of a fast-paced law office."

Legal specialties that Dynamic Legal Services is prepared to work with include antitrust, banking, bankruptcy, real estate, family law, international law, labor law, litigation, patents and copyrights, personal injury, securities, tax, trusts and workers' compensation. Various corporate categories of the law include mergers and acquisitions, SEC, EEO ERISA, pensions and benefits and closings. In addition, Dynamic Legal Services will provide help with document handling and research skills.

For further information about the complimentary needs analysis and the services provided by Dynamic Legal Services, please call 313-680-9760.

HARTFORD, CT (MAY 30) PR NEWSWIRE - Chase Communications, Inc. of Hartford today announced that its Memphis station, WPTY-TV, Channel 24, was awarded

the Fox Network affiliation in that city. The switch from WLMT-TV, owned by MT Communications, Inc., will be effective July 1.

Edward Karlik, president of the Television Division of Chase Communications, in making the announcement said: "This is a win-win situation for Chase and Fox. Fox becomes affiliated with the No. 1 independent in Memphis, and WPTY enjoys all the benefits to be derived from joining the emerging power in network television."

WPTY joins the other four Chase-owned, Fox-affiliated stations, WATL Atlanta, WTIC Hartford, WXIN Indianapolis and KDVR Denver.

FAIRFIELD, NJ (MAY 30) PR NEWSWIRE - Selectatech Inc. announced its first quarter 1990 results today. Pro forma revenue and earnings including Clinical Homecare (acquired Dec. 31, 1989) were as follows:

	SELECTATECH INC.	
Three months ended March 31,	1990	1989
Revenue	$2,885,161	$2,782,572
Net income	142,819	301,946

The decreased net income was due to increased expenses in connection with the merger of Selectatech and Clinical Homecare, as well as additional expenses in connection with the company's expansion into present markets.

SAN MATEO, CA (MAY 30) PR NEWSWIRE - Electronic Arts (NASDAQ: ERTS) today announced that it has signed a contract with Chicago Bulls superstar Michael Jordan to help co-design multiple video and computer games. Electronic Arts plans for these products to be available for play on the Nintendo Entertainment System(R) (NES), in addition to other systems.

The agreement also gives Electronic Arts exclusive rights to Jordan in co-designing multiple games, including video, computer, and hand-held formats. The first game is scheduled to come to market in 1991.

"We have established a very satisfying and successful relationship with Michael over the last several years," said Trip Hawkins, president of Electronic Arts. "Michael Jordan provides unmatched entertainment

everytime he performs, and we plan to deliver that excitement in a new series of interactive games."

Basketball superstar and game designer Jordan says, "I love videogames and I really like to get involved in helping design them. I enjoyed developing my first game with Electronic Arts (Jordan vs. Bird: One on One(TM) 1988), especially because my personal style gets incorporated into each game."

Specific game content for the new Michael Jordan series will not be disclosed at this time.

Jordan's previous venture into computer game design was highly successful. Jordan vs. Bird: One on One has had sales of more than 1 million units to date, combining sales on the IBM-PC, Tandy, Commodore 64/128, NES (distributed by Milton Bradley(R)), and the Tiger(R) hand- held version.

NEW YORK (MAY 30) PR NEWSWIRE - Nasta International, Inc. (AMEX: NAS) announced today that it has received an offer from Tyco Toys, Inc. (NASDAQ: TTOY) to acquire through a merger all of Nasta's common stock which Tyco does not already own for $1.75 per share in cash. Tyco owns 3,237,000, or approximately 63.3 percent of the 5,111,200 shares of Nasta common stock presently outstanding. The offer is subject to certain conditions, including approvals by the respective boards of Nasta and Tyco and Nasta's shareholders.

Nasta's board of directors has appointed a committee of disinterested directors to review and recommend action as to the offer. The committee will hire an investment advisor to advise the committee and to render an opinion as to the fairness of the transaction from a financial point of view to Nasta's shareholders other than Tyco.

Nasta's stock closed yesterday at $1.00 per share.

FARMINGTON HILLS, MI (MAY 30) PR NEWSWIRE - Complete Business Solutions, Inc. (CBSI), a computer-consulting firm based in Farmington Hills, and with offices worldwide, recently has been named the second-fastest-growing,

privately held company in Michigan. CBSI becomes the top company in the computer-services industry.

CBSI earned the second-place finish at the end of 1989, when its compound-growth rate rose to 92 percent, based upon revenues of $18 million. The CBSI ranking - in the Michigan Private 100 - is based on five-year compound rates of revenue growth for fiscal years 1985 through 1989.

In 1985 - at the company's inception - CBSI employed 20 persons and demonstrated $432,000 in revenues. At present, CBSI employs over 300 persons and expects gross sales to reach $30 million during 1990. The financial forecast for CBSI in 1995 is 700 to 800 employees and sales revenues of $60 million.

The Michigan Private 100 has been compiled for five years by Michigan Business Magazine, the Michigan offices of BDO Seidman (the national firm of certified public accountants and management consultants), and by Durocher & Co., a Michigan-based public relations firm.

"Our company's success is the direct result of a strong corporate culture which emphasizes responsiveness and attention to detail in all areas," said Raj Vattikuti, president of CBSI.

"Our track record proves that we enhance the quality and improve upon productivity of every project we undertake," said Vattikuti. "Our objectives for each project transcend 'just completing the assignment' - we treat each client as a partner."

Evidence of the CBSI philosophy is a major project with the Society for Worldwide Interbank Financial Telecommunications (S.W.I.F.T.). CBSI designed and developed sophisticated funds transfer and accounts reconciliation applications which connect more than 3,000 banks and financial institutions worldwide. The applications support a high volume of traffic, encompassing more than 1 million electronic messages a day.

CBSI holds a variety of contracts with Fortune 500 companies such as Ford Motor Company (design and implementation of the vehicle-test catalog and vehicle-test planning); IBM (design and development of an IBM software toolkit); Chrysler Motors (manufacturing applications); and Motorola (systems engineering and design for radio communications).

CBSI works closely with IBM, Unisys, Tandem, and many other computer hardware vendors. CBSI provides these firms and their customers with consulting services and a solutions-oriented approach to their business needs.

#90150p3384 05/30/1990 ~PR Newswire
HARRISBURG, PA (MAY 30) PR NEWSWIRE - Harsco Corp. (NYSE: HSC) has announced today that its BMY-Combat Systems Division (CSD) has concluded an international sale for 60 of its Field Artillery Ammunition Support Vehicles (FAASV).

Valued at more than $50 million, the award will restart FAASV production at the division's York, Pa., facility late next year and continue it into 1992.

Incorporating the same chassis and drive-train as the M109 self- propelled howitzer, a BMY-CSD product since 1974, the FAASV provides for the stowage protection and automated transfer of ammunition to artillery systems on the battlefield. BMY initially funded development of the vehicle in the late 1970s for the U.S. Army to provide for the safe movement and handling of artillery ammunition. The FAASV's unique design not only protects artillery rounds and accompanying charges but also the soldiers who must coordinate the ammunition transfer amid enemy fire. Officially type-classified in 1984 by the Army as the M992 FAASV, more than 650 were produced against a requirement of 1400. Army production ended in 1989.

The sale comes at a time when the U.S. Army and several other international customers are showing renewed procurement interest in the ammunition vehicle. As part of its recent go-ahead for production start-up of the M109A6 Howitzer Improvement Program, the U.S. Army has expressed a need for as many as 300 additional M992 FAASVs to complement the HIPs "shoot and scoot" battlefield capabilities. Congress has recently approved $45 million to fund an initial purchase of the vehicle.

Harsco Corp. is a diversified, international, industrial company headquartered in Camp Hill, Pa. The company's 12 divisions provide products and services for defense, industrial, commercial and construction applications from more than 270 facilities in 32 states and 15 countries.

#90150p3389 05/30/1990 ~PR Newswire
BALTIMORE (MAY 30) PR NEWSWIRE - After returning hundreds of thousands of rockfish (striped bass) to the Chesapeake Bay, Baltimore Gas & Electric (NYSE: BGE) today agreed to license the Maryland Department of Agriculture (MDA) to operate its Crane Aquaculture Facility for the next 10 years.

Under the terms of the private/public cooperative agreement, the MDA will

contract with the University of Maryland Agricultural Experiment Station to operate the facility for aquaculture research, education and demonstration.

Established in 1983 at BG&E's C.P. Crane power plant on Seneca Creek in eastern Baltimore County near Chase, the facility was the first rockfish waste-heat aquaculture laboratory in the Chesapeake Bay region. Between 1983 and 1989, 75,000 pounds of rockfish were reared and 350,000 six- to 10-inch rockfish were returned to the Chesapeake Bay.

Nearly another 500,000 fish have been consigned to research cooperatives investigating the decline of the rockfish population.

Additionally, the Crane facility itself has been a center for research on the growth, development and reproduction of rockfish.

Recent growth in rockfish populations in the Chesapeake Bay have led to the impending lifting of a five-year moratorium on rockfish, and a decision to end BG&E's restoration efforts. Instead, the focus will now shift to the growing field of aquaculture. In fact, last year rockfish reared at the facility since 1983 spawned naturally in tanks for the first time, the first step in domesticating brood stock for aquaculture.

"We are delighted to be able to turn over operation of the aquaculture project to the state," said BG&E Chairman George V. McGowan. "Our restoration efforts have been very successful, as evidenced by the growing rockfish population in the Chesapeake Bay. We feel the state and the University of Maryland are now in position to make significant strides in the area of aquaculture."

Maryland Secretary of Agriculture Wayne A. Cawley, Jr. agreed with McGowan's assessment.

"With this cooperative facility, Maryland has the opportunity to move into the forefront in aquaculture research by having a million dollar research and demonstration unit in immediate operation," said Cawley.

Cawley added that the Crane facility will be the focal point for aquacultural research funded by state and federal appropriations to the University of Maryland Agricultural Experiment Station. Also, he pointed out that the 1990 state legislature approved an appropriate of $250,000 to operate the facility.

RICHMOND, VA (MAY 30) PR NEWSWIRE - Crestar Financial Corporation (NASDAQ-NMS: CRFC) announced today that John J. Mason has resigned from the Board of Directors of Crestar and its Virginia bank, Crestar Bank.

Richard G. Tilghman, Crestar Chairman and Chief Executive Officer, noted that the resignation was initiated by Mr. Mason in light of his expressed desire to devote more time to his investment in Washington Bancorporation, the parent of National Bank of Washington.

Mr. Tilghman expressed his appreciation for Mr. Mason's service as a director and noted that Mr. Mason was instrumental in Crestar being the first out-of-state institution to acquire a bank in the District of Columbia.

Mr. Mason, a Crestar director since 1986, was previously Chairman and Chief Executive Officer of NS&T Bankshares, Inc., which was acquired by Crestar in December 1985.

Crestar Financial Corporation is an $11.4 billion holding company with $8.4 billion in deposits. Its four banking subsidiaries serve Virginia, Washington, D.C., and suburban Maryland through more than 250 offices.

WAYNESBORO, VA (MAY 30) PR NEWSWIRE - Don E. Ackerman, chairman of the board of Genicom Corporation (NASDAQ-NMS: GECM), recently announced the appointment of Paul T. Winn, 43, as president and chief executive officer.

Winn comes to Genicom following a 22-year career at IBM Corporation where he most recently served as vice president of Graphics Systems in the Advanced Work Station Division. Prior to this, he was vice president of Large and Intermediate Page Printer, Software and Copiers. In this position, he had worldwide business responsibility for these IBM products.

Other key senior management positions held by Winn during his tenure with IBM include division director of technical staff for IBM's Printer Division, product manager for development of all High-End Non-Impact Printers, program development manager for IBM's Advanced Non-Impact Printer Program, and test laboratory manger. Prior to these assignments he was involved in developing tape drives, mass storage subsystems and publishing systems.

Ackerman stated: "Paul Winn's extensive, worldwide printer products experience makes him uniquely qualified to head Genicom's management team. His managerial and technical experience in a variety of printer technologies will permit him to provide the leadership to return Genicom to its historical growth path."

Genicom Corporation, whose stock is traded on the NASDAQ market is a leading U.S. manufacturer of computer printers marketed to a wide range of commercial business and industrial customers. The company also manufacturers electro-mechanical relays for aerospace, defense and transportation applications.

LOS ANGELES (MAY 30) PR NEWSWIRE - Webcott Holdings, the owner of 9.7 percent of the outstanding common stock of Del Webb Corporation (NYSE: WBB), announced today that the official results of the voting relative to its proposal that Del Webb redeem its outstanding shareholder rights indicated that the proposal was approved by over 78 percent of the shareholders voting for or against the proposal and that such affirmative votes represented a majority of the outstanding shares of the corporation.

In disclosing the results, James Cotter, a director of Del Webb and general partner of Webcott Holdings, said that the shareholder vote

represented a clear mandate to Del Webb's board of directors to redeem the outstanding shareholder rights so that this possible obstacle to acquisition proposals would be eliminated.

Cotter said that the vote showed that shareholders, both large and small, wanted the company to take no actions which could hinder shareholders from realizing the benefit of acquisition proposals at premiums over the market price of Del Webb's stock.

ORLANDO, FL (MAY 30) PR NEWSWIRE - The directors of Harcourt Brace Jovanovich, Inc. (NYSE: HBJ) have declared a regular quarterly dividend on the company's 12 percent Preferred Stock. The record date for payment of the dividend is June 8, 1990, and the dividend will be paid on June 29, 1990.

The quarterly dividend (which amounts to 40.5 cents per share) has been computed on the $13.50 liquidation value of the 12 percent Preferred Stock and will be paid in 12 percent Preferred Stock at the rate of one share for each $13.50 of the amount of dividend paid. Fractional shares will be paid in cash.

#90150p3410 05/30/1990 ~PR Newswire

SANTA BARBARA, CA (MAY 30) PR NEWSWIRE - Financial Corp. of Santa Barbara (NYSE: FSB) reported that on or about May 11, 1990, the Resolution Trust Corp. (RTC) became the receiver for Santa Barbara Savings and Loan Association, the principal subsidiary of Financial Corp. This action followed the appointment of the RTC as conservator of the Association on April 27, 1990.

The receivership action was announced on May 11 by the RTC, but the announcement was not broadly reported by the news media. Financial Corp. understands that, in connection with the receivership, certain assets and liabilities of the Association were transferred to a newly chartered institution, Santa Barbara Federal Savings and Loan Association. Financial Corp. has not received official information from the RTC regarding the details of this action, but it appears that one effect of the action may be to make more remote the possibility of any recovery by Financial Corp. of residual value relating to the Association's business.

Financial Corp. has also been informed that on May 25, 1990, two shareholders, the Leonard M. Ross Revocable Trust and Jon-Christian Billigmeier, filed in U.S. District Court in Washington D.C. a derivative action seeking to remove the RTC as conservator and/or receiver of the Association.

Financial Corp. owns two operating subsidiaries. One processes checks for the Association and the other sells insurance and securities products through branches of the Association. Because the business of these two subsidiaries depends substantially on the Association, Financial Corp. believes their future viability is threatened, and it is seeking to sell the two subsidiaries.

Financial Corp. is jointly liable with the Association on $8.4 million of 9 percent Convertible Subordinated Debentures due 2012. It is the position of the trustee for the Debentures that the maturity of the Debentures has been accelerated by virtue of the Association's conservatorship and receivership. There is a substantial likelihood that the Association will not pay the entire amount of this debt. Because Financial Corp. does not now have sufficient assets to pay this obligation, it may be forced to liquidate, through a bankruptcy proceeding or otherwise, in which case there is a substantial likelihood that shareholders would receive no value for their stock. This result could be changed if the derivative action to regain control of the Association is successful or results in a settlement with the RTC.

Due to recent events and the limited resources of Financial Corp., the company does not intend to mail its 1989 Annual Report to shareholders, and it is late in filing a report on Form 10-Q for the quarter ended March 31, 1990.

WASHINGTON (MAY 30) PR NEWSWIRE - The U.S. Customs Service has awarded EG&G Dynatrend, Inc., a subsidiary of EG&G, Inc. (NYSE: EGG) of Wellesley, Mass., an estimated $76 million contract for the management of the agency's Seized Property and General Order Merchandise Program.

Under the program, EG&G Dynatrend, of EG&G's Technical Services Group, will be responsible for the custody, transport, storage, safeguard, maintenance, and disposition of property seized by Customs officers.

The contract, which consists of a four-month basic period and four

additional option years, will be staffed and managed by EG&G Dynatrend. Roderic W. Moses, a vice president at EG&G Dynatrend, will lead the effort which will be headquartered in the Washington, D.C. area.

EG&G currently provides property and site management services to other federal agencies such as the department of Defense, the Department of Energy, the EPA and NASA.

EG&G, Inc. is a Fortune 300 company that offers security engineering services, airport security screening systems, and automotive testing services to both the government and private business sectors. EG&G manufactures laboratory and field-test instruments and electronic and mechanical components for many commercial markets.

MIAMI (MAY 30) PR NEWSWIRE - The Beacon Council announced today that Aurum Industries, a distributor of men's knit apparel headquartered in California, will expand its operations into Dade County's Enterprise Zone.

Aurum Industries was founded seven years ago by Stanley Halbreich and Richard Fields. The firm has operations in California, New York, Dayton, Ohio and now in Miami. The Miami operation will concentrate on distribution of New York men's knit apparel.

The estimated impact of Aurum Industries' expansion in Dade County will be the creation of 20 full-time jobs within the first year of operation, projected to increase to 30 by the second year. The firm's projected

capital investment will be $1.3 million and it has selected a 26,000 square foot distribution facility at the Enterprise Zone in Opa Locka, Fla.

NEW YORK (MAY 30) PR NEWSWIRE - Cypress Fund Inc. (AMEX: WJR), a closed-end management investment company seeking long-term capital appreciation through investment in common stocks, today announced its performance for the quarter ended March 31, 1990, the second quarter of its 1990 fiscal year.

During the quarter ended March 31, 1990, net realized and unrealized losses were $10,056,966, equal to $1.46 per share. The fund incurred a net investment loss during the same period of $350,882, equal to 5 cents per share. This compares with net investment losses of $203,676, equal to less than 2 cents per share, and net realized and unrealized gain of $717,424, equal to 9 cents per share, incurred during the quarter ended March 31, 1989.

For the six-month period ended March 31, 1990, the fund's total net investment losses were $586,643, equal to 9 cents per share. Total net realized and unrealized losses for the same period were $6,632,346, equal to 95 cents per share. This compares to total net investment losses of $134,696, equal to 1 cent per share, and total net realized and unrealized losses of $4,172,416, equal to 46 cents per share, for the same six-month period ended March 31, 1989.

On March 31, 1990, total net assets of the fund were $66,640,516, compared with total net assets of $81,086,442 on March 31, 1989. The net asset value per share on March 31, 1990, was $9.68 based on 6,884,516 shares outstanding, a 5.68 percent increase from the net asset value per share of $9.16 based on 8,851,332 shares outstanding on March 31, 1989.

The decrease in shares outstanding and in net assets was attributable in part to the fund's purchase in July 1989 of 2,057,724 shares of its own common stock in a tender offer, at a price of $9.28 per share.

As previously reported, the fund was authorized in October 1987 to repurchase its shares on the American Stock Exchange. The current repurchase authorization permits repurchases of shares at discounts from net asset value of 5 percent or greater. A total of 784,100 shares have been repurchased from the inception of the repurchase program through March 31, 1990, excluding shares purchased in the July 1989 tender offer.

Mitchell Hutchins Asset Management Inc. is the investment advisory subsidiary of PaineWebber Incorporated.

STAMFORD, CT (MAY 30) PR NEWSWIRE - Xerox Corporation (NYSE: XRX) has decided to sell the third party financing and leasing business that is part of Xerox Credit Corporation, Stuart B. Ross, chairman and chief executive officer of Xerox Financial Services, Inc., and executive vice president of Xerox Corporation announced today.

The third party business is Xerox Credit Corporation's financing and leasing of a wide variety of industrial and commercial equipment other than that produced by Xerox Corporation.

"The third party financing and leasing business has grown significantly in the last ten years since its founding," Ross said. "Nevertheless, we have a large financial services business, and we are committed to managing it in a way that will best satisfy customers, maximize returns, make the business strong, and deliver value for shareholders. We believe that this sale will help us accomplish the financial objectives."

The third party businesses that are part of the intended sale include Circle Business Credit, which finances commercial and industrial equipment through middle-market leases and term loans; Highline Financial Services, which specializes in operating leases for manufacturers and distributors of high technology equipment; LMV Leasing, a lessor and manager of commercial fleets of automobiles and trucks; the Corporate Finance Division, which provides asset based lending, leveraged funding and leveraged lease financing; and two European financing operations.

Xerox Financial Services has retained Salomon Brothers Inc. to manage the sale of the business.

Ross said: "The decision to sell these third party financing businesses, which represents about $2.2 billion or about 40 percent of Xerox Credit Corporation's assets and an additional $140 million in international third party financing assets, does not impact the financing of Xerox equipment or our other financial services businesses.

"We intend to continue to review our financial services strategy to ensure that we concentrate our resources and efforts on those businesses that offer the greatest opportunity to add profit growth and value for our shareholders, and to take any actions that we believe are necessary."

Xerox Financial Services, a subsidiary of Xerox Corporation, has more than $19 billion in assets and provides a diversified product line that includes insurance, investments and investment banking. In addition to Xerox Credit Corporation, its largest business units include Crum and Forster, Inc., Van Kampen Merritt Inc., Furman Selz and Xerox Life.

#90150p3426 05/30/1990 ~PR Newswire

MINNEAPOLIS (MAY 30) PR NEWSWIRE - Washington Scientific Industries Inc. (NASDAQ: WSCI) said today that it expects to report a net loss of approximately 15 cents per share for its third quarter ending June 3, 1990 compared with restated net earnings of 18 cents per share from continuing operations for the same period in 1989. The company previously reported net earnings of one cent per share for its second quarter, and 53 cents per share for the first half of fiscal year 1990.

Clifford W. Dinsmore, president and chief executive officer, said that margin pressures experienced in the second quarter are continuing. "Even though our sales continue to be strong, we are still being affected by start-up costs on several of our new machining projects and by lower gross margins in our plastic injection molding business. While we expect our fourth quarter results to be somewhat better, it is likely that we will have an overall net loss for our second half.

"These anticipated results are not indicative of where Washington Scientific is headed," Dinsmore continued. "We are in the midst of planned strategic changes in the mix of our business which will make us a stronger and more consistent company in the longer term. Our computer peripherals business is as strong as ever, and we have a number of new clients in other industries. We expect to make progress over the next several months toward resolving the margin pressures we have experienced as the result of these changes."

Washington Scientific Industries is a Minnesota-based provider of high precision manufacturing services for a variety of industries. The company's Contract Manufacturing Division produces metal components and subassemblies in three plants located in Minnesota and California, and its Advanced Custom Molders subsidiary produces thermoplastic injection molded components in two Texas plants.

GAITHERSBURG, MD (MAY 30) PR NEWSWIRE - Life Technologies, Inc. (NASDAQ: LTEK) announced today that it plans to reduce its expenditures and participation in the molecular diagnostics business.

While the company intends to meet current customers' need for ViraPap, Viratype and Viratype in situ tests for human papillomavirus (HPV) and to continue certain research activities, overall diagnostics operations can be expected to be reduced in scope. Other actions may include the sale of all or a portion of the diagnostics business.

It is the company's present assessment that the adoption rate of HPV testing by the medical community will be slower than originally expected. Life Technologies continues to devote its primary efforts and resources on growth opportunities in its core life science research and industrial products.

Life Technologies, Inc. develops, manufactures and supplies more than 2,000 products used principally in life science research, commercial manufacture of genetically engineered products and human diagnostics. The company said it believes it is a leading supplier of sera, other cell growth media as well as enzymes and other biological products necessary or recombinant DNA procedures.

LA JOLLA, CA (MAY 30) PR NEWSWIRE - Agouron Pharmaceuticals Inc. (NASDAQ: AGPH) announced today the signing of a lease for 43,600 square feet for 10 years in Nexus Science Center Torrey Pines. The projected occupancy date is May 1991 for the new facility at 3565 General Atomics Court, La Jolla, CA 92037.

Agouron Pharmaceuticals Inc., based in La Jolla, is developing new drugs to treat a number of major diseases including cancer and AIDS. Using an advanced technology called "three-dimensional drug design," the company's scientists design drugs to interact specifically with proteins that play key roles in human disease.

"Nexus Development Corporation was able to provide a building ideally suited to the needs of our company," said Peter Johnson, president and CEO of Agouron Pharmaceuticals Inc.

Tom Mercer and Kevin Cravin represented both parties in the lease transaction.

#90150p3438 05/30/1990 ~PR Newswire

WASHINGTON (MAY 30) PR NEWSWIRE - Alpha 1 Biomedicals, Inc. (Alpha 1) (NASDAQ: ALBMC) today announced the recent completion of a pilot Phase II trial using Thymosin in the treatment of chronic hepatitis B.

Alpha 1 believes that the use of Thymosins has produced the most promising results to date in the treatment of chronic hepatitis B. In the trial, funded by the U.S. Food and Drug Administration (the "FDA") and conducted at the Wayne State University School of Medicine in Detroit, 20 patients were entered in a randomized, double-blind, placebo-controlled study and given Thymosin alpha 1, Thymosin fraction 5 or a placebo. The drugs were given subcutaneously twice weekly for six months, and the patients were followed for an additional six months before the treatment code was revealed. Throughout the trial, the patients were monitored for disease remission, defined as clearing of Viral DNA and normalization of an indicator liver enzyme in their serum.

One year after the entry of all patients, two of eight placebo recipients had developed spontaneous disease remission. Of 12 patients treated with Thymosin alpha 1 and/or Thymosin fraction 5, nine achieved disease remission. The responding patients achieved complete remission five to eight months after treatment with Thymosin alpha 1 or Thymosin fraction 5 began. With follow-up extending to over 32 months, none of the patients has relapsed. None of the patients has manifested any local or systemic reaction to Thymosin alpha 1.

Confirmation of the Phase II trial results through a multicenter Phase III trial is planned, once the funding necessary to complete such a trial becomes available. The goal of such a trial would be to enroll a sufficient number of patients over a two to three year interval of treatment and follow-up, and, if the results were to be successful, to make application to the FDA for approval of the product.

An estimated 1.5 million people in the United States and 300 million worldwide are chronically infected with the hepatitis B virus.

In certain Western countries the incidence is increasing, possibly due to intravenous drug abuse and homosexual as well as heterosexual contacts.

In the United States, 300,000 cases of acute hepatitis occur each year, of which approximately 30,000 develop chronic liver disease, which is associated with an annual death rate of over 5,000 due to liver failure, cirrhosis and cancer. Thus far, no drug has received FDA approval for treatment of chronic hepatitis B.

Alpha 1 is a Washington-based biotechnology company that is engaged in the development of pharmaceutical products for the treatment of immune system deficiencies and resulting diseases. The company's principal products, the Thymosins, are natural and synthesized hormones of the thymus gland which act as modulators of the body's immune and neuroendocrine system. Clinical trials also have indicated a potential usefulness of Thymosin in increasing the effectiveness of influenza and hepatitis vaccines in elderly and immunocompromised individuals, and in treating several kinds of cancer.

ROANOKE, VA (MAY 30) PR NEWSWIRE - At its meeting on May 30, 1990, the Board of Directors of Roanoke Gas Company approved a proposed offering to its shareholders of 70,685 shares of the Company's authorized but unissued common stock, $5 par value. It is anticipated that the offering will be undertaken by issuing transferable Rights to subscribe for and purchase shares of Company common stock. The Company proposes to issue each

shareholder one Right for every eight shares of common stock owned on a record date to be established by the Board. Each share of common stock will be sold upon exercise of one Right and the payment of a proposed subscription price of $31.00 per share. The Company plans to make an oversubscription privilege available to holders of the Rights.

The proposed offering is subject to approval by the Virginia State Corporation Commission and other regulatory authorities. The Rights and the common stock issuable upon exercise of the Rights will be registered with the Securities and Exchange Commission, and the proposed offering will be made only by means of a Prospectus following the effective date of such registration. Pending regulatory approval and registration of the proposed offering, the Company has not determined the timing, record date, term, or expiration date of the offering.

Roanoke Gas Company is a Virginia natural gas distribution utility serving approximately 44,000 customers in the Roanoke, Virginia and Bluefield, West Virginia areas.

NEW YORK (MAY 30) PR NEWSWIRE - In response to press inquiries about Fitch's action today, Citicorp (NYSE: CCI) released the following:

Fitch's move means that three of four agencies have reaffirmed Citicorp's top commercial paper ratings. Though not reported on the news wires, Duff & Phelps reaffirmed our Duff 1+ commercial paper rating yesterday, along with ratings for our senior debt, subordinated debt and preferred stock that are basically in line with Standard & Poor's, and now with Fitch. Duff & Phelps also reaffirmed its Duff 1+ rating for Citibank, N.A. certificates of deposit.

While disappointing in some aspects, Fitch's comments are extremely positive in citing Citicorp's diversified income stream and consistently strong global consumer business profits (55 percent of normalized earnings), as well as the stable core deposit base and ample balance sheet liquidity that underlie funding and overall liquidity strengths.

Fitch notes Citicorp's program for rebuilding capital from earnings, sales of non-strategic businesses and appreciated assets, and vigorous balance sheet management. They also point out that marketplace funding needs have been reduced by a strong deposit base and asset securitization programs.

The combination of the Fitch and Duff & Phelps actions should have minimal if any, impact on Citicorp funding costs.

LOS ANGELES (MAY 30) PR NEWSWIRE - All Nippon Airways Co. Ltd. (ANA), the largest airline in Japan, reported record operating revenues and profits for the fiscal year beginning April 1, 1989 and ending March 31, 1990.

Operating revenues for the year improved 16.4 percent to 672.1 billion yen ($4.3 billion at $1 equal 158 yen). Net income increased a dramatic 103.0 percent to 15 billion yen ($95 million). Net income per share was 10.9 yen up from 5.4 yen the previous year. The board of directors has proposed raising the cash dividend one yen, from four to five yen per share.

ALL NIPPON AIRWAYS CO. LTD.
Summary of Financial Results

	Year ended March 31	
	1990	1989
Operating revenue (million yen)	672,080	577,576
	(up 16.4 percent)	
Net income (million yen)	15,022	7,399
	(up 103.0 percent)	
Net income per share	10.9	5.4

Passenger volume on ANA's International services surged 25.6 percent during the fiscal year, to more than one million passengers, as the airline added six overseas destinations to its fast-expanding network of international routes. ANA now offers scheduled air service to 14 cities outside of Japan, including Los Angeles, Washington D.C., London, Moscow, Vienna, Stockholm, Guam, Salpan, Sydney, Hong Kong, Seoul, Bangkok, Beijing and Dallan. Services to New York City, Orlando, Paris and Singapore will be inaugurated during the current fiscal year.

For the current fiscal year, ANA expects to maintain strong growth in international passenger traffic while maintaining its dominant position in the Japan domestic market. Financially, the company is projecting a six percent increase in operating revenues, to 710 billion yen, and a two percent increase in net income, to 15.3 billion yen.

#90150p3452 05/30/1990 ~PR Newswire

MINNETONKA, MN (MAY 30) PR NEWSWIRE - Tonka Corp. (NYSE: TKA) announced today that it expects to report a significant loss on lower sales in its fiscal second quarter ending June 30, 1990, compared to second quarter a year ago. The company reported net earnings of $100,000, or 2 cents per share, on sales of $189.4 million in the second quarter of 1989. Actual results for the 1990 second quarter will not be reported until late July.

Commenting on the full-year outlook, the company indicated that it now appears that it will not achieve its objective of revenue growth in 1990,

and the company is uncertain whether it will be profitable for the year. The company reported 1989 net income of $7.7 million, or 90 cents per share, before extraordinary items, and $5.7 million, or 67 cents per share after extraordinary items.

The change in the company's outlook was prompted by disappointing early retail sales of certain promotional products and an overall retail order trend below year-ago levels. Net orders from retailers totaled $630 million through May 19, 1990, compared to $722 million through the same period last year. Excluding orders of Sega video games, which have been discontinued, orders for the year-ago period were $681 million.

Kenner Products and Tonka Products divisions are expected to post significant revenue declines in 1990. The company continues to expect revenue growth in its other two divisions, Parker Brothers and Tonka International, although profit contributions of Tonka International will be affected by expenses involved in growing that segment of the business.

"While we continue to expect a profitable second half, it is uncertain whether it will be sufficient to offset first-half performance," said Stephen G. Shank, chairman and chief executive officer. "We are clearly disappointed by the current outlook and are examining every option to improve performance for the balance of the year."

"We are nonetheless encouraged by progress at Parker Brothers and by our prospects in international markets," Shank said, adding that some of the company's new lines that are now on retail shelves "are showing promise," notably the Beetlejuice and Batman lines.

"We're also optimistic about prospects for the company's new doll lines, but we believe the aggregate volume potential we now see for new products will not be sufficient to offset the $48 million decline from discontinued Sega video games, and the volume decline from The Real Ghostbusters," Shank said. The Ghostbusters line, now in its fourth year in the U.S. market, is selling through at retail about as the company had expected -- "which is to say in substantial volume, but below last year," he said.

Tonka Corp., headquartered in Minnetonka, Minn., is the nation's third largest toy company. The company's operating divisions include Kenner Products, based in Cincinnati, Ohio; Parker Brothers, based in Beverly, Mass.; and Tonka Products and Tonka International, based in Minnetonka.

HOUSTON (MAY 30) PR NEWSWIRE - Powell Industries Inc. (NASDAQ: POWL) today reported record second quarter results. Revenues from continuing operations for the fiscal quarter ended April 30, 1990 were $34,985,000, an increase of $13,868,000 (66 percent) from $21,117,000 for the second quarter of 1989. Revenues from continuing operations for the first six months of 1990 were $63,822,000 vs. $38,881,000 in 1989, an increase of $24,941,000 (64 percent).

Earnings for the quarter were $1,526,000 or 15 cents per share compared to $596,000 or 6 cents per share from continuing operations for the second quarter of 1989, an increase of $930,000 (156 percent). Earnings for the six months ended April 30, 1990 were $2,612,000 or 25 cents per share compared to $1,172,000 or 12 cents per share from continuing operations in 1989, an increase of $1,440,000 (123 percent).

The order backlog at April 30, 1990 was $62.6 million vs. $67.1 million at April 30, 1989. This decline in backlog is mainly attributable to our Powell Electrical Manufacturing Co. subsidiary. This decline is comprised of two separate components. Orders booked in the second quarter this year while ahead of forecast, were less than the comparable period last year. This is a result of management's previously stated objective of being more selective, to improve profitability, rather than increase volume in 1990. There has been no apparent decline in activity in the markets PEMCO serves. The second component is shipments. PEMCO shipments in the second quarter of 1990 were substantially higher than shipments in the second quarter of 1989. The higher level of shipments is, in large part, the result of management efforts to improve efficiency and reduce cycle time.

HOUSTON (MAY 30) PR NEWSWIRE - WNS Inc. (NASDAQ: WNSIC) announced today that it has requested that the National Association of Securities Dealers grant a further extension to a temporary exception from the minimum capital and surplus requirements of the NASD. The company advised the NASD that it believes it will be unable to comply with certain conditions of the temporary exception by June 1, 1990. The company requested that the temporary exception be extended to June 30, 1990 to allow the company time to consummate certain transactions in an attempt to comply with such conditions.

There can be no assurance that the request for further extension will be granted or that the transactions will be consummated. If the further extension is not granted, the company's common stock would be deleted from the NASDAQ system prior to the market opening on the next business day. In such event, the company's common stock should continue to be quoted in the over-the-counter market.

WNS Inc., is a leading specialty retailer in three areas of the home decorations market operating under the trade names of Wicks 'N' Sticks, Deck the Walls and Wallpapers To Go.

LOS ANGELES (MAY 30) PR NEWSWIRE - Ted G. Westerman has been elected corporate vice president for human resources and administration at Hughes Aircraft Co.

Westerman, who also becomes a member of the Hughes policy board, was formerly staff vice president, human resources. In his new position, he replaces J. Allen Hollingsworth, who will retire on July 1.

At the same time, it was announced that Edgar N. Best, director of corporate security for Hughes, has been named a staff vice president.

Westerman came to Hughes nine years ago from Dart Industries, where he had also been a vice president for human resources. Before that, he served in the U.S. Army for 23 years, retiring in 1977 with the rank of colonel. He holds a bachelor of arts degree in administration from the University of Missouri and an master of arts in International Relations from George Washington University.

Best joined Hughes in 1985 after heading security for the 1984 Olympic Games as vice president and director of security for the Los Angeles Olympic Organizing Committee. He served with the FBI for 22 years, retiring in 1982 as special agent in charge of the Los Angeles division. He received his bachelor of arts from Siena College and holds a law degree from Albany (N.Y.) Law School.

LAPEER, MI (MAY 30) - Durakon Industries, Inc. (NASDAQ-NMS: DRKN), announced today that it had entered into a stock purchase agreement to sell DFM Corp. to a private investor company. DFM Corp. is a wholly owned subsidiary and the market leader in bug and gravel deflector shields. The stock purchase agreement calls for the payment of a purchase price of $12,500,000 cash at the time of closing and the receipt by Durakon of a warrant to purchase shares of stock of the parent company of the purchaser. The closing of the sale is required to occur on or before June 30, 1990.

The stock purchase agreement is subject to the occurrence or non-occurrence of several events, including the ability of the prospective

purchaser to close on acquisition financing.

Lapeer based Durakon Industries is the world's leading manufacturer and distributor of truckbed liners, bug and gravel deflectors and rollback car carriers. A publicly held company, it is traded on the NASDAQ National Market System.

DALLAS (MAY 30) PR NEWSWIRE - Lomas Financial Corp. (NYSE: LFC) today announced that Lomas Mortgage USA, its wholly owned mortgage banking subsidiary, has signed an agreement to acquire a $600 million mortgage servicing portfolio from Ameriway Mortgage Corp. of Houston. The acquisition was facilitated and approved by Resolution Trust Corporation, represented by Houston-based Charbonneau-Klein Inc.

The acquisition, the second such transaction by Lomas in as many months, will increase Lomas Mortgage USA's mortgage servicing portfolio to $24.7 billion -- a figure that surpasses its previous high of $23.5 billion posted in June 1988. The transaction will add 10,000 loans to Lomas Mortgage USA's servicing portfolio bringing the total loans serviced to approximately 625,000.

Jess Hay, chairman and chief executive officer of Lomas Financial Corp., said, "The acquisition is another important step in the continued enhancement and growth of our core business -- mortgage servicing. We anticipate that this acquisition will improve our revenues. It also will serve to reinforce our position as a major player in the mortgage banking industry."

Earlier this month, Lomas Mortgage USA completed its purchase of the $3.4 billion mortgage servicing portfolio of Bright Mortgage Co., a move which added 90,000 loans to its portfolio.

According to Executive Vice President Terry J. Deyoe, "The Ameriway purchase, coming on the coattails of the Bright Mortgage portfolio acquisition, serves as confirmation that Lomas is firmly and actively committed to a strategy of controlled growth and establishing itself as a major participant in the resolution of mortgage assets associated with troubled thrifts."

Lomas Mortgage USA, the largest operating unit of Dallas-based Lomas Financial Corp., provides a range of mortgage services, including mortgage-related funds management, mortgage servicing, field services, subservicing, real estate management and marketing, and secondary

marketing.

DETROIT (MAY 30) PR NEWSWIRE - Ford Motor Company (NYSE: F) has informed its dealers that it will provide a post-1991-model introduction incentive on sales of 1990 models between Sept. 28 ('91 model introduction day) and Dec. 31 in lieu of a model-year close-out allowance.

"The amounts offered would not be in addition to amounts being offered to customers in our current buyer-incentive program scheduled to expire July 9," said Robert L. Rewey, vice president - Ford North American Sales Operations. "In fact, some of these amounts could be even less than the amounts in our current program.

"A report in a national newspaper today left the impression that the post-introduction rebates 'may nearly double the incentives (Ford) now offers on 1990 models' ... this is absolutely incorrect.

"There is no reason for buyers to wait until the fall to purchase 1990 models when they can get them now at attractive incentives ranging from $500 to $2,000 on most cars and trucks," he said.

"We believe our 1990 model close-out strategy, which was developed in cooperation with our Dealer Councils, provides all of our dealers with the flexibility to meet the changing competitive environment," said Rewey. "We will continue to keep them competitive on both 1990 and 1991 models during the fourth quarter."

Mark Smith, president of Dick Smith Ford, Kansas City, Mo., and chairman of the Ford Division Dealer Council, said: "For dealers, there is always a delicate balance of managing inventory and carrying costs. Our dealer stocks are much lower right now compared to last year at this time. We share Ford's concern that adequate supplies are available to meet the customer's needs.

"Ford dealers in no way interpreted Ford's letter to mean that fall programs would be necessarily any better than current incentive programs. The incentives covered in the letter are meant to give dealers some sort of assurance of support from Ford for any 1990 models we may still have in our inventories after the 1991 model introduction. Ford's current programs are very competitive, and now is a great time to buy a new Ford car or truck."

John D. Porcelli, president of Capital Lincoln-Mercury, Chicago Heights, Ill., added:

"The consumer offers in the market today are as high as we can remember them. Obviously, business is not as strong as we want it to be, so, naturally, we would like even more incentives. The program that the factory has provided us is competitive and, in many cases, we have a distinct car line advantage. I believe that now is the best time to buy a new car, because I don't see customer offers going any higher."

#90150p3491 05/30/1990 ~PR Newswire

LA JOLLA, CA (MAY 30) PR NEWSWIRE - Charles R. Scott, President and Chief Executive Officer and a controlling shareholder of Intermark Inc. (AMEX: IMI), and Chairman of the Board of Intermark's 52 percent-owned affiliate Triton Group Ltd. (NYSE: TGL) today announced that the Boards of Directors of the two companies have elected John C. Stiska, 48, as President of Intermark and Triton effective June 1, 1990. Scott, 62, was named Chairman of the Board of Intermark, and will continue to focus on setting corporate strategy and direction. He will remain the Chief Executive Officer of both companies.

Stiska has been a practicing lawyer for the past 20 years, specializing in mergers, acquisitions and financings. He has been affiliated with the regional firm of Brobeck, Phleger and Harrison since 1987. For the past 15 years, Stiska has served as Special Counsel to the Board of Directors of Intermark. Stiska served on an interim basis as President of Triton from March, 1986 until June, 1987, directing the affiliation of that company with Intermark.

Commenting on the appointment, Scott stated: "Given the growth of Intermark over the past decade, and the enormous opportunities which await us when the pending merger with Triton is accomplished, this is the appropriate time to enhance the depth of leadership at Intermark/Triton. Of several candidates which were considered for the position, John Stiska stood out as the perfect fit. For nearly twenty years, John and I have worked closely together, and he has played a pivotal role in virtually every significant Intermark transaction." Scott added that Stiska will be groomed as his ultimate successor to the top post at Intermark.

Said Stiska, "Red Scott is the creator of a uniquely successful business strategy, and he has built an organization with an exceptional level of energy and purpose. This is a rare opportunity to work side by side with one of the great corporate leaders in America. As the President of the

two companies, I look forward to augmenting Red's vitality and vision by executing and helping shape the Intermark strategy as the Company begins another chapter of growth and prosperity."

Intermark is a billion dollar operating/holding company listed on the American Stock Exchange. Its business is to own control of and add value to well-established, mid-sized American growth companies operating in broadly diverse industries. Each of these "Partner Companies" is autonomously managed and is a leader in its own market niche or industry.

Triton Group is a diversified holding company.

ST. LOUIS (MAY 30) PR NEWSWIRE - Pulitzer Publishing Co. (NASDAQ-NMS/MSE: PLTZ) confirmed today that it has been advised that ABC Television Network is considering a change in its affiliation in Louisville, Ky., from Pulitzer's station WLKY-TV.

Ken J. Elkins, president of Pulitzer Broadcasting Co., the broadcasting subsidiary of Pulitzer, commented, "We are surprised and disappointed with these events, particularly in light of our long-term relationship with ABC. We do not believe, however, that a change in the network affiliation of WLKY-TV will have a material adverse effect on Pulitzer or its broadcasting operations."

Founded in St. Louis in 1878, Pulitzer Publishing is engaged in newspaper publishing and television and radio broadcasting. The company's newspaper operations consist of two major metropolitan dailies, the St. Louis Post-Dispatch and The Arizona Daily Star in Tucson, Ariz., and newspapers and shoppers in the Chicago area, including the Southtown Economist, a suburban daily and Sunday newspaper.

Broadcasting operations consist of seven network-affiliated television stations: WYFF in Greenville, S.C.; WGAL in Lancaster, Pa.; WXII in Winston-Salem, N.C.; KOAT in Albuquerque, N.M.; KETV in Omaha, Neb.; WLKY in Louisville, Ky.; and WDSU in New Orleans, La.; and two radio stations (KTAR-AM and KKLT-FM) in Phoenix, Ariz.

SAN JOSE, CA (MAY 30) PR NEWSWIRE - Trace Products (NASDAQ: TRCE) today announced operating results for the fourth quarter and fiscal year ended Feb. 28, 1990.

For the fourth quarter, Trace reported sales of $6,896,000, net income of $7,000 and earnings per share of $.00. For the like period last fiscal year, Trace reported sales of $5,374,000, net loss of $1,815,000 and a net loss per share of $.19.

For the fiscal year ended Feb. 28, 1990, sales were $25,626,000 and net income was $1,036,000 or $.11 per share. For the prior fiscal year, sales were $23,380,000, and net income was $397,000 or $.04 per share.

Sales increased almost 10 percent over the prior fiscal year and net income increased by 161 percent. Fourth quarter results were negatively impacted by a downward adjustment in the carrying value of an investment.

Trace Products is the industry leader in the design and manufacture of diskette duplication systems and products for software publishers and other corporations distributing information on diskettes.

SPOKANE, WA (MAY 30) PR NEWSWIRE - Jalan (OTC Pink Sheets) President Jan Robinson announced today that sales figures for the first six months of the fiscal year show a 43 percent increase over the same period last year. The company reports revenues of $597,000 and after-tax profits of $83,000 for the period.

"1990 has been very good to Jalan. At this point, with half of the year behind us, I would like to congratulate our staff for their performance. Their efforts have not only sparked the company's growth, but have generated a significant impact on bottom-line profits as well," said Robinson. Jalan's president went on to say, "We are finally large enough to have a core of superb people, an installation base of customers, the best system support in the industry, and proven statistics on the success customers enjoy using our five products.

"It's a compound thing," noted Robinson, "one gets two, two gets four, and so on. These satisfied customers are telling their associates in the law and justice community about us."

Vice President Trish Lane reported that Jalan now has installations in 17 states, and that the company is expanding into Canadian provinces. "It's still plenty exciting around here with new products and major systems enhancements coming out yet this year," said Lane.

Jalan recently increased the size of their office space by approximately 1,200 square feet and will be holding their first National User Group Meeting in Spokane later this summer.

Jalan is a public company based in Spokane. The company's stock is traded over the counter.

#90150p3504 05/30/1990 ~PR Newswire

CINCINNATI (MAY 30) PR NEWSWIRE - Craig C. Standen today was named vice president, marketing/advertising, for Scripps Howard's newspaper/publishing division.

For the past eight years, Standen has been president and chief executive officer of the Newspaper Advertising Bureau, a not-for- profit sales, research, marketing and promotion organization that provides assistance to member newspapers and helps the advertising community use daily newspapers more effectively. He will join Scripps Howard in August.

"The selection of Mr. Standen, with his outstanding record in the marketing field, underscores our commitment to position our newspapers for a future that demands a new order of marketing skills," said William R. Burleigh, executive vice president, Scripps Howard.

Standen, 47, joined the bureau in 1980 as executive vice president in charge of the sales operation. Two years later he was elected president and chief executive officer.

Under Standen's leadership the bureau initiated the Future of Advertising Project, an industry-wide effort to address the long- range marketing challenges facing the newspaper business, and guided the newspaper industry's conversion to Standard Advertising Units, which standardized the sizes of ads available to newspaper advertisers.

Standen also supervised the bureau's installation of a new strategic planning system and its creation of a marketing/technology department.

"My 10 years here have been personally and professionally rewarding. We

have made great progress during the past decade solidifying and improving the long-term competitive position of newspapers. I feel very good about the potential for our business," Standen said in announcing his resignation to the bureau's board of directors.

Walter Mattson, chairman of the Newspaper Advertising Bureau and president of The New York Times Company, said, "Craig Standen has made a significant contribution to the newspaper business. The bureau will miss his leadership and wise counsel."

Len Forman, executive vice president of the bureau, will assume responsibility for directing operations until the board appoints a new president. A special committee of the board has been formed to recommend a management succession plan.

Standen's professional affiliations include The Advertising Council, of which he is a director, and the International Newspaper Advertising and Marketing Executives. He is a former member of the Young Presidents' Organization.

Before joining the bureau, Standen was director of marketing services for the R.J. Reynolds Tobaccco Co. where he directed a 200-person staff responsible for media and promotional activities. He also held several marketing positions with General Foods Corporation prior to his association with R.J. Reynolds.

Standen is a 1964 graduate of Denison University with a bachelor's degree in liberal arts. He also earned a master of business administration in marketing from Northwestern University School of Business. He served three years from the U.S. Army Medical Services Corps in Korea and Texas before the start of the marketing career.

Standen and his wife, Marcia, have two children. They will be moving to Cincinnati from their home in Darien, Conn.

Scripps Howard operates 19 daily newspapers, nine television stations, five radio stations and cable television systems with 571,000 basic subscribers. It is also a worldwide syndicator and licensor of news features and comics. Scripps Howard is the operating subsidiary of The E.W. Scripps Company (NASDAQ: EWSCA).

HIGHLAND PARK, MI (MAY 30) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today released the following:

I've been privileged to be part of the turnaround and then the rebuilding of a great American company. Looking back, the most gratifying period for me were those uncertain years. I've been offered an opportunity to lead another great company during a period of major transition, and it's an opportunity I can't turn down.

At 54 years of age, I want to combine my experience and energy as the chief executive officer of a major corporation. I was approached at the right time and with the right challenge.

I believe Chrysler is poised to become a stronger, more important player in the U.S. and world auto industry in the '90s. Future product programs are on schedule and securely funded, product quality has been steadily increasing, significant progress has been made in reducing costs and, most important, our market share has started to rebound from its April low.

The difficult part, for me, is leaving Lee Iacocca and the management team at Chrysler, as well as all the men and women in the company who have taken it so far in the past 10 years. For Chrysler, the best is yet to come, and I'll miss not being part of it.

NEW YORK (MAY 30) PR NEWSWIRE - United Employee Acquisition Corp. (UEAC), the acquisition entity formed by United Air Lines' three principal unions, announced today that it had entered into a five-year employment agreement with Gerald Greenwald, vice chairman of Chrysler Corporation, pursuant to which Greenwald will serve as chief executive officer of UEAC prior to the acquisition of UAL Corporation, and as chairman and chief executive officer of UAL and its principal subsidiary, United Air Lines, following the acquisition.

In a joint statement, Diane Robertson, Frederick C. Dubinsky and John Peterpaul, the three leaders whose unions, the Association of Flight Attendants, Airline Pilots Association, International and the International Association of Machinists and Aerospace Workers, established UEAC, said:

"Jerry Greenwald brings to the transaction an extraordinary mix of qualities. He has a proven track record in running one of America's largest enterprises with a history of sound labor relations, a superb financial background well-suited to leading the UEAC team in raising the

acquisition financing and to running UAL following the acquisition, and a comfortable style which will enable him to relate readily to all constituencies at UAL. He is an individual with whom the financial community and UAL's management team and employees can easily relate."

Greenwald's first task as chief executive officer of UEAC will be to work with Saloman Brothers and Goldman Sachs in arranging for bank financing for the acquisition.

Greenwald will bring to the transaction, and to UAL upon consummation of the transaction, more than 30 years of experience in running a variety of businesses both at Chrysler and prior thereto at Ford Motor Co., as well as experience participating in Chrysler's successful financial restructuring.

Greenwald spent approximately 22 years in a variety of positions at the Ford Motor Co. In 1979, he became vice president and controller of Chrysler, served as vice chairman of Chrysler from 1981 to 1985, chairman of Chrysler Motors Corp. from 1985 to 1988, and again as vice chairman of Chrysler Corp. since 1988.

Greenwald was selected by UEAC in a professionally managed executive search process headed by Thomas J. Neff, president of Spencer Stuart, a New York-based executive search firm.

TORONTO (MAY 31) PR NEWSWIRE - Helen Roman-Barber, chairman and chief executive officer of Denison Mines Ltd. (Toronto: DEN.A), said today that "Denison has not put its interests in Quintette Coal Ltd. or Denison-Potacan Potash Co. up for sale."

She said, however, that "Denison is prepared to sell non-core assets, if necessary, to raise cash to meet its financial obligations."

"Media reports quoting me as having said at Denison's annual meeting last week that either Quintette or Denison-Potacan are now on the market are incorrect," Roman-Barber said.

"The statement I made was: 'We will not sell our oil and gas properties at a price that is below their fair value or on terms that are not satisfactory. We are therefore dealing with the prospect that the oil and gas divestiture program may not provide us with sufficient funds to meet all of our financial obligations. And because of this, we are prepared to

sell other non-core assets."

(MAY 30) UPI - A fire in a natural gas well that exploded Tuesday outside Heidelberg, Mississippi, is being kept going by firefighters in order to burn up excess hydrogen sulfide. Authorities say one person was killed in the blast, and four others were critically burned. Officials have NOT determined the cause of the explosion at the well owned by R-and-H Oil and Gas of Tickfaw, Louisiana.

Astronomers from Boston University say they've discovered what might be the largest visible structure in the solar system- a 20-Million-mile-long cloud of sodium streaming away from the planet Jupiter. The astronomers announced their findings Tuesday at a gathering of scientists meeting in Baltimore.

OTTAWA (MAY 30) UPI - A Soviet army deserter from Estonia who fled to Canada a year ago challenged Soviet leader Mikhail Gorbachev to set free

the Baltic republics. He received an unexpected reply.

''I asked him why don't you sit down and discuss it. He said, 'That's what I'll do,''' said Imre Sooaar, 21, who spoke to Gorbachev for several minutes as the Soviet leader walked through downtown Ottawa within hours of his arrival in Canada for talks with Prime Minister Brian Mulroney.

Speaking in Russian, Sooaar, an Estonian who served in the Soviet national army before deserting to Canada, told Gorbachev: ''Let the Baltics be free.''

''He looked into my eyes and didn't say a thing,'' Sooaar said. ''He was trying to make excuses that it takes time when nations have lived together tens of years. You can't stop it in one day. It takes time to solve the problems.''

Estonia is one of three Baltic republics along with Lithuania and Latvia that recently declared independence from Soviet rule.

Sooaar said he shook Gorbachev's hand and asked the Soviet leader if he would remember the encounter. ''How can't I remember such a strong guy as you,'' said Gorbachev, who meets with President Bush this week in Washington.

Sooaar said he left the Soviet army because he believed he was fighting in the ''enemy's army. I'm from Estonia.''

WASHINGTON (MAY 30) UPI - Mayor Marion Barry, facing trial on 14 drug-related counts, acknowledged he smoked crack cocaine during the FBI sting operation that led to his arrest but accused federal authorities of trying to kill him and manipulate Washington politics, The Washington Post reported Wednesday.

''They had me ingest cocaine, crack cocaine, which could have killed me. ... I could have been dead now, with 70, 80, 90 percent pure cocaine,'' Barry said Tuesday during an interview with the newspaper.

Barry is scheduled to go on trial June 4 on three felony charges of perjury, 10 misdemeanor counts of cocaine possession and one misdemeanor count of conspiring to possess cocaine. A federal judge refused Tuesday to separate the drug and perjury charges into two trials.

Barry denied during the interview Tuesday that he was considering a plea bargain with federal prosecutors.

He predicted that if he is not aquitted outright on drug and perjury charges, there would not be a unanimous verdict to convict him, the Post said.

''I think the prosecutors know that in this town all it takes is one juror saying, 'I'm not going to convict Marion Barry. I don't care what you say ''' Barry said.

The three-term mayor was arrested at a downtown Washington hotel Jan. 18 during an FBI sting operation in which he was reportedly videotaped smoking crack with a former girlfriend who was cooperating with federal authorities.

''I've seen this videotape, and the tape is more damaging to the government than to me,'' Barry told the newspaper. ''It shows they bought the liquor, they did everything there.

Nineteen other people have been named as co-conspirators, and the videotape made on the night of Barry's arrest is considered an essential part of the evidence against him.

The Post said that during the hour-long interview in his office, Barry portrayed himself as ''hounded, harassed, vilified, slandered''. The main culprits, he said, were federal law enforcement officials trying to change district politics.

''The prosecutors have been dipping and dabbling in the politics of Washington for a long time, and it's unconscionable,'' he said. ''And then to try to kill me, it's unprecedented.''

Barry told the newspaper he was not worried that some co-conspirators were to testify against him in his trial.

''What's the worst they could say, that I used cocaine with them?'' Barry told the Post. ''I think if you talk to most Washingtonians - even my supporters have some inklings that they may think I may have done that (used cocaine) because of all the deluge of information.''

Barry said federal prosecutors had only charged him with doing something that was harmful to himself.

''Even my most serious, vociferous critics can't say the mayor is out making money selling drugs,'' he said.

New manager. Familiar results.

Bud Harrelson, who replaced Davey Johnson as manager of the New York Mets Tuesday, pledged to ''fire up'' the team, but the Mets continue to fizzle as they lost 2-1 to the Cincinnati Reds.

''Being manager is a whole different ballgame when you're deciding who's going to go up there and hit,'' Harrelson said. But lately, it doesn't matter much who goes to the plate for New York.

Tom Browning, 4-4, struck out three and walked one before being replaced by Rob Dibble to start the ninth. Dibble came on and struck out Kevin McReynolds before Randy Myers entered and struck out Darryl Strawberry and Mike Marshall for his 10th save.

''It was nice to have a lead for a change and I really wasn't tired after eight innings,'' Browning said. ''But we had Dibble and Myers ready and the 4-5-6 men in their batting order were coming up.''

''That's my job,'' said Dibble. ''I'm the right-handed stopper and I got my man out. Then Randy came in and got the next two. That's how we sell T-shirts and posters.''

Bob Ojeda, 1-3, suffered the loss, allowing four hits in seven innings.

Tim Teufel had given the Mets a 1-0 lead in the first inning with his second homer of the season.

Davis countered with his second homer in the fourth inning to tie it 1-1.

Sabo gave the Reds the lead in the fifth with his 10th of the season.

Mets General Manager Frank Cashen, speaking at a Riverfront Stadium news conference before the game, said blame for the club's poor start should also go to the front office and to the players. Nevertheless, he made Johnson the first major-league manager fired this season.

When asked why he dismissed Johnson, Cashen said: ''Because I felt our baseball club was underachieving and we needed a new direction.''

''If I don't get a concerted effort out of a player, it's time for him to sit and watch,'' said Harrelson. ''I feel in my heart this ballclub will be fired up.''

In the AL it was Baltimore 5, Minnesota 1; Chicago 5, New York 4; Boston 2 Texas 1; Kansas City 4, Detroit 3; Milwaukee 5, Seattle 3, Toronto 2, Oakland 1;and California 2, Cleveland 1.

In other NL games, Pittsburgh dropped Los Angeles 9-5; San Francisco

downed Chicago 6-2; St. Louis tripped Houston 3-2; and San Diego at Philadelphia was rained out.

-- AROUND THE NL --

Pirates 9, Dodgers 5

At Pittsburgh, R.J. Reynolds, Andy Van Slyke, Don Slaught and Sid Bream drove in two runs each, helping Pittsburgh extend its winning streak to four games. Bob Patterson, 3-1, gave up six hits over 6 1-3 innings and Scott Ruskin went 2 1-3 innings for his second save. Fernando Valenzuela, 4-4, took the loss.

Giants 6, Cubs 2

At Chicago, Don Robinson, making only his second start of the season, allowed five hits over 6 2-3 innings and added an RBI single to lead San Francisco. Robinson, 1-0, earned the win and Jeff Brantley notched his fifth save. Kevin Blankenship, 0-1, called up from Iowa for the start, took the loss.

Cardinals 3, Astros 2

At Houston, John Tudor scattered five hits over seven innings and Ozzie Smith scored and drove in a run, helping St. Louis snap its four-game losing streak. Tudor, 5-2, went seven innings to post his first win since April 28 and Lee Smith notched his fourth save. Dan Schatzeder, 1-3, was the loser.

#90150u0291 05/30/1990 ~United Press International

MOSCOW (MAY 30) UPI - Hundreds of people took to the streets in celebration of the parliamentary election of maverick Boris Yeltsin as president of the Russian republic, hoisting portraits of Soviet President Mikhail Gorbachev's chief rival and showering him with flowers.

Yeltsin's defeat Tuesday of Alexander Vlasov, the incumbent Russian premier and a non-voting member of the Soviet Communist Party's ruling Politburo, ended a two-week deadlock in the struggle for the giant republic's effective presidency.

His election also gives Yeltsin a power base from which to challenge Gorbachev on issues including the pace and content of economic reform, the role of the Communist Party and the nature of the Soviet federation.

As he left the Kremlin after his victory, Yeltsin was met near St. Basil's Cathedral by several hundred supporters brandishing his portrait and

pre-revolutionary Russian flags while chanting ''Victory! Victory!''

Yeltsin, 59, mounted a hill and told the crowd that his election was ''a very serious, enormous step toward the victory of democracy in Russia.'' Then, bombarded by flowers and good wishes, he pushed through the throngs to a car.

A few hours later, two small rallies of about 500 people each, one next to the Kremlin, celebrated Yeltsin's election and were told that mass support is still needed despite the populist leader's new powers. Yeltsin did not speak.

The government newspaper Izvestia rushed the election results to press Tuesday evening, printing a large picture of a smiling Yeltsin with a front-page story that overshadowed a smaller notice on Gorbachev's departure for Canada and the United States.

Yeltsin said his election could cloud Gorbachev's mood at this week's Washington summit with President Bush. ''At first, President Gorbachev will take (the election) very hard, but gradually he will get used to this inescapable fact.''

Yeltsin's election ended a three-year return from disgrace on the strength of massive popular support expressed through democratic elections. After criticizing the pace of Gorbachev's reforms in November 1987, Yeltsin lost his post as Moscow's party leader and his candidate membership in the Politburo.

Minutes after the vote was announced in the new Russian Congress of People's Deputies, Yeltsin took the podium and pledged ''to spare nothing, neither health nor time, so that we can escape the crisis situation and lead Russia to better times.''

Gorbachev, who last week accused Yeltsin of trying to break up the Soviet Union, said in Ottawa after the vote that he now believes his rival is serious in his pledge to cooperate with the Soviet leadership. But he noted that Yeltsin has been forced to clarify his position on socialism in recent days.

''He has had to adjust his policy very seriously over the past few days, and has adjusted to the better,'' said Gorbachev, in Canada for talks with Prime Minister Brian Mulroney before heading to Washington. ''If he is playing political games, then we are maybe in for difficult times.''

Yeltsin received 535 votes, four more than a needed clear majority for election as chairman of the Russian legislature and the smaller Supreme Soviet, or permanent Parliament, to be chosen from its ranks.

Vlasov got 467 votes. A third candidate, ethnic Korean businessman Valentin Tsoi, a would-be kingmaker, received 11 votes.

Yeltsin called for a coalition government to overcome the sharp differences in the legislature, directing deputies to set up a ''conciliation commission representing different political courses.''

The commission will negotiate the division of portfolios in the new government. On Monday, Oleg Rumyantsev, an organizer for the Democratic Russia bloc that orchestrated Yeltsin's victory, said the radical leader will likely offer Vlasov the No. 2 post in the Parliament as deputy chairman.

In a post-election interview on Soviet television, Yeltsin repeated demands for Russian sovereignty, saying the republic's laws should supersede Soviet ones in cases of conflict and that it should be an autonomous player on the international scene.

''Sovereignty means independent domestic and foreign policy, and the right to conclude all sorts of treaties, including international treaties,'' he said.

Earlier, Yeltsin affirmed support for Lithuanian independence and said: ''I consider that Russia should first conclude treaties with the Baltic republics and then with all the others who want them.''

Latvian President Anatolijs Gorbunovs welcomed Yeltsin's election, sending a congratulatory telegram that called for the ''development of friendly, good-neighborly relations with Russia on an equal basis.''

(MAY 30) UPI - Arkansas Gov. Bill Clinton captured his sixth straight Democratic gubernatorial nomination, while in Kentucky, Sen. Mitch McConnell, R-Ky., easily won renomination and will meet Democratic primary victor Harvey Sloane in November.

If Clinton, 43, who has governed Arkansas for 10 of the past 12 years, wins re-election and completes another term, he will have served as governor longer than anyone in the state's 154-year history.

Clinton served as governor from 1979-81.

He won the Democratic nomination in 1980, but lost the general election to Republican Frank White. Clinton was elected in 1982 and re-elected in 1984. In 1986, Clinton became the first Arkansas governor elected to a four-year term.

Only one of Clinton's Democratic challengers, Tom McRae, 51, a former Peace Corps volunteer and former director of the Winthrop Rockefeller Foundation, was able to garner much support in Tuesday's primary.

''I received a call from Mr. McRae congratulating is on this victory,'' Clinton said. ''I asked him for his support and I ask all his supporters to join us in a campaign of progress.''

In the Republican primary for governor, Little Rock lawyer Sheffield Nelson claimed victory over Rep. Tommy Robinson, R-Ark. Both men are former Democrats.

Rep. Bill Alexander, D-Ark., won renomination in his bid for a 12th term in Congress, defeating Mike Gibson, the city attorney in Alexander's home town of Osceola. Alexander will face Republican Terry Hayes of Heber Springs in November.

Alexander said his race against Gibson was ''the most determined and probably best financed campaign we've ever faced.''

Sen. David Pryor, D-Ark., had no opposition in either the primary or the November election.

In Kentucky, Sloane defeated John Brock while McConnell beat Tommy Klein, who said he ran for office because he needed a job.

With 98 percent of the Republican precincts reporting, McConnell led Klein 88.6 percent to 11.4 percent. With 98.1 percent of the Democratic precincts reporting, Sloane led Brock 59 percent to 41 percent.

When asked if he thought Sloane was beatable, McConnell said, ''Sure. Remember this is the man who left the county government a few years ago a shambles with such actions as misuse of the county river patrol boat. It's time for Harvey to move on.''

McConnell challenged Sloane to a debate and one former GOP official predicted such a meeting would occur.

''McConnell thinks he has a better command after six years in Washington of the issues, national, economic and foreign policy issues than Sloane,'' said former Republican Pary Chairman Larry Forgy of Lexington. ''Sloane will accept because Sloane feels he has to defeat McConnell in a debate to win the election.''

The two Kentucky House members who faced opposition in their primaries - Reps. Romano Mazzoli, D-Ky., and Carl ''Chris'' Perkins, D-Ky., - both won.

Mazzoli defeated Paul Bather and Jeff Hutter, both of Louisville, in the 3rd Congressional District Democratic primary. Results were not complete for the Republican primary between Tim Hardy and Al Brown.

Perkins easily defeated Jerry Cecil of Winchester in the 7th Congressional District race. Perkins has served three terms since taking over when his father, Carl, who held the seat for 35 years, died in 1984.

Perkins will meet Will Scott of Pikeville, who defeated Larry Leslie of Prestonsburg in the GOP primary.

The only other congressional race on Kentucky's primary ballot had Martin Tori of Radcliff defeating Linda Pepper of Irvington in the Republican

race to challenge Rep. William Natcher, D-Ky., in the 2nd Congressional District.

#90150u0344 05/30/1990 ~United Press International

(MAY 30) UPI - Engineers at Cape Canaveral, Florida, are tracing a leak in a hydrogen fuel line that forced NASA to postpone launch of the shuttle Columbia. Technicians found two leaks- a small one in a ground fuel supply system and a more serious one in the area where a 17-inch fuel line enters the shuttle's belly. Launch director Robert Sieck says liftoff has been delayed for at least 48 hours, and some sources say it could be two weeks or more.

Air traffic between the United States and the Soviet Union could triple under an aviation agreement that's ready to be signed at this week's superpower summit. State Department spokeswoman Margaret Tutwiler says U-S and Soviet negotiators finished work on the accord Monday. Under the agreement, U-S airlines could increase service to Moscow and Leningrad and possibly other cities. Soviet airlines could increase their service to New York and Washington... and possibly Chicago, Miami and other cities.

In Nicaragua, Contra rebels reached agreement Tuesday with the government on so-called ''development zones'' where the rebels and their families can settle after demobilization. The agreement is seen as a step toward re-starting the stalled Contra disarmament process, but other questions still must be resolved. One rebel leader says ''the disarmament will remain at a standstill until agreeemnts are reached on security and guarantees'' for Contras who hand in their weapons.

Voters went to the polls Tuesday in primary elections in two states. In Arkansas, Governor Bill Clinton is seeking his fifth consecutive Democratic gubernatorial primary victory. If he wins re-election and completes another term, he will have served as governor longer than anyone else in the state's history. In congressional races, Democrat Bill Alexander won re-nomination in his bid for a 12th term... defeating Mike Gibson. In Kentucky, G-O-P Senator Mitch McConnell won re-nomination and will face Democratic primary winner Harvey Sloane in November.

#90150u0350 05/30/1990 ~United Press International

PORTLAND, OR (MAY 30) UPI - Clyde Drexler scored 32 points, including the go-ahead free throws with 34.4 seconds left Tuesday night, helping the Portland Trail Blazers maintain their precious home-court advantage in the Western Conference finals with a 120-114 victory over the Phoenix Suns.

Portland, 9-0 at home in the playoffs, leads the best-of-seven series 3-2

and can advance to its first NBA finals in 13 years with a victory Thursday night at Phoenix.

The Blazers have struggled recently on the road, dropping their last five games by an average of 18.5 points. But if necessary, they will play host Game 7 Saturday.

The Suns, who won the previous two games at home by a combined 46 points, fell for the 20th straight time at Portland. They have lost their three road games in the series by a combined 9 points.

In scoring his series high, Drexler snapped out of his scoring slump by hitting 13 of 24 shots. He added 10 rebounds. Jerome Kersey contributed 21 points and 11 rebounds and Terry Porter had 19 points and 12 assists.

Kevin Johnson scored 28 points for the Suns and Tom Chambers had 22, though he made only 6 of 21 shots.

Kersey snapped a 109-109 tie with two foul shots, then fed Drexler for a sensational slam in transition for a 113-109 Portland lead with 2:41 to play.

But the Suns retaliated with five straight points. Mark West hit a free throw, Dan Majerle scored off a difficult drive and Chambers made two free throws to put Phoenix ahead 114-113 with 47.3 seconds left.

However, Drexler drew a foul on Majerle and sank two free throws 13 seconds later to push Portland back ahead.

On the next possession, Majerle missed a lay-up in traffic. Jeff Hornacek couldn't control a loose ball and fouled Buck Williams, who made two foul shots for a 117-114 edge with 14.9 seconds left.

Hornacek missed a 3-pointer with about 7 seconds to go, Kersey rebounded and canned one free throw with 5.2 seconds left to seal the victory.

Hornacek hit for 7 straight Phoenix points, and when Johnson completed a 3-point play off a drive, the score was tied 98-98 with 8:18 to play.

Thirty seconds later, Danny Young coughed up the ball after colliding with teammate Duckworth, and Johnson coasted home for a breakaway layup that made it 102-99 with 7:32 remaining.

But the Blazers fought back. Drexler hit a 3-pointer, and West was called for a foul underneath. Duckworth made this foul shot, and Portland was within 106-105 with 6:09 to play.

Chambers missed 12 of his first 15 shots, but suddenly sank two straight

as the Suns opened the third quarter with an 8-1 spurt to tie it 65-65. However, Porter nailed his third 3-pointer and Kersey dunked off Drexler's fastbreak feed to conclude a sudden 16-6 burst, and the Blazers carried a 91-84 lead into the final period.

Drexler, averaging just 16.5 points in the series - almost 7 points under his season average - struck for 18 points and grabbed 8 rebounds in the first half as the Blazers raced to a 64-57 advantage.

Johnson had 17 points for the Suns by halftime, but got little help. Chambers missed 9 of 12 field-goal attempts and Hornacek took only 4 shots.

Phoenix started hot, making 7 of its first 10 shots to take a 17-9 lead. But Portland went on a 16-1 burst, holding the Suns without a field goal for a 4:22 stretch. Porter had 8 points, including a pair of 3-pointers, in the run that made it 25-18.

Phoenix, trailing 31-24 after one period, received two steals and a layup from Johnson to slip to within 33-31. But the Suns went cold again, managing just one basket in a five-minute span, and the Blazers capitalized for a 46-37 lead midway through the quarter.

#90150u0359 05/30/1990 ~United Press International

MANILA, Philippines (MAY 30) UPI - A military court Wednesday denied a defense petition asking bail for two generals and 19 other officers charged in connection with the December coup attempt against President Corazon Aquino.

The court's denial of the bail plea and two other petitions prompted defense attorneys to accuse the tribunal of attempting to ''railroad'' the proceedings. The court said bail was not allowed under the military justice system.

The bail issue sparked lengthy debates that delayed the entry of pleas by air force Brig. Gen. Jose Commendador and army Brig. Gen. Marcelo Blando and the hearing was deferred until next week.

Aside from the motion to grant bail, the court also dismissed petitions questioning the jurisdiction of the court and seeking specifics relating to the charges, which defense lawyers claimed were ''too general.''

The court did grant one motion allowing defense lawyers greater access to information about prospective witnesses and examination of documentary evidence in advance.

At least 119 people were killed and more than 500 were wounded during the

Dec. 1-9 uprising that nearly toppled Aquino. The 21 accused are the first group of officers to go on trial. Some 2,100 officers and lower-ranking personnel still await trial.

#90150u0366 05/30/1990 ~United Press International

(MAY 30) UPI - A federal jury Tuesday convicted a suburban Miami mayor and two council members of extortion. The three Sweetwater officials were convicted of accepting thousands of dollars from a businessman who needed a zoning variance to sell part of his shopping center. Sweetwater is a town of 82-hundred people 15 miles southwest of Miami.

A landmark development for the embattled Seabrook nuclear power plant. Officials in New Hampshire say the plant produced its first nuclear-generated electricity Tuesday night. Plant spokesman Ron Sher says it fed 75 megawatts of power into the New England power grid. He called it ''perhaps the most significant milestone in the history of Seabrook Station.''

#90150u0382 05/30/1990 ~United Press International

(MAY 30) UPI - On a night when Rickey Henderson stole past Ty Cobb, the Toronto Blue Jays swiped some of his fun.

Henderson broke the American League career steal record, but Toronto came up the winner over Oakland 2-1 Tuesday night.

The loss was Oakland's second straight.

Henderson said that the last few days before he broke the record were tough.

''The last few days, I have been having trouble getting on base and the record's been on my mind,'' he said. ''I haven't been doing my job - helping the team win. So now that I have the record, I can relax, get on base more and do what I'm suppose to do.''

David Wells, 2-0, making just his fourth career start, allowed only two hits in six innings.

One of them was a sixth-inning double to Henderson, who stole third for his 893rd career theft.

Tom Henke, the third Toronto pitcher, earned his sixth save.

''If I don't get into the record book on my own at least he gets me in,''

Wells said. ''I told myself if he got on I wasn't going to let him steal. But it's tough to hold a guy on second.''

On a 2-0 pitch to Carney Lansford, Henderson stole third without a throw from catcher Greg Myers.

The Blue Jays took a 1-0 lead in the second inning when rightfielder Lance Blankenship misplayed Nelson Liriano's pop for an error, allowing Fred McGriff to score.

Toronto increased its lead to 2-0 in the sixth on McGriff's RBI single.

Oakland scored in the ninth when Henderson tripled and scored on Carney Lansford's single.

In other AL games, Baltimore topped Minnesota 5-1, Chicago clipped New York 3-2, Boston edged Texas 2-1, Kansas City beat Detroit 5-3, Milwaukee beat Seattle 5-3, California shaded Cleveland 2-1.

In the NL, it was: Cincinnati 2, New York 1; Pittsburgh 9, Los Angeles 5; San Francisco 6, Chicago 2; St. Louis 3, Houston 2 and San Diego at Philadelphia was postponed by rain.

-- AROUND THE AL --

Orioles 5, Twins 1

At Minneapolis, Randy Milligan smashed two home runs and added an RBI double to help Baltimore snap Minnesota's five-game winning streak. Bob Milacki, 2-3, did not allow a walk and fanned three over 6 1-3 innings. Allan Anderson, 2-6, absorbed the loss.

White Sox 5, Yankees 4

At Chicago, Lance Johnson scored on a wild pitch by Lance McCullers with two out in the bottom of the ninth inning, boosting Chicago's winning streak to four games. Jeff Robinson, 0-3, took the loss, the Yankees fourth straight. Bobby Thigpen, 2-2, earned the win.

Royals 5, Tigers 3

At Kansas City, Mo., Willie Wilson scored on a wild pitch to tie the score and Jim Eisenreich drove in the game-winner in the eighth inning, to lift Kansas City to their fourth straight win. Steve Farr, 4-2, earned the victory and Jeff Montgomery pitched the ninth for his third save. Mike Henneman, 1-4, took the loss.

Red Sox 2, Rangers 1

At Arlington, Texas, Carlos Quintana doubled home Tony Pena from first base with two out in the eighth inning to lead Boston. Roger Clemens pitched eight innings, improving his record to 8-2. Jeff Reardon pitched the ninth to record his fifth save. Despite throwing a complete game, Charlie Hough, 5-3 took the loss.

Angels 2, Indians 1

At Anaheim, Calif., Kirk McCaskill and Mark Eichhorn combined on a seven-hitter lifting California over Cleveland. McCaskill, 3-2, ran his career record to 7-1 against the Indians. Eichhorn pitched 2 1-3 innings of scoreless relief for his ninth save. John Farrell, 3-2, suffered the loss.

Brewers 5, Mariners 3

At Seattle, Pinch-hitter Darryl Hamilton and Charlie O'Brien each singled in a run in the ninth inning, to help snap Milwaukee's six-game losing streak. Chuck Crim, 2-1, who retired the final batter in the eighth, picked up the victory. Dan Plesac pitched the ninth for his ninth save. Mike Jackson, 1-3. took the loss.

#90150u0411 05/30/1990 ~United Press International

LUSAKA, ZAMBIA (MAY 30) UPI - President Kenneth Kaunda's ruling party has decided to hold a nationwide referendum on whether to restore a multi-party democracy in the southern African nation for the first time since 1973.

The decision Tuesday to hold a referendum comes amid increasing agitation for a multi-party system from trade unionists and government efforts to seek fresh investment and loans for the debt-strapped copper-based economy.

Kaunda, closing an extraordinary two-day meeting of the ruling United National Independence Party, said a referendum would be held to test public support, but he vowed to campaign vigorously against multi-party politics.

''As a party, we are saying the people are free to make their choice and the party will respect it,'' said Kaunda, who has ruled the country since it gained independence in 1964.

''The National Council has decided the party should uphold one-party participatory democracy and offer it to the people as the best option.''

No date was set for the referendum following the meeting of party leaders from the country's 55 districts.

Zambia had nearly 20 political parties across the country when all but the ruling party were banned in 1973.

#90150u0441 05/30/1990 ~United Press International

BANGKOK, Thailand (MAY 30) UPI - Burma said it planned to expel a British journalist Wednesday for posing as a businessman to cover Burma's recent elections for the British Broadcasting Corp., official Rangoon radio said.

The journalist's name was indistinct in the Tuesday night broadcast, but BBC sources identified him as Lindsey Shanson, a free-lance journalist who works for Jane's Defense Weekly in Britain and newspapers in Israel.

The radio report said Shanson, who entered the country on a business visa, would be expelled Wednesday evening.

The military government, which suffered a stunning landslide defeat during Sunday's elections, provided journalist visas for about 30 news organizations to cover the balloting, but excluded the BBC, the U.S. government's Voice of America and other major organizations.

The official radio broadcast said ''it was reported by a dutiful person that whenever the other journalists were having meals ... the stranger was observed to be eavesdropping or questioning the journalists.''

''Responsible authorities conducted an investigation to check out the foreigner with the incorrect behavior. From the stranger's expense account telephone calls, and the news he sent, he was found to be a journalist posing as a businessman,'' it said.

It said the news provided by the journalist was carried by the BBC.

''Since such behavior not only violates the ethical rules that journalists should abide by but also causes inconvenience to those foreign correspondents who had entered the country legally and to the other genuine foreign newsmen who could not come after applying for visas, arrangements were made to make him leave the country on May 30,'' it said.

-30- 1902

#90150u0566 05/30/1990 ~United Press International

MIAMI (MAY 30) UPI - Former Panamanian ruler Manuel Noriega's lawyers claim the government violated federal seizure rules by not telling the general the location of his $20 million in seized and frozen assets.

Defense lawyers argued Tuesday that as a result, the deposed Panamanian leader cannot step forward to claim assets he said are needed to pay his

attorneys.

In drug cases, the government typically seizes assets it believes to be ''tainted'' by a criminal enterprise. Noriega is charged with protecting U.S.-bound drug shipments from Colombia. The government has frozen about $20 million of his assets.

But Noriega's lead attorney, Frank Rubino, declared in a motion Tuesday that Noriega can't claim his property because no one in the government has told him where it is.

''The United States Government has not filed any notices of seizure, nor requested, from this court, any warrant of arrest of the property,'' Rubino wrote.

''The notice should have been personally served on General Noriega advising him of what property had been seized from him and advising him of the remedies that were available to him,'' Rubio wrote.

The U.S. Attorney's office has done neither, Rubino said, adding that it is incumbent on the government to show why Noriega's property should be subject to seizure.

Noriega's lawyers have asked to withdraw because they have not been paid. At the government's suggestion, they applied for court-appointed status so they could be paid with public funds.

But last week, U.S. District Judge William Hoeveler said the Criminal Justice Act allows publicly funded payments to only one lawyer per defendant and does not permit fees over $75 per hour.

Noriega has several lawyers on his defense team, which sought $250 to $350 per hour.

Hoeveler had given the defense until Tuesday to show him how the law is unconstitutional.

But in his response, another Noriega attorney, Jon May, said the issue is not whether the Criminal Justice Act is unconstitutional but whether Noriega's Sixth Amendment rights to a fair trial require higher fees so he can have adequate represenatation.

''We believe the answer to that question is yes,'' May wrote.

Diane Cossin, a spokeswoman for the U.S. Attorney's Office in Miami, said she could not comment because prosecutors had not seen the new defense motion.

(MAY 30) UPI - Around the world... around the clock... the latest news from U-P-I.

A strong earthquake rocked northern Peru last night. Reports from disaster relief officials and ham radio operators say 22 people are dead and dozens of others are injured. The Peru Geophysical Institute says the quake registered five-point-eight on the Richter scale. It was centered off the coast, in the Pacific Ocean.

Soviet President Gorbachev made two forays into crowds of friendly Canadians after his arrival in Ottawa. Gorbachev rarely does anything like it at home in Moscow. The Soviet leader and his wife took a two-hour walk through downtown Ottawa last night. Hundreds of well-wishers applauded and chanted ''Gorby! Gorby!''

Gorbachev stopped at a statue of French explorer Samuel de Champlain. He told reporters it is necessary to distinguish between national and nationalistic events... a reference to the Baltics and Armenia. At the airport earlier in the day, he waded into a group of 850 schoolchildren.

A federal judge has ordered Washington, D-C, Mayor Marion Barry to stand trial as scheduled Monday. Judge Thomas Jackson yesterday refused to separate the drug and perjury charges against Barry. The mayor's lawyers asked that Monday's trial include only the original charges involving cocaine.

The District of Columbia's mayor accuses federal authorities of trying to kill him and manipulate Washington politics. Marion Barry, in an interview says the cocaine given him was pure enough to have killed him.

Abortion rights activists staged a noisy sit-in for more than five hours yesterday at the Manhattan offices of the Health and Human Services Department. Demonstrators protested restrictions on abortion counseling. The protesters faxed a list of demands to H-H-S Secretary Louis Sullivan.

The action was timed to coincide with the Supreme Court's deliberations on whether to hear two cases seeking repeal of the restrictions imposed by the Reagan administration on federally funded clinics. The court decided yesterday it will hear the cases.

President Bush has selected a Florida state circuit judge to succeed federal Judge Alcee Hastings, who was impeached last year for allegedly accepting a bribe. Bush chose Dade County Judge Federico Moreno to sit on the bench in the southern district of Florida. Moreno was born in Venezuela.

#90150u0709 05/30/1990 ~United Press International
WASHINGTON (MAY 30) UPI - The Index of Leading Economic Indicators plunged 0.2 percent in April on the third straight monthly decline in new building permits, the Commerce Department said Wednesday.

The decrease in the government barometer of future economic activity was in line with the expectations of private economists.

The department's Bureau of Economic Analysis also said the index increased by a revised 1 percent in March after declining 1 percent in February. In its preliminary estimate, the bureau reported a 0.9 increase in March.

The Commerce Department said the index itself stood at 144.9 in April.

Of the 11 indicators that contribute to the government barometer, six were

negative:

-Building permits.

-Contracts and orders for plant and equipment.

-Average workweek.

-Manufacturers' new orders for consumer goods and materials.

-Change in manufacturers' unfilled orders.

-Average weekly initial claims for state unemployment insurance.

The February, March and April decline in building permits follows increases in November, December and January and confirms the ongoing slump in construction activity in most parts of the nation.

The change in manufacturers' unfilled orders also scored three straight monthly declines, the Commerce Department said.

On the positive side in the April leading indicators:

-Change in sensitive material prices.

-Index of consumer expectations.

-Vendor performanace, which tracks product delivery time.

-Money supply.

A single indicator, stock prices, was unchanged.

For the six-month period, the index was up 0.3 percent in April, and down 0.1 percent for the previous six-month period, a government spokesman said. For the 12-month period, the index was down 0.6 percent, the spokesman indicated.

Meanwhile, the composite index of coincident indicators, a monthly approximation of aggregate economic activity, fell 0.2 percent in April after gains of 0.3 percent in March and 1 percent in February.

The Commerce Department also said the composite of lagging indicators declined 0.1 percent in April after an increase of 0.3 percent in March and a decrease of 0.3 percent in February.

#90150u0759 05/30/1990 ~United Press International

(MAY 30) UPI - Stock prices on the Tokyo Stock Exchange bounced back from early arbitrage selling pressure Wednesday to close higher in moderate trading.

The blue-chip Nikkei Average of 225 selected issues, which fell 373.94 points Tuesday, rebounded 108.59 points to 32,926.26.

The broader-based Tokyo Stock Exchange Index of all listed major shares, which lost 22.39 points Tuesday, gained 5.43 points to 2,417.09.

An estimated 800 million shares changed hands, compared with 825 million shares on Tuesday.

Advances led declines 511 to 414, while 197 issues remained unchanged.

Market watchers said prices opned lower but recovered around midday, fell again in early afternoon trading and recovered once more shortly before the close.

Analysts said the fluctuations were mainly due to arbitrage trading by foreign brokerages.

Arbitrage trading is when brokerages take advantage of price differences between current stocks and stock futures, and attempt to turn a profit.

The recovery of the Japanese yen on the Tokyo Foreign Exchange, which closed higher in Tokyo Wednesday than it did in New York Tuesday, also encouraged buyers, analysts said.

On the trading floor, construction issues ended higher, along with housing stocks and ceramics.

Shipbuildings and mining shares also advanced.

Large electricals and some food stocks eased slightly.

Elsewhere in Asia, stock prices on the Hong Kong Stock Exchange climbed to a post June 4, 1989 high in heavy trading, propelled by Wall Street's powerhouse rally on Tuesday.

The blue-chip Hang Seng Index, which eased 10.95 points Tuesday, surged 34.80 points, or 1.14 percent, to 3,083.35, shattering its highest previous close since the Beijing uprising of 3,068.00 on April 19.

Among the narrower indexes, utilities rose 39.39 points, financials gained 14.44, industrials jumped 45.30 and properties climbed 41.97 points.

An estimated 1.6 billion shares changed hands, compared with 1.2 billion shares on Tuesday.

Analysts said the gain was mostly due to heavy buying of blue chip issues by foreign institutional traders.

David Lavington, a broker with Morgan Grenfell, said, ''all the reports we've been reading about China's attitude toward the outside world have been positive lately, which is a big change.''

''I think this, and continued strength on Wall Street, have given the overseas investors the confidence to enter the Hong Kong market again,'' Lavington said.

Stocks jumped nearly 30 points in the first 15 minutes of trading but were worn down by morning profit-taking.

A late-morning rally pushed issues up again, and the surge continued throughout afternoon trading.

In Singapore, stock prices on the Singapore Stock Exchange closed mixed in moderate trading as late profit taking wiped out gains sparked by Tuesday's surged on Wall Street.

The key Straits Times Industrial Index, which gained 0.87 points Tuesday, slipped 0.76 points to 1,557.44. The narrower All Singapore Index eased 0.34 points to 435.52.

An estimated 59 million shares changed hands, compared with 63.8 million shares on Tuesday.

Singapore Land warrants once again toppped the day's activity, ending sharply higher after announcing Monday a 2-for-1 bonus issue and a 2-for-1 bonus warrants issue aimed at tripling its capital base and helping United Industrial Corp. finance its takeoverof the property group.

The bonus issue was the first major decision announced by Singapore Land's new board of directors, appointed after UIC won control following a five-week battle.

Elsewhere on the trading floor, Overseas Chinese Banking Corp. foreign followed Singapore Land warrants on the advancing side. Other issues showing sizeable gains included Alex Holdings, Ming Court and Cycle and Carr.

Asia Pacific Brewing led the declining issues followed by Hong Leong Industries, Amcol Holdings, Metalock and Prima Co.

In Australia, stock prices closed higher in moderate trading on the Sydney Sharemarket propelled by Tuesday's surge on Wall Street.

The blue-chip All Ordinaries Index, which gained 9.8 points Tuesday, added another 4.6 points to 1,499.5.

An estimated 78.8 million shares chnaged hands, compared with 68.3e million shares on Tuesday.

Banking stock and transportation issues led the overall advance.

NAB Bank paced the actives rising 4 cents to $6.48, followed by Westpac Bank adding 3 cents to $4.95 and the ANZ Bank adding 4 cents to $5.04.

In the transporation sector, Brambles climbed 15 cents to $13.60 followed by TNT up 4 cents to $2.52.

Elsewhere, News Corp rose 5 cents to $10.30, Coles Myer added 8 cents to $7.28, and BTR Nylex added 3 cents to $2.90.

Wormald fell 20 cents to $10.75 following Tuesdy's announcement of a $850 million sale of its fire protection business to Tyco Laboratories.

#90150u0806 05/30/1990 ~United Press International

TULSA, OK (MAY 30) UPI - Convicted Colombian drug trafficker Jose Abello-Silva, believed to be a ranking member of the Medellin drug cartel, was sentenced to 30 years in prison and fined $5 million for smuggling marijuana and cocaine into the United States, court officials said.

U.S. District Judge Thomas R. Brett said the prison sentence he imposed Tuesday was the maximum permitted under a 1989 agreement between the United States and Colombia.

But U.S. Attorney Tony Graham said he will ask the Justice Department to authorize an appeal becasue he asked for an $8 million fine and life imprisonment, the maximum permitted under federal law.

Brett said the extradition decree states: ''In no case shall the extradition of a Colombian national be granted unless the requesting state fully guarantees to not impose a prison sentence exceeding 30 years.''

A jury found Abello, 35, guilty of two federal drug trafficking counts May 19 after an eight-week trial. Brett fined him $2.5 million and sentenced him to 30 years on each count, to be served concurrently.

''You are responsible for corrupting the minds and bodies of thousands of

people,'' Brett told Abello.

Authorities have labeled Abello, of Santa Marta, Colombia, as the No. 4 man in the Medellin drug cartel.

Abello, speaking through an interpreter, said, ''Judge, I am innocent. I congratulate you for allowing an artistry of witnesses that was the best in the world. I have never seen anything like it.''

Abello was indicted by a federal grand jury in Tulsa in 1987 and was extradited from Bogota last October.

#90150u0807 05/30/1990 ~United Press International

(MAY 30) UPI - Soviet President Gorbachev enjoys popularity in Canada while President Bush prepares to welcome him to Washington late today... that story plus other top news this morning coming up next, from U-P-I.

President Bush and other officials in Washington are getting ready to greet Soviet President Gorbachev.

The Soviet leader will arrive at Andrews Air Force Base this evening for a three-day summit conference.

Bush and Gorbachev will focus on obstacles facing both of their nations as they chart the future of East-West relations. Their talks will begin tomorrow at the White House.

Before Gorbachev's arrival, Bush will spend most of the day in a series of briefings with top advisers on summit issues.

A senior Bush administration official says this is NOT a summit devoted to the celebration of agreements that can be signed. He says it's designed to do the hard work of trying to overcome the remaining obstacles that stand in the way of transforming East-West relations.

Gorbachev's efforts to thwart secessionist movements by the Baltic republics and U-S demands for de-escalation of that crisis, plus the tensions on German reunification, top the summit agenda.

U-S and Soviet officials are racing to resolve differences on agreements designed to serve as the tangible signs of a successful summit.

Soviet President Gorbachev was all smiles as he began his Canadian visit. So were the faces on the crowds that greeted him.

The Soviet leader and his wife, Raisa, strolled through downtown Ottawa

last night to the joy of hundreds of the Canadian capital's residents.

He received greetings in both English and French- Canada's two official languages. Crowds applauded and chanted- ''Gorby! Gorby!'' Some people asked him to autograph copies of his book, ''Perestroika .''

Among more than one-thousand people who welcomed Gorbachev at the airport were 850 schoolchildren who waved Soviet and Canadian flags and shouted greetings. Gorbachev plunged into the crowd... smiling as he greeted the children.

About 15-hundred Canadians of Baltic heritage plan to demonstrate today against Gorbachev's measures to prevent the secession of Estonia, Latvia and Lithuania from the Soviet Union. A few Lithuanians demonstrated yesterday in front of the Soviet Embassy.

#90150u0812 05/30/1990 ~United Press International

MARQUETTE, MI (MAY 30) UPI - A Boy Scouts council has ousted as ''unfit'' an Air Force captain who has been honored by two presidents for his courage and leadership abilities..

Henry Seitz, president of the scouts' Hiawathaland Council, declined to say why Capt. Michael Lamb was given the boot after 30 years as a scout and adult supervisor, and Lamb himself says he is in the dark about it.

''This is a personal matter between the Boy Scouts of America and Captain Lamb,'' Seitz said, The Detroit News reported Wednesday.

The scouts called the 36-year-old Lamb an ''unfit example for American youth'' and accused him of ''disrupting council harmony,'' but Seitz emphasized that there are no allegations of child abuse involved.

Lamb said the unexplained dismissal inspired ''rumors of sexual misconduct'' and promised to appeal to the organization's national council if necessary.

''I've been devastated,'' said Lamb, a program engineer at K.I. Sawyer Air Force Base near Marquette.

Regional and national scouting officials said it is unusual for a member to be dismissed without specific reasons being given.

Lamb was named an Outstanding Young American by the U.S. Chamber of Commerce and honored by President Bush at a White House ceremony because of his successful battle to persuade the Air Force to let him continue training while he underwent treatment for Hodgkins disease.

He also received a National Courage Award from President Reagan in 1988.

Lamb said much of his family life revolves around scouting. He and his wife, Sharon, have been scoutmasters and five of their seven children are in scouting.

Lamb said he suspects his clashes with the scouting hierarchy in Marquette and reputation as ''an outsider'' may lie behind the ouster.

Lamb once objected to the behavior of a council commissioner and, on another occasion, bucked the leadership by trying to get a refund for a man whose son was unable to attend a scouting event for medical reasons.

''I thought that was all water under the bridge,'' he said.

Tech. Sgt. Anita Bailey, a spokeswoman at the air base, said Lamb has been at K.I. Sawyer since November 1988 and ''is a fine, outstanding Air Force officer.''

''We are not in a position to judge whether he is a good Boy Scout.''

#90150u0815 05/30/1990 ~United Press International

(MAY 30) UPI - Palestinian sources say a three-day Arab summit in Baghdad scheduled to end tomorrow, will produce a more moderate final communique on Middle East issues.

A Palestinian source tells United Press International Egypt and Saudi Arabia used their influence to defeat objections by Iraq and the P-L-O regarding the toned-down resolutions.

The source, requesting anonymity, says- ''The terms will NOT be as harsh or as strongly worded as the Iraqis and Palestinians would like.'' 16 of the 21 Arab League foreign ministers are attending the emergency conference which was called by P-L-O leader Yasser Arafat.

Arafat apparently called the session to discuss the influx of Soviet Jews into Israel and the Israeli-occupied territories. Also, Arafat expressed concern about an alleged Western campaign against Iraqi President Saddam Hussein.

NASA was forced late yesterday to scrub the planned launch of the shuttle Columbia early today. The move came after engineers discovered two hydrogen leaks.

One leak was traced to a ground fuel supply system on the shuttle's mobile

launch platform. A more serious leak was found in the area where a 17-inch fuel line enters the shuttle's belly.

The shuttle was to blast off early this morning, but this new snag has put the mission on hold for at least 48 hours, and possibly two weeks or more. The mission already is two weeks behind schedule.

NASA spokeswoman Lisa Malone says the shuttle ''was never in an unsafe condition at any time.'' She says a new launch date will be announced as soon as the problem is corrected.

When the spacecraft does get off the ground, seven astronuats will spend 10 days in orbit using four telescopes to examine the most violent stars and galaxies in the universe.

-30- 1947

#90150u0820 05/30/1990 ~United Press International

(MAY 30) UPI - The president-elect of Colombia wants a new series of weapons in his war against the cocaine cartels.

Colombian officials and diplomats say President-elect Cesar Gaviria already has chosen his weapons. Gaviria plans to create special courts modeled on Italian anti-Mafia tribunals and to provide heavy security for judges to hear drug cases involving the cartels.

Gaviria also wants to make judges ''anonymous.'' A panel of four or five judges would hear a cocaine case and NO one would know who is going to make the decision.

Since 1977, at least 46 judges have been assassinated in Colombia. Judges also are poorly paid and susceptible to bribes.

The Medellin cartel has threatened Gaviria... who has made few public appearances in recent months. The Colombian news agency calls Gaviria's heavily guarded apartment ''el bunker.''

The small rural town of Heidelberg, Mississippi, was rocked yesterday by a natural gas explosion that killed one person and critically burned four others.

Authorities say the blast occurred in a natural gas well and prompted the evacuation of the area. Emergency personnel say the oil well belongs to R-H Oil and Gas Incorporated of Tickfaw, Louisiana.

Heidelberg Town Clerk Debbie Logan says the well was spewing hydrogen sulfide and fire authorities had to let the blaze burn itself out and consume the toxic gas to keep it from spreading.

The cause of the explosion is NOT known.

Officials at Southcentral Regional Medical Center say four of five workers brought to the hospital suffered severe burns. Three of them were flown to a burn center in Mobile, Alabama.

Most of the evacuated residents were allowed to return to their homes late yesterday.

#90150u0853 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - The New York Stock Exchange reported Wednesday these odd lot transactions by principal dealers through NYSE facilities for May 29: Purchases of 399,752 shares and sales of 442,302 shares including 13,716 shares sold short.

-30- 399

#90150u0875 05/30/1990 ~United Press International

BOSTON (MAY 30) UPI - Digital Equipment Corp. could reduce its domestic work force by 5,000 employees through a voluntary severance program, some 3,000 more than previously estimated, The Boston Globe said Wednesday.

Quoting Wall Street analysts, the Globe said the 3,000 additional workers are expected to leave the company and accept the package of cash and extended health benefits as the Maynard, Mass.-based computer firm seeks to reduce expenses through the voluntary severance program.

Digital last month estimated 2,000 of its 75,000 workers in the United States would accept the offer. The company has more than 125,000 employes worldwide.

A company spokesman said Tuesday no decision to seek further cuts had been made, the Globe said. He said analysts at a recent meeting with Digital were given no specific figures beyond the previous forecast of 2,000.

The spokesman, Brad Allen, said Digital is ''certainly looking at continuing cost reduction efforts.'' He said that ultimately, the severance program ''may be extended to more people.''

The Globe said, however, that comments by various Digital executives at the meeting convinced at least three analysts that the company was counting on far more than 2,000 workers to take the severance offer.

The financial community believes Digital must sharply reduce expenses in order to offset shrinking profits caused by competition and a shift to

less profitable product lines such as workstations, the Globe said.

The Globe said about 5,000 workers have been told they are eligible for the deal, and analysts estimate that figure could rise to up to 10,000, based on executives' comments.

#90150u0898 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - Sales of new single-family homes dropped 1.6 percent in April for the fifth straight monthly decline while prices shattered all previous records, a government report said Wednesday.

Private economists had expected a somewhat better sales showing.

But in the hard-hit Northeast, sales jumped by 18 percent in April, while dropping by 2.1 percent in the Midwest, 6 percent in the South and 6.4 percent in the West, the government report said.

The median price for a new home rocketed to $135,900 in April, after dipping to $119,400 in March, and April's average price zoomed to $160,200 after falling to $144,100 in March, the government report said.

A Commerce Department spokesman said the April prices were the highest on record, but the report did not indicate why there was such a huge increase in new home costs during the month.

But the level of new home sales - 546,000 at an annual rate - was the lowest since 521,000 in December 1982, the spokesman said.

All the figures were adjusted to reflect critical seasonal factors, such as the weather.

The monthly report, compiled by the Commerce Department and the Housing and Urban Development Department, said new home sales plunged by a revised 8.4 percent in March and fell by a revised 1.1 percent in February.

The last time sales of single-family home increased was in November 1989, and from April 1989 to April 1990 sales were off by nearly 10.5 percent, the government report said.

''The surge in new home prices over the last few years is catching up with the new home market,'' said analysts at Mitsubishi Bank in New York. ''However, there is hope for improved affordability down the road if income growth continues while new home price increases remain subdued.

''But that improvement still may take some time,'' the analysts added.

WASHINGTON (MAY 30) UPI - A record 225 young people participated in the preliminary rounds of the 63rd annual National Spelling Bee Wednesday, with ''irreducible'' and ''thoracic'' claiming its first contestants.

The participants - 126 girls and 99 boys - range in age from 9-14 and hail from 47 states, the District of Columbia, Guam, Mexico, Puerto Rico, the Virgin Islands and overseas Department of Defense schools.

Amee Bauman, 12, of Gardnerville, Nev., was the spelling bee's first casualty, misspelling ''irreducible'' as ''irreducable.'' When the bell sounded indicating her misspelling she had a sad blank look on her face.

Cheryl Caprio, 14, of Grand Island, N.Y., was the next contestant to trip, spelling ''thoracic'' as ''therassic.''

The contestants took full advantage of the opportunity to ask for a word's definition, use of a word in a sentence, more specific pronunciation and the word's derivation to help them spell the word.

Kirsten Hanson, 13, of Carthage, Ill., had the unenviable spot as being the first contestant out of the box.

''I don't get too nervous,'' Kirsten said just after the competition began although she had hoped she would have been in the middle of the pack.

She said her daily preparation for the bee involved supplying the spelling and definition of words her mothergave her.

Though the competition is intense for the young people, some are making a return appearance to try their luck.

One contestant, Kanika Bahl, 14, of Beavercreek, Ohio, is back for a fourth try.

Those contestants remaining after Wednesday's round, will participate in Thursday's rounds, with the winner taking home $5,000.

Some of the works in the early round that failed to trip up the sharp spellers included: coquettish, meandrous, nasturtium, yachtsman, tungsten, uxorial, and poinciana.

#90150u0932 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - Sales of new single-family homes dropped 1.6 percent in April for the fifth straight monthly decline while prices shattered all previous records, a government report said Wednesday.

Private economists had expected a somewhat better sales showing.

But in the hard-hit Northeast, sales jumped by 18 percent in April, while dropping by 2.1 percent in the Midwest, 6 percent in the South and 6.4 percent in the West, the government report said.

The median price for a new home rocketed to $135,900 in April, after dipping to $119,400 in March, and April's average price zoomed to $160,200 after falling to $144,100 in March, the government report said.

A Commerce Department spokesman said the April prices were the highest on record, but the report did not indicate why there was such a huge increase in new home costs during the month.

But the level of new home sales - 546,000 at an annual rate - was the lowest since 521,000 in December 1982, the spokesman said.

All the figures were adjusted to reflect critical seasonal factors, such as the weather.

The monthly report, compiled by the Commerce Department and the Housing and Urban Development Department, said new home sales plunged by a revised 8.4 percent in March and fell by a revised 1.1 percent in February.

The last time sales of single-family home increased was in November 1989, and from April 1989 to April 1990 sales were off by nearly 10.5 percent, the government report said.

''The surge in new home prices over the last few years is catching up with the new home market,'' said analysts at Mitsubishi Bank in New York. ''However, there is hope for improved affordability down the road if income growth continues while new home price increases remain subdued.

''But that improvement still may take some time,'' the analysts added.

WASHINGTON (MAY 30) UPI - Soviet President Mikhail Gorbachev will receive the first ''Man of History'' award given by the Appeal of Conscience Foundation, a freedom of religion group, Rabbi Arthur Schneier said Wednesday.

The award, in the form of a Steuben crystal star, will be presented to Gorbachev on Friday while he is in Washington for the summit with President Bush.

''President Gorbachev's policies have changed the course of world events in our time,'' said Schneier, who heads the ecumenical organization of U.S. religious and business leaders that has been working for religious freedom and human rights for 25 years.

Along with the award, Schneier also announced that the organization is initiating the ''Gorbachev Scholar Program'' that allows 10 Soviet graduate students to study at American universities for the academic year beginning in Septemer 1991.

''The scholarships are intended to bring the United States and Soviet Union closer together in a real sense,'' Schneier said. ''We want to open up new avenues of exploration to young men and women from the Soviet Union by enabling them to study the American experience in their fields.

''This porgam is in the spirit of President Bush's hope, expressed in Malta, to link our nations further through education.''

The award to Gorbachev recognizes the strides toward religious freedom and human rights made in the Soviet Union under Gorbachev's policy of glasnost.

But it also comes at a time when some observers see a rise in anti-Semitism in the Soviet Union, especially among Russian nationalists.

On Tuesday, a group of 139 House members and 51 senators urged Bush to raise the issue of Soviet anti-Semitism during his meetings with Gorbachev.

Gorbachev has come under fire in Congress for not making forceful enough statements in opposition to reports of growing anti-Semitism and for appointing government officials with records of anti-Jewish statements.

The letters call on Bush to express ''deep concern'' about anti-Semitic incidents in the Soviet Union and to press Gorbachev to help Jews emigrate from the Soviet Union.

In April, the American Jewish Committee commissioned a poll of 506 Moscow residents in which 48 percent of them said anti-Semitism is on the rise; 44 percent said anti-Semitism remains at the same level as in the past.

In February, liberal supporters of Gorbachev in the Soviet Union, said the rise in anti-Semitism was receiving veiled support from conservative opponents of Gorbachev's reforms.

#90150u0972 05/30/1990 ~United Press International

TEL AVIV, ISRAEL (MAY 30) UPI - Israeli soldiers killed four guerrillas and captured several others who landed a speedboat Wednesday on a beach

south of Tel Aviv, an army spokesman said.

No Israelis were wounded in the morning attack.

Army helicopters and infantry pursued the gunmen from the boat that reached the shore near Nizzanim, 20 miles south of Tel Aviv. After a chase Israeli soldiers killed four gunmen and captured several others, the spokesman said.

A second boat was stopped before it could reach the coast, the spokesman said.

Military sources said the speedboats were lowered from a ship that had sailed from the port of Benghazi, Libya. The speedboats had been launched somewhere off the coast of Israel, they said.

After launching the speedboats, the larger ship sailed in the direction of Port Said, Egypt. Egyptian authorities had been notified, they said.

#90150u0977 05/30/1990 ~United Press International

PHILADELPHIA (MAY 30) UPI - An electrical fire in a circuit breaker on the main switchboard caused the M.V. Regent Star to lose power and run aground during the Memorial Day weekend, stranding 890 passengers in the Delaware Bay, the Coast Guard said Wednesday.

The cause of the fire remained under investigation by the Coast Guard and the National Transportation Safety Board, said Coast Guard Lt. James Weakley. "As a result of that fire, the ship lost electrical power and main propulsion and ran aground," Weakley said.

Weakley said the ship will remain docked in Philadelphia until the inspection is complete and repairs made. "The Coast Guard will not allow the ship to load passengers or get under way until we feel it is safe to do so," Weakley said.

The Regent Star was heading for Philadelphia at the end of a cruise from Nassau in the Bahamas when it lost power at 1 a.m. Sunday and ran aground on a sand bar five miles off Fortescue, a fishing village in southern New Jersey.

After several attempts to refloat the 642-foot ship, the 890 passengers were evacuated Monday to another boat and taken ashore. The 24,000-ton ship finally was refloated Tuesday morning during high tide and was pulled by tugboats to Big Stone Beach off Slaughter Beach, Del. The ship was listing to the right because much of its fuel had been pumped out to make it easier to pull.

The liner returned to Philadelphia with its crew early Wednesday. No one was injured and passengers seemed to take the extra day and a half of vacation in stride.

Weakley said it could be several weeks before the investigation is completed. Inspection crews remained on board Wednesday to determine what sparked the fire in the circuit breaker.

Circuit breakers distribute electricity to electric circuits throughout the ship. Those circuits feed into the main switchboard that controls power for the entire boat.

When the circuit breaker caught fire, it knocked out the main switchboard and plunged the ship into darkness. Investigators also were trying to determine why backup power systems failed and what steps might have been taken to prevent the grounding.

#90150u0988 05/30/1990 ~United Press International

(MAY 30) UPI - Soviet President Gorbachev arrives in Washington later today for his summit with President Bush. The leaders officially will begin talks tomorrow that will chart the future of East-West relations. A senior Bush administration official says the meeting will NOT be devoted to agreements that are ready for signing. He says Bush and Gorbachev instead will work to overcome remaining obstacles that stand in the way of improved relations.

Gorbachev was greeted by more than one-thousand people, including 850 cheering schoolchilren, when he arrived in Ottawa, Canada, yesterday. Later he addressed the serious problems he left behind in his country. He said the Soviet Union could be in for ''difficult times'' if outspoken communist Boris Yeltsin- quote- ''plays political games.'' Yeltsin was elected president of the Russian republic this week.

Northern Peru was rocked by a strong earthquake last night that left at least 22 people dead and dozens of others injured. The Peru Geophysical Institute says the tremor registered five-point-eight on the Richter scale. The tremor's epicenter was about 110 miles southeast of Chiclayo and about 50 miles below the surface of the Pacific Ocean. The Civic Defense Institute says nine of the victims died when their homes collapsed.

South African President de Klerk has canceled a trip to Washington next month and senior government sources say it's NOT likely de Klerk will visit the United States this year. De Klerk's visit would have occurred near the time when South African black leader Nelson Mandela is scheduled visit the White House and address Congress. The White House says President

de Klerk is welcome at any time.

#90150u0995 05/30/1990 ~United Press International

(MAY 30) UPI - Nicaraguan Contra rebels and the government of President Chamorro have reached a land settlement deal for rebels and their families. The so-called ''development zones'' will include land, schools, and services for rebels returning to civilian life. The rebels and the government resumed discussions more than one week after rebels suspended disarming in security zones monitored by U-N-peace-keeping forces.

Chicago fire authorities say it appears arson is to blame for an early morning blaze that killed four children and one adult today. Cook County Hospital officials say another child is in extremely critical condition with burns over 100 percent of his body. Fire authorities say they found a gasoline can in the apartment dining room and evidence that gasoline was poured from the dining room into the living room, where all six vicitms were found.

Naval Academy officials in Annapolis, Maryland, say they're increasing penalties for hazing and opening up new lines of communication so plebes who feel they've been harassed can air their grievances. The action follows the resignation of a female midshipman earlier this month. 19-year-old Gwen Dreyer said she has lost faith in the academy after officials barely punished the midshipmen who harassed her by hand-cuffing her to urinal and taking photos.

A sea otter that survived the Alaska oil spill has given birth to an apparently healthy pup at San Diego's Sea World. Scientists say the event could mean good things for hundreds of other animals that were rescued and returned to the wild. Brownie, one of six survivors of the Exxon Valdez spill arrived at Sea World with her fur still matted with oil. Sea World officials say she appears to be an experienced mother by the way she's handling her still-unnamed pup. Mother and baby soon will be available for public viewing.

#90150u1011 05/30/1990 ~United Press International

BANGKOK (MAY 30) UPI - Vietnam has awarded two 25-year oil contracts to Canadian companies for offshore exploration, the Vietnam News Agency reported.

The agency, in a dispatch dated Tuesday, said one contract was signed May 2 with Sceptre Resources of Canada and the second was signed May 29 with a group that included Petro-Canada, Husky Oil of Canada and the National Company KUFPEC of Kuwait.

It said Sceptre Resources was given an exploration bloc off the coast of Quang Binh province, about 275 miles south of Hanoi.

The three-company group will operate south of Con Son island off the southern tip of Vietnam, the agency said.

''The term of the contracts is 25 years of which the first five years will cover a big volume of work on oil exploration and test-drillings,'' it said.

''Their initial investment capital amounts to dozens of millions of U.S dollars,'' it said.

In the past three years Vietnam has moved aggressively to expand exploration which was previously carried out only by a Soviet-Vietnamese joint venture.

Vietnam has now signed a total of eight contracts with foreign exploration groups.

Last month Dao Duy Chu, the director of the Vietnamese state oil company Petro-Vietnam, told United Press International that BHP of Australia and Petrofina of Belgium would also sign contracts soon after the Canadian contracts.

That will bring the number of contracts with Western companies to 10, he said.

Chu said Vietnam has been saving four promising exploration areas for American oil companies, but if the United States does not lift its economic embargo on Vietnam by the end of the year, the areas will be leased out to other companies.

#90150u1012 05/30/1990 ~United Press International

LIBREVILLE, GABON (MAY 30) UPI - Oil companies resumed normal production Wednesday in the petroleum center of Port Gentil, which was under army control after a day of fighting that killed two people and seriously injured 14 others.

The body of one man was discovered Wednesday morning in a Port Gentil neighborhood, bringing to two the number of victims of the fighting sparked by last week's mystrious death of an opposition leader, government sources in the capital of Libreville said.

A Gabonese parachutist was earlier reported to have died from injuries

suffered when he was captured by anti-government militants.

Military authorities said 14 people, including several children, had been seriously injured in the fighting. Another 52 people, including three leaders of the local branch of the opposition Gabonese Progress Party, were under arrest.

Opposition leader Joseph Redjambe's death in a Libreville hotel room last week week sparked riots across the central African country and nearly halted oil production. Redjambe was found with syringe marks on his abdomen and officials said the Ivory Coast woman he met there has disappeared.

The government has still not permitted Redjambe's funeral to take place for fear it might set off further riots.

The Gabonese Parliament voted earlier this month to allow the establishment of a multi-party system for the first time since the country achieved independence from France in 1960.

Elf Aquitaine and Shell, the two major foreign oil companies that together extract 90 percent of Gabon's oil production, announced Tuesday they would resume normal operations.

President Omar Bongo, worried about the drop in production from 270,000 barrels per day to 20,000 barrels, declared a state of siege in Port Gentil Monday night and sent in the elite presidential guard to reinforce the army.

He also threatened to cancel Elf's exploration and production contracts if itdid not resume normal operations within five days. Elf is responsible for 70 percent of Gabon's oil production.

Witness reports from Port Gentil said the army troops removed roadblocks set up in the past days by the demonstrators. The soldiers fired into the air to disperse young people who greeted them with rocks.

The witnesses said most of the injured suffered leg wounds, with the military apparently acting under orders to neutralize the opponents but not to kill them.

The demonstrators had been in effective control of the city since Wednesday, taking the French consul and 10 employees of Elf and Shell hostage. All were released within 12 hours of their imprisonment.

France also sent reinforcements to Gabon to protect key installations and evacuate about 2,000 French nationals from Libreville, Port Gentil and other cities.

French Foreign Afairs Minister Roland Dumas told the National Asembly in Paris Wednesday that the French forces had limited their role to protecting French citizens and other foreigners and that they would remain until the situation had returned to normal.

#90150u1039 05/30/1990 ~United Press International

HOLLYWOOD (MAY 30) UPI - The third "Back to the Future" installment burst into the summer movie season with $23.7 million at the turnstiles, placing it among the top ten moneymakers in the Memorial Day record books.

"Back to the Future Part III," is the second sequel in the McFly Family misadventures starring Michael J. Fox as the time-traveling teen and Christopher Lloyd as the zoned-out professor. The sci-fi adventure, this time set in the Old West, opened in 2,019 theaters.

But as big as the opening week was for "Future III," it failed to measure up to the opening of "Teenage Mutant Ninja Turtles," which pulled in $25.2 million in its debut nine weeks ago. Nor was this sequel close to last year's Memorial Day opener, "Indiana Jones and the Last Crusade," which registered $37 million.

In second place last weekend was the holdover romantic comedy "Bird on a Wire," co-starring Mel Gibson and Goldie Hawn as former lovers reunited when Gibson, as a witness under federal protection, accidentally encounters Hawn and they flee for their lives from the bad guys.

"Bird on a Wire" was No. 1 in its opening frame the previous week. Last week it dropped 17 percent but still managed to ring the cash register to the tune of $12.7 million on 1,949 screens for a two-week total of $33.4 million, as reported by Entertainment Data Inc.

No. 3 last week was the Richard Gere-Julia Roberts version of George Bernard Shaw's "Pygmalion," which collected $8.1 million for a ten-week total of $120.2 million. It was showing on 1,803 screens.

Plummeting from No. 2 the previous week all the way down to the fourth spot last week was the Robin Williams' not-so-funny comedy "Cadillac Man." While dropping only four percent, "Cadillac Man" grossed a disappointing $6.4 million in its second week (in 1,844 theaters) for a two-week total of $15.2 million.

Also a bit disappointing was the debut of "Fire Birds," a violent action drama starring Nicolas Cage, Tommy Lee Jones, and Sean Young. Sort of a "Top Gun" with helicopters, the plot involves the war on drug smugglers in South America. "Fire Birds," No. 5, opened in 2,006 theaters and grossed

$6.3 million.

An oddity in last week's rankings was the reappearance of "Joe Versus the Volcano," starring Tom Hanks in an off-beat romantic drama. "Joe" had been out of the top ten since the week of April 10. A week ago it was ranked 25th while showing on only 222 screens and grossing only $182,432. But with the addition of 524 screens last week it grossed $821,125 to bring its 12-week total to $37.5 million.

It was a banner week for the 23,000 North American popcorn palaces, which took in a total of $75.4 million, a hefty increase over the 1989 total of $71 million for the same week.

Overall 1990 gross receipts for all pictures released was $1.6 billion, more than $100 million ahead of the 1989 tally of $1.5 billion for the same period. The top 10, last week's gross, total gross, weeks in release:

1. "Back to the Future III," $23.7 million, 1 week.
2. "Bird on a Wire," $12.7 million, $33.4 million, 2 weeks.
3. "Pretty Woman," $8.1 million, $120.2 million, 10 weeks.
4. "Cadillac Man," $6.4 million, $15.2 million, 2 weeks.
5. "Fire Birds," $6.3 million, 1 week.
6. "Teenage Mutant Ninja Turtles," $2.9 million, $118 million, 9 weeks.
7. "The Hunt for Red October," $2.1 million, $110.8 million, 13 weeks.
8. "Tales from the Darkside," $1.6 million, $14.5 million, 4 weeks.
9. "Joe Versus the Volcano," $821,125, $37.5 million, 12 weeks.
10. "Spaced Invaders," $734,724, $13.6 million, 5 weeks.

#90150u1040 05/30/1990 ~United Press International

MIDDLETOWN, CT. (MAY 30) UPI - This weekend's scheduled speech by black South African Archbishop Desmond Tutu prompted complaints Wednesday from Jewish students and faculty who resent his comments about Israel and the Holocaust.

The Nobel Peace Prize winnwer will be the main speaker Sunday at Wesleyan University's 158th commencement and will receive an honorary degree for his lifelong struggle against apartheid.

Some Jewish students and professors raised concerns about his selection, however, and parents have written to Wesleyan's president to voice their opposition.

''He represents a powerful movement and a powerful moral force in a deeply divided country,'' said Wesleyan spokesman Bobby Wayne Clark, who acknowledged the protests but defended Tutu's selection as commencement speaker.

''No one is charging Tutu with anti-Semitism,'' Clark said. ''They are expressing some concern about his sensitivity and awareness about Judaism. He is the guest of the university and we look forward to a wonderful talk.''

The Wesleyan students and faculty object to statements attributed to Tutu in December while he was visiting Jerusalem's Yad Vashem Holocaust memorial, that Jews should forgive those responsible for the Nazi genocide.

He was earlier quoted as making several comments that were considered by some to be anti-Israel.

No one suggested Tutu be banned from speaking and no formal protests are planned but classics Professor Marylin A. Katz, an adviser to Jewish students, said some Jewish parents intended to boycott the commencement.

Tutu, who won the 1984 Nobel Peace Prize, will speak at Wesleyan following several months of controversy in which campus buildings have been firebombed and incidents of graffiti have involved racial slurs.

Minority student groups and protesters, including hunger-strikers, have demanded the exclusive liberal arts university expand its minority faculty courses and student aid.

''Appropriate security measures'' will be taken Sunday for Tutu's visit, university officials said.

PITTSBURGH (MAY 30) UPI - PPG Industries said Wednesday it has reached agreement to boost its stake in fiberglass producer Silenka B.V. of The Netherlands to 100 percent.

PPG, which owns one-third of the Dutch company, said the transaction is subject to government approval and that its own board of directors. Terms of the transaction were not disclosed.

PPG, a manufacturer of glass, chemicals and coatings, indicated it would purchase the two-thirds stake owned by Akzo NV, a diversified chemicals firm, and NV N.O.M., a government investment and development company in The Netherlands.

Silenka, established in 1961, had 1989 sales of about $120 million, PPG said. The Dutch company produces fiberglass reinforcements and textiles at Hoogezand, the Netherlands, and has announced plans for a plant in Xilxes, Spain.

PPG said the acquisition is part of its strategy for profitable global growth. Silenka's existing management team will coordinate operations with a PPG British fiberglass operation to serve European customers, the company said.

#90150u1075 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - The White House held out the possibility Wednesday the new U.S.-Soviet grain agreement would be signed during this week's summit meeting but other officials were not as optimistic.

Negotiators reached agreement March 22 on terms for the new five-year agreement, which would be the fourth since 1975 to set basic terms for grain sales between the superpowers.

Although White House press secretary Marlin Fitzwater said there was a good chance the agreement would be signed, a spokesman for trade ambassador Carla Hills said it was not a certainty.

Spokesman Timothy O'Leary pointed to recent Soviet statements suggesting the Kremlin was not willing to bestow luster on the grain agreement if a broader trade agreement was not going to be signed at the summit. The trade agreement would normalize trade relations between the nations.

''That's pretty much been their position - no trade, no grain,'' O'Leary said.

The trade agreement has been snagged by concerns that include Soviet emigration laws and sanctions against Lithuania.

The current grain agreement expires at the end of this year. Even if there were no agreement, the Soviet Union would be free to buy U.S. grain on the cash market. The Kremlin took that route in late 1988 during a brief period before the current agreement was extended.

Under the new agreement, the Kremlin would be obligated to buy 10 million metric tons of U.S. grain a year, 1 million tons more than at present, but it would have more flexibility in meeting the target. The sales could be worth several billion dollars over the five-year life of the agreement.

U.S. and Soviet officials wrote the first grain agreement in 1975 in the wake of huge Soviet purchases in the early 1970s that caught the United States unaware and emptied its warehouses. The pacts have the advantage of giving the Kremlin a guaranteed source of grain while U.S. officials can limit sales, if necessary, when they reach high levels.

The Kremlin bought a record 21.7 million tons of U.S. corn and wheat during fiscal 1990. It has purchased 19.6 million tons so far this year. The United States is the pre-eminent grain supplier to the Soviet Union but sells relatively small amounts of other agricultural products.

#90150u1077 05/30/1990 ~United Press International

PARIS (MAY 30) UPI - Andre Agassi, suddenly elevated to the role of favorite, accepted the position with authority Wednesday, pounding out a straight-set victory over Todd Woodbridge to gain the third round of the French Open.

Agassi, taking a warning from the swift dismissals of top seeds Stefan Edberg and Boris Becker a day earlier, got down to business quickly, taking 2 hours and 8 minutes to dispose of Woodbridge, 7-5, 6-1, 6-3.

''There was definitely a higher level of concentration and intensity,'' said Agassi, the third seed. ''I thought that with the two top seeds beaten, don't take anything lightly.

''The losses by Boris and Stefan helped me in that sense.''

The third day of the $5.35 million championship got off to a clam beginning following the defeats Tuesday of Edberg and Becker, the first time ever the top two men seeds have been eliminated in the opening round of a Grand Slam event.

Steffi Graf, although allergic to her surroundings, cruised to a 6-1, 6-2 victory over American Jennifer Santrock, advancing to the third round along with fourth seed Gabriela Sabatini. Sabatini blew a 5-2 lead in the second set before subduing American Susan Sloane, 6-0, 5-7, 6-1.

Among the men, eighth seed Andrei Chesnokov defeated Jean Fleurian, 7-6 (8-6), 6-2, 6-0 and No. 13 Jim Courier beat Milan Srejber, 7-6 (7-3), 6-1, 2-6, 6-2.

Defending champion Michael Chang, the 11th seed, was playing Marc Rosset in a late match.

Agassi, a third-round loser to Courier in the 1989 French, came to Paris with a far healthier attitude than a year ago.

''Last year I had plane reservations before each match, that was my attitude,'' he explained. ''This year I packed two weeks worth of socks.''

Agassi swept the first four games from Woodbridge before dropping the next five. The 20-year-old from Las Vegas, Nev., playing with rackets he had shipped in the night before to replace the wide body model he used in his first match, came back to win seven games in a row. Agassi never was threatened again by his Australian rival, ranked No. 136 in the world.

Woodbridge contributed to his defeat by committing 52 unforced errors.

Agassi, a big favorite of the kids' day crowd at Roland Garros, said he was disappointed the two men seeded above him were no longer in action.

''It would have been good for the tournament, and I would have enjoyed playing them,'' he said. ''You have to win so much before you play the top seeds you can't worry about it until you get down to the semifinals.''

He insisted his mental approach to the tournament isn't any different with the removal of his two top rivals.

''It's really the same as if I wasn't the top seed,'' he said. ''My confidence level isn't based on who survives. I take it one match at a time. Anyone who steps on the court is going to have a long afternoon in front of them.''

Courier, a 19-year-old from Dade City, Fla., who attended the same training academy as Agassi, expressed the general feeling among the men that the tournament now was wide open.

''I think it will be one of the more exciting French Opens because someone unexpected can win it,'' he said. ''One positive thing is there will be a couple of other big names for the people to follow. It's a chance for everybody.''

Graf, seeking the only Grand Slam crown she doesn't hold, has been bothered by a severe sinus condition, affecting her head and her ears.

''I didn't play any yesterday and today I didn't feel good at all,'' the 20-year-old West German said. ''I have six or seven medicines I take and Japanese nose drops.

''I'm allergic here. Every year I get it here, I don't know what it is. Fortunately it happens at the beginning of the tournament.''

Graf, who lost last year's French final to Arantxa Sanchez-Vicario, broke service in the second and sixth games of the opening set. She began the match with an ace and registered a single ace in each of her four service games during the set.

Santrock, a 21-year-old left-hander from Plano, Texas, held her first two serves of the second set. Graf, though, swept through the last five games with the loss of seven points, ending the match played in warm sunshine in 51 minutes.

After Sabatini faltered in the second set, she was in control during the final set, allowing Sloane to hold serve only in the third game.

''I guess I was trying to finish the points too quickly, that's what I did

wrong,'' the 20-year-old Argentine said. ''In the third set I calmed down and told myself to start again. She looked tired so I just fought more and tried to move a little better. I tried to be positive.''

(MAY 30) UPI - Canadian officials plan to hold a series of meetings with Soviet President Gorbachev in Ottawa today. In addition to the private meetings, Gorbachev will lay a wreath at Canada's National War Memorial and make a speech at the National Art Gallery. The Soviet leader will fly to Washington this evening.

Arkansas Governor Bill Clinton has won the Democratic nomination for governor a sixth time. In the November general election, Clinton will face Democrat-turned-Republican Sheffield Nelson, a Little Rock lawyer.

Congressman Bill Anderson, an Arkansas Democrat, won re-nomination in yesterday's primary. He will run against Republican Jerry Hayes in November.

Kentucky Senator Mitch McConnell easily won re-nomination in his state's Republican primary. Harvey Sloan won the Democratic primary. Representatives Romano Mazzoli and Carl Perkins, both Kentucky Democrats, won re-nomination.

The ruling party in Zambia has decided to hold a nation-wide referendum on whether to restore a multi-party system for the first time since 1973. President Kaunda is under pressure from unions and potential foreign investors to hold referendum.

Former Senator John Tower is hospitalized in Dallas. Hospital officials say doctors removed a cancerous prostate gland yesterday. The Texas Republican's doctor says his recovery should be good. Tower vows to leave the hospital in a week.

At least 22 people died in an earthquake in Peru last night. Reports from disaster relief officials and ham radio operators say the quake was felt the worst in the Amazon region of northern Peru. Nine people died in a town in the Andes.

A fire in Chicago killed five people this morning. Four children and one adult died in an apartment on the Southwest Side. Fire officials say the blaze apparently was arson. They say an accelerant was poured on a mattress.

BOGOTA, COLOMBIA (MAY 30) UPI - Six men arrested with more than a ton of dynamite before Sunday's presidential election were plotting to attack President-elect Cesar Gaviria, a newspaper reported Wednesday.

The newspaper El Espectador said the six arrested Saturday also planned to set off car bombs at a crowded polling place, the headquarters of the secret police, a school and a private home.

No details were given of the plot against Gaviria, who was elected Sunday with 47.5 percent of the vote. He is a target of the cocaine-trafficking Medellin cartel because of his anti-drug stance.

The six men arrested in a Bogota home with 2,425 pounds of dynamite were to be paid about $6,000 for each attack, the newspaper reported. The head of the gang was a sergeant in the Colombian Air Force, authorities said.

Four car bombs have exploded in Bogota since May 12, killing 18 people and

wounding more than 200.

Gaviria lives in an apartment in northern Bogota. The area around his apartment building is being patrolled by soldiers and police with bomb-sniffing dogs.

Because of the threat against his life, Gaviria has made few public appearances. He travels in an armored vehicle escorted by heavily armed bodyguards and with an ambulance trailing the caravan.

Gaviria has acknowledged Colombia's justice system is a shambles and has been unable to effectively prosecute members of the cocaine cartels or common criminals.

Aides and diplomats said Tuesday Gaviria plans to create special courts modeled on Italian anti-Mafia tribunals and provide heavy security for judges to hear drug cases involving the powerful cocaine cartels.

Since 1977, at least 46 judges have been assassinated in Colombia. Judges also are poorly paid and the profession is held in low regard by Colombians, reportedly making them susceptible to bribes.

Gaviria's plans for rebuilding the justice system include creation of separate heavily guarded courts that would try cocaine cases exclusively, the aides and diplomats said.

Gaviria also has proposed creating judicial compounds to protect judges and their families who hear drug cases. The plan, which would include the magistrates' families, is modeled on the Italian judicial system's handling of Mafia cases.

The U.S. State has Department arranged several meetings between Italian anti-Mafia judges and Colombian officials.

WASHINGTON (MAY 30) UPI - The World Bank has approved almost $800 million in loans to Mexico, Costa Rica, the Philippines, and several West African countries.

The bank said Tuesday night it approved a $380 million loan to Mexico to support the deregulation of the trucking sector and promote competition in telecommunications through privatization and regulatory reforms.

A second $22 million loan will help finance a technical assistance project in the Mexican communications sector.

The bank also approved a $60 million loan to support Costa Rica's efforts to make the transport sector of the Central American nation more efficient.

A $121.8 million World Bank loan will help the Philippines to improve coconut yields and the quality of coconut-based products while boosting the income of small-scale farmers and increase export earnings.

The World Bank announced several loans to support educational reforms in West African nations.

A major reform of the federal university system of Nigeria obtained a $120 million loan from the International Development Association, the World Bank's concessional terms lending associate.

Ghana's improvements in teaching standards and use of sectoral resurces will benefit from an IDA $50 million credit.

Cameroon is receiving a $21.5 million World Bank loan to protect the poor and other vulnerable groups as the country undertakes reforms to restore economic growth.

Gambia will use a $14.6 million IDA loan to expand primary education, reform the secondary school system and raise the quality of education at all levels. The country will also benefit from a $7 million IDA loan to improve the productivity, welfare and status of women, the World Bank said.

BONN, WEST GERMANY (MAY 30) UPI - The parties in the West German government coalition Wednesday fully backed Chancellor Helmut Kohl's policy of swift German reunification and said they were determined to achieve economic union with East Germany on schedule.

Government spokesman Hans Klein said the parties reiterated they were not

willing to alter a draft treaty for economic, currency, and social union with East Germany, despite calls from the West German opposition for certain changes. The treaty was signed earlier this month and still has to be ratified by both German parliaments.

The latest statements came made at a meeting of the parties - Kohl's Christian Democratic Union, its Bavarian sister party, the Christian Social Union and the Free Democratic Party.

Klein said delegates at the coalition meeting, chaired by Kohl, "stressed that the timetable for the economic, currency and social union - to be enforced July 1 - will be held." He said they welcomed the fact the government was holding talks with the opposition Social Democratic Party on the issue.

The talks started Tuesday in a bid to work out a compromise over Social Democratic demands for improvements or additions to the treaty that would offer additional guarantees to the East German workforce.

Although it has already been signed by the East and the West German governments, the draft treaty still has to be ratified by the two German parliaments.

Kohl will need the support of the Social Democrats to get the two-thirds parliamentary majority needed for ratification of the treaty. Both the Bonn and the East Berlin governments - including the East German Social Democrats - support the treaty.

The West German Social Democratic Party is not only at odds with its sister party in East Berlin and the government in Bonn, but also with itself. In recent days the party has been increasingly divided over the issue, with mounting internal criticism directed at leading Social Democrat Oskar Lafontaine, who said the party should oppose the document in parliament.

Lafontaine, who is due to challenge Kohl in December elections, has led a bitter campaign against the chancellor, claiming that Kohl was unnecessarily rushing the pace of unification. Kohl has suggested all-German elections may be held Dec. 2, the date originally set for West German polls.

Klein said the coalition parties fully backed Kohl's policies on unification. "The coalition has once again made it clear that there is no alternative to this policy of the federal government and that any attempt to delay or block the interests of the entire German people would cause irreparable damages," Klein said.

#90150u1190 05/30/1990 ~United Press International

SRINAGAR, INDIA (MAY 30) UPI - A memorial service called to mourn the shooting death of the chief Kashmiri Moslem cleric was canceled Wednesday to protest a government decision to enforce a curfew in parts of Srinagar because of fears it would trigger more violence.

Police said Moslem militants waging a bloody campaign for the secession of the northern Kashmir region killed two Hindus in separate incidents in the northern Jammu and Kashmir state capital of Srinagar, 400 miles north of New Delhi.

Police said they were killed because militants suspected them to be police informers.

The militants have been waging a campaign for secession of the Kashmir region since 1988, claiming separation from India is necessary because successive Hindu-dominated New Delhi administrations have ignored the interests of Kashmiris.

In another incident, Moslem separatists shot and wounded Hakim Yasin, a former Kashmir state minister, police said.

Shops and businesses remained closed in Srinagar as Moslem militants ordered residents to stay indoors, enforcing a 10-day-old strike to mourn the death of Moulvi Farooq, the chief Kashmiri Moslem cleric, who was assassinated by two gunmen May 21.

Militants charge the state government killed Farooq, but authorities blamed the militants for his death.

The militants had planned to end the 10-day mourning period on Wednesday with a massive gathering at Idgah - the sprawling prayer ground in Srinagar.

The service, which was expected to draw hundreds of thousands of people, reportedly was canceled because the Kashmir state government refused to lift the curfew in parts of the city, fearing violent demonstrations.

A spokesman for the Awami Action Committee, which was headed by Farooq, accused the government of preventing Moslems from paying respects to their slain religious leader.

He described the action of the government as ''naked interference in the religious matters of Kashmiri Moslems by preventing them from paying their last tribute to the greatest religious leader of the Kashmir valley.''

He said the service would be rescheduled when the state government lifts curfew.

The militant drive snowballed into a popular uprising in mid-January when security forces fired indiscriminately into a crowd of demonstrators, killing at least 35 people, including women and children.

Most of the 4 million Moslem residents of the region now appear to be supporting the militants' demands for separation from India.

More than 400 people have died in separatist violence since January and security forces have rounded up hundreds of suspected militants in house-to-house searches.

WASHINGTON (MAY 30) UPI - Soviet President Mikhail Gorbachev is scheduled to arrive in Washington about 6:30 p.m. EDT Wednesday. The following is the schedule for the U.S.-Soviet summit Thursday through Sunday:

Thursday:

10:00 a.m.	President and Mrs. Bush welcome President and Mrs. Gorbachev.
10:25	Ceremony concludes, presidents and wives enter White House.
10:30	Bush and Gorbachev begin first meeting.
Noon	Gorbachev departs White House for embassy luncheon.
1:00 p.m.	Joint U.S.-Soviet press briefing.
4:00	Gorbachev arrives for second White House meeting.
5:30	Gorbachev departs for private time at the embassy.
6:00	U.S.-Soviet press briefing.
7:15	Bushes welcome Gorbachevs for White House state dinner.
10:45	Gorbachevs depart for embassy.

Friday:

9:30 a.m.	Gorbachev meets congressional leadership, embassy.
11:00	Third Bush-Gorbachev meeting.

1:00 p.m. Gorbachev departs for embassy private time.

1:30 U.S.-Soviet press briefing.

5:00 Bush-Gorbachev sign Soviet-U.S. documents.

5:30 Final Bush-Gorbachev meeting, Oval Office.

6:30 Gorbachev departs for embassy private time.

7:00 Secretary of State James Baker briefs.

7:20 Bushes depart for embassy.

7:30 Bushes arrive for dinner hosted by Gorbachevs.

Saturday:

10:00 a.m. Bushes and Gorbachevs board Marine One and depart White
. House for Camp David.
10:30 Bushes-Gorbachevs arrive Camp David for private time and
. informal talks.

5:00 p.m. Joint U.S.-Soviet press briefing.

7:30 Gorbachevs board helicopter and depart Camp David for
embassy.

Sunday:

9:30 a.m. Gorbachevs arrive White House for private coffee with Bushes.

10:00 Bush-Gorbachev news conference.

11:15 Gorbachevs depart South Lawn for Reflecting Pool.
11:35 Reflecting Pool arrival, board helicopter for Andrews AFB.

Noon p.m. Gorbachevs depart Andrews for Minneapolis.

#90150u1198 05/30/1990 ~United Press International
BAGHDAD, IRAQ (MAY 30) UPI - Egypt and Saudi Arabia, despite objections from Iraq and the Palestine Liberation Organization, persuaded Arab leaders Wednesday to moderate the Arab summit's final resolutions on Middle East issues, Palestinian sources said.

At a summit of 21 Arab ministers in the Iraqi capital, the PLO elicited

criticism of Israel and the United States but the leaders did not condemn a stalled U.S.-backed plan calling for dialogue between Israel and a non-PLO Palestinian delegation.

''Iraq and the PLO requested stronger language to be used in the resolution against Israel and the United States, but Egypt and Saudi Arabia spearheaded efforts to ensure that a more moderate and practical tone prevailed,'' one Arab envoy told United Press International.

''Both the Egyptians and the Saudis feel it is better that the Arab message gets across to the United States and the Soviet Union before their Washington summit in a moderate and clear manner ... they feel the fiery rhetoric of Iraq and the PLO would not serve a useful purpose at this stage.''

Western diplomatic sources said in addition to Egypt and Saudi Arabia, Morocco also played a key role in ensuring a moderate resolution was passed.

The PLO wanted the summit to discuss fears that mass Soviet Jewish migration to the occupied territories might hinder Palestinian chances of statehood. And in a final conference resolution, the participants said the settlement of Soviet Jews in the occupied territories is seen as a threat to Arab interests.

Arab officials said one proposal included an international conference on the Middle East with PLO participation, but the group was persuaded not to condemn the U.S. plan at its three-day summit.

Wealthy Arab states such as Saudi Arabia also pledged cash support for Jordan, which is facing near bankruptcy, and to the Palestinian intifada, or uprising, in the occupied territories, the sources said.

But the summit was marred from the beginning by the absence of five of the 21 Arab leaders, including Syrian President Hafez Assad, who remains a key regional power-broker despite diminished Soviet support.

Egyptian President Hosni Mubarak also notched another success at the summit by persuading Arab leaders to hold their annual ordinary meetings in Cairo starting this November.

Mubarak last year restored ties with radical Arab states such as Libya and Syria, ending Egypt's isolation in the Arab world since his predecessor, Anwar Sadat, signed a controversial peace treaty with Israel in 1979.

The summit also welcomed the new Yemen Republic into the Arab fold. The formerly Marxist South Yemen and the conservative, Islamic-oriented state of North Yemen united under the leadership of President Ali Abdullah Saleh.

#90150u1200 05/30/1990 ~United Press International
NEW YORK (MAY 30) UPI - Baltimore Orioles Manager Frank Robinson was suspended for three games for bumping umpire Drew Coble in Monday's game against Minnesota, AL President Bobby Brown announced Wednesday.

Brown said the penalty was imposed for ''physical contact with the umpire, use of abusive language, delay of the game and inappropriate post-game remarks to the press.''

Since Robinson has already said he will appeal the suspension - due to start with Wednesday's game with the Twins - the penalty will not take effect until the results of a hearing in the AL offices Thursday afternoon.

-30- 791
#90150u1202 05/30/1990 ~United Press International
PARIS (MAY 30) UPI - France's Socialist government and right-wing opposition leaders were badly split Wednesday on the thorny question of foreign immigrants and a former prime minister charged the country has no policy on the issue.

A meeting Tuesday between the two sides ended without agreement on a charter of basic principles on immigration, following bitter debate on whether foreigners should be given the right to vote in local elections.

Opposition leaders refused to sign a statement proposed by Prime Minister Michel Rocard dealing with political asylum, the right to rejoin family members already in France and modifications to the naturalization law.

''On the problem of foreigners in France the government has no policy and in fact does nothing,'' former prime minister Jacques Chirac said after the meeting.

He said Rocard had rejected all opposition proposals and had failed to answer its questions. ''We are in disagreement over everything except that the tolerance level on the number of foreigners in France has been reached '' Chirac declared.

Rocard insisted that the meeting demonstrated ''the unanimous will to control the flow of immigrants and to work at integrating into society those foreigners who are here legally.''

The meeting between the government and all of the country's political parties with the exception of the extreme right-wing National Front took place at a tie of increasing racial tension in France.

Earlier this month vandals desecrated 34 tombstones and impaled the body of an 80-year-old man in a Jewish cemetery in the southern town of Carpentras.

The action, which sparked a series of cemetery desecrations across the country, shocked France and brought the festering issues of antisemitism, racism and immigration to the forefront of the political debate.

Political analysts said the round table meeting with the opposition was an attempt by the government to isolate the National Front, whose leader Jean-Marie Le Pen has been widely blamed for creating a climate of racism that led to the vandalism at Carpentras.

Le Pen has been on the defensive since the incident, with several mayors prohibiting National Front meetings in their cities and calls in the press to ignore him and his movement.

The most emotional issue between the government and the opposition is over a proposal to give foreigners the right to vote in local elections. Although the Socialist Party recently agreed to postpone any decision on the subject, the opposition wants the government to formally renounce the idea, something Rocard has refused to do.

The right wing is also calling for tougher measures to govern the right of asylum and the right of foreigners to join families legally established in France. It also wants changes in the nationality code to make it more difficult for children born in France of foreign parents to acquire French citizenship.

Both the government and the opposition agree tougher measures must be taken to stop the flow of illegal immigrants into France, currently estimated at between 300,000 and 1 million people. But the Socialists have emphasized measures to integrate legal immigrants better into French society.

Estimates of the number of foreigners in France vary, with the government putting the number of legal immigrants at 4.5 million, or just over 8 percent of the population of 55 million.

The Portuguese represent the largest single group, with 800,000 people. They are followed by Algerians, 700,000; Moroccans, 550,000; and Italians, 375,000. When most French speak of an immigration problem, however, they are referring to Arab immigrants from Morocco and Algeria as well as blacks from France's former African colonies.

#90150u1213 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - Soviet first lady Raisa Gorbachev will open a special exhibition of rare historic manuscripts at the Library of Congress that includes a first-ever display of Russian works, a spokeswoman said Wednesday.

The exhibition, ''Living Traditions of Russian Faith: Books and Manuscripts of the Old Believers, 15th Century to the Present,'' will have 30 works on display, including 20 from the Pushkin House in Leningrad, said Helen Dalrymple, spokeswoman for the Library of Congress.

The 20 manuscripts are from a branch of the Russian Orthodox Church called the ''Old Believers,'' which broke away from the church and was outlawed in the 1800s.

The group ''passed on its tradition of faith through written communication'' and the works on display are an example of ''literary and religious dissent,'' she said.

''They have never left the Soviet Union and most were never on display in the Soviet Union,'' said Dalrymple.

Gorbachev has been active with an organization that is involved in preserving works that represent different Russian cultures.

''Many of these (manuscripts) are illustrated, so they kept alive a folk art tradition in Russia,'' Dalrymple said.

Five of the 20 manuscripts are from a now-active church of the ''Old Believers'' in Moscow, the Church of the Intercession, said Dalrymple.

Other works on display include three hymnals and two books of the Gospel. Five items from the Library of Congress's collection also will be on display, said Dalrymple, including one of the earliest books printed in Russian in 1564.

Industrialist-philanthropist Armand Hammer, who has coordinated many U.S.-Soviet cultural exchanges, will be the host for the reception.

More than 400 guests are expected, including Marilyn Quayle, James Billington, the Librarian of Congress, Mstislav Rostropovich, musical director of the National Symphony Orchestra and J. Carter Brown, director of the National Gallery of Art.

In addition to the public exhibition and reception, Gorbachev and Quayle will have a private viewing of other rare manuscripts and works.

''They will look at some of the treasures of the United States, including

a rough draft of the Declaration of Independence, the Bill of Rights, (poet) Walt Whitman's 'Russian Songs' and a copy of 'The Star Spangled Banner' written in Francis Scott Key's own hand,'' Dalrymple said.

Also on display will be a complete set of the Soviet newspaper Isvestia from 1917, which the Library has recently restored.

The Library also will grant a request from Gorbachev and show her how to operate the Library of Congress's computer system, which catalogues thousands of items in the library's collections.

''She asked for a demonstration of how to access the data base,'' Dalrymple said.

#90150u1215 05/30/1990 ~United Press International

JAKARTA, INDONESIA (MAY 30) UPI - Foreign Minister Ali Alatas said Wednesday he will visit China in July to discuss how and when the two countries can resume diplomatic ties after a 23-year freeze.

Alatas said plans for the visit follow an agreement on the $84 million foreign debt that Indonesia owes China.

He said he could not set a definite date when the two countries would formally restore formal relations but hoped it could be ''this year.''

''It is not the intent of this trip to finalize normalization,'' Alatas said of his planned three-day visit to Beijing July 1-3.

Indonesia froze diplomatic relations with China two years after a 1965 coup attempt that led to the downfall of President Sukarno. Jakarta accused China of backing the coup but Beijing has denied the charge.

Alatas said that during his visit with his Chinese counterpart, Qian Qichen, he would sign a formal agreement on the debt, calculated by both countries at $84 million.

He said as far as Indonesia is concerned, there are no other problems blocking the normalization of relations, since Indonesia has adopted China's policy of not recognizing Taiwan.

Asked to give a timeframe for normalization, Alatas said ''hopefully this year,'' but added it would depend on the results of the meeting in Beijing.

''Indonesia has ... had relations with China since 1950,'' Alatas said. ''The relations were only 'frozen' in 1967 and now will be thawed.''

CHICAGO (MAY 30) UPI - An arson fire Wednesday in a Southwest Side apartment that killed six family members - five of them children - was murder-suicide, police said.

The fire began about 1 a.m. on a mattress in the living room of the second-story flat and was confined to the room where firefighters found the victims, said First District Chief William Nolan.

A gasoline can was found in the dining room of the apartment and investigators also found evidence that gasoline was poured in the dining room and living room, Nolan said.

''We think the father did it and now he's dead,'' said Sgt. Ron Rewers of the Area 4 Violent Crimes Unit.

Hermino Elricalde, 36, Greta Elricalde, 16, Laura Elricalde, 15, Vernice Garcia, 10, and Clara Garcia, 9, all apparently died of severe burns. A sixth victim, 8-year-old David Joel Garcia, died hours later at Cook County Hospital. The child had been taken to the hospital in extremely critical condition with burns over 100 percent of his body.

Hermino Elricalde's wife, Theresa, and the children's mother apparently was out with a boyfriend when the fire started but showed up as firefighters fought the blaze, authorities said.

Rewers said the woman attempted suicide after she found out her children were dead. She was reported in ''stable condition'' at Cook County Hospital.

Police said the woman had moved back in with the family about a week ago after being estranged from her husband.

It was not immediately determined whether smoke detectors were in the apartment but Bomb and Arson Sgt. Leonard Sykes said a working smoke detector would not have saved the family.

''Not with gasoline,'' Sykes said. ''It wouldn't have made much difference.''

Juan Hernandez, 19, who lives across the street from the apartment, said he was the first to arrive at the scene.

''We heard an explosion, looked out the window and saw so much smoke that we could hardly see the house,'' Hernandez said. After breaking down the door Hernandez said he heard screaming but was unable to enter the

building to rescue the victims because of thick smoke.

Alejandra Salgado, 33, who lived on the first floor of the two-story flat, said, ''I heard the windows blow out and I ran outside and saw flames coming from the windows. I heard one child screaming.''

The family had been living in the apartment about one week ago, Salgado said.

#90150u1248 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - The fans gave Bob Newhart a bang-up farewell by making the final show of the "Newhart" series the No. 1 program of the ratings week, it was reported Wednesday.

A glance at the top of the Nielsen list for the week ending May 27 made it look like old times for CBS, with the network that once routinely dominated television capturing three of the top four - "Newhart" on top, "Murphy Brown" in third right behind second-place "Cheers" (NBC), and "Designing Women" fourth. But reality snapped back and NBC remained the most-watched network, with CBS still in third place.

The season finale of "Twin Peaks," which ABC moved from Thursday to Wednesday night so it could be included in the May sweeps, ranked 24th and won its time period but not by enough to allow ABC to wrest the night from NBC.

Americans had something better to do over the Memorial Day weekend than watch television, which pushed ABC's "American's Funniest Home Videos" down to 24th, a steep drop from No. 1 the previous week.

The Sunday movies also suffered - "Diamonds Are Forever" (ABC) was the highest ranked in 40th place. NBC put a "Saturday Night Live" anniversary special in the movie slot and it tied for 42nd, while CBS's "At Mother's Request," part 2, tied for 47th. "Wings" (NBC) remains the top new show of the spring season, tied for 11th place, and "Carol & Company" (NBC) was 25th.

NBC was the most-watched network on Wednesday, Thursday and Saturday, while CBS took Sunday, Monday and Tuesday - the Tuesday win thanks to its movie, "Killing in a Small Town," which ranked 7th for the week. ABC was tops on Friday.

NBC won the week ending May 27 with an 11.1 rating and a 21 share. ABC was second with a 10.4 rating and a 19 share, while CBS had a 10.0 rating and a 19 share.

The official 30-week prime time season ended Sunday, April 15, but working on a 52-week season, as of the week ending May 27 NBC had a year-to-date rating of 14.1 and a 24 share. ABC was second with a 12.6 rating and a 21 share and CBS third, with an 11.9 rating and a 20 share.

In the evening news race, ABC's "World News Tonight" with Peter Jennings continued in the lead with a 9.3 rating and a 20 share. "CBS Evening News" with Dan Rather placed second with an 8.5 rating and an 18 share, while "NBC Nightly News" with Tom Brokaw was third with a 7.8 rating and an 17 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show. The top ten programs for the week ending Sunday, May 27, according to the A.C. Nielsen Co., were:

1. Newhart (CBS)
2. Cheers (NBC)
3. Murphy Brown (CBS)
4. Designing Women (CBS)
5. Roseanne (ABC)
6. A Different World (NBC)
7. Killing In A Small Town, CBS Tuesday movie
8. The Cosby Show (NBC)
9. (tie) Unsolved Mysteries (NBC) Voices Within: The Lives of Truddi Chase (ABC)

#90150u1254 05/30/1990 ~United Press International
(MAY 30) UPI - Soviet President Gorbachev is in Canada today where he'll meet with Canadian Prime Minister Mulroney before heading to Washington for the summit with President Bush. Gorbachev will arrive in the nation's capital this evening and will officially open talks with Bush tomorrow.

Disaster relief officials and ham radio operators in Peru say a strong earthquake shook northern Peru last night, killing at least 16 people and injuring dozens of others. The Peru Geophysical Institute says the quake measured five-point-eight on the Richter scale.

The ruling party of Zambian President Kaunda has decided to hold a nationwide referendum on whether to restore a multi-party democracy in the southern African nation for the first time since 1973. Trade unionists and government efforts to seek fresh investment for the debt-strapped nation prompted the party's decision.

A three-day Arab summit in Baghdad will end today with the participating Arab League nations issuing moderate resolutions on Middle East issues. Palestinian sources say the adopted resolutions fall short of Iraqi and

the P-L-O goals. The summit was less productive with the marked absence of five key Arab nations, including Syria.

Chicago fire officials say they suspect arson is to blame for this morning's fatal apartment blaze on the city's Southwest Side. Four children and one adult died in the fire. Hospital officials say another child was critically injured with third degree burns covering 100 percent of his body. Investigators found a gasoline can in the apartment's living room.

#90150u1261 05/30/1990 ~United Press International

(MAY 30) UPI - Colombian President-elect Cesar Gaviria plans to overhaul his country's judicial system to make it safer for judges to hear drug cases involving the powerful cocaine cartels. Officials say Gaviria wants to create special courts modeled on Italian anti-Mafia tribunals and provide heavy security for judges.

The attorney for Washington, D-C, Mayor Marion Barry says he's eager to go to trial next week on 14-drug-related charges. Barry's lawyers had asked a federal judge to split the charges into two separate trials, but the judge refused. The lawyers said six additional misdemeanor charges made it difficult to prepare a defense on such short notice.

A published report says financier Michael Milkin gave an impromptu math lesson last week to students at a Harlem elementary school. One unidentified teacher says it's ''outrageous'' that Milken- who faces a jail term in October for his part in a Wall Street corruption scandal- was treated like a celebrity.

National Transportation Safety Board officials are combing the M-V Regent Star cruiseship today to investigate the ship's grounding on a Delaware Bay sandbar. Officials say the probe will center on Sunday's fire in the engine's electrical control box that led to a power failure in the ship's steering and propulsion systems.

Miami police say a man who entertained children at roller-rink birthday parties has been charged with sexually assaulting a 13-year-old girl while wearing his clown make-up and skates. The arrest marks the second crime incident this week in south Florida involving people dressed in clown suits.

#90150u1265 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - South Korean President Roh Tae Woo is planning to fly to California next week for a post-summit meeting with Soviet

President Mikhail Gorbachev, State Department officials said Wednesday.

The officials said that plans are still being worked out and it is possible that Roh will also fly to Washington to report on the meeting to President Bush later in the week.

State Department spokeswoman Margaret Tutwiler said she could not confirm the Gorbachev-Roh meeting but said, ''We would welcome it'' since the United States has encouraged the opening of discussions between the Soviet Union and South Korea and between the two governments of North and South Korea.

Officials said plans are being made for a California meeting on June 4, when Gorbachev is scheduled to visit San Francisco and Stanford University near Palo Alto, Calif.

An official of the South Korean Embassy claimed to have no immediate information about Roh's travel plans. A spokesman in Roh's office in Seoul denied a Kyodo News Service report that the meeting would take place in Washington.

South Korea and the Soviet Union, which have no official diplomatic ties, have been moving toward normalization of relations since the Summer Olympics in Seoul in 1988.

Meanwhile, relations between the Soviet Union and North Korea have cooled. The North Koreans this week turned over the remains of five Americans listed as missing in action since the Korean War in the 1950s. The State Department expressed appreciation for the action and said it would welcome an opening of direct talks between South and North Korea.

The prospective talks in California would be the first between Roh and Gorbachev and would likely be viewed as an acceleration of that process of rapprochement between Seoul and Moscow.

Kyodo quoted the South Korean state-run news agency, Yonhap, as saying that Gong Ro Myung, a South Korean diplomat in Moscow, had been summoned to Seoul for urgent consultations on Roh's trip to the United States.

Kyodo said a senior South Korean Foreign Ministry official, Lee Yong Bin, has been in the United States to prepare for the Roh-Gorbachev meeting.

In April 1989, South Korea and the Soviet Union exchanged trade offices and opened consular offices.

#90150u1288 05/30/1990 ~United Press International

ASPEN, CO (MAY 30) UPI - Prosecutors Wednesday dismissed drug and explosives charges against gonzo journalist Hunter S. Thompson, saying discrepancies in the testimony of witnesses would make it difficult to prove the charges in court.

Thompson, who had claimed he was the victim of a witchhunt, quickly proclaimed that a ''celebratory orgy'' would be held Wednesday night at the Woody Creek Tavern, his hangout.

''Everyone will be a little safer now because Fourth Amendment rights have been protected,'' Thompson said when informed of the district attorney's decision. ''This is a victory for all people.''

Thompson, 52, had faced four felony charges of possessing cocaine, dynamite and other narcotics. But in a written statement issued to the media Wednesday, prosecutors said the ''investigation has been hampered by the refusal of several necessary witnesses to speak with investigators.''

The statement also said there were ''discrepancies in the testimony and sworn statements of several witnesses'' that would make it difficult or impossible for prosecutors ''to sustain the burden of proof beyond a reasonable doubt at trial.''

A major discrepancy apparently was evidence given by Gail Palmer-Slater, 35, a pornographic movie producer whose testimony at the preliminary hearing differed from an account she made in a sworn statement.

Thompson, whose tales of drugs and drinking created the gonzo journalism genre, said Wednesday that police ''should have hit me when I was guilty '' apparently referring to his admitted long-time marijuana smoking. ''They came after me at the wrong time,'' he said.

Thompson originally was charged with five felony counts of possession of illegal drugs and dynamite and one misdemeanor count of sexual assault. The charges resulted from a visit by Palmer-Slater to Thompson's home in Woody Creek last winter.

Palmer-Slater said she went to his home Feb. 26 to talk about movie rights to Thompson's book ''Fear and Loathing in Las Vegas.'' She said she witnessed drug use by Thompson and several of his friends, including Thompson dipping his face into some white powder on a kitchen counter and saying, ''There's coke everywhere I look in this house. That's why I love this house.''

Palmer-Slater said Thompson invited her to join him in the hot tub. When she refused, she said he got violent, pushing her and grabbing her breast.

That incident resulted in a misdemeanor sexual assault charge, which was

dismissed earlier.

Palmer-Slater's complaint led to an 11-hour search of Thompson's home, in which agents seized cocaine, marijuana, Valium-type pills, LSD, four sticks of dynamite and three blasting caps that led to the felony charges.

Testimony at the preliminary hearing, however, was unclear whether the items belonged to Thompson or to numerous other people who frequented his home. There were no fingerprints on any of the seized articles.

#90150u1293 05/30/1990 ~United Press International

BOSTON (MAY 30) UPI - People with a relatively common heart condition appear to face substantially increased risks of developing or dying from heart disease, the nation's foremost killer, researchers said Wednesday.

A study of more than 3,000 people aged 40 and over found a ''significant'' relationship between a condition that leaves the heart enlarged and an increased incidence of fatal heart attacks and other types of heart disease, said Dr. Daniel Levy of the Framingham Heart Study in Massachusetts.

Previously, smaller studies led scientists to conclude that those who developed a thickening of the heart wall, known as left ventricular hypertrophy, faced a higher - but still unknown - chance of suffering a heart attack.

The new research indicates that for every 40 percent increase in the thickness and mass of the heart, ''the risk of dying increases two-fold,'' said Levy, co-author of the study.

In left ventricular hypertrophy - a common result of high blood pressure - the heart wall increases in size because it has to work harder to pump blood through arteries partially blocked by fatty deposits known as plaque.

The effect is similar to a body builder working to pump up his muscles, but instead of making the heart muscle stronger it becomes weaker. The hard-working heart increasingly needs more oxygen but gets less and less, causing a ''supply-demand'' mismatch that can trigger a heart attack.

Until recently, Levy said doctors thought the condition was fairly uncommon, since it usually is detected in only about 1 percent of patients who undergo an electrocardiogram, in which the electric current produced by the rhythmic contraction of the heart is traced on a screen.

However, when Levy and colleagues used more sensitive echocardiograhy to evaluate 1,403 men and 1,817 women with no obvious signs of heart disease,

they found evidence that 16 percent of the men and 20 percent of the women had enlarged hearts.

The findings indicated that heart wall enlargement is ''far more common'' than other diagnostic tools had indicated, they said in The New England Journal of Medicine.

All of those studied were participants in the Framingham Heart Study, a government-funded 42-year-old study involving residents of city west of Boston on the causes and effects of heart disease. Echocardiograhy, in which doctors use sound waves to gain a two-dimensional picture of the heart on an oscilloscope screen, provides a much more detailed picture of the organ than an electrocardiogram, Levy said.

In a four-year follow-up, the Framingham researchers found 12 percent of the men and 7 percent of the women with enlarged hearts developed heart disease, compared with 6.8 percent of the men and 4 percent of the women without the condition.

During the same period, 4.8 percent of the men with enlarged hearts and 1.2 percent of the women died from cardiac disease, compared with 1 percent of the men and less than 1 percent of the women without heart enlargement.

During the follow-up period, 208 people with enlarged hearts had a non-fatal heart attack or another health problem linked to cardiac disease 37 died from a heart-related problem and 124 died from a variety of causes.

The Framingham researchers said that except for age, ''left ventricular mass was the only variable that was consistently related to all three outcome events.''

They concluded that there was a ''significant relation'' between heart size and ''cardiovascular disease, mortality from cardiovascular disease and mortality from all causes'' in those studied.

It now appears that not only is heart enlargement a ''surprisingly common'' condition, but that it may be the ''most powerful indicator'' of who is likely to develop cardiac disease, ''above and beyond anything else'' such as smoking habits, diabetes, cholesterol levels and blood pressure, Levy said.

Nevertheless, Levy and his colleagues said they do not advocate routine use of echocardiography to detect enlarged hearts in people with no apparent symptoms of heart disease because the findings may not apply to all parts of the population.

The researchers also indicated the benefits of knowing a person has an enlarged heart are unclear, because methods to prevent or reverse the condition ''remain largely unproved.''

#90150u1307 05/30/1990 ~United Press International

LONDON (MAY 30) UPI - Stock prices on the London International stock exchange surged sharply higher Wednesday in brisk trading, powered by hopes that Britain would soon fully enter the European Monetary System.

The blue-chip Financial Times 100-stock index, which climbed a revised 30.0 points Tuesday, catapulted 50.6 points to 2,346.4. The narrower top 30 industrial average surged 34.1 points to 1,857.4.

Market watchers noted that just four issues of the key index, which measures the value of Britain's largest 100 companies in terms of market capitalization,finished in negative territory while another four closed unchanged on the day.

Volume amounted to around 556 million shares compared with just 330 million shares changing hands on Tuesday.

Analysts said stocks moved sharply higher from the opening bell boosted in part by strength in the British pound on major global foreign currency markets and carryover from Tuesday's strong advance.

Investors, encouraged by Tuesday's performance on both Wall Street and London,were also stimulated by hopes that British Chancellor of the Exchequer John Major would signal the date of Britain's full entry into the EMS at a meeting in Paris on Wednesday of the Organization of Economic Cooperation and Development.

"The market has just woken up to the fact that the Chancellor is in Paris and that means only one thing to many people - EMS," one analyst said. However, Major said that he would not rule out another increase in British interest rates, indicating that entry into the EMS would not be imminent.

Major said that Britain's underlying annual rate of inflation currently stands at 6 3/4 percent compared with an average of 5 1/4 percent for the European community as a whole.

Major reiterated the government's view that the entry of the British pound into the EMS at an inappropriate level would be "potentially turbulent factor," for the financial markets. Analysts expect Britain's entry to the EMS to result in reduced interest rates and lower pressure on the pound.

On the trading floor, the brewery sector led the surge. Guinness climbed

31 cents to $11.82 amid speculation that the diversified French company LVMH may double its stake in the company.

SmithKline Beecham gained 30 cents to $8.60 after announcing it sold its cosmetics operation for $358 million.

B.A.T. Industries gained 21 cents to $11.58, the company is expected to announce sharply higher earnings on Thursday.

On the down side, J. Mowlem, the construction company, eased 19 cents to $5.09 ahead of its annual meeting on Thursday.

Thames Television tumbled 53 cents to $8.21 after issuing a warning of lower-than-expected profits.

#90150u1308 05/30/1990 ~United Press International

CHARLESTON, SC (MAY 30) UPI - Federal authorities announced Wednesday the largest single cocaine seizure in South Carolina history - 1,780 pounds - and the arrests of five suspects.

U.S. Attorney Bart Daniel and FBI Special Agent Fred Verinder said Tuesday's arrests stemmed from a May 6 seizure of 1,780 pounds of uncut cocaine worth about $16 million.

Undercover agents took control of the haul near Curacoa, a West Indies island off the South American coast. The cocaine later was moved onto a Coast Guard cutter for transportation to Charleston, but agents continued dealing with the suspects as if a drug transaction were still in the works.

Authorities said the arrests in Charleston occurred after three of the suspects attempted to take delivery of a partial shipment of 200 kilos of cocaine destined for New York.

Daniel, who estimated the cocaine's wholesale value at $16 million, said the investigation took agents from Cali, Colombia, to Caracas, Venezuela, and from New York to Mt. Pleasant, S.C.

Other agencies involved included the U.S. Customs Service, the federal Drug Enforcement Agency and police departments in Mt. Pleasant and North Charleston.

The seizure surpassed the 1,100 pounds of cocaine grabbed by authorities last July on Hilton Head Island, S.C. That case resulted in the convictions of nine defendants and the seizure of more than $1.5 million in cash and related drug assets.

Apprehended were three Colombian nationals and two men from Hialeah, Fla., Carlos Monzon, 64, and Oscar Rico, 43. Three of the arrests occurred in the Charleston area. The two other men were picked up by federal agents in New York City.

All five face cocaine trafficking counts that could land them in prison for life, without the possibility of parole.

#90150u1320 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - Stricter clean air legislation would have an ''immediate, chilling impact'' on U.S. steelmakers already struggling against foreign competition, the president of the steel division of USX Corp. said Wednesday.

''The goal of an internationally competitive domestic steel industry certainly seems absent in some of the more Draconian clean air proposals being considered in Washington,'' Thomas C. Graham told reporters during a press conference at the American Iron and Steel Institute's general meeting.

Graham, who is vice chairman of the trade group, said steelmakers have already spent a total of $7 billion to reduce emissions into the air and water, but anticipate expenditures of at least $5 billion more with the passage of any new clean air legislation.

''The issue is cost-effectiveness,'' said Graham. ''We oppose requirements which would drain our available capital ... without verifiable scientific indication of real benefit to the environment or improvement to public health.''

A clean air bill that aims to cut in half acid rain pollution from power plants, impose limits on some 170 toxic or cancer-causing industrial emissions, and reduce smog-causing releases from factories and automobiles is currently before the House.

Passage of the measure would set the stage for negotiations this summer with the Senate, which passed its clean air bill last month.

Legislative leaders hope to send President Bush a clean air bill before the fall, ending 13 years of Congressional gridlock on the issue.''

Graham said shutdown provisions passed by the Senate would threaten 15,000 direct coke plant jobs, 10,000 coal mining jobs and up to 150,000 jobs in downstream facilities.''

''The shutdown provision would have an immediate, chilling impact,'' said

Graham, even though the Senate bill would give steel firms as long as 30 years to comply with new coke oven standards.

Graham said environmental concerns are the major public policy issue facing steel producers after a decade in which trade was at center stage.

''Foreign steelmakers, who are not facing the kind of environmental cost burdens we are, would love to see passage of the Senate shutdown provisions,'' he added.

#90150u1322 05/30/1990 ~United Press International

MANAGUA, NICARAGUA (MAY 30) UPI - The Contra rebels agreed Wednesday to speed up their stalled demobilization process and disarm at least 500 troops a day until all the rebels have given up their arms.

''We are all Nicaraguans and we all want peace,'' President Violeta Chamorro said after all-night talks with rebel leaders. ''Our friends of the resistance have promised to comply with all the agreements and to completely disarm by June 10.''

Wednesday was Mothers' Day in Nicaragua and in an apparent gift to Chamorro, the Contras said an even larger number would be disarmed Wednesday. Chamorro is the mother of four and is seen as a mother figure by many Nicaraguans.

''In honor of Mothers' Day, a considerable quantity of combatants will be demobilized,'' said the agreement signed by Chamorro and rebel leader Israel Galeano, alias ''Commander Franklin,'' as well as by Catholic Cardinal Miguel Obando y Bravo, who mediated the talks.

The agreement provides that at least 100 rebels a day will set down their arms in each of the five security zones set up for the disarmament process. The agreement also reaffirmed earlier accords whereby the rebels have vowed to disarm all their forces by June 10.

Nonetheless, the Contras would have to disarm more than 1,000 rebels a day to complete the process by June 10 and United Nations and Contra leaders have said that is a logistical impossibility. More than 13,000 of the 15,000 Contras still retained their weapons as of Wednesday morning, according to U.N. officials who are monitoring the disarmament.

Moreover, many of the Contras have said they will not turn in their arms until the Sandinista army does the same. The Contras have fought a bloody, nine-year civil war with the Sandinistas who, despite their election loss to Chamorro Feb. 25, still control the military.

Though technically complying with earlier accords, the Contras have delayed the disarmament process as long as possible and it had been suspended since May 18 over various Contra complaints.

Sandinista military leader Humberto Ortega also appeared at the news conference Wednesday morning to announce the new pact and said he would comply with Chamorro's orders to reduce the size of the army. Chamorro has said she will announce plans June 10 for a reduction of the army.

''As far as the reductions and changes in the army, we will comply with the central government once she completes her studies on how we can do this in a proper manner,'' said Ortega, brother of former Sandinista President Daniel Ortega.

Daniel Ortega had said the disarmament of the Contras was necessary for a peaceful transfer of power to Chamorro after more than a decade of Sandinista rule. Chamorro was inaugurated April 25.

''The president has listened to some of the reforms we have asked for, because many of us have no place to go,'' Contra leader Galeano said at the news conference.

The agreement smoothed over differences between the rebels and the government over land that is to be given to the Contras once they disband.

''The government of Nicaragua promises to give economic assistance to each demobilized (rebel),'' the agreement said.

The Contras are to be given their own plot of land in the southeast of the country, near El Almendro. The acreage was not announced. The Contras had asked they be allowed to govern the land themselves, but the government rejected the proposal.

Under a compromise, Contra members are to participate in a police force in the region, but the force will ultimately answer to the interior ministry.

Also promised was immediate medical assistance to sick and wounded Contras and help to their families and orphans, including monthly stipends. The government also promised to help the Contras find jobs in their return to civilian life, and to provide assistance to those who want to return to their hometowns rather than the new land.

Finally, the agreement reaffirmed the Contras' right - and intention - to form a legal political party after the disarmament.

#90150u1327 05/30/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 30) UPI - Fixing a leak in a critical hydrogen fuel line system will delay the shuttle Columbia's launch at least a week, sources said Wednesday, with engineers hopeful they can avoid hauling the ship back to its hangar for repairs.

Columbia had been scheduled for a predawn launch at 12:38 a.m. EDT Wednesday, but the flight was put on hold Tuesday when engineers detected a massive leak of hydrogen gas in the ship's engine room.

Technicians initially suspected the leak was in an ''interface seal'' where a 17-inch fuel line enters the belly of the orbiter.

If that turns out to be the case, NASA engineers would be forced to haul Columbia back to the Vehicle Assembly Building at the Kennedy Space Center for major repairs, delaying the flight three weeks or so. Launch was already two weeks behind schedule because of earlier problems.

But engineers were hopeful the leak will be easier to fix than at first believed.
